Finding of No Significant Impact

for

Project Number: LCLC-5233(4)
Control Number: 13294

North 33rd and Cornhusker

The Federal Highway Administration (FHWA) has determined that this project will not have any significant impact on the human environment or natural environment. This Finding of No Significant Impact (FONSI) is based on the enclosed Final Environmental Assessment, which has been independently evaluated by FHWA and determined to adequately and accurately discuss the need, environmental issues, and impacts of the proposed project and appropriate mitigation measures. It provides sufficient evidence and analysis for determining that an Environmental Impact Statement is not required. FHWA takes full responsibility for the accuracy, scope, and content of the attached Final Environmental Assessment.

1.0 Introduction

Project Background and Location

A Draft Environmental Assessment (DEA) for the North 33rd and Cornhusker project was prepared in accordance with the National Environmental Policy Act (NEPA), as amended (42 United States Code (U.S.C.) §4321 et seq.), with the Federal Highway Administration (FHWA), in cooperation with the Nebraska Department of Transportation (NDOT) and the City of Lincoln/Lancaster County Railroad Transportation Safety District (RTSD), as the lead federal agency. The environmental review, consultation, and other actions required by applicable federal environmental laws for this project have been carried out by NDOT and executed by FHWA.

Summary of the Draft Environmental Assessment

The DEA was completed and approved by FHWA on May 22, 2024, with a Public Hearing that was held regarding the above referenced project at the Country Inn and Suites Lincoln North in Lincoln, Nebraska on Thursday, September 5, 2024, from 5:00 to 7:00 PM. The Project notice was distributed to 7,836 stakeholders and businesses adjacent to the proposed project area, as well as potentially interested parties. Additionally, 22 public and private agencies with potential interest in the project were also included in the distribution list. A legal notice was published on August 14, 2024, in the *Lincoln Journal Star,* a Nebraska Press Association newspaper and is included in Public Hearing Memo in Appendix A. Temporary highway signs advertising the meeting were placed near the project location. Project information was placed on the City of Lincoln's website. The Public Hearing Report includes the Public Involvement Plan, the various notifications related to the project, a description of the venue, information provided at the hearing, attendance information, official transcripts, and the public comment information. The Public Hearing Report is included in Appendix A.

The DEA was available at the following locations during a 30-day comment period, which began on August 14, 2024, and ended on September 26, 2024:

- **Malone Community Center** 2032 U Street, Lincoln, NE 68503 (temporary location is 4530 A Street, Lincoln, NE 6851033)
- **Center for People** 3901 North 27th Street, Unit 1, Lincoln, NE 68521
- **Victor E. Anderson Branch Library** 3625 Touzalin Ave., Lincoln, NE 68507
- **City of Lincoln - Lincoln Transportation & Utilities** 555 South 10th Street, Suite 208, Lincoln, NE 68508
- **Federal Highway Administration - Nebraska Division Office** Robert V. Denney Federal Building 100 Centennial Mall North, Room 200, Lincoln, NE 68508

- **Nebraska Department of Transportation – Headquarters** 1500 Nebraska Parkway, Lincoln, NE 68509
- **City of Lincoln Website –** An electronic version of the Draft EA was posted on the project website in pdf format at the following location: https://www.lincoln.ne.gov/City/Departments/RTSD/33rd-Cornhusker/Phases

During the 30-day comment period 23 comments were received by the RTSD. No agency comments were received during the review period.

This Final Environmental Assessment (FEA) Errata documents the public comments from the Public Hearing and any other comments received during the 30-day review period of the DEA. The FEA – Errata also documents any changes to the project design or analysis, as described in the DEA, resulting from the comments received.

The purpose of this FEA – Errata is to respond to comments received during the hearing process and to provide additions or changes to the DEA where necessary. This FEA includes:

- Public Involvement Summary
- Revisions to the DEA (Errata)
- A list of environmental commitments and mitigation measures to be implemented by the listed responsible party.
- Public Involvement Report
- Section 4(f) Use Documents

This document, in conjunction with the May 6, 2024, DEA document, and the issuance of the finding of no significant impact (FONSI) by FHWA constitutes the complete NEPA document.

2.0 Comments and Responses Received

Twenty-three public comments were received by the RTSD during the specified comment period (August 14, 2024, to September 26, 2024) outlined below. Written comments received are included in Table 1. Recorded verbal comments from the public hearing are included in Table 2.

Table 1. Written Comments Received During the Public Comment Period (Comments have been summarized. The original comments forms and emails are included in the Public Hearing Report which is included in Appendix A of this Errata document).
Comment 1: **A resident along the corridor stated their concerns for safety and congestion along the railroad crossing at Adams & Cornhusker and on N. 33rd near Cornhusker Highway.**
Response to Comment 1: *The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed **33rd/Cornhusker Viaduct, Lincoln** project.* *The purpose of the proposed project is to improve safety along the rail corridor between N. 27th and N. 48th streets by eliminating or reducing the potential conflict points between trains and other transportation modes (vehicles, pedestrians, and bicyclists).* *The project is needed due to the high volume of vehicular and train traffic in the area along the BNSF rail corridor between N. 27th and N. 48th Streets.* *The proposed project would close both the existing at-grade crossings of 33rd Street and Adams Street with the BNSF railroad tracks. The project would also include a new viaduct over the railroad to allow vehicles, bicycles, and pedestrians to traverse the area without the possibility of being stopped on the tracks.* *Thank you again for your participation!*
Comment 2: **A resident along the corridor asked what the time frame would be for this project and how traffic would be rerouted during construction.**
Response to Comment 2: *The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed **33rd/Cornhusker Viaduct, Lincoln** project.* *The detour routes for traffic will be determined during final design, which is anticipated to begin in 2025. Detour routes typically follow similar or greater roadway classifications. For example, residential roadways would be detoured to other residential roadways or commercial roadways. Arterial roadways would be detoured to other arterial roadways, but not to commercial or residential roadways.* *The project is nearing the completion of the preliminary design and environmental review stages. Final design is anticipated to begin in 2025 with right-of-way acquisition occurring in 2026 and utility relocations occurring in 2027. Construction of the proposed project is anticipated to begin in late 2027 or early 2028 and is expected to take three years to complete.* *Thank you again for your participation!*

Comment 3:
A resident along the corridor was wondering if there was any way to make the east bound right turn lane at 33rd and Cornhusker a right turn only lane. The resident shared personal experiences and concerns about the safety of people due to their account of witnessing a lot of near misses and road rage incidents. They also offered some suggestions on how to improve the intersections prior to construction.

Response to Comment 3:
*The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed **33rd/Cornhusker Viaduct, Lincoln** project.*

The Preferred Alternative eliminates the at-grade crossing of Adams Street and addresses your concern. An interim solution for the eastbound merging movements on Cornhusker Highway east of 33rd Street is not part of the scope of this project. Your comment will be shared with the City of Lincoln Traffic Division for further consideration.

Thank you again for your participation!

Comment 4:
A resident trail user expressed support for the implementation of trails with this project and shared experiences regarding the existing conditions in the areas for pedestrian users crossing the railroad corridor.

They also expressed concerns about the length of the new paths and sidewalks that would be available for pedestrians to cross the railroad corridor and provided suggestions on an alternative pedestrian crossing.

Response to Comment 4:
*The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed **33rd/Cornhusker Viaduct, Lincoln** project.*

The purpose of the proposed project is to improve safety along the rail corridor between N. 27th and N. 48th streets by eliminating or reducing the potential conflict points between trains and other transportation modes (vehicles, pedestrians, and bicyclists).

The Preferred Alternative proposes to completely close the crossings of 33rd Street and Adams Street in order to eliminate the potential for collisions between trains and all other transportation modes.

Currently there are no accommodations for bicyclists or pedestrians at the existing 33rd Street and Adams Street railroad crossings. In the Preferred Alternative, accommodations will be provided for pedestrians and bicyclists with the addition of sidewalks or multi-use paths along the south side of Adams Street and the east side of 33rd Street to avoid pedestrian and bicyclist conflicts with trains. Additionally, a multiuse path would be constructed along the north side of Cornhusker Highway through the project limits.

The project team reviewed multiple alternatives for providing a separate bicycle/pedestrian crossing near Adams Street. Ultimately a solution was not found that would have been both reasonable and feasible. The provided solution along 33rd Street and Adams Street, utilizing the proposed viaduct over the railroad tracks, adds approximately 700 additional feet in length as opposed to a direct route. The proposed grades would be 5 percent or less to comply with the Americans with Disabilities Act (ADA) requirements. *Thank you again for your participation!*
Comment 5: **A resident recommended an alternative to lower the train tracks like it is in Reno Nevada.**
Response to Comment 5: *The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed 33rd/Cornhusker Viaduct, Lincoln project.* *The project team considered several alternatives to cross beneath the railroad tracks. Ultimately any alternatives that went below the tracks were eliminated from further consideration due to the potential flooding concerns based on being below the floodplain and utility conflicts in that area. Another alternative looked at lowering the tracks which was also deemed not feasible due to the long distance needed to make the connections on the north and south sides of the tracks west of Deadmans Run. The Preferred Alternative was chosen based on its alignment with the project's purpose and need, compliance with the selection criteria, and input gathered from the public and stakeholders.* *Thank you again for your participation!*
Comment 6: **A resident expressed concern that the display boards for 33rd Street do not show street trees and recommended that all roadway/streetscape project include trees.**
Response to Comment 6: *The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed* ***33rd/Cornhusker Viaduct, Lincoln*** *project.* *The Cornhusker Highway Corridor Enhancement Plan (CEP) was developed in 2020 as part of the revitalization strategy for the North 33rd and Cornhusker Highway subarea. The CEP provides an overview of how updated lighting, landscaping, pedestrian amenities, and other streetscape enhancements could address the visual enhancements of the Cornhusker Highway corridor from N. 11th to N. 56th streets. The CEP was developed with the consideration of safety, connectivity, economic sustainability, identity and quality of life, and environmental sustainability. Future construction or improvements on Cornhusker Highway would utilize the recommendations from the CEP. The CEP can be found on the city's website, lincoln.ne.gov (search: Cornhusker corridor enhancement).* *The final landscape plan for the proposed project would be determined during final design which is anticipated to begin in 2025.*

Thank you again for your participation!
Comment 7: **An anonymous recommendation was made to use visual keys and slow down the presentation so that everyone can follow. They also identified a spelling error in one of the maps in the brochure.**
Response to Comment 7: *The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed **33rd/Cornhusker Viaduct, Lincoln** project.* *Thank you again for your participation!*
Comment 8: **A business owner in the project corridor agreed that this project is needed and would like to have their property purchased as soon as possible.**
Response to Comment 8 The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project. The right-of-way phase of this project is anticipated to begin in 2026. Early acquisition may be possible in 2025 but would require approval by state and federal authorities due to the use of federal funding for the project. If that approval is received, the City of Lincoln's right-of-way agent will be in contact with you as soon as feasibly possible. Thank you again for your participation!
Comment 9: **A member of the Lincoln Independent Business Association (LIBA) thanks the consultants and project team and commended the quality of the Draft Environmental Assessment. The LIBA is supportive of the project, but they expressed concerns that several of the business owners would be affected by this project due to the reduction of access to their establishments that threatens their ability to remain in business.** **The LIBA is requesting minor alterations to the final design that would maintains the current level of access to the businesses that are adjacent to the project upon completion of construction.**
Response to Comment 9: *The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed **33rd/Cornhusker Viaduct, Lincoln** project.* *We understand your concerns about the impacts to local businesses. The City of Lincoln has adopted an Access Management Policy which provides guidelines for providing reasonable access to individual properties while protecting the effective and safe flow of traffic on the surrounding road*

system. Additionally, Cornhusker Highway is on the National Highway System which is governed by the Nebraska Department of Transportation.

The proposed project is currently designed to follow the guidelines set forth by the Access Management Policy. According to that policy, the City may approve a deviation provided that public health, safety and welfare are not jeopardized, but they may not conflict with applicable State or Federal standards.

Members of the project team would be available to listen to specific concerns from property owners during final design anticipated to begin in 2025.

Thank you again for your participation!

Comment 10:
A business owner in the project corridor stated concerns about the proposed impacts that would occur to their property and asked if a project representative would contact them from additional details.

Response to Comment 10:
The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** *project.*

We understand your concerns about the impacts to your property. A member of the project team will soon reach out to you to discuss the proposed project and to listen to your specific concerns.

Thank you again for your participation!

Comment 11:
A business owner in the project corridor stated concerns about customer access to their property and not being compatible with the current layout of their property. They also made a comment that the access issues will also impact other business owners in the area. The business owner is concerned that the lack of access will impact their future operations, and the project is causing them to delay improvements due to the uncertainty that the project is compatible with the current layout of their business.

This business owner also provided a testimony at the public hearing (Comment #14).

Response to Comment 11:
The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** *project.*

As previously discussed, the City of Lincoln has adopted an Access Management Policy which provides guidelines for providing reasonable access to individual properties while protecting the effective and safe flow of traffic on the surrounding road system. Additionally, Cornhusker Highway is on the National Highway System which is governed by the Nebraska Department of Transportation. The proposed project is currently designed to follow the guidelines set forth by the Access Management Policy. According to that policy, the City may approve a deviation provided that public

health, safety and welfare are not jeopardized, and it may not conflict with applicable State or Federal standards.

The City is currently reviewing the deviation request you sent in via email on July 5, 2024 and looking at potential design modifications that would accommodate your request. This will be further evaluated in final design, and we will follow up with you when that phase of the project is underway, anticipated in 2025.

Thank you again for your participation!

Comment 12:
A business owner in the project corridor made a comment that they were concerned that the project will adversely impact the ability of customers and employees to access the building and would prevent the ability to continue to conduct business.

Response to Comment 12:
*The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed **33rd/Cornhusker Viaduct, Lincoln** project.*

We understand your concerns about the impacts to your property. The City of Lincoln has adopted an Access Management Policy which provides guidelines for providing reasonable access to individual properties while protecting the effective and safe flow of traffic on the surrounding road system. Additionally, Cornhusker Highway is on the National Highway System which is governed by the Nebraska Department of Transportation. The proposed project is currently designed to follow the guidelines set forth by the Access Management Policy. According to that policy, the City may approve a deviation provided that public health, safety and welfare are not jeopardized, and it may not conflict with applicable State or Federal standards. Members of the project team would be in contact with property owners and available to listen to specific concerns during final design. Design modifications to individual property access points would occur during final design, which is anticipated to occur in 2025.

Thank you again for your participation!

Comment 13:
A multiple property owner in the project corridor is concerned about the loss of paved access from North 33rd Street and losing parking for two properties. They are also frustrated with the potential impacts to their properties and timeline of the planning for this project and the Deadmans Run project.

Response to Comment 13:
*The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed **33rd/Cornhusker Viaduct, Lincoln** project.*

You have correctly interpreted the preliminary plans regarding access to these three properties. Due to geometric conditions, direct access to 33rd Street from these properties is not able to be provided in the future. The project proposes to pave Griffith Street between Huntington Avenue and Baldwin Avenue and provide an access driveway from Baldwin Avenue to these properties. Permanent and

temporary easements are anticipated for paving of Griffith Street; however no right-of-way would be acquired. Members of the project team would be in contact with property owners and available to listen to specific concerns during final design. Design modifications to individual property access points would occur during final design, which is anticipated to occur in 2025.

Thank you again for your participation!

Table 2. Comments Recorded on the Hearing Transcripts (Comments have been summarized. The entire transcript can be found in the Public Hearing Report which is included in Appendix A of this Errata document).
Comment 14: **A business owner in the project corridor stated concerns about customer access to their property and the project not being compatible with the current layout of their property. They also made a comment that the access issues will also impact other business owners in the area. The business owner is concerned that the lack of access will impact their future operations, and the project is causing them to delay improvements due to the uncertainty that the project is compatible with the current layout of their business. The property owner requested an access point to their property off of Cornhusker Highway, similar to the existing configuration. They also recommended maintaining access to the adjacent businesses similar to the existing configuration.** ***This business owner also submitted a written comment (Comment #11).***
Response to Comment 14: *The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed **33rd/Cornhusker Viaduct, Lincoln** project.* *As previously discussed, the City of Lincoln has adopted an Access Management Policy which provides guidelines for providing reasonable access to individual properties while protecting the effective and safe flow of traffic on the surrounding road system. Additionally, Cornhusker Highway is on the National Highway System which is governed by the Nebraska Department of Transportation. The proposed project is currently designed to follow the guidelines set forth by the Access Management Policy. According to that policy, the City may approve a deviation provided that public health, safety and welfare are not jeopardized, and it may not conflict with applicable State or Federal standards.* *The City is currently reviewing the deviation request you sent in via email on July 5, 2024 and looking at potential design modifications that would accommodate your request. This will be further evaluated in final design, and we will follow up with you when that phase of the project is underway, anticipated in 2025.* *Thank you again for your participation!*
Comment 15: **A business owner in the project corridor stated concerns about the impacts to their property limiting the ability to maneuver the large vehicles it serves. They also commented that the proposed egress/ingress from Cornhusker Highway to the business is not compatible with large tractor trailers, busses, or the fire trucks that they serve. The business owner is concerned the timeline of the project construction will disrupt their business and create confusion for its customers.**

Response to Comment 15:
*The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed **33rd/Cornhusker Viaduct, Lincoln** project.*

We understand your concerns about the impacts to your business. The City of Lincoln has adopted an Access Management Policy which provides guidelines for providing reasonable access to individual properties while protecting the effective and safe flow of traffic on the surrounding road system. Additionally, Cornhusker Highway is on the National Highway System which is governed by the Nebraska Department of Transportation.

The proposed project is currently designed to follow the guidelines set forth by the Access Management Policy. According to that policy, the City may approve a deviation provided that public health, safety and welfare are not jeopardized, but they may not conflict with applicable State or Federal standards.

The project is nearing the completion of the preliminary design and environmental review stages. Final design is anticipated to begin in 2025 with right-of-way acquisition occurring in 2026 and utility relocations occurring in 2027. Construction of the proposed project is anticipated to begin in late 2027 or early 2028 and is expected to take three years to complete.

Members of the project team would be in contact with property owners and available to listen to specific concerns during final design. Design modifications to individual property access points would occur during final design.

Thank you again for your participation!

Comment 16:
A member of the Lancaster County Board of Commissioners thanked the project team and provided support for the project in regard to improving the railroad safety.

Response to Comment 16:
*The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed **33rd/Cornhusker Viaduct, Lincoln** project.*

Thank you again for your participation!

Comment 17:
A resident that participated in the subarea plan asked about potential for future trail options along Deadmans Run and how it would connect to the project.

Response to Comment 17:
*The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed **33rd/Cornhusker Viaduct, Lincoln** project.*

The 33rd and Cornhusker RTSD project focuses on multimodal transportation in the proposed project area. The Deadmans Run project is a separate project in the area, which the Lower Platte South Natural Resource District (LPSNRD) and the City of Lincoln are actively working on. *The scope for that project has recently been modified and Jared Nelson with the City of Lincoln Watershed Division can provide you with more information regarding the Deadmans Run. Jared can be reached at jnelson@lincoln.ne.gov or 402-441-7018.* *As this proposed project moves into final design, the RTSD would coordinate with the NRD and the City's Watershed Division regarding potential impacts to either project.* *Thank you again for your participation!*
Comment 18: **A local resident provided comments and suggestions on the Deadmans Run project.**
Response to Comment 18: *The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed* ***33rd/Cornhusker Viaduct, Lincoln*** *project.* *The 33rd and Cornhusker RTSD project focuses on multimodal transportation in the proposed project area. The Deadmans Run project is a separate project in the area, which the Lower Platte South Natural Resource District (LPSNRD) and the City of Lincoln are actively working on.* *The scope for that project has recently been modified and Jared Nelson with the City of Lincoln Watershed Division can provide you with more information regarding the Deadmans Run. Comment 19: **A business owner in the project corridor commented that the project does not allow for reasonable access to the adjacent businesses and that the focus on vehicular safety is at the expense of the businesses. They requested some revisions to the final design to allow for greater access to their businesses from Cornhusker Highway.**
Response to Comment 19: *The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed* ***33rd/Cornhusker Viaduct, Lincoln*** *project.* *We understand your concerns about the impacts to your business. The City of Lincoln has adopted an Access Management Policy which provides guidelines for providing reasonable access to individual properties while protecting the effective and safe flow of traffic on the surrounding road*

system. Additionally, Cornhusker Highway is on the National Highway System which is governed by the Nebraska Department of Transportation.

The proposed project is currently designed to follow the guidelines set forth by the Access Management Policy. According to that policy, the City may approve a deviation provided that public health, safety and welfare are not jeopardized, but they may not conflict with applicable State or Federal standards.

Members of the project team would be in contact with property owners and available to listen to specific concerns during final design. Design modifications to individual property access points would occur during final design, which is anticipated to occur in 2025.

Thank you again for your participation!

Comment 20:
A local realtor in Lincoln made a comment about the Deadmans Run project and requested a joint open house style meeting to discuss both projects.

Response to Comment 20:
*The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed **33rd/Cornhusker Viaduct, Lincoln** project.*

The 33rd and Cornhusker RTSD project focuses on multimodal transportation in the proposed project area. The Deadmans Run project is a separate project in the area, which the Lower Platte South Natural Resource District (LPSNRD) and the City of Lincoln are actively working on.
The scope for that project has recently been modified and Jared Nelson with the City of Lincoln Watershed Division can provide you with more information regarding the Deadmans Run. Jared can be reached at jnelson@lincoln.ne.gov or 402-441-7018.

As this proposed project moves into final design, the RTSD would coordinate with the NRD and the City's Watershed Division regarding potential impacts to either project.

Your request for a joint public meeting has been forwarded to Tim and the LPSNRD for consideration.

Thank you again for your participation!

Comment 21:
A resident in the project corridor asked to verify the amount that RTSD receives in taxes from the community and asked for input on how to provide input to the RTSD budget. They also asked about how they project would tie into the other projects in the area and if it was compatible with the infrastructure in other parts of the city. The resident suggested that the project includes north/south transportation improvements for traffic to connect to Superior Street and reduce the possibility for a traffic "bottleneck".

Response to Comment 21:
*The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed **33rd/Cornhusker Viaduct, Lincoln** project.*

The mission by state statute for the Railroad Transportation Safety District (RTSD) is to improve safety and reduce conflicts between trains, pedestrians, bicyclists and bikers and vehicles. Because of this, there is a very limited scope where RTSD dollars can be spent and building a roadway from Cornhusker Highway to Superior Street along 33rd Street would not meet those criteria.

The RTSD collects property tax from everyone in Lancaster County and it's about 1.9 cents per $100 of your valuation on your property.

The RTSD coordinates very closely with the City and the County to make sure anything we build is compatible with their long-range plan. More specifically, the desire for and possible connections for north/south transportation in North Lincoln were addressed in the 33rd and Cornhusker Subarea Plan and are included in the 2050 Long Range Transportation Plan. Both documents can be found on the city's website at lincoln.ne.gov (search "cornhusker subarea" and "LRTP", respectively).

Thank you again for your participation!

Comment 22:

A business owner in the project corridor stated they were concerned about the impacts to their property and the lack of access for customers and services that result from the project. They ask requested to meet with a project member to discuss their concerns in person.

Response to Comment 22:
*The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed **33rd/Cornhusker Viaduct, Lincoln** project.*

We understand your concerns about the impacts to your property. The City of Lincoln has adopted an Access Management Policy which provides guidelines for providing reasonable access to individual properties while protecting the effective and safe flow of traffic on the surrounding road system. The proposed project is currently designed to follow the guidelines set forth by the Access Management Policy. According to that policy, the City may approve a deviation provided that public health, safety and welfare are not jeopardized, and it may not conflict with applicable State or Federal standards.

Members of the project team would be in contact with property owners and available to listen to specific concerns during final design. Design modifications to individual property access points would occur during final design, which is anticipated to occur in 2025.

Thank you again for your participation!

Comment 23:
A business owner in the project corridor stated they were concerned that the project will remove one of their two access points to Cornhusker Highway and that by doing so would create issues for their business.

Response to Comment 23:

*The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed **33rd/Cornhusker Viaduct, Lincoln** project.*

We understand your concerns about the impacts to your property. The City of Lincoln has adopted an Access Management Policy which provides guidelines for providing reasonable access to individual properties while protecting the effective and safe flow of traffic on the surrounding road system. The proposed project is currently designed to follow the guidelines set forth by the Access Management Policy. According to that policy, the City may approve a deviation provided that public health, safety and welfare are not jeopardized, and it may not conflict with applicable State or Federal standards.

Members of the project team would be in contact with property owners and available to listen to specific concerns during final design. Design modifications to individual property access points would occur during final design, which is anticipated to occur in 2025.

Thank you again for your participation!

3.0 Universal Changes to the Draft Environmental Assessment

The following changes are made universally to the DEA text.

- Reference to the "Proposed Alternative" or "Preferred Alternative" is changed to the "Selected Alternative".
- Reference to the "USACE Deadmans" is changed to "Deadmans Run"
- All references to Environmental Justice (EJ), Title VI, and minority and low income are removed.

4.0 Changes to the Draft Environmental Assessment by Section

Changes to each section are in response to public comments or changes to the project or information since initial publication of the DEA on August 14, 2024. Newly added material is shown by underlining, while deleted material is shown by ~~strikethrough~~. Explanatory notes or comments are included in *italics*. These changes are provided below.

Figure 2 is revised to display the current railroad alignments and match the display at the public hearing. The revisions to Figure 2 are included in Section 4.1 below.

The second to last sentence in the first paragraph is revised for grammatical errors in Section 2.2:
Transportation improvements in northern Lincoln are needed due to the high volume of vehicular and train traffic in the area along the BNSF rail corridor between N. 27th and N. 48th Streets. While N. 27th and N. 48th Streets provide grade-separated crossings of the rail corridor, there are three at-grade crossings within the 1.8-mile-long corridor: N. 33rd Street, Adams Street, and N. 44th Street. High volumes of vehicular and train traffic create undesirable conditions regarding safety, traffic congestion, traffic delay, and mobility within the Project Environmental Study Area (ESA), which is bounded by N. 27th, Superior, N. 48th, and Holdrege Streets (Figure 3). A full description and definition of the Project ESA is provided in Section 4.1. In addition, facilities for walking, cycling, and public transit do not meet existing, or future (2040) needs for the area~~. Based~~ based on the Needs Assessment Report for the PEL study. Since the completion of the PEL, the needs remain valid. The needs are supported as follows:

The third bullet item is removed from Section 2.2.2 because the Hansen-Mueller grain elevator is slated to be demolished in 2025:

- ~~The Hansen-Mueller grain elevator on the south side of Cornhusker Highway between State Fair Park Drive and Deadmans Run.~~

North 48th Street is revised to Adams Street in Section 2.2.3 – Mobility, Page 16, Second Paragraph:

The frequency and duration of train blockages from when gates were lowering as a train was approaching to when the gates were lifting were reviewed in May 2015. From this review, it was estimated that over a typical 24-hour period, the crossings are blocked for approximately 3.6 hours of the day, or 15 percent of a 24-hour period. This level of delay likely causes many drivers to adjust their travel patterns and seek alternate routes. Alternative routes can become congested during train blockages which contribute to mobility limitations for all vehicular traffic along the railroad corridor in northeast Lincoln. Train blockages and delays limit the ability of public transportation such as StarTran and emergency services to serve areas adjacent to the crossings, adding to mobility and access limitations for populations located in northeast Lincoln. Currently there is no pedestrian or bicycle infrastructure (sidewalks, trails) at the railroad crossing on North 33rd Street or ~~North 48thStreet~~ Adams Street which limits alternative transportation mobility.

The reference to Figure 2 in the third paragraph of Section 2.2.3 is removed due to an inaccurate reference on the map:

City, County, and State leaders have aggressively pursued construction of grade separations and at-grade crossing closures along the rail corridor in northern Lincoln~~, as depicted on Figure 2.~~

The first paragraph of Section 2.2.4 is revised to match the figure that was updated with 2025 bus route data:

StarTran provides regular bus service on several routes within or immediately adjacent to the Project ESA. Route ~~41~~ 27, 41, and 48, which ~~is~~ are the only three ~~route~~ routes that cross~~es~~ the rail corridor in the area, use~~s~~ the N. 48th Street underpass and the N. 27th Street overpass to avoid unpredictable travel times and delays due to train blockages at the N. 33rd Street and Adams Street railroad crossings. StarTran has completed and adopted a Transit Development Plan (TDP) which evaluated alternatives for improving service and operations on the system. The preliminary results showed a relatively high “propensity” for transit in the residential area southeast of N. 33rd Street and Adams Street. One of the alternate plans evaluated included service along Adams Street between N. 20th Street and N. 84th Street. That route plan was not selected due to the uncertainty of travel times crossing the BNSF rail corridor. The StarTran routes shown in Figure 7 were implemented in ~~May 2021~~ January 2025.

Figure 7 is revised to match the text in Paragraph 2.2.4 showing updated 2025 Star Tran routes. The revisions to Figure 7 are included in Section 4.1 of the errata below.

The first paragraph of Section 3.0 is revised to include a statement regarding the Executive Order (E.O.) 14154 and E.O. 14173 rescissions:

This section describes the process used to develop and screen alternatives to address the purpose and need for the Project. Please note, as a result of Executive Orders (E.O.) 14154 and 14173, all federal environmental justice requirements are revoked and no longer applicable to the

environmental review. Although information on Environmental Justice, minority, and low-income populations was included in resource studies, planning studies, and public involvements activities in preparation of the DEA prior to the issuance of Executive Order (E.O.) 14154 and E.O. 14173, the data was not a deciding factor in the selection of alternatives through the screening process.

The eighth main bullet point and associated sub-bulleted list in Section 3.4.2 is revised as follows due to the E.O. 14154 and E.O. 14173 rescissions:

- Avoid/minimize direct and indirect impacts to environmental resources
  - Floodways and floodplains
  - Parks and recreation areas
  - Historic resources
  - Sites with hazardous materials risk
  - Wetlands and Waters of the U.S.
  - Sensitive, threatened, and endangered species
  - ~~Minority and low-income populations~~

The third full paragraph and associated bulleted list in Section 3.5 is revised as follows due to the E.O. 14154 and E.O. 14173 rescissions:

Subsequent to the Tier 0 and Tier 1 screening, additional evaluation was completed for Alternative 1D, Alternative 1E, and Alternative Modified PEL C. As part of the additional evaluation process, the RTSD held a public meeting and comment period in June 2019, completed a traffic study, completed the benefit cost analysis, and refined environmental impact estimates. Based on these additional data analyses, the following issues were identified regarding Alternative 1D:

- Vocal public opposition. Approximately 72 percent (118 of 162) of the public comments received were in support of not impacting Virginia's Café, which would be acquired and relocated as part of Alternative 1D. This information is summarized in the Public Meeting Report (Olsson 2019b).
- Large number (12) of full commercial acquisitions.
- Large~~st~~ number of residential acquisitions. ~~in a low-income neighborhood south of the railroad tracks, with potential for additional low-income impacts as further information about long-term motel rooms at Virginia's Café and Lincoln Tent and Awning was gathered through the public involvement process.~~
- Relatively total high cost ($101.4 million) compared to other reasonable alternatives.

Table 3.3 in Section 3.5 is revised as follows due to the E.O. 14154 and E.O. 14173 rescissions:

Table 3.3 Tier 1 Alternatives Reasonable Screening Summary

Alternative	Carried Forward to Tier 2 Screening
1D	**Eliminated** because of public objection, 12 full commercial acquisitions, large number of residential acquisitions~~, potential for impacts to low income populations~~, and a relatively total high cost of $101.4 million (2019).
1E	**Retained** because it would provide a direct connection of N. 33rd Street to Cornhusker Highway with a traditional intersection configuration familiar to local commuters and provides a connection for Adams Street over the railroad tracks. Alternative E meets the cost benefit analysis and is retained.
12B	**Eliminated** because the cost of $145.8 million (2019) was determined to be unreasonable and there is not sufficient RTSD funding to complete this alternative.
14	**Eliminated** because the cost $165.3 million (2019) was determined to be unreasonable and there is not sufficient RTSD funding to complete this alternative
15A	**Eliminated** because the cost $176.1 million (2019) was determined to be unreasonable and there is not sufficient RTSD funding to complete this alternative
Modified PEL C	**Retained** because it would provide a direct connection of N. 33rd Street to Cornhusker Highway with a traditional intersection configuration familiar to local commuters and provides a connection for Adams Street over the railroad tracks. The Modified PEL C meets the cost benefit analysis and is retained.
No-Action	**Retained** as a baseline to compare alternatives for evaluation and environmental analysis purposes.

The fourth main bullet point and associated sub-bulleted list in Section 3.6 is revised as follows due to the E.O. 14154 and E.O. 14173 rescissions:

- Community and Environmental Resource Benefits and Impacts
  - Does the alternative avoid/minimize direct and indirect impacts to community resources?
    - Acquisition of residential and business properties (partial or full)
    - Business and resident displacements
    - Neighborhood integrity and cohesion
  - Does the alternative avoid/minimize direct and indirect impacts to environmental resources?

- Floodways and floodplains
- Parks and recreation areas
- Historic resources
- Sites with hazardous materials risk
- Wetlands and Waters of the U.S.
- Sensitive, threatened, and endangered species
- ~~Minority and low-income populations~~

Table 3.5 is revised due to E.O. 14154 and E.O. 14173 rescissions and references to Environmental Justice are removed:

Table 3.5 Tier 2 Screening Detailed Analysis

Purpose and Need and other Basic Requirements		Alternative 1E	Alternative Modified PEL C
Screening Criteria	**Goal**		
Does the Alternative minimize potential capital investment cost?	Minimize capital costs for construction, design, acquisition of property for ROW, utility relocations, etc.	Total Project Cost: $109.8 million [1#]	Total Project Cost: $89.1 million [1#]
Does the Alternative minimize long-term operations and maintenance costs?	Length of roadways, bridge structures, retaining walls, and traffic signals	Estimated 30-Year Maintenance Cost: $27.5 Million [2#]	Estimated 30-Year Maintenance Cost: $21.5 Million [2#]
Does the Alternative maximize Benefit (reduced crashes, travel time and delay) to Cost Ratio?	Maximize benefit cost ratio	Benefit to Cost Ratio: 0.88	Benefit to Cost Ratio: 1.09
Does the Alternative minimize impacts to wetlands and Waters of the US (WOUS)?	<0.5 acres of wetlands or 300 feet of channel	No permanent impacts are anticipated to wetlands or streams based on review of mapping and aerial imagery; limited ground-truthing; and the assumption that all WOUS crossings will span jurisdictional waters. Delineations will be conducted for the final alternatives during future phases of the Project to confirm. Temporary channel impacts are anticipated during construction. No anticipated channel reconstruction.	No permanent impacts are anticipated to wetlands or streams based on review of mapping and aerial imagery; limited ground-truthing; and the assumption that all WOUS crossings will span jurisdictional waters. Delineations will be conducted for the final alternatives during future phases of the Project to confirm. Temporary channel impacts are anticipated during construction. No anticipated channel reconstruction.
Does the Alternative avoid/minimize direct and indirect impacts to community resources?	Avoid/minimize direct and indirect residential and business impacts and business and resident displacements (number of properties impacted, acreage of property potentially acquired, number of potential business and resident displacements, number of property access modifications); maintain neighborhood integrity and cohesion; and maintain compatibility with existing and future local land use	Acquisitions [3] Residential Full: 1 (0.12 acre) / Residential Partial: 12 Commercial Full: 13 (20.70 acres) / Commercial Partial: 50 Other Full: 5 (1.02 acres) / Other Partial: 14 Impact on neighborhood integrity and cohesion (qualitative): New Adams Street	Acquisitions [3] Residential Full: 2 (0.28 acre) / Residential Partial: 5 Commercial Full: 15 (9.0 acres) / Commercial Partial: 47 Other Full: 5 (1.02 acres) / Other Partial: 11 Impact on neighborhood integrity and cohesion (qualitative): minimal

Purpose and Need and other Basic Requirements		Alternative 1E	Alternative Modified PEL C
Screening Criteria	**Goal**		
		alignment would bisect existing commercial properties Compatibility with existing and future local land use (qualitative): Minimal impact	Compatibility with existing and future local land use (qualitative): Minimal impact
Does the Alternative avoid/minimize direct and indirect impacts to environmental resources?	Avoid/minimize impacts to floodways and floodplains (square feet/acres); parks and recreation areas (temporary use during construction and permanent conversion to a transportation use); historic resources (sites eligible for the National Register of Historic Places); sites with hazardous materials risk; sensitive, threatened, and endangered species (square feet/acres of potential habitat); ~~minority and low-income populations (direct and indirect impacts to community facilities).~~	**Potential Impacts Section 4(f) and 6(f) Resources:** parks: 0.10 acre; trails: approx. 2,130 feet shifted as road widens, approx. 6,400 feet additional new trails; schools: 0 **Section 106 Resources immediately adjacent to Project alignment:** historic properties (known): 0 ; (potential): 5 **Section 404 Resources:** wetland (acres): 0 ; NHD Stream Crossings: 2 **Section 7 Resources: endangered species impacts:** none ~~**EJ & Civil Rights:** Likelihood that the Project would impact an EJ Population*: Low~~ **Alternative compliments US Army Corps of Engineers (USACE) Section 205 Alternatives for Deadmans Run:** Yes	**Potential Impacts Section 4(f) and 6(f) Resources:** parks: 0.09 acre ; trails: approx. 1,440 feet shifted as road widens, approx. 5,695 feet additional new multi-use paths; schools: 0 **Section 106 Resources immediately adjacent to Project alignment:** historic properties (known): 0 ; (potential): 5 **Section 404 Resources: wetland (acres):** 0 ; NHD Stream Crossings: 2 **Section 7 Resources: endangered species impacts:** none ~~**EJ & Civil Rights:** Likelihood that the Project would impact an EJ Population*: Low~~ **Alternative compliments USACE Section 205 Alternatives for Deadmans Run:** Yes
Does the Alternative Meet the Purpose and Need?		Yes	Yes

[1] Cost estimate dated 05/14/2019
[2] Maintenance calculation dated 06/20/2019
[3] ROW impacts calculated from information used to gather cost estimate dated 05/14/2019. Data is consistent with that presented to the public at the June 27, 2019, open house for Alternatives 1B, 1D, 1E, Modified PEL C
Cost Estimates shown as Future Year of Expenditures Dollars
* Low is defined as a full acquisition of 2 or less residential properties, High is defined as full acquisition of more than 2 residential properties

The first paragraph following the "North 44th Street Crossing" heading in Section 3.7 is revised for grammar and consistency:

The initial Preliminary ~~Preferred~~ Selected Alternative presented to the public in 2019 included the proposal to close the at grade crossing at N. 44th Street to vehicular traffic and ~~providing~~ provided a grade separation for pedestrians at N. 44th Street. Comments received as a result of public and stakeholder meetings did not indicate a consensus solution regarding pedestrian access options at N. 44th Street. Comments included multiple perspectives, with some indicating a lack of support for an overpass structure and some indicating concern for closing the N. 44th Street crossing without maintaining pedestrian access. Adjacent landowners were generally not supportive of a pedestrian overpass adjacent to their properties. Neighborhood representatives wanted to maintain pedestrian access with either an at-grade crossing or pedestrian overpass. Neighborhood representatives were not supportive of options that would divert pedestrians away from N. 44th Street (e.g., to N. 48th Street). During this public involvement process, minimal concerns were raised regarding closing the existing at-grade crossing assuming pedestrian access at N. 44th Street remained available.

The last paragraph in the "North 44th Street Crossing" discussion in Section 3.7 is revised for grammar and consistency:

Based on the lack of support from the public engagement process and design constraints, the RTSD removed the pedestrian grade separation from the Project and determined the N. 44th Street crossing would remain open to traffic and pedestrians. There would be no improvements to the at-grade traffic crossing at ~~N. 44th~~ N. 44th Street. The N. 44th Street pedestrian crossing would be improved to meet current ADA standards and provide a consistent, accessible crossing for non-vehicular traffic.

The third to last paragraph of Section 3.8.1 is revised for typographic errors:

The project would include sidewalk and curb ramp improvements to meet ADA guidelines at the intersection of N. 29th Street and Cornhusker Highway. A traffic signal at N. 29th Street and Cornhusker Highway would be upgraded due to the addition of another westbound left turn lane and westbound outside through lane. A traffic signal~~s~~ would be added to N. 31st Street and Cornhusker Highway and the traffic signal at N. 35th Street and Cornhusker Highway would be reconstructed.

The first paragraph of Section 3.8.3 is updated to reflect current events:

Funding for the design and ROW for the Project is currently scheduled for Fiscal Year ~~2022~~ 2024 through 2026 with construction funding beginning in Fiscal Year 2027 in the Lincoln MPO TIP (Lincoln MPO 2023). Final design would be completed by 2026. Construction is anticipated to begin in 2027 with a three-year construction duration.

A paragraph is added to the end of Section 3.8.3 to include additional funding awarded to the project:

On January 14th, 2025, the project was awarded up to $66,706,880 from the Federal Railroad Administration Rail Crossing Elimination Grant.

The links in Section 4.1.1 are updated:

- Platte River Depletions and Borrow are not evaluated because the Project is not located within the Platte River Recovery Implementation Program area and would not deplete flows to the Platte River. (Reviewed resources: ~~https://platteriverprogram.org/map and https://platteriverprogram.org/about/program-details)~~ https://platteriverprogram.org/about/program-components)
- Wild and Scenic Rivers were eliminated from further study because the Project ESA includes no Wild and Scenic Rivers or National Rivers Inventory rivers. (Reviewed resource: ~~https://www.rivers.gov/mapping-gis.php)~~ https://www.rivers.gov/map)

The "USACE Deadmans Run Project" discussion in Section 4.2.1 is revised to summarize updates to the Deadmans Run project:

~~USACE~~ Deadmans Run Project

Within the Project ESA, the U.S. Army Corps of Engineers (USACE) identified the need to consider a feasibility study along the Deadmans Run channel from its confluence with Salt Creek, at Cornhusker Highway, and extending upstream along Deadmans Run to approximately N. 48th Street. Deadmans Run is almost completely urbanized and has contributed to numerous past flood events in that area of Lincoln. Due to the high density of residential and commercial properties within the Deadmans Run floodplain, and the previous history of flooding, the USACE evaluated the feasibility of three action alternatives to reduce the flood risk from Deadmans Run.

After several years of study by the USACE and unforeseen events like record flooding, a global pandemic, and economic factors that included rising material costs and interest rates, the Lower Platte South Natural Resources District (LPSNRD) hired a consultant to complete a value engineering study for the project. This study revealed a possible savings of nearly $35 million utilizing several unique design options.

As a result of the value engineering study, the City of Lincoln and the LPSNRD have agreed to move forward without USACE fiscal support. The City and LPSNRD will fund the project by splitting costs evenly, redesigning the project while maintaining the same project benefits. The project is proposed to include detention basins at viable locations as well as widening of the channel in certain locations between Cornhusker Highway and 48th Street. A new bridge structure for N. 33rd Street over Deadmans Run remains part of the overall solution.

~~The USACE Deadmans Run project includes widening the channel and replacing the existing concrete mat and gabions with rip-rap to mitigate erosion of the streambed. Above the rip-rap, a channel bench would be installed on one bank to allow for the planting of native grass and~~

~~vegetation, as well as to provide additional flow capacity within the channel cross-section. The channel banks would then be cut back to allow for a 3:1, horizontal-to-vertical slope to be installed from the channel bench, or rip-rap depending upon the bank, to the surrounding existing grade. The Preferred Alternative would require the replacement of several bridge sized structures along Deadmans Run, including removal of the existing box culvert at N. 33rd Street. The existing box culvert would be replaced with a new bridge structure spanning Deadmans Run.~~

Due to the extent of the Project and the location of the new N. 33rd Street bridge over Deadmans Run, the City of Lincoln and RTSD determined the new N. 33rd Street bridge would be best served if built as a part of the North 33rd and Cornhusker project. The Deadmans Run project is anticipated to be completed prior to the construction of the N. 33rd and Cornhusker Highway transportation project.

The first paragraph of Section 4.2.4 is revised for grammar and consistency:
The end of the nearest runway at Lincoln Municipal Airport (Runway 35) is approximately 3.75 miles to the closest point of the Project. Due to the proximity ~~to~~ of the Lincoln Municipal Airport to the Project, the height of any equipment used in the construction of the project (or any antennae installed on the equipment) shall not exceed the local airport's Height Restriction Zoning. Any Contractor involved in the project shall use the Notice Criteria Tool available at https://oeaaa.faa.gov/oeaaa/external/portal.jsp. (Contractor)

The last paragraph of Section 4.3.3 is revised to update the Deadmans Run project:
The potential property impacts associated with the ~~Preferred~~ Selected Alternative are provided in Table 4.1. These impacts are also illustrated in Figures 13a-13e. Each property tract has a numerical identifier (shown in the left-hand column of Table 4.1) that corresponds to its location on Figures 13a-13e. Full Acquisition is defined as the potential purchase of a property and, if applicable, the relocation of the existing residence or business. Impacted Property is defined as the potential purchase of some ROW, Temporary and/or Permanent Easement on a property while maintaining existing use of the property. Coordination with ~~USACE~~ the City of Lincoln and the LPSNRD would be completed prior to ROW acquisitions to avoid conflicts with the ~~USACE~~ Deadmans Run project.

The last paragraph of Section 4.3.4 is revised to update the Deadmans Run project:
Coordination with ~~USACE~~ the City of Lincoln and the LPSNRD would be completed prior to ROW acquisitions to avoid conflicts with the ~~USACE~~ Deadmans Run project. (Project Sponsor)

Due to E.O. 14154 and E.O. 14173 rescissions, all of Section 4.4 is removed from the DEA:

4.4 Title VI/Environmental Justice (Resource Removed)
In compliance with recently enacted executive orders, the EA has been revised. On January 20, 2025, President Trump signed Executive Order (E.O.) 14154 – Unleashing American Energy. The E.O. revoked E.O. 14096 – Revitalizing Our Nation's Commitment to Environmental Justice for All (April 21, 2023). Subsequently on January 21, 2025, President Trump signed E.O. 14173 –

Ending Illegal Discrimination and Restoring Merit-Based Opportunity. This E.O. revoked E.O. 12898 – Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations (February 11, 1994). As a result of E.O. 14154 and 14173, all federal environmental justice requirements are revoked and no longer applicable to the environmental review process. DEA Section 4.4 Title VI/Environmental Justice is removed in its entirety from the DEA. This includes all Section 4.4 subsections, associated tables (Table 4.2, 4.3, 4.4, and 4.5), and associated figures (Figure 14a, 14b, and 14c).

Figure 15b is revised for typographic errors in Section 4.8.1 of the DEA. Revisions to Figure 15b are included in Section 4.1 of this errata below.

The third paragraph under the "Fleming Fields Recreation Sports Park" heading in Section 4.8.3 is revised to update the Section 4(f) Use documentation:

~~Final concurrence with the Official with Jurisdiction (OWJ) will be sought after the Public Hearing regarding the impacts to Fleming Fields Recreation and Sports Park. Prior disclosure to the public is required to complete the 4(f) review.~~

Final concurrence with the Official with Jurisdiction (OWJ) was obtained on January 24, 2025, regarding the impacts to Fleming Fields Recreation and Sports Park. Impacts to Fleming Fields Recreation and Sports Park were disclosed to the public during the Public Hearing for this project on September 5th, 2024. No comments were received during the comment period concerning Fleming Field.

Fleming Fields Recreation and Sports Park is federally protected by Section 6(f) of the LWCF. Coordination with Nebraska Game and Parks Commission (NGPC) on August 26, 2022, confirmed the permanent easements required for the underground utilities at the property would not trigger a change in ownership, nor a conversion of property use, if returned to the original condition within 12 months of construction.

The second paragraph under the "34th and Madison Park" heading in Section 4.8.3 is revised to update the Section 4(f) Use documentation:

~~Final concurrence with the OWJ will be sought after the Public Hearing regarding the impacts to 34th and Madison Park. Prior disclosure to the public is required to complete the 4(f) review.~~

Final concurrence with the OWJ was obtained on January 24, 2025, regarding the impacts to 34th and Madison Park. Impacts to 34th and Madison Park were disclosed to the public during the Public Hearing for this project on September 5th, 2024. No comments were received during the comment period concerning 34th and Madison Park.

The fifth paragraph under the "Dietrich Trail" heading in Section 4.8.3 is revised to update the Section 4(f) Use documentation:

~~Final concurrence with the OWJ will be sought after the Public Hearing regarding the impacts to Dietrich Trail. Prior disclosure to the public is required to complete the 4(f) review.~~

Final concurrence with the OWJ was obtained on January 24, 2025, regarding the impacts to Dietrich Trail. Impacts to Dietrich Trail were disclosed to the public during the Public Hearing for this project on September 5th, 2024. No comments were received during the comment period concerning the Dietrich Trail.

The fourth paragraph under the "Huntington Trail" heading in Section 4.8.3 is revised to update the Section 4(f) Use documentation:

~~Final concurrence with the OWJ will be sought after the Public Hearing regarding the impacts to Huntington Trail. Prior disclosure to the public is required to complete the 4(f) review.~~

Final concurrence with the OWJ was obtained on January 24, 2025, regarding the impacts to Huntington Trail. Impacts to Huntington Trail were disclosed to the public during the Public Hearing for this project on September 5th, 2024. No comments were received during the comment period concerning the Huntington Trail.

The fifth paragraph under the "33rd Street Trail" heading in Section 4.8.3 is revised to update the Section 4(f) Use documentation:

~~Final concurrence with the OWJ will be sought after the Public Hearing regarding the impacts to 33rd Street Trail. Prior disclosure to the public is required to complete the 4(f) review.~~

Final concurrence with the OWJ was obtained on January 27, 2025, regarding the impacts to 33rd Street Trail. Impacts to 33rd Street Trail were disclosed to the public during the Public Hearing for this project on September 5th, 2024. No comments were received during the comment period concerning the 33rd Street Trail.

The fifth paragraph under the "45th and Gladstone Park" heading in Section 4.8.3 is revised to update the Section 4(f) Use documentation:

~~Coordination with the OWJ, Director of Lincoln Parks and Recreation, has occurred throughout the NEPA process. Through preliminary OWJ coordination, the temporary impacts at 45th and Gladstone Park would be considered a Section 4(f) Temporary Occupancy. 45th and Gladstone Parks is protected by LWCF Section 6(f). No replacement property would be required due to the lack of permanent impacts at this location. Final concurrence with the OWJ will be sought after the Public Hearing regarding the impacts to 45th and Gladstone Park. Prior disclosure to the public is required to complete the 4(f) review.~~

Coordination with the OWJ has occurred throughout the NEPA process. Through initial OWJ coordination it was determined the temporary impacts at 45th and Gladstone Park would be considered a Section 4(f) Temporary Occupancy. 45th and Gladstone Park is protected by LWCF Section 6(f). No replacement property would be required due to the lack of permanent impacts at this location. Final concurrence with the OWJ was obtained on January 24, 2025, regarding the impacts to 45th and Gladstone Park. Impacts to 45th and Gladstone Park were disclosed to the

public during the Public Hearing for this project on September 5th, 2024. No comments were received during the comment period concerning the 45th and Gladstone Park.

The third paragraph in Section 4.8.4 is revised for typographic errors:

Trail continuity would be maintained at all times during construction via detour. A temporary surface would be constructed to provide a trail detour for the following locations: ~~Dietric~~ Dietrich Trail, ~~Hunting~~ Huntington Trail, and 33rd Street Trail. (Contractor)

A mitigation commitment is added to Section 4.8.4 from OWJ Coordination:

Advanced warning to notify trail users and drivers of the trail crossing would be required at the new crossing on Griffith Street and Huntington Avenue. Pavement markings and additional signage would be added for pedestrian safety for 33rd Street Trail, John Dietrich Trail, and Huntington Trail. (Project Sponsor, Contractor)

The first paragraph of Section 4.10.3 is revised to update the Deadmans Run project:
Preliminary design indicates the ~~Preferred~~ Selected Alternative would have no permanent impacts to channels. Temporary impacts of less than 536 linear feet (0.3150 ac) to Deadmans Run are anticipated due to proposed contractor access crossings or work platforms for the 33rd Street bridge construction and the construction of new storm sewer pipes in the area. The outlets to the storm sewer pipes ~~would be constructed by the USACE project~~ may be constructed by the Deadmans Run project. The removal of the culvert at N. 33rd Street is part of the ~~USACE~~ Deadmans Run project and the replacement of a bridge on N. 33rd Street would be part of the ~~Preferred~~ Selected Alternative. Although removing the culvert and adding the bridge over Deadmans Run would be considered an impact, the culvert removal is associated with the ~~USACE~~ Deadmans Run project and is considered an overall improvement to Deadmans Run.

The first paragraph on Section 4.13.3 is revised to remove an indentation in the paragraph:
The Biological assessment was reviewed by the NGPC and the USFWS; both agencies concurred with the findings that the project would result in a “May Affect, Not Likely to Adversely Affect” determination for the eastern black rail. The project would have no effect to all other state and federally listed species. NGPC concurrence was received on October 3, 2022, and USFWS concurrence was received on October 19, 2022. The Biological Assessment was re-evaluated on December 21, 2023, due to changes in the NDOT programmatic agreement threatened and endangered species with FHWA, NGPC, and USFWS. The Biological Assessment PQS Memo and re-evaluation is included in Appendix G.

The last paragraph of Section 4.14.1 is revised to update the Deadmans Run project:
The ~~USACE~~ Deadmans Run project, currently in the detailed study and design phase, is a joint effort by the City of Lincoln~~,~~ and the Lower Platte South NRD~~, and the USACE~~. The ~~USACE~~ Deadmans Run project would result in improvements to the Deadmans Run channel and bridges that would lower the Deadmans Run flood elevations and reduce the floodplain extents. At N. 33rd Street, backwater from Salt Creek still causes flooding in the overbanks of Deadmans Run.

Upstream of N. 33rd Street, at the limits of the Salt Creek backwater, the regulatory floodplain would be confined to Deadmans Run in most locations. Construction of the proposed ~~USACE~~ Deadmans Run Project is anticipated in ~~2025~~ 2026 and would remove a significant portion of floodplain associated with Deadmans Run from the Project ESA.

The fourth paragraph in Section 4.15.1 is revised for typographic errors:

Other consulting parties that were contacted for review and comment regarding historic property identification and evaluation include City of Lincoln Parks and Recreation, National Park Service, and NGPC. Consultation letters to each of the respective parties above were sent out on February 7, 2023. The City of Lincoln concurred with the findings of "no historic properties affected" on February 10, 2023. The National Park Service indicated on February 23, 2023, that the agency does not hold any land interest ~~In~~ in the APE areas and therefore has no comment or concern. To date, NGPC has not responded to the initial consultation letter, but has been involved with the Section 4(f) aspect and is aware of the project. NDOT recommended a project effects determination of "no historic properties affected" and FHWA concurred upon this determination on November 16, 2022. In order to consider effects to historic properties as a result of the development of a Section 6(f) mitigation site, which is located at Wilderness Hills Park, near Castle Pine Drive and Tree Line Drive in Lincoln, Lancaster County, Nebraska, a Section 106 Supplemental Evaluation was completed in February 2023. During this supplemental evaluation, the APE was expanded, and identification and evaluation of historic properties was completed. No historic properties were identified within the supplemental APE and NDOT recommended to FHWA that the project effects determination of "no historic properties affected" remained appropriate. FHWA concurred with this determination on February 3, 2023. Documentation with the other consulting agencies is included in Appendix I. The location of the supplemental APE is shown on Figure 18b.

The fifth paragraph in Section 4.16.4 is revised for typographic errors:

If contaminated soils/groundwater or unexpected wastes are discovered, The Contractor shall stop all work within the immediate area. The Contractor shall secure the area of the discovery and notify the ~~RSTD~~ RTSD Representative. The Contractor shall not re-enter the discovery area until notified by the RTSD Representative. At the time of discovery, the RTSD Representative and Contractor shall utilize the Unexpected Waste Action Plan (UWAP) to coordinate appropriate actions. The actions to be carried out by the RTSD Representative are (but not limited to): verification that the Contractor has suspended construction activities in the area of the discovery, contact the RTSD Representative and shall then utilize the UWAP Notification Form (NDOT Form 691) to properly document the extent and type of waste. The RTSD Representative will ensure that proper disposal of the waste and any required health and safety mitigation is implemented by the Contractor. The Contractor is required by NDOT's Standard Specification section 107.11 (Hazardous Material Discoveries) to handle and dispose of regulated material in accordance with applicable laws. (Project Sponsor, NDOT Environmental, Contractor)

The eighth and tenth paragraphs in Section 4.16.4 are revised to update the website links:

The Contractor shall survey structures(s) on buildings to be demolished for the presence of asbestos containing materials (ACM). The inspector must be certified in accordance with the Nebraska Department of Health and Human Services (DHHS) Nebraska Asbestos Control Program Regulations, Title 178. A list of Licensed Asbestos Inspectors can be found at ~~http://dhhs.me/gov/Pages/Asbestos.aspx~~. https://dhhs.ne.gov/Pages/Asbestos.aspx Documentation of the survey shall be provided to the RTSD Representative by the contractor prior to structure demolition. (Contractor)

Removal and disposal of ACM shall be in accordance with the Nebraska Department of Health and Human Services (DHHS) Nebraska Asbestos Control Program Regulations, Title 178. The Contractor shall develop a removal and disposal plan in coordination with a licensed asbestos removal contractor and NDOT. The Contractor shall contact DHHS no later than 10 business days prior to removal of the ACM for guidelines on disposal. If the asbestos cannot be kept in a non-friable condition upon removal, the Contractor shall use a licensed asbestos removal contractor. A list of licensed asbestos removal contractors can be found at: ~~http://dhhs.me/gov/Pages/Asbestos.aspx.~~ https://dhhs.ne.gov/Pages/Asbestos.aspx . ACM shall be disposed of at a landfill approved for handling asbestos. The Contractor shall provide landfill receipts to the RTSD Representative within 10 working days of disposal. (Contractor, Project Sponsor)

The second paragraph under the "N. 33rd Street and Huntington Avenue Intersections", "Phase 2" heading of Section 4.17.3 is revised to update the Deadmans Run project:
Construction of the east and north legs of the roundabout would be staggered to maintain access to the apartment complex at the northeast corner of the intersection. Northbound traffic on N. 33rd Street from the newly constructed roundabout would potentially be detoured until the completion of N. 33rd Street, assuming the existing box culvert and roadway has been removed as part of the ~~USACE~~ Deadmans Run project. If the ~~USACE~~ Deadmans Run project has not removed the existing box culvert at this point, temporary pavement could be constructed to allow north/south traffic on N. 33rd Street. Further coordination would be needed between the RTSD project and ~~the USACE~~ the City of Lincoln to determine when the existing box culvert under N. 33rd Street would be removed. See Figure 20b.

The tenth paragraph in Section 4.17.4 is revised to update the Deadmans Run project:

Additional coordination would be needed between the RTSD project and the ~~USACE~~ City of Lincoln to determine when the existing box culvert under N. 33rd Street would be removed. (Project Sponsor, Contractor)

The following paragraph is added to the end of Section 4.17.4 to include the additional construction mitigation commitment:
During construction, access to neighborhoods and community facilities shall be maintained through controlled construction scheduling and/or provisions for alternate routes of entry. Any access changes shall be indicated by providing adequate signage and, where necessary, by

working with the facility and/or property owner throughout the construction period to provide advanced notification of the changes. (Contractor, Project Sponsor)

The bullet items in Section 4.18.2 are revised to update the status of the projects listed in this section:

- Federal-aid project on Adams Street from N. 36th Street to N. 49th Street to widen the street to meet minimum design standard. ~~ROW acquisition will begin in 2024.~~ Construction will occur in 2025.

- ~~The USACE Deadmans Run project is set to be in the 95 percent design phase by September 5, 2023, and ROW acquisition will begin in 2024. The project consists of two phases: Phase 1 downstream of the BNSF bridge to be constructed in 2025 and Phase 2 upstream of the BNSF bridge to be constructed in 2026.~~ The Deadmans Run project is currently in the final design phase which is expected to through the fall of 2025. Construction is anticipated to begin in late 2025 or early 2026 with all construction activities complete prior to the N. 33rd & Cornhusker project.

Table 4.8 in Section 4.19 is revised due to E.O. 14154 and E.O. 14173 rescissions as follows:

Table 4.8 Summary of Environmental Impacts

Environmental Consideration	No-Action Alternative	Preferred Alternative
Land Use and Planning	Negative impact - continued safety concerns at at-grade crossings, not compatible with SAP, LRTP, or comprehensive plan.	Beneficial impact due to improved safety and elimination of at-grade crossings. The preferred alternative would be compatible with planned land uses outlined in the LRTP, SAP, and comprehensive plan.
Socioeconomic Resources	Negative impact - existing condition would continue. Area would remain inaccessible for public transportation and delay risk for emergency services providers.	Beneficial impact due to potential for public transportation accessibility across the tracks, reduced delay risk for emergency services via the railroad viaduct.

Environmental Consideration	No-Action Alternative	Preferred Alternative
~~Environmental Justice~~	~~Negative impact - populations within the Project ESA would continue to experience delays and safety concerns associated with at-grade crossings.~~	~~None – With the implementation of mitigation measures there would be no disproportionate impacts to protected populations.~~
Visual Resources and Aesthetics	None – no change to the existing condition.	Neutral - Elevated viaduct structure would be visible from residences, businesses, and recreational areas. New viewshed would be consistent with other transportation features within the Project ESA.
Air	Negative impact - existing condition is perpetuated with vehicles stopped by passing trains resulting in longer idling and increased potential for GHG emissions.	Beneficial impact due to improved traffic patterns and reduced delay. The Preferred Alternative would be considered a Category 2 project with low potential Mobile Source Air Toxic Analysis effects in accordance with the 2023 FHWA Interim Guidance.
Noise	None – no change to the existing condition.	None - No receivers approach or exceed the NAC, and no future noise levels substantially exceed existing noise levels.
Parks/Trails/Section 4(f)/Section 6(f)	None – no change to the existing condition.	Project is proposed to result in *De Minimis* impacts to Fleming Fields Recreation Sports Park, 34th and Madison Park, Huntington Trail, Dietrich Trail, and 33rd Street Trail. 45th and Gladstone Park would require a temporary occupancy exception. 34th and Madison Park also required a LWCF/6(f) conversion for impacts.
Utilities	None – no change to the existing condition.	Minor impacts due to relocations of certain utilities. Private utility companies are responsible for relocating their own facilities.
Wetlands	None – no change to the existing condition.	Minor negative impact - permanent impacts to approximately 0.047 acre of wetlands.

Environmental Consideration	No-Action Alternative	Preferred Alternative
Surface Water Quality (Impaired/Unique Waters)	None – no change to the existing condition.	Minor beneficial impact - Project would require SWPPP. Mitigation measures if wells in the Project area would be impacted, any registered or unregistered wells in the impacted project area would be properly decommissioned.
Vegetation and Invasive Species	None – no change to the existing condition.	Low beneficial impact with the implementation of conservation conditions to prevent the spread of non-native or invasive species while utilizing native seedings and plantings using proposed standard specifications for revegetation.
Threatened, Endangered, and Special Status Species	None – no change to the existing condition.	No Effect for most T&E species. “May affect, but is not likely to adversely affect” eastern black rail. Not likely to adversely affect eagles or migratory birds with proposed mitigation following the Avian Protection Plan.
Floodplains	None – no change to the existing condition.	Neutral – Project would have a floodplain encroachment but would comply with all floodplain regulations. Project would not place fill above allowable limits.
Cultural Resources	None	None – no resources identified in the APE.
Hazardous Materials and Wastes	Neutral - known regulated sites are in the area.	Neutral - known regulated sites are in the area. Proposed mitigation measures if impacted soil or groundwater is encountered during construction.
Material Sources and Waste Materials	None	None - with proposed environmental commitments regarding borrow sites; and, Low negative, disposal of excess material would require the Contractor to follow mitigation measures for disposal.
Temporary Construction Impacts	None	Minor negative impact - some disruption to the traveling public during construction with proposed temporary access plan, detours, and phasing. Construction noise would be minor and temporary. Standard provisions address dust suppression

Environmental Consideration	No-Action Alternative	Preferred Alternative
Secondary and Cumulative Impacts	Negative impact - traffic condition, delay, and safety concerns would be perpetuated.	Moderate positive impact - would provide more reliable transportation facility and access to the area, improve transportation movement through the area, and encourage development/economic growth to the area.

In Section 5.3.1 the last paragraph of the "NEPA Public Meeting Heading" is removed in its entirety due to E.O. 14154 and E.O. 14173 rescissions as follows:

~~A sign in sheet was requested for all meetings to document the attendees. Table 4.9 depicts the attendance summary of the meetings based on the addresses listed from the sign in sheet. The addresses from the attendees at the meeting were widespread and dispersed across the City of Lincoln with a total of 283 addresses recorded from all of the meetings. From the total addresses listed in meeting attendance, 113 addresses were located within the ESA of the Project. Of the 113 addresses inside the ESA, more than one-half of the addresses are located in areas with greater than 25% minority populations, as identified by the census data and depicted in Figure 14a.~~

In Section 5.3.2 the last paragraph is revised due to E.O. 14154 and E.O. 14173 rescissions as follows:

~~To ensure that EJ, LEP, and low-income communities were represented in the Advisory Committee, specific individuals or organizations were selected from census areas containing EJ, LEP, or low-income individuals within the Study Area, such as, Malone Community Center, Center for People in Need, El Centro De Las Américas, Salvation Army, and Civic Nebraska.~~ A list of Advisory Committee members and minutes from Advisory Committee meetings are included in Appendix K.

Due to E.O. 14154 and E.O. 14173 rescissions, Table 4.9 is removed in its entirety:

~~Table 4.9 Summary of Public Attendance from NEPA Meeting #3~~

~~Census Tract~~	~~Block Group~~	~~Percent of Minority Populations Based on Census Data~~	~~Percent of Low-Income Populations Based on Census Data~~	~~Attendees Present at Meeting based on Address~~
~~29~~	~~3~~	~~25.1-30%~~	~~18.4%~~	~~50~~
~~3~~	~~2~~	~~Less than 20%~~	~~28.9%~~	~~52~~
~~3~~	~~3~~	~~30.1 – 35%~~	~~17.1%~~	~~2~~
~~4~~	~~1~~	~~25.1-30%~~	~~36.0%~~	~~6~~
~~9~~	~~1~~	~~20.1-25%~~	~~26.3%~~	~~1~~

~~Census Tract~~	~~Block Group~~	~~Percent of Minority Populations Based on Census Data~~	~~Percent of Low-Income Populations Based on Census Data~~	~~Attendees Present at Meeting based on Address~~
~~4~~	~~2~~	~~30.1 – 35%~~	~~22.5%~~	~~2~~
			~~Total of Addresses Recorded at the Meeting~~	~~283~~
			~~Addresses within the ESA~~	~~113~~
			~~Addresses outside of the ESA~~	~~170~~

A new section, "Section 5.3.5 Public Involvement Mitigation", is added to include the following mitigation commitments applicable to the public involvement process that were removed from Section 4.4:

5.3.5 Public Involvement Mitigation

Considering the total population affected by the project, the presence of a Spanish-speaking LEP population exceeds the NDOT LEP outreach trigger of 5 percent of the population. Therefore, NDOT will utilize appropriate alternative language assistance measures to outreach to these communities in accordance with the current NDOT LEP Plan. (NDOT Communications)

All written information that is dispersed to the public about this Project shall be translated into Spanish. Dispersed information does not include highway signs or electronic messaging boards, but does include, for example, public meeting invitations, mailers and postcards, legal notices, news releases, and project map/information handouts. Project information that is placed on websites of the NDOT, the city of Lincoln, or RTSD regarding this project must be translated into Spanish. Legal notices and news releases do not need to be translated if they are only to be placed in an English-language media source. Information that is distributed to businesses, public agencies, or to departments/representatives of public agencies, does not need to be translated (Project Sponsor, Contractor).

For the public hearing, Spanish language interpreters shall be present. The written documents prepared for public dispersal (for example, project map/information handouts) at the hearing must be translated into Spanish. There must be a Spanish interpreter present. There must also be clear notices posted in Spanish at the hearing that interpreters are available. "I Speak" cards will be placed on the front table during any Public Meeting, in the event that an LEP person of an unanticipated language is in attendance. If a person who primarily speaks an unanticipated language is in attendance, their language will be recorded as part of the LEP data collection process and the Nebraska Language Line will be used to communicate. (Project Sponsor)

- This mitigation commitment was completed during the public hearing that was held on September 5, 2024.

The third mitigation commitment under the "Socioeconomic, Community, Cohesion, and Pedestrian Consideration" heading of Section 6.0 is revised to update the Deadmans Run project:

Coordination with ~~USACE~~ the City of Lincoln would be completed prior to ROW acquisitions to avoid conflicts with the ~~USACE~~ Deadmans Run project. (Project Sponsor)

The "Environmental Justice" heading and associated text of Section 6.0 are removed.

~~**Environmental Justice**~~

~~The Contractor shall provide private dwellings, commercial properties, businesses, and public facilities access to and from the nearest intersecting public road or street. Accommodations shall be made to ensure local traffic passing within the limits of the Project has access to private dwellings, commercial properties, businesses, and public facilities. During those periods when a road is closed, even for a short duration, limited access shall be maintained for authorized local traffic. If access is to be closed longer than one day, the Contractor shall coordinate with the affected property owners. (Contractor, Project Sponsor)~~

~~During construction, access to neighborhoods and community facilities shall be maintained through controlled construction scheduling and/or provisions for alternate routes of entry. Any access changes shall be indicated by providing adequate signage and, where necessary, by working with the facility and/or property owner throughout the construction period to provide advanced notification of the changes. (Contractor, Project Sponsor)~~

~~The RTSD shall notify the public, school districts within the Project ESA, and civic organizations serving LEP residents and emergency services providers, such as police and fire departments, before construction activities begin, as well as maintain continued coordination throughout construction. Notifications shall include in-person as well as virtual methods. Civic organizations and school districts serving LEP residents and emergency service providers shall be invited to the pre-construction open house meeting for the Project. (Project Sponsor)~~

~~The RTSD would continue to engage the owner of the property located at 3223 Cornhusker Highway regarding acquisition of their property and impacts to the tenants and patrons that serve environmental justice populations located at this address (La Cabaña restaurant, Taquiera Limon food truck, and La Mexicana grocery store) as well as potential future relocation options. This coordination would be documented through the NEPA Re-Evaluation Process (Project Sponsor).~~

~~All written information that is dispersed to the public about this Project shall be translated into Spanish. Dispersed information does not include highway signs or electronic messaging boards, but does include, for example, public meeting invitations, mailers and postcards, legal notices, news releases, and project map/information handouts. Project information that is placed on websites of the NDOT, the city of Lincoln, or RTSD regarding this project must be translated into Spanish. Legal notices and news releases do not need to be translated if they are only to be~~

~~placed in an English-language media source. Information that is distributed to businesses, public agencies, or to departments/representatives of public agencies, does not need to be translated (Project Sponsor, Contractor).~~

~~For the public hearing, Spanish language interpreters shall be present. The written documents prepared for public dispersal (for example, project map/information handouts) at the hearing must be translated into Spanish. There must be a Spanish interpreter present. There must also be clear notices posted in Spanish at the hearing that interpreters are available. "I Speak" cards will be placed on the front table during any Public Meeting, in the event that an LEP person of an unanticipated language is in attendance. If a person who primarily speaks an unanticipated language is in attendance, their language will be recorded as part of the LEP data collection process and the Nebraska Language Line will be used to communicate. (Project Sponsor)~~

The third mitigation commitment under the "Parks/Trails/Section 4(f)/Section 6(f)" heading of Section 6.0 is revised to update typographic errors:

Trail continuity would be maintained at all times during construction via detour. A temporary surface would be constructed to provide a trail detour for the following locations: ~~**Dietric**~~ **Dietrich Trail,** ~~**Hunting**~~ **Huntington Trail, and 33rd Street Trail.** (Contractor)

The eighth and tenth mitigation commitments under the "Hazardous Materials and Waste" heading of Section 6.0 are revised to update the website links:

The Contractor shall survey structures(s) on buildings to be demolished for the presence of asbestos containing materials (ACM). The inspector must be certified in accordance with the Nebraska Department of Health and Human Services (DHHS) Nebraska Asbestos Control Program Regulations, Title 178. A list of Licensed Asbestos Inspectors can be found at ~~http://dhhs.me/gov/Pages/Asbestos.aspx~~. https://dhhs.ne.gov/Pages/Asbestos.aspx Documentation of the survey shall be provided to the RTSD Representative by the contractor prior to structure demolition. (Contractor)

Removal and disposal of ACM shall be in accordance with the Nebraska Department of Health and Human Services (DHHS) Nebraska Asbestos Control Program Regulations, Title 178. The Contractor shall develop a removal and disposal plan in coordination with a licensed asbestos removal contractor and NDOT. The Contractor shall contact DHHS no later than 10 business days prior to removal of the ACM for guidelines on disposal. If the asbestos cannot be kept in a non-friable condition upon removal, the Contractor shall use a licensed asbestos removal contractor. A list of licensed asbestos removal contractors can be found at: ~~http://dhhs.me/gov/Pages/Asbestos.aspx.~~ https://dhhs.ne.gov/Pages/Asbestos.aspx . ACM shall be disposed of at a landfill approved for handling asbestos. The Contractor shall provide landfill receipts to the RTSD Representative within 10 working days of disposal. (Contractor, Project Sponsor)

The tenth mitigation commitment under the "Hazardous Materials and Waste" heading of Section 6.0 is revised to update the Deadmans Run project:

Additional coordination would be needed between the RTSD project and the ~~USACE~~ City of Lincoln to determine when the existing box culvert under N. 33rd Street would be removed. (Project Sponsor, Contractor)

The heading "Public Involvement" and the following commitments are added to end of Section 6.0:

Public Involvement

Considering the total population affected by the project, the presence of a Spanish-speaking LEP population exceeds the NDOT LEP outreach trigger of 5 percent of the population. Therefore, NDOT will utilize appropriate alternative language assistance measures to outreach to these communities in accordance with the current NDOT LEP Plan. (NDOT Communications)

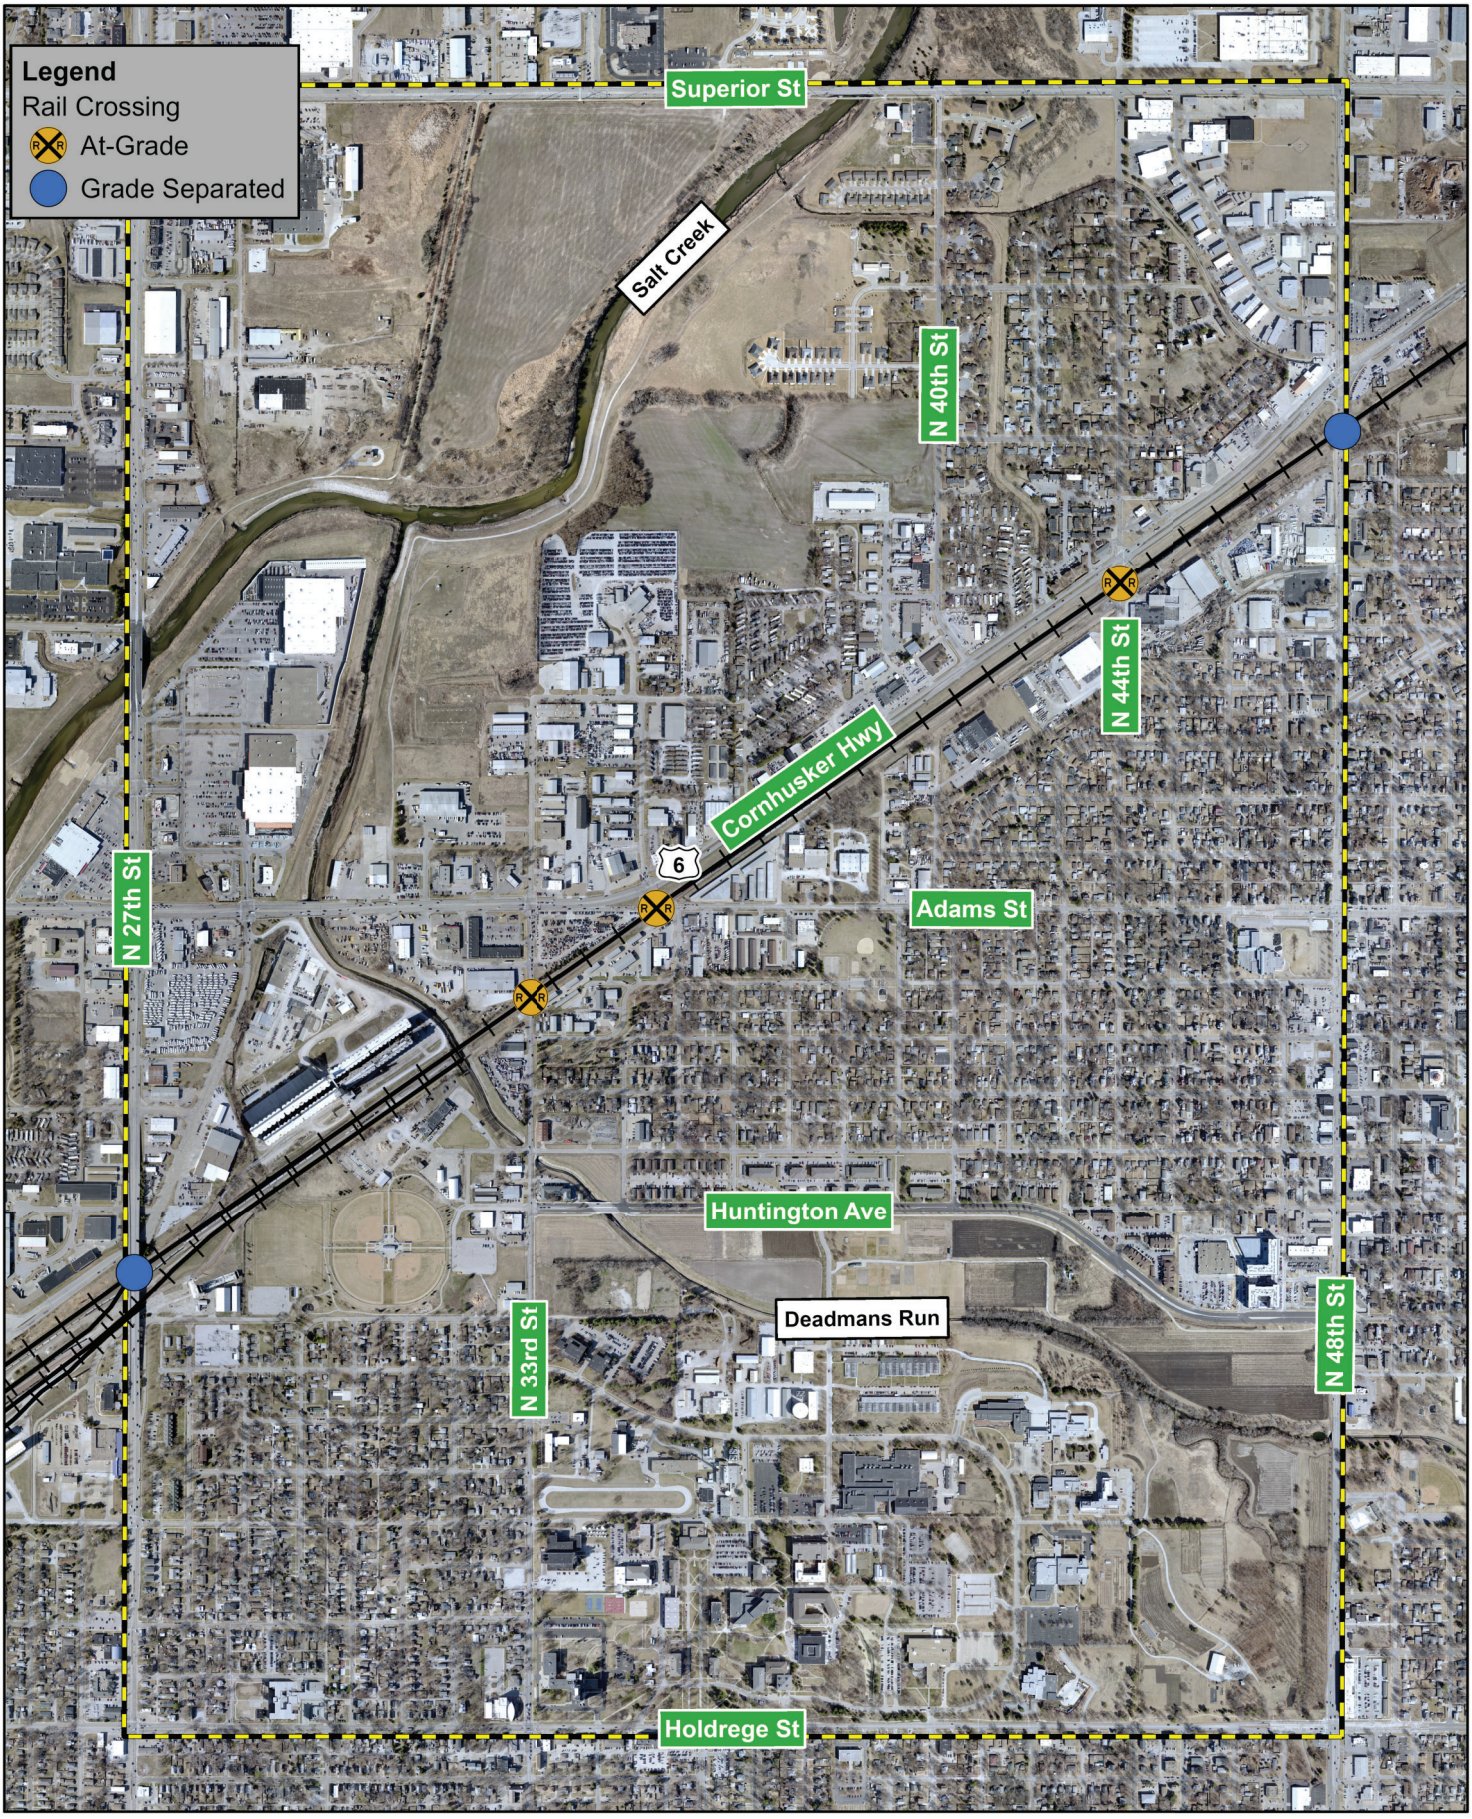

All written information that is dispersed to the public about this Project shall be translated into Spanish. Dispersed information does not include highway signs or electronic messaging boards, but does include, for example, public meeting invitations, mailers and postcards, legal notices, news releases, and project map/information handouts. Project information that is placed on websites of the NDOT, the city of Lincoln, or RTSD regarding this project must be translated into Spanish. Legal notices and news releases do not need to be translated if they are only to be placed in an English-language media source. Information that is distributed to businesses, public agencies, or to departments/representatives of public agencies, does not need to be translated (Project Sponsor, Contractor).

For the public hearing, Spanish language interpreters shall be present. The written documents prepared for public dispersal (for example, project map/information handouts) at the hearing must be translated into Spanish. There must be a Spanish interpreter present. There must also be clear notices posted in Spanish at the hearing that interpreters are available. "I Speak" cards will be placed on the front table during any Public Meeting, in the event that an LEP person of an unanticipated language is in attendance. If a person who primarily speaks an unanticipated language is in attendance, their language will be recorded as part of the LEP data collection process and the Nebraska Language Line will be used to communicate. (Project Sponsor)

- This mitigation commitment was completed during the public hearing that was held on September 5, 2024.

4.1 Changes to the Figures in the Draft Environmental Assessment

Figure 2 is revised to display the current railroad alignments and match the display at the public hearing.

Project No. 702614, RTSD BU 5919, CN 13294

5.0 Environmental Commitments and Mitigation Measures

To comply with all applicable federal, state, and local legislation, as well as any general or special conditions required by pending permits; the following mitigation measures/environmental commitments have been incorporated into the Selected Alternative. These commitments would be implemented during the appropriate Project phase(s). The mitigation measures are presented in association with the resource for which they most directly act to avoid or minimize impacts to the maximum extent practicable.

Although some of the listed measures apply to multiple resources, they are listed only once in this section, under the resource that they most directly benefit. In addition to the mitigation measures, NDOT Standard Specifications and Special Provisions would be applied to the Selected Alternative to provide specific methodology.

If there are changes in the project scope, project limits, existing conditions, pertinent regulations, or environmental commitments, the Project Sponsor must re-evaluate potential impacts prior to implementation in coordination with NDOT and FHWA. Environmental commitments are not subject to change without prior written approval from FHWA.

Land Use and Planning

The end of the nearest runway at Lincoln Municipal Airport (Runway 35) is approximately 3.75 miles to the closest point of the Project. Due to the proximity to the Lincoln Municipal Airport to the Project, the height of any equipment used in the construction of the project (or any antennae installed on the equipment) shall not exceed the local airport's Height Restriction Zoning. Any Contractor involved in the project shall use the Notice Criteria Tool available at https://oeaaa.faa.gov/oeaaa/external/portal.jsp. (Contractor)

If required, the Contractor shall file a 7460-1 Form with the Federal Aviation Administration (FAA). The form shall be required if the Contractor uses any equipment over 200 feet tall, or the equipment breaks a 100:1 slope from a public-use airport. This includes any trucks or equipment used during the construction of the project. (Contractor)

Socioeconomic, Community Continuity, Cohesion, and Pedestrian Considerations

The Project Sponsor (RTSD) shall notify the public at the start of construction by placing notices in the newspapers with local circulation including, the Lincoln Journal Star and El-Perico, 14 calendar days prior to construction. Websites and social media (Facebook, "X" formerly Twitter) will also be used as public notification mechanisms prior to the beginning of construction activities. The Project Sponsor shall also notify emergency services such as police and fire departments before construction activities begin, as well as maintain continued coordination throughout

construction. Emergency services providers shall be invited to the pre-construction meeting for this Project in order to provide input on accessibility during construction activities as well as future accessibility upon Project completion. (Project Sponsor)

The Contractor shall, at all times, to the extent practicable, provide private dwellings, commercial properties, businesses, and public facilities access to and from the nearest intersecting public road or street. Accommodations shall be made to ensure local traffic passing within the limits of the Project has access to all private dwellings, commercial properties, businesses, and public facilities. During those periods when a road is closed, even for a short duration, limited access must be maintained for authorized local traffic. If access is to be closed longer than one day, the Contractor shall coordinate with the affected property owners to address temporary access issues. Access details shall be coordinated among the Project Sponsor's Project Manager, the Contractor, and property owners. (Contractor, Project Sponsor)

Coordination with the City of Lincoln would be completed prior to ROW acquisitions to avoid conflicts with the Deadmans Run project. (Project Sponsor)

Noise

Construction shall be completed during normal working hours, typically between 6 a.m. and 6 p.m., 6 to 7 days a week. Standard construction noise mitigation best management practices (BMPs) such as mufflers shall be utilized on construction equipment. (Contractor)

Parks/Trails/Section 4(f)/Section 6(f)

Access to the following Section 4(f) properties shall be maintained during construction via temporary traffic control such as signing, striping, and/or barricading: **Fleming Fields Recreation Sports Park, 34th and Madison Park, and 45th and Gladstone Park**. (Contractor)

The contractor shall not complete work, stage, stockpile, or store materials within the boundaries of the following Section 4(f) properties and access shall be maintained at all times: **UPCO Park, Dietrich Trail Connector, and Theresa Trail.** (Contractor)

Trail continuity would be maintained at all times during construction via detour. A temporary surface would be constructed to provide a trail detour for the following locations: **Dietrich Trail, Huntington Trail, and 33rd Street Trail.** (Contractor)

The Contractor shall not complete work, stage, stockpile, or store materials beyond the boundaries of easements for the following locations: **45th and Gladstone Park, Fleming Fields, and 34th and Madison Park.** (Contractor)

Following construction, the areas of temporary easements shall be restored to pre-existing condition or better; **John Dietrich Trail, 33rd Street Trail, Huntington Trail, 45th and Gladstone Park, Fleming Fields, and 34th and Madison Park.** (Contractor)

The following properties shall be marked on the project plans as sensitive areas (excepting areas of new ROW and easements): **33rd Street Trail, 45th and Gladstone Park, Fleming Fields, and 34th and Madison Park.** (Project Sponsor)

NDOT and the City of Lincoln will ensure that the conversion of use for **34th and Madison Street** Park is approved by the NPS and NGPC in writing prior to beginning construction at the park site. Upon approval from the NPS for the Section 6(f) replacement property at Wilderness Hills Park, the City of Lincoln will develop the park features within the timeline set forth by the NPS to provide an adequate replacement for the converted property. (Project Sponsor, NDOT Environmental)

Advanced warning to notify trail users and drivers of the trail crossing would be required at the new crossing on Griffith Street and Huntington Avenue. Pavement markings and additional signage would be added for pedestrian safety for **33rd Street Trail, John Dietrich Trail, and Huntington Trail**. (Project Sponsor, Contractor)

Access to the **John Dietrich Trail, Huntington Trail, and 33rd Street Trail**, outside of areas slated or construction, would remain open and available at all times during construction. (Contractor)

The Contractor shall complete routine inspections and maintenance on the trail detour for the duration of the trail detour. (Contractor)

During final design, if it is determined that access to the Section 4(f) properties cannot be maintained, then this Section 4(f) review shall be reevaluated, and the appropriate review process followed to determine if mitigation is required. (Project Sponsor, NDOT Environmental)

Utilities

The Contractor shall follow the guidelines of NDOT's Policy for Accommodating Utilities on State Highway ROW (NDOT, 2001). It is the Project Sponsor's responsibility to notify utility companies of the need for relocation during the design stage of the Project. The Project Sponsor would coordinate utility agreements with the utility companies before construction. It is the Contractor's responsibility to notify utility companies of relocation needs during the construction phase of the Project for utilities that were not relocated before construction. If utility relocations using federal funds are located outside the Project ESA, those locations would be evaluated before construction. (Project Sponsor, Contractor, Utility Provider(s))

Any utility relocations that utilize public funds shall follow "Buy America" guidelines. (Project Sponsor, Contractor, Utility Provider(s))

Wetlands

All wetlands and other WOUS within the Project ESA that are not permitted for impacts shall be marked on the 2W aerial sheets within the construction plan set for the Contractor as avoidance areas. (NDOT Design, NDOT Environmental)

Before any construction work, The Project Sponsor shall obtain a Letter of Opinion of Non-Degradation from NDEE for Impacts to Waters of the State. (NDOT Environmental)

The Project is anticipated to qualify under a Notifying Nationwide Permit #14 – Linear Transportation Projects. The contractor shall adhere to the permit conditions, including regional and general conditions, during construction. All wetlands and other WOUS within the project area that are not permitted for impacts shall be marked on the project plan aerial sheets for the contractor as avoidance areas. (NDOT Design, NDOT Environmental, Contractor)

The Contractor shall not stage, store, waste or stockpile materials and equipment in undisturbed locations, or in known/potential wetlands and/or known/potential streams that exhibit a clear “bed and bank” channel. Potential wetland areas consist of any area that is known to pond water, swampy areas, or areas supporting known wetland vegetation, or areas where there is a distinct difference in vegetation (at lower elevations) from the surrounding upland areas. (NDOT Design, NDOT Environmental, Contractor)

Surface Water Quality (Impaired/Unique Waters)

This project requires a Construction Stormwater Permit and a Storm Water Pollution Prevention Plan (SWPPP) be maintained for the project. The Contractor shall understand the terms and conditions of the general National Pollutant Discharge Elimination System (NPDES) permit that authorizes the storm water discharges associated with activity from the construction site. For reference, the general permit is posted on the Department’s website. (Contractor)

The Project Sponsor shall coordinate with the owners of wells that would be directly impacted by the proposed Project. If the well is actively used, the Project Sponsor shall get estimates to have the property owner hire their own contractor to replace and relocate the well. The Project Sponsor shall then have an independent contractor decommission the well after ROW negotiations and acquisitions are complete. If the well is not in use, the Contractor shall decommission the well after negotiations with the owner. (Project Sponsor, Contractor)

A licensed water well contractor shall decommission any wells in accordance with the NDHHS regulations under Nebraska Administrative Code Title 178, Water Well Standards, Chapter 12, Water Well Construction Pump Installation, and Water Well Decommissioning Standards. (Project Sponsor)

There are Category 5 impaired waters in the project study area; BMPs shall be reviewed and developed as necessary during the erosion control review process. If mitigation is required for

impaired waters, it shall be captured in the project's erosion control plan sheets and special provisions. (Project Sponsor)

If manure is specified for the project, a restricted area will be established around identified impaired waters and streams. (Project Sponsor, Contractor)

Vegetation and Invasive Species

The Contractor shall prevent the transfer of invasive plant and animal species. The Contractor shall wash equipment at the Contractor's storage facility before entering the construction site. The Contractor shall inspect all construction equipment and remove all attached vegetation and animals before leaving the construction site. (Contractor)

Appropriate mulching materials shall be applied and shall not include brome hay. If sod is required to be applied, then it shall be free from all weeds, including noxious weeds. (Contractor)

Threatened, Endangered, and Special Status Species

A-1 Changes in Project Scope: If there is a change in the project scope, the project limits, or environmental commitments, the Highway Project Manager shall coordinate with NDOT Environmental Section to evaluate potential impacts prior to implementation. Environmental commitments are not subject to change without prior written approval from the NDOT Environmental Section. (District Construction)

A-2 Conservation Conditions: Conservation conditions are to be fully implemented within the project limits as shown on the plans. (District Construction, Contractor)

A-3 Early Construction Starts: Early Construction Starts. Contractor requests for early construction starts must be coordinated by the Project Construction Engineer with the NDOT Environmental Section for approval to ensure avoidance of listed species sensitive lifecycle time frames. Early start requests may require consultation with the USFWS and NGPC. Agency coordination time will vary depending on species and project location. (District Construction, Contractor)

A-4 T&E Species: If federal or state listed species are observed during construction, the Highway Project Manager will contact NDOT Environmental Section to determine if additional species conservation conditions would be required prior to continuing project construction activities. Contact NDOT Environmental for a reference of federal and state listed species. Coordination with the USFWS and NGPC may be required depending on the species identified and construction activities. (NDOT Environmental, District Construction, Contractor)

A-5 Refueling: Refueling will be conducted outside of those sensitive areas identified on the plans, in the contract, and/or marked in the field. (Contractor)

A-6 Restricted Areas: The following project activities shall, to the extent possible, be restricted to between the beginning and ending points (stationing, reference posts, mile markers, and/or section-township-range references) of the project, within the right-of-way designated on the project plans: borrow sites, burn sites, construction debris waste disposal areas, concrete and asphalt plants, haul roads, stockpiling areas, staging areas, and material storage sites.

For activities outside the project limits, the contractor should refer to the Nebraska Game and Park Commission website to determine which species ranges occur within the off-site area. The contractor should plan accordingly for any species surveys that may be required to approve the use of a borrow site, or other off-site activities. The contractor should review the T&E Matrix agreement (on NDOT's website), where species survey protocols can be found, to estimate the level of effort and timing requirements for surveys.

Any project related activities that occur outside of the project limits must be environmentally cleared/permitted with the Nebraska Game and Parks Commission as well as any other appropriate agencies by the contractor and those clearances/permits submitted to the District Construction Project Manager prior to the start of the above listed project activities. The contractor shall submit information such as an aerial photo showing the proposed activity site, a soil survey map with the location of the site, a plan-sheet or drawing showing the location and dimensions of the activity site, a minimum of 4 different ground photos showing the existing conditions at the proposed activity site, depth to ground water and depth of pit, and the "Platte River depletion status" of the site. The contractor must receive notice of acceptance from NDOT environmental, prior to starting the above listed project activities. These project activities cannot adversely affect state and/or federally listed species or designated critical habitat. (NDOT Environmental, District Construction, Contractor).

A-7 Waste/Debris: Construction waste/debris will be disposed of in areas or a manner which will not adversely affect state and/or federally listed species and/or designated critical habitat. (Contractor)

A-8 Post Construction Erosion Control: Erosion control activities carried out by NDOT Maintenance or others after construction is complete, but prior to project close-out, shall adhere to any standard conservation conditions for species designated for the project limits during construction. (NDOT Maintenance, District Construction, Contractor)

S-1 Fencing: When project-related fence construction/relocation work is required to be done prior to the start of construction, and if the fence work occurs outside urban or cropland areas that are not within swift fox or mountain plover range, then fencing can be installed/relocated at any time using the following criteria:

a. The fencing is temporary in nature and/or consists of only hand-driven posts.
b. The work does not compact the soils (ex. through the use of heavy equipment) or cause soil disturbance beyond the driving of posts)

c. Within the whooping crane migration corridor, work occurring within a half of a mile of wetlands or perennial waters will occur between the hours of 10:00 am to 4:00pm when the work is between March 6 – April 29 or October 9 – November 15

If the fencing work cannot meet these criteria, the NDOT Right-of-Way Division shall coordinate with NDOT Environmental prior to the completion of Right-of-way negotiations.

S-2 Platte River Depletions: To the maximum extent practical, efforts will be made to design the project and select borrow sites to prevent depletions to the Platte River. If there is any potential to create a depletion, NDOT (during design) and the Contractor (for borrow sites) shall follow the current Platte River depletion protocols for coordination, minimization, and mitigation. In general, the following are considered de minimis depletions, but may still require agency coordination; a project which: a) creates an annual depletion less than 0.1 acre feet, b) creates a detention basin that detains water for less than 72 hours, c) diverted water that will be returned to its natural basin within 30 days, or d) creates a one-time depletion of less than 10 acre feet. (NDOT Roadway Design, Contractor)

S-3 Revegetation: All permanent seeding and plantings (excluding managed landscaped areas) shall use species and composition native to the project vicinity as shown in the Plan for the Roadside Environment. However, within the first 16 feet of the road shoulder or within high erosion prone locations, tall fescue or perennial ryegrass may be used at minimal rates to provide quick groundcover to prevent erosion, unless state or federally listed threatened or endangered plants were identified in the project area during surveys. If listed plants were identified, any seed mix requirements identified during resource agency consultations shall be used for the project. (NDOT Environmental)

S-6 Permanent LED Lighting (NDOT Design Commitment): Only LED roadway luminaries listed on the NDOT “Nebraska Qualified Material Vendors List” will be considered for use on Nebraska highway lighting projects. Proposed changes to the following LED lighting requirements would require resource agency (USFWS and/or NGPC) coordination and approval prior to installation:

- Nominal CCT – 3000 +/- 300 K
- BUG Ratings – Maximum nominal Backlight (N/A), Uplight (0), Glare (N/A)
- Lumen Output – N/A

Any proposed changes to the listed requirement(s) must be presented to the NDOT Environmental Section for Agency Coordination and approval. (NDOT Design)

Migratory Birds

The NDOT APP was developed to reduce conflicts between construction of NDOT projects and the laws governing migratory birds. This procedure is designed to protect and conserve avian populations and reduce avian conflicts thorough changes in project scheduling (that is, tree clearing outside primary nesting season), increased migratory bird surveys, and changes in

project construction timelines. NDOT would use its APP to reduce conflicts with migratory birds. (NDOT Environmental, Contractor)

During the project's construction within the primary nesting season April 1 through September 1, if unforeseen work on migratory bird habitat is to take place, a nesting survey shall be completed prior to starting work. The contractor will contact the PM, who will contact the Environmental Section to schedule a survey. Surveys will be conducted from April 1 through September 1 for work that may require general clearing or grubbing, large tree removal, or work that may impact or disturb eagles or threatened or endangered species. Surveys will be conducted April 1 through September 30 for bridge/culvert work. Surveys conducted from April 1 through September 1 will be accomplished by qualified biologists or WS. Efforts will be made to conduct surveys in the morning to capture the most bird breeding activity. During the heat of the day, birds may be less active; therefore, breeding behaviors may not be apparent. NDOT understands the time constraints placed on construction project activity; however, nesting surveys might not be as accurate during adverse weather conditions. Periods of precipitation or high winds should be avoided as birds would likely avoid detection. Trees, brush, and surrounding vegetation that are surveyed during the primary nesting season, and found to be devoid of active nests, will be removed within three (3) days. Culverts, bridges, and surrounding vegetation that are surveyed during the primary nesting season and found to be devoid of active nests, will be protected, such as with netting, within three (3) days. Vegetation surrounding the bridge/culvert will either be removed, or otherwise made unattractive to potential nesting birds, also within three (3) days. If vegetation is not removed, or the culvert/bridge is not protected, within three (3) days, an additional survey shall be conducted prior to the start of work. (NDOT Environmental, Contractor)

Floodplains

The Project construction would have a floodplain encroachment. A Floodplain Development Permit shall be obtained from the City of Lincoln prior to construction to certify that the proposed Project shall not raise the base flood elevation more than one foot and there would be no rise in the floodway. (Project Sponsor)

Cultural Resources

The contractor shall comply with the Nebraska Unmarked Human Burial Sites and Skeletal Remains Protection Act, Sections 12-1201 – 12-1212. If human skeletal remains or burial goods associated with an unmarked human burial in the ground or on the ground are discovered, then all work in the immediate area of the discovery shall stop and the contractor shall contact the NDOT District Environmental Coordinator. The NDOT District Environmental Coordinator will then comply with Section 12-1205, notification of local law enforcement in the county in which the remains or burial goods are found. The NDOT District Environmental Coordinator will promptly consult with the appropriate federal, state, and tribal agencies to determine if further field investigations are required before maintenance operations may resume. Pertinent legal authorities covering such discoveries include: the National Historic Preservation Act, the Native American Graves Protection and Repatriation Act, the Archeological Resources Protection Act,

the Nebraska Unmarked Burial Sites and Skeletal Remains Protection Act, and the Nebraska Archeological Resources Protection Act. (Project Sponsor, NDOT Environmental, Contractor)

Any discovered archeological or paleontological objects or deposits are not the property of the Contractor. The NDOT Environmental Coordinator will consult with appropriate federal, state, or tribal agencies to determine the proper disposition of such remains. (NDOT Environmental, Contractor)

Hazardous Materials and Wastes

If contaminated soils/water or unexpected wastes are discovered, the Contractor shall stop all work within the immediate area. The Contractor shall secure the area of the discovery and notify the RTSD representative. The contractor shall not re-enter the discovery area until allowed to do so by the RTSD representative. At the time of discovery, the RTSD representative and contractor shall coordinate appropriate actions. The actions to be carried out by the RTSD representative are (but not limited to): verification that the contractor has suspended construction activities in the area of the discovery, contact the RTSD representative and then utilize the NDOT Unexpected Waste Action Plan to properly document the extent and type of waste. The RTSD representative shall ensure that proper disposal of the waste and any required health and safety mitigation is implemented by the Contractor. (Project Sponsor, NDOT Environmental, Contractor)

Demolition work on any structures will require the contractor to submit a written NESHAP (National Emission Standards for Hazardous Air Pollutants) notification to the Nebraska Department of Environment & Energy (NDEE). In addition, the Department of Health and Human Services shall also be notified by the contractor, using DHHS Form 5, at least 10 working days prior to commencement of bridge demolition or renovation activities where ACM are found. The 10-day clock starts with the day the Notification is postmarked, hand delivered, or picked up by a commercial delivery service, such as UPS, FedEx, etc. Faxing documents is prohibited. (Contractor)

There is potential for lead or toxic metal-based paint to be found on the structures to be demolished or repaired. The Contractor shall test these structures for the presence of lead/toxic metal paint. If lead-based paint/toxic metals within the paint are discovered, extreme caution shall be taken to minimize the amount of painted material or debris from causing or threatening to cause pollution of the air, land, and waters of the State. If the method of removal of the components generates paint debris, the Contractor shall create an implementation plan to dispose of waste in accordance with NDOT's Standard Specification for Highway Construction Section 732 (Lead-based Paint Removal) and Title 128 Nebraska Hazardous Waste Regulations. The Contractor's implementation plan efforts shall be documented in OnBase. (Project Sponsor, NDOT Environmental, Contractor)

There is a medium potential for petroleum contamination to be present in the soils/groundwater at project N 33rd & Cornhusker Highway. The following sites are identified as having a medium potential for petroleum contamination.

Name:	Address:	Station Number:
Relique Ltd	3645 Adams Street	1010 + 720 to 1010 + 800
U-Stop convenience shop 09	3244 Cornhusker Highway	520 + 400 to 520 + 600
Casey's General Store 2706	3010 Cornhusker Highway	510 + 700 to 510 + 810
Joe's Body Shop	2505 N. 33rd Street	100 + 800 to 100 + 900
Olston's Import Car Repair	243 N. 33rd Street	100 + 575 to 100 + 700
Precision Machine Company	2933 N. 36th Street	1500 + 0 to 1500 + 100
Star City Auto Salvage	2705 N. 33rd Street	1200 + 900 to 1300 + 50
Cornhusker International	3131 Cornhusker Highway	510 + 650 to 510 + 900
Star City Auto Sales	3101 Cornhusker Highway	510 + 400 to 510 + 650
Cornhusker Body Shop	3701 Adams Street	1010 + 850 to 1020 + 0
Jones Oil Company	2930 N. 33rd Street	1100 + 300 to 1100 + 600
Hansen Mueller Company	3001 Cornhusker Highway	510 + 0 to 510 + 200
Blum's Auto Repair	2415 N. 33rd Street	100 + 500 to 100 to 575
Azteca Motors	3625 Adams Street	1010 + 520 to 1010 + 720
City of Lincoln Maintenance Yard	33rd & Baldwin Avenue	1200 + 150 to 1200 + 650

If contaminated soils/groundwater or unexpected wastes are discovered, The Contractor shall stop all work within the immediate area. The Contractor shall secure the area of the discovery and notify the RSTD Representative. The Contractor shall not re-enter the discovery area until notified by the RTSD Representative. At the time of discovery, the RTSD Representative and Contractor shall utilize the Unexpected Waste Action Plan (UWAP) to coordinate appropriate actions. The actions to be carried out by the RTSD Representative include (but not limited to): verification that the Contractor has suspended construction activities in the area of the discovery, contact the RTSD Representative and shall then utilize the UWAP Notification Form (NDOT Form 691) to properly document the extent and type of waste. The RTSD Representative will ensure that proper disposal of the waste and any required health and safety mitigation is implemented by the Contractor. The Contractor is required by NDOT's Standard Specification section 107.11 (Hazardous Material Discoveries) to handle and dispose of regulated material in accordance with applicable laws. (Project Sponsor, NDOT Environmental, Contractor)

The Contractor shall submit a written National Emissions Standards for Hazardous Air Pollutants (NESHAP) notification to the Nebraska Department of Environment and Energy (NDEE) and a Nebraska Department of Health and Human Services (DHHS) Form 5 at least 10 days prior to demolition/renovation. The 10-day clock starts when the NESHAP and Form 5 notifications are post marked, hand delivered or picked up by a commercial delivery service. Faxing documents is prohibited. The Contractor shall provide the RTSD Representative copies of the notifications and the submittal date prior to demolition/renovation activities. (Contractor)

The RTSD Representative will upload NDEE, NESHAP and DHHS Form 5 documentation to OnBase. (Project Sponsor)

The Contractor shall survey structures(s) on buildings to be demolished for the presence of asbestos containing materials (ACM). The inspector must be certified in accordance with the Nebraska Department of Health and Human Services (DHHS) Nebraska Asbestos Control Program Regulations, Title 178. A list of Licensed Asbestos Inspectors can be found at https://dhhs.ne.gov/Pages/Asbestos.aspx. Documentation of the survey shall be provided to the RTSD Representative by the contractor prior to structure demolition. (Contractor)

The RTSD Representative will record survey documentation to OnBase. (Project Sponsor)

Removal and disposal of ACM shall be in accordance with the Nebraska Department of Health and Human Services (DHHS) Nebraska Asbestos Control Program Regulations, Title 178. The Contractor shall develop a removal and disposal plan in coordination with a licensed asbestos removal contractor and NDOT. The Contractor shall contact DHHS no later than 10 business days prior to removal of the ACM for guidelines on disposal. If the asbestos cannot be kept in a non-friable condition upon removal, the Contractor shall use a licensed asbestos removal contractor. A list of licensed asbestos removal contractors can be found at: https://dhhs.ne.gov/Pages/Asbestos.aspx. ACM shall be disposed of at a landfill approved for handling asbestos. The Contractor shall provide landfill receipts to the RTSD Representative within 10 working days of disposal. (Contractor, Project Sponsor)

The RTSD Representative will upload disposal documentation (i.e., landfill receipts or other documentation provided by the Contractor to OnBase. (Project Sponsor)

Phase I Environmental Site Assessments may be conducted for each property to be purchased. Phase I assessments allow RTSD to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability. Under CERCLA, entities may be held strictly liable for cleaning up hazardous substances at properties that they either currently own or operate or owned or operated in the past. Strict liability under CERCLA means that liability for environmental contamination may be assigned based solely on property ownership. (Project Sponsor)

Performance of the utility work set forth in the Project plans and specifications shall be conducted in accordance with any easement agreement among the utility companies, RTSD, or private landowners. If polychlorinated biphenyls (PCBs)-containing transformers or other equipment are identified, NDOT required that they be managed and disposed of according to the Toxic Substance Control Act (TSCA) regulations. Releases of PCBs to the environment at levels requiring actions under TSCA are to be managed or remediated according to TSCA regulations. Any transformer with no label is assumed to be “PCB contaminated equipment” per EPA regulations. The Contractor shall notify the utility for remediation for PCB contaminated soils or transformer repair. (Project Sponsor, Contractor)

Additional site reconnaissance, investigation, or additional review of design impacts will be done during the ROW acquisition process. Based on this work, green sheets will be updated during

subsequent EA updates and revisions. The medium potential sites identified are not anticipated to have a major impact to the project. Minimal impacts to schedule and cost are anticipated. Additional mitigation measures may be required due to the presence of wells and any additional environmental concerns identified. (Project Sponsor, Contractor)

Temporary Construction Impacts

A Traffic Control Plan (TCP) shall be created specific to the Project prior to construction. Once developed, the Project Sponsor would be responsible to review the TCP and assess the impacts of the TCP within the framework of NEPA. If the TCP could result in impacts that were not previously reviewed under NEPA, the Project Sponsor would review the impacts prior to implementing the TCP or construction of the Project. (Project Sponsor, NDOT Environmental, Contractor).

Project bidding documents shall include a provision that requires the Contractor to maintain access at either N. 33rd Street or N. 35th Street/Adams Street and Cornhusker Highway intersections. There shall be a maximum number of days that these intersections can be closed to minimize disruptions to access. The RTSD shall identify the number of days of closure during the final design process. (Project Sponsor, Contractor).

Temporary drives shall be constructed on N. 31st Street and N. 35th Street/Adams Street intersections to maintain access and to connect the existing pavement to the newly constructed Cornhusker Highway during construction of the south half of Cornhusker Highway between State Fair Park Drive and N. 37th Street. (Project Sponsor, Contractor)

Project bidding documents shall include a provision that requires the Contractor to maintain at least two of the three intersections with Cornhusker Highway (N. 31st Street, N. 33rd Street and N. 35th Street) open for access during construction of the Project. There shall be a maximum number of days that these intersections can be closed to minimize disruptions to access. The RTSD shall identify the number of days of closure during the final design process. (Project Sponsor, Contractor)

Additional temporary pavement shall be constructed as necessary to improve temporary intersections at N. 31st Street, N. 33rd Street, and N. 35th Street and as necessary to maintain access to properties on the north side of Cornhusker Highway. The drives at Tract 31, Tract 36, and Tract 37 shall be built in a separate pour to allow access to the properties. (Project Sponsor, Contractor)

ROW acquisition would be completed in conformance with the Federal Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (Uniform Act), as amended (42 USC 4601-4655 et seq.), and the Nebraska Relocation Assistance Act (Nebraska Revised Statute Section 76-1214 et seq.) (Project Sponsor).

Per standard practice, the RTSD would notify the public at the start of construction by placing notices in the newspaper 14 calendar days before construction begins, and electronic message boards may be used before construction activities begin. The RTSD would also notify the local schools and emergency services such as police and fire departments before construction activities begin, as well as maintain continued coordination throughout construction. Emergency services providers would be invited to the pre-construction meeting for this Project. In addition to these standard practices of notification before the start of construction, these entities would be provided an opportunity to review the proposed concept and provide input regarding their needs during construction and during long-term operation of the Project. (Project Sponsor)

According to NDOT's Standard Specifications, the Contractor would, at all times, to the extent practicable, provide private dwellings, commercial properties, businesses, and public facilities access to and from the nearest intersecting public road or street (NDOT, 2017). Accommodations would be made to ensure that local traffic passing within the Project limits has access to all private dwellings, commercial properties, businesses, and public facilities. During those periods when a road is closed, even for a short duration, limited access must be maintained for authorized local traffic. If access is to be closed longer than one day, the Contractor would coordinate with the RTSD's Project Manager and affected property owners. (Project Sponsor, Contractor)

Dust emissions shall be minimized by including techniques to control fugitive dust into the air during construction. These minimizations shall be included in the construction plans and specifications with implementation during construction. (Project Sponsor, Contractor)

Additional coordination would be needed between the RTSD project and the City of Lincoln to determine when the existing box culvert under N. 33rd Street would be removed. (Project Sponsor, Contractor)

Public Involvement

Considering the total population affected by the project, the presence of a Spanish-speaking LEP population exceeds the NDOT LEP outreach trigger of 5 percent of the population. Therefore, NDOT will utilize appropriate alternative language assistance measures to outreach to these communities in accordance with the current NDOT LEP Plan. (NDOT Communications)

All written information that is dispersed to the public about this Project shall be translated into Spanish. Dispersed information does not include highway signs or electronic messaging boards, but does include, for example, public meeting invitations, mailers and postcards, legal notices, news releases, and project map/information handouts. Project information that is placed on websites of the NDOT, the city of Lincoln, or RTSD regarding this project must be translated into Spanish. Legal notices and news releases do not need to be translated if they are only to be placed in an English-language media source. Information that is distributed to businesses, public agencies, or to departments/representatives of public agencies, does not need to be translated (Project Sponsor, Contractor).

For the public hearing, Spanish language interpreters shall be present. The written documents prepared for public dispersal (for example, project map/information handouts) at the hearing must be translated into Spanish. There must be a Spanish interpreter present. There must also be clear notices posted in Spanish at the hearing that interpreters are available. "I Speak" cards will be placed on the front table during any Public Meeting, in the event that an LEP person of an unanticipated language is in attendance. If a person who primarily speaks an unanticipated language is in attendance, their language will be recorded as part of the LEP data collection process and the Nebraska Language Line will be used to communicate. (Project Sponsor)

- This mitigation commitment was completed during the public hearing that was held on September 5, 2024.

APPENDIX A

PUBLIC HEARING REPORT

Disclaimer:
In compliance with recently enacted executive orders, the EA has been revised. On January 20, 2025, President Trump signed Executive Order (E.O.) 14154 – Unleashing American Energy. The E.O. revoked E.O. 14096 – Revitalizing Our Nation's Commitment to Environmental Justice for All (April 21, 2023). Subsequently on January 21, 2025, President Trump signed E.O. 14173 – Ending Illegal Discrimination and Restoring Merit-Based Opportunity. This E.O. revoked E.O. 12898 – Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations (February 11, 1994). As a result of E.O. 14154 and 14173, all federal environmental justice requirements are revoked and no longer applicable to the environmental review process.

Due to E.O. 14154 and E.O. 14173 rescissions, Environmental Justice references in this section are no longer valid and are not considered in the overall determination of significant impacts in this Final Environmental Assessment and will not be carried forward in the Finding of No Significant Impact:

> *E.O. 14154 – Unleashing American Energy (January 20, 2025) revoked E.O. 14096 – Revitalizing Our Nation's Commitment to Environmental Justice for All (April 21, 2023).*

C E R T I F I C A T E

STATE OF NEBRASKA)
: ss.
COUNTY OF LANCASTER)

I, Christine M. Salerno, Registered Professional Reporter, General Notary Public within and for the State of Nebraska, do hereby certify that the foregoing proceedings were taken by me in shorthand and thereafter reduced to typewriting by use of Computer-Aided Transcription, and the thirty-seven (37) pages contain a full, true and correct transcription of all the proceedings to the best of my ability;

That I am not a kin or in any way associated with any of the parties to said cause of action, or their counsel, and that I am not interested in the event thereof.

IN WITNESS WHEREOF, I hereunto affix my signature and seal this 19th of SEPTEMBER, 2024.

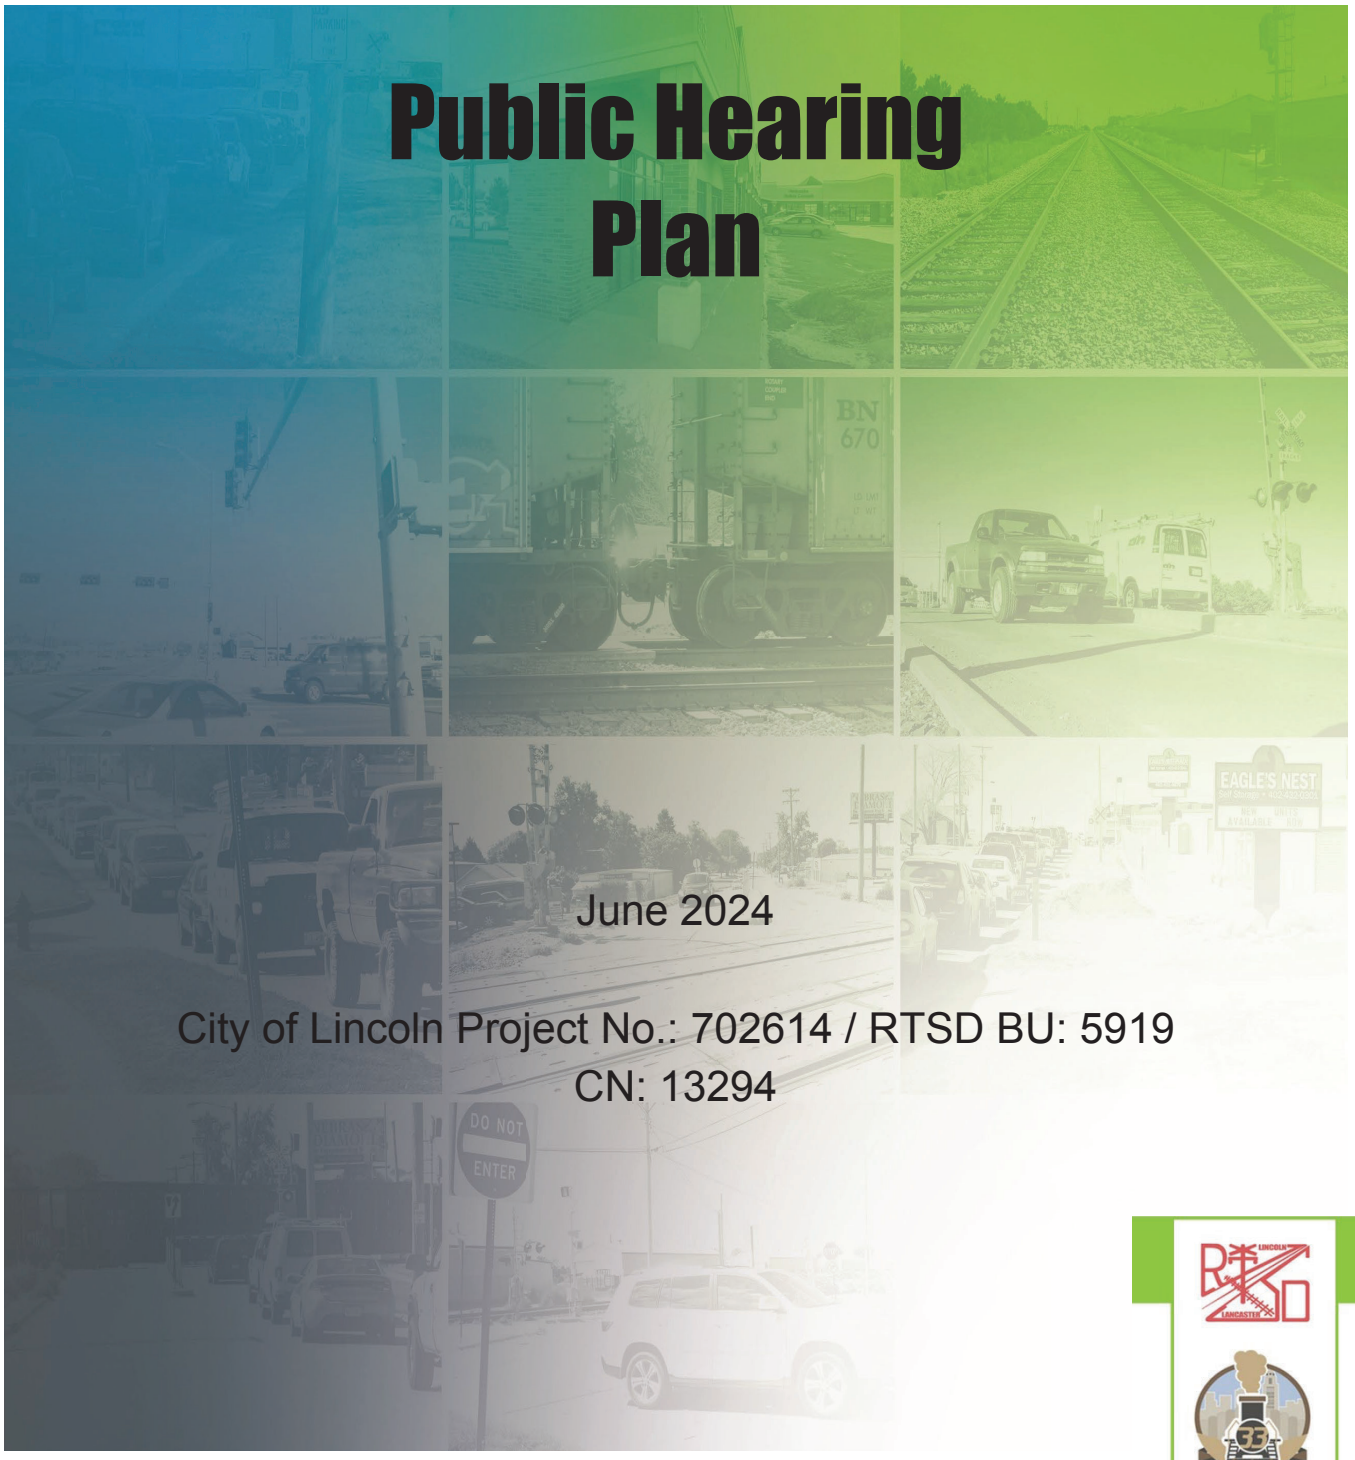

Christine M. Salerno, RPR
GENERAL NOTARY PUBLIC
Registered Professional Reporter

My Commission Expires: October 02, 2027.

Civil Rights Analysis

A detailed Civil Rights Analysis is available in *Section 4.4 Title VI/Environmental Justice* of the Draft Environmental Assessment (EA). The Draft EA was approved by the Federal Highway Administration in May 2024 and is available online at lincoln.ne.gov/City/Departments/RTSD/33rd-Cornhusker/Involvement.

ROW	Right-of-Way
RTSD	Railroad Transportation Safety District

PUBLIC HEARING PLAN

Draft EA Public and Agency Review Objectives

This document provides an overview of the steps and strategies to facilitate public and agency review of the 33rd/Cornhusker Viaduct, Lincoln Draft Environmental Assessment (EA). Public and agency review are required by the National Environmental Policy Act (NEPA) and provide an efficient and inclusive review and comment process that results in a better project with fewer approval and permitting hurdles. This process will be guided by the Nebraska Department of Transportation (NDOT) current Public Involvement Procedure and other applicable requirements. The objectives of the Draft EA (DEA) review process are to provide the public and agencies with clear and accessible information about the project and ample time and opportunity to review the document, post questions, or make comments regarding the project.

Draft Environmental Assessment Document Access and Review Opportunities

Notice of the availability of the DEA and public hearing will be provided through multiple channels described below, including an official legal notice. Electronic and hard copies of the EA will be available in the following accessible locations and by specific request through the contacts noted in the official legal notice, EA document and other notifications. Electronic and hard copies of the

DEA will be made available for public review and comment no less than 15 days prior to the public hearing.

EA Availability

Hard Copies

The body of the DEA with a weblink to the appendices will be made available for public review at the following locations:

Malone Community Center
2032 U Street, Lincoln, NE 68503
(temporary location is 4530 A Street, Lincoln, NE 68510)

Center for People
3901 North 27th Street, Unit 1, Lincoln, NE 68521

Victor E. Anderson Branch Library
3625 Touzalin Ave., Lincoln, NE 68507

City of Lincoln - Lincoln Transportation & Utilities
555 South 10th Street, Suite 208, Lincoln, NE 68508

Federal Highway Administration- Nebraska Division Office
Robert V. Denney Federal Building
100 Centennial Mall North, Room 200, Lincoln, NE 68508

Nebraska Department of Transportation – Headquarters
1500 Nebraska Parkway, Lincoln, NE 68509

Electronic – project website

An electronic version of the DEA will be posted on the project website, lincoln.ne.gov (search: 33rd and Cornhusker), in pdf format. In addition, an announcement of the public hearing, comment periods, and meeting materials including a comment form will also be published to the website.

Official Legal Notices

An official legal notice would be published in the *Lincoln Journal Star*, a Nebraska Press Association newspaper, at least 15 days prior to the public hearing (not including the day of the hearing). The official legal notice would include:

- Date, time, location and format of hearing

- Project description and history
- Project purpose and need
- Points of contact for additional information or accommodations
- Comment period beginning and end dates and how comments will be addressed
- Information about the DEA
- Where copies of the DEA are available

Notification Postcard

A postcard notification will be developed and delivered to properties in the vicinity of the project location using Every Door Direct Mail through the US Postal Service and contacts gathered throughout the project. The postcards will be mailed at least 15 days prior to the public hearing. Information on the postcard will be available in both English and Spanish. The notification will include:

- Date, time, location and format of hearing
- Points of contact for additional information or accommodations
- Comment period end dates
- Website to view the DEA and additional project information

Media Release

A media release will be prepared and distributed to local media outlets to announce the availability of the DEA and the public hearing approximately two weeks prior to the public hearing. Roger Figard will be the primary point of contact for media interviews at the hearing.

Email Notification

An email notification will be prepared and distributed to email list subscribers to announce the availability of the DEA and the public hearing approximately two weeks prior to the public hearing. The email will also include a link to hearing materials on the project website.

Title VI and Environmental Justice Compliance

In accordance with title VI of The Civil Rights Act of 1964 and Executive Orders 12898 and 13166, appropriate measures will be taken to ensure that opportunities to comment on and participate in the DEA review are provided to all interested individuals regardless of race, color, national origin, income status, or level of English proficiency. A Spanish-speaking population was identified in the initial Civil Rights analysis, and although the most recent analysis did not determine a presence of the same population, accommodations for Spanish-speakers will be provided, including:

- Legal notice, postcard notifications, fact sheets and comments forms will be provided in Spanish

- Spanish interpreters will be present at the public hearing
- Additional outreach to minority, low-income and non-English speaking populations within the project area will be performed in accordance with the Public Involvement Plan. Organizations / locations receiving hand-delivered or mailed notifications are below:

In addition, doorhangers or Project notifications will be hand delivered to the units above Virginia's Café, Lincoln Tent and Awning, and to strip malls within the study area. Project notifications would also be mailed directly to the owners and occupants of individual mobile homes within the study area.

Comments

All public and agency comments received on the DEA will be considered and a written response in the Final EA. Additionally, individual response letters will be provided to commenters in conjunction with the Final EA will be provided. If public or agency comments note errors or needed clarifications to the EA analysis or conclusions, these will be made during the Final EA process. All comments and responses will also be published with the Final EA in a matrix format. Notification of the Final EA will be through similar channels as the DEA. The Final EA will be posted on the project website. Multiple opportunities and formats for providing comments will be provided during the comment period.

Comment Period

The public comment period on the DEA will be a minimum of 30 days. Comments received during this period via the identified methods will be compiled and responded to in the Final EA. Additionally, individual written responses will be provided in coordination with the Final EA.

Comments at the Public Hearing

Comments may be provided in person at the public hearing, and a court reporter will be available to record oral comments received during the hearing.

Public Testimony

After the formal presentation, the facilitator will provide instructions on how comments will be received, considered, and responded to. The facilitator will also discuss other ways to provide input for those that do not wish to speak at the microphone to include private comments documented by the court reporter, comment forms, website comments, or direct email, phone or written correspondence to project contacts.

To use time efficiently, members of the public who wish to make a public comment at the microphone will be asked to sign up to speak. Commenters will be asked to minimize duplication of comments and/or questions and to keep their time at the microphone within the designated limit.

Oral Comments to Court Reporter

A second court reporter will be stationed near the comment table for anyone who would like to provide oral comments outside of the public testimony format. Staff at the open house stations will encourage people that wish to make official comments and not fill out a comment sheet to go to the court reporter to provide official comments.

Additional Opportunities to Provide Comments

The public hearing is the primary opportunity to provide comments. In addition, members of the public can submit comments through the following methods:

- Online comment form on the project website
- Emails, letters or phone calls to the project team via provided contact information
- Written comment form mailed or emailed to the project team

Public Hearing

Notifications

Notices of the public hearing will be provided through an official legal notice, media release, mailed postcard, email to project email list subscribers, project website and dynamic message signs.

Location

The public hearing will be held at a venue within or near the project area. The venue will be large enough to accommodate a minimum of 150 people with a layout conducive to the meeting format and meet all ADA requirements.

Format

The public hearing will be an open house format with formal presentation with an opportunity for oral and written comments.

Staffing

Sign in table and information stations will be staffed by project team members. During the presentation, the majority of staff will move from the open house area to the presentation area, and back to the open house following the presentation and public testimony. A staffing plan with specific individuals and roles will be developed prior to the dry run. In addition to project team members, two court reporters and one Spanish interpreter will also be present.

Dry Run

The project team will complete a dry run session two to three weeks prior to the public hearing to practice presentations and review roles and responsibilities during the hearing.

Schedule of Events

The schedule of events is as follows:

- 5:00 p.m. – Open house
- 5:30 p.m. – Formal presentation followed by public testimony
- Return to open house format following public testimony until 7:00 p.m.

Project Information Stations

Once the venue is confirmed, a room layout diagram will be developed. The following stations are anticipated for the public hearing:

- Welcome and Sign in (public and media): A sign in table will be placed near the entrance to welcome and record meeting attendees and distribute fact sheets
- Speaker Sign in: A separate sign in table will be placed near the presentation / public testimony area for those who wish to speak at the microphone to sign in
- Comments: Comment tables will be set up for the public to fill out comment and submit comment forms. A court reporter will be set up nearby for anyone who wishes to provide oral comments outside of the public testimony setting.

Project information stations will be placed around the room staffed by project representatives to explain the contents and answer questions.

- Welcome: (1 board)
- Project Introduction: Provide a high-level overview of the project (2 board)
- Purpose and Need: Present the project purpose and need. (1 board)
- Preferred Alternative: Present the current design of the preferred alternative with 3-D renderings, cross sections (33rd St., Adams St., Cornhusker Hwy) + 2 table maps (mosaic only). (4 boards)
- Right-of-Way: City of Lincoln & NDOT right-of-way staff will be available to discuss ROW and answer questions about the ROW process. (1 board to label the station, plan set sheets, exhibits from the EA, plus standard handouts on ROW process)
- Environmental Resources: Present the list of environmental resources that were considered in the EA (1 board)
- Temporary Construction Impacts – Summarize short term impacts during construction (1 board)
- Section 4(f) Resources: Summarize Section 4(f) impacts and provide opportunity to review and comment on the effects of the project on adjacent 4(f)resources (Overall, Trail Impacts, 44th & Gladstone Park/Fleming Fields, 34th & Madison Park + Wilderness Hills Property, (4 boards)
- Environmental Justice: Summarize environmental justice definition and present the potential impacts to environmental justice populations (1 board)
- Public Input: Outline previous public involvement efforts; consideration of comments in the EA and NEPA decision, and opportunities for public involvement in the future. (1 board)
- Project Schedule / Next Steps: Present the overall project schedule and anticipated next steps (2 boards)

Other Printed Materials

Additional printed materials needed for the public hearing are listed below.
Project Fact Sheet: The project fact sheet will include a brief description of the project, project purpose and need, the proposed action including potential impacts, estimated costs and timeline, how to provide comments, next steps and project contacts. The fact sheet will be provided in English (200 copies) and Spanish (25 copies).

Sign-in Sheets: Sign in sheets will be provided for the sign in table to accommodate 150 attendees. Hearing attendees will provide their names and contact information at the entrance to the venue. Separate sign in sheets will be provided for the public testimony.

Comment Forms: Comment forms will be provided that can be completed at the hearing, or mailed or emailed to project contacts following the hearing. Comment forms will be provided in English (200 copies) and Spanish (25 copies).

Presentation

A slide presentation in PowerPoint format with coordinating script will be prepared for the public hearing. The presentation will summarize the project's history, project scope, EA process and findings, opportunities for input, process for responding to comments and the next steps for the project. Much of the presentation content will be repurposed from the display boards. The presentation slides with script in English and Spanish will be made available in pdf format on the project's website.

Public Involvement Summary Memo

Following the completion of the comment review and response period, a public involvement summary memo will be prepared to summarize the public hearing notifications, comments received and responses provided.

Public Involvement Report

Following the completion of the summary memo, a public involvement report will be prepared to summarize and document the full public hearing process including notifications, materials presented, full transcript of the public testimony, comments received and responses provided.

Deliverables

The primary deliverables and activities for the public hearing include:

- Coordination of public hearing logistics
- Information for project website update including all public hearing materials
- Official legal notice and other hearing notifications
- Display boards
- Fact sheet
- Presentation and script
- Public hearing transcripts
- Responses to comments and comment response matrices
- Public Involvement Summary Memo
- Public Involvement Report

Schedule

The public hearing is scheduled for Thursday, September 5, 2024.

Notification

Lincoln/Lancaster County Railroad Transportation Safety District (RTSD)

NOTICE OF PUBLIC HEARING

5:00-7:00 PM; SEPTEMBER 5, 2024
Country Inn & Suites Lincoln North
5353 N. 27th Street
Lincoln, NE 68521

LCLC-5233(4) 33rd/Cornhusker Viaduct, Lincoln; C.N. 13294
RTSD BU 5919, City Project 702614

The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) will hold a public hearing to present the Draft Environmental Assessment (DEA) and accept public comments regarding the proposed transportation project in the vicinity of N. 33rd Street and Cornhusker Highway in the City of Lincoln, Lancaster County, Nebraska. The hearing will be held at Country Inn & Suites, 5353 N. 27th Street, on September 5, 2024. The format includes an open house at 5:00 p.m., a panel presentation at 5:30 p.m. followed by public testimony. Members of the public who wish to provide comments during the public testimony portion will be asked to sign up to speak; time will be limited to allow for maximum participation.

The purpose of the proposed project, identified as ***33rd/Cornhusker Viaduct, Lincoln,*** is to improve safety along the rail corridor between N. 27th and N. 48th streets by eliminating or reducing the potential conflict points between trains and other transportation modes (vehicles, pedestrians, and bicyclists). The project is needed due to the high volume of vehicular and train traffic in the area along the Burlington Northern Santa Fe (BNSF) rail corridor between N. 27th and N. 48th Streets. The high-volume traffic creates undesirable conditions regarding safety, traffic congestion, traffic delay, and mobility within the project area. In addition, facilities for walking, cycling, and public transit do not meet existing, or future (2040) needs for the area.

The proposed project would close the at-grade railroad crossings at N. 33rd Street and Adams Street by improving the roadway network in this area and constructing a grade separation across the BNSF Railway tracks at approximately N. 31st Street, south of Cornhusker Highway. The existing at-grade crossing a N. 44th Street would remain open to vehicle, bicycle and pedestrian traffic and would be improved to comply with the Americans with Disabilities Act (ADA) requirements. Cornhusker Highway would be expanded to six lanes with turn lanes from Deadmans Run to 35th Street. Additional side streets would be reconstructed to tie into the primary project elements and to maintain local connectivity. The project would also include new sidewalks and curb ramps and upgraded traffic signals. Reconstruction of the storm sewer system, sanitary system, water main system and traffic signal and underground fiber-optic lines would also be included.

The proposed project may require the acquisition of additional property rights which could include new right-of-way (ROW), control of access (CA), permanent easements (PE) and/or temporary easements (TE) for construction throughout the project area. Relocations may be required depending on the alternative selected. If your property would be impacted by this project, you would be contacted by a representative in the future once the design footprint has been established.

The proposed project would be constructed under full and partial closures. Closures would be phased and access to adjacent properties would be maintained but may be limited at times due to phasing requirements. Trail detours would be constructed or would use existing local roadways and sidewalks.

Minimal impacts are anticipated to trails and parks along the project. A Section 4(f) De minimis use is anticipated at Fleming Fields Recreation Sports Park, 34th and Madison Park, Huntington Trail, Dietrich Trail, and 33rd Street Trail. Temporary occupancy is anticipated at 45th and Gladstone Park. A Land Water Conservation Fund/Section 6(f) conversion for impacts at 34th and Madison Park would be required. This 1.8 acre park would be reduced in size by approximately 0.1 acres. Minor impacts are also anticipated to utilities, and wetlands Impacts are anticipated to environmental justice communities, however, with the mitigation measures included in the project, the impacts are not considered disproportionately high and adverse. There would be no impacts to threatened and endangered species through the implementation of mitigation measures.

Construction is anticipated to begin in Fall 2027 and be complete Fall 2029.

The DEA is provided for public input. It presents alternatives evaluated, impacts identified, and proposed mitigation measures for the project. The DEA is available online at lincoln.ne.gov (search: 33rd and Cornhusker) and during regular business hours at the following locations in Lincoln: Malone Community Center (4530 A Street), Center for People (3901 N. 27th Street), Victor E. Anderson Branch Library (3625 Touzalin Ave.), City of Lincoln Transportation & Utilities (555 S. 10th Street, Suite 208), Federal Highway Administration Nebraska Division Office (100 Centennial Mall North, Room 200), and Nebraska Department of Transportation Headquarters (1500 Nebraska Parkway).

The public hearing allows the public the formal opportunity to comment on the project. All interested persons are invited to attend the public hearing and present relevant comments and questions. Representatives from the RTSD, City of Lincoln and Consultant team will be on hand to answer questions and receive feedback. Public comments will be accepted through September 26, 2024 and must be postmarked or emailed by the date to be part of the official record. All comments and responses will be considered and included in the Final Environmental Assessment (EA), and all comments will receive individual responses. All comments should be sent to Stacey Roach, Olsson, 601 P Street, Suite 200, Lincoln, NE 68508 or 33rdcornhusker@olsson.com. Comments can also be submitted online at lincoln.ne.gov (search: 33rd and Cornhusker).

The RTSD will make every reasonable accommodation to provide an accessible meeting facility for all persons. Appropriate provisions for the hearing and visually challenged or persons with Limited English Proficiency (LEP) will be made if the RTSD is notified by August 30, 2024. Written materials will be available in English and Spanish. A Spanish interpreter will be available at the public hearing.

Requests for accommodations and project inquiries should be submitted to: City of Lincoln, Engineering Services, ATTN: Kris Humphrey, 949 West Bond Street, Suite 200, Lincoln, NE 68521. Voice telephone (402) 326-0617; e-mail khumphrey@lincoln.ne.gov; fax (402) 441-6576.

For more information, visit lincoln.ne.gov (search: 33rd and Cornhusker). For those without internet access, please contact the individual above.

33rd/Cornhusker Viaduct, Lincoln NOTICE OF PUBLIC HEARING

Lincoln/Lancaster County Railroad Transportation Safety District (RTSD)
NOTICE OF PUBLIC HEARING
5:00-7:00 PM; SEPTEMBER 5, 2024
Country Inn & Suites Lincoln North
5353 N. 27 th Street
Lincoln, NE 68521

LCLC-5233(4) 33rd/Cornhusker Viaduct, Lincoln; C.N. 13294 RTSD BU 5919, City Project 702614

The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) will hold a public hearing to present the Draft Environmental Assessment (DEA) and accept public comments regarding the proposed transportation project in the vicinity of N. 33 rd Street and Cornhusker Highway in the City of Lincoln, Lancaster County, Nebraska. The hearing will be held at Country Inn & Suites, 5353 N. 27 th Street, on September 5, 2024. The format includes an open house at 5:00 p.m., a panel presentation at 5:30 p.m. followed by public testimony. Members of the public who wish to provide comments during the public testimony portion will be asked to sign up to speak; time will be limited to allow for maximum participation.
The purpose of the proposed project, identified as ***33 rd / Cornhusker Viaduct, Lincoln,*** is to improve safety along the rail corridor between N. 27 th and N. 48 th streets by eliminating or reducing the potential conflict points between trains and other transportation modes (vehicles, pedestrians, and bicyclists). The project is needed due to the high volume of vehicular and train traffic in the area along the Burlington Northern Santa Fe (BNSF) rail corridor between N. 27th and N. 48th Streets. The high-volume traffic creates undesirable conditions regarding safety, traffic congestion, traffic delay, and mobility within the project area. In addition, facilities for walking, cycling, and public transit do not meet existing, or future (2040) needs for the area.
The proposed project would close the at-grade railroad crossings at N. 33rd Street and Adams Street by improving the roadway network in this area and constructing a grade separation across the BNSF Railway tracks at approximately N. 31st Street, south of Cornhusker Highway. The existing at-grade crossing a N. 44th Street would remain open to vehicle, bicycle and pedestrian traffic and would be improved to comply with the Americans with Disabilities Act (ADA) requirements. Cornhusker Highway would be expanded to six lanes with turn lanes from

from Deadmans Run to 35th Street. Additional side streets would be reconstructed to tie into the primary project elements and to maintain local connectivity. The project would also include new sidewalks and curb ramps and upgraded traffic signals. Reconstruction of the storm sewer system, sanitary system, water main system and traffic signal and underground fiber-optic lines would also be included.

The proposed project may require the acquisition of additional property rights which could include new right-of-way (ROW), control of access (CA), permanent easements (PE) and/or temporary easements (TE) for construction throughout the project area. Relocations may be required depending on the alternative selected. If your property would be impacted by this project, you would be contacted by a representative in the future once the design footprint has been established.

The proposed project would be constructed under full and partial closures. Closures would be phased and access to adjacent properties would be maintained but may be limited at times due to phasing requirements. Trail detours would be constructed or would use existing local roadways and sidewalks.

Minimal impacts are anticipated to trails and parks along the project. A Section 4(f) De minimis use is anticipated at Fleming Fields Recreation Sports Park, 34th and Madison Park, Huntington Trail, Dietrich Trail, and 33rd Street Trail. Temporary occupancy is anticipated at 45th and Gladstone Park. A Land Water Conservation Fund/Section 6(f) conversion for impacts at 34th and Madison Park would be required. This 1.8 acre park would be reduced in size by approximately 0.1 acres. Minor impacts are also anticipated to utilities, and wetlands Impacts are anticipated to environmental justice communities, however, with the mitigation measures included in the project, the impacts are not considered disproportionately high and adverse. There would be no impacts to threatened and endangered species through the implementation of mitigation measures.

Construction is anticipated to begin in Fall 2027 and be complete Fall 2029.

The DEA is provided for public input. It presents alternatives evaluated, impacts identified, and proposed mitigation measures for the project. The DEA is available online at lincoln.ne.gov (search: 33rd and Cornhusker) and during regular business hours at the following locations in Lincoln: Malone Community Center (4530 A Street), Center for People (3901 N. 27 th Street), Victor E. Anderson Branch Library (3625 Touzalin Ave.), City of Lincoln Transportation & Utilities (555 S. 10 th Street, Suite 208), Federal Highway Administration Nebraska Division Office (100 Centennial Mall North, Room 200), and Nebraska Department of Transportation Headquarters (1500 Nebraska Parkway).

The public hearing allows the public the formal opportunity to comment on the project. All interested persons are invited to attend the public hearing and present relevant comments and questions. Representatives from the RTSD, City of Lincoln and Consultant team will be on hand to answer questions and receive feedback. Public comments will be accepted through September 26, 2024 and must be postmarked or emailed by the date to be part of the official record. All comments and responses will be considered and included in the Final Environmental Assessment (EA), and all comments will receive individual responses. All comments should be sent to Stacey Roach, Olsson, 601 P Street, Suite 200, Lincoln, NE 68508 or 33rdcornhusker@olsson.com . Comments can also be submitted online at lincoln.ne.gov (search: 33rd and Cornhusker).

The RTSD will make every reasonable accommodation to provide an accessible meeting facility for all persons. Appropriate provisions for the hearing and visually challenged or persons with Limited English Proficiency (LEP) will be made if the RTSD is notified by August 30, 2024. Written materials will be available in English and Spanish. A Spanish interpreter will be available at the public hearing.

Requests for accommodations and project inquiries should be submitted to: City of Lincoln, Engineering Services, ATTN: Kris Humphrey, 949 West Bond Street, Suite 200, Lincoln, NE 68521. Voice telephone (402) 326-0617; e-mail khumphrey@lincoln.ne.gov ; fax (402) 441-6576.

For more information, visit lincoln.ne.gov (search: 33rd and Cornhusker). For those without internet access, please contact the individual above.

The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) will hold a public hearing for a proposed transportation project in the vicinity of N. 33rd Street and Cornhusker Highway. The RTSD has prepared a Draft Environmental Assessment (DEA) to evaluate the potential effects of the project. The public hearing will be held to present an overview of the DEA and provide a formal opportunity for the public to comment on the project.

The DEA is available online at lincoln.ne.gov (search: 33rd and Cornhusker). A list of available locations to access print copies is available on the website or by contacting the individuals below.

YOUR FEEDBACK IS IMPORTANT! PUBLIC COMMENTS WILL BE ACCEPTED THROUGH SEPTEMBER 26, 2024.

El Distrito de Seguridad del Transporte Ferroviario (RTSD) de Lincoln/Lancaster llevará a cabo una audiencia pública para un proyecto de transporte propuesto en las cercanías de N. 33rd Street y autopista Cornhusker. El RTSD ha preparado un Borrador de Evaluación Ambiental (DEA) para evaluar los efectos potenciales del proyecto. La audiencia pública se llevará a cabo para presentar una descripción general de la DEA y brindar una oportunidad formal para que el público comente sobre el proyecto.

La DEA está disponible en línea en lincoln.ne.gov (búsqueda: 33rd y Cornhusker). Una lista de ubicaciones disponibles para acceder a copias impresas está disponible en el sitio web o comunicándose con las personas a continuación.

¡TU OPINIÓN ES IMPORTANTE! LOS COMENTARIOS PÚBLICOS SERÁN ACEPTADOS HASTA EL 26 DE SEPTIEMBRE 2024.

PUBLIC HEARING
SEPTEMBER 5, 2024

LCLC-5233(4) 33RD/CORNHUSKER VIADUCT, LINCOLN; C.N. 13294
RTSD BU 5919 | CITY PROJECT 702614

The City of Lincoln complies with Title VI of the Civil Rights Act of 1964 and Section 504 of the Rehabilitation Act of 1973 guidelines. Ensuring the public's access to and participation in public meetings is a priority for the City of Lincoln. In the event you are in need of a reasonable accommodation in order to attend or participate in a public meeting conducted by the City of Lincoln, please contact the Director of Equity and Diversity, Lincoln Commission on Human Rights at 402-441-7624, 555 S 10th St., Ste. 304, Lincoln, NE 68508 as soon as possible before the scheduled meeting date in order to make your request.

33rd and Cornhusker Project Public Hearing Set for September 5

Published on August 22, 2024

Lincoln Transportation and Utilities (LTU) and the Railroad Transportation Safety District (RTSD) invite residents to a public hearing Thursday, September 5, regarding a proposed transportation safety project in the area of 33rd Street and Cornhusker Highway. The event will be from 5 to 7 p.m. at the Country Inn and Suites Lincoln North, 5353 North 27th St. A formal presentation will begin at 5 p.m., followed by public testimony at 5:30 p.m.

The purpose for the proposed project between North 27th and North 48th streets is to eliminate or reduce conflict points between trains and vehicles, pedestrians and bicyclists; to reduce delays for emergency responders, motorists, pedestrians and bicyclists when streets are blocked by trains; to reduce congestion; and to improve mobility and multimodal connectivity.

The RTSD has prepared a Draft Environmental Assessment (DEA). At the hearing, the RTSD will present the DEA and accept public comments. Representatives from the RTSD, LTU, and consultant team will be available to answer questions and receive feedback. Hearing materials and comment forms are available at lincoln.ne.gov/33rdCornhusker (https://lincoln.ne.gov/33rdCornhusker). Comments will be accepted through September 26.

The meeting room is accessible for persons with disabilities, and a Spanish interpreter will be available. To make accommodations for those with hearing and/or vision impairments and those with limited English proficiency, call the RTSD at 402-326-0617 by August 30. Written materials will be available in English and Spanish.

For more information about this project, visit lincoln.ne.gov/33rdCornhusker (https://lincoln.ne.gov/33rdCornhusker) or contact Roger Figard, RTSD, 402-525-56 or rfigard@lincoln.ne.gov (mailto:rfigard@lincoln.ne.gov) or Kris Humphrey, LTU, a 326-0617 or khumphrey@lincoln.ne.gov (mailto:khumphrey@lincoln.ne.gov).

33RD & CORNHUSKER Intersection Improvement Project

THE PROJECT | PROJECT PHASES | COMMUNITY INVOLVEMENT

Project Goals | Schedule | FAQ | Project Updates

The BNSF railway currently carries nearly 65 trains daily on the double-track mainline railroad through northeast Lincoln, resulting in at least 3.5 hours per day that each of the at-grade railroad crossings at N. 33rd Street and Adams Street are blocked to vehicular traffic. Combined, these two crossings have one of the highest exposure ratings and crash rates in Nebraska.

Project Area Map

Public Hearing on the Draft Environmental Assessment

September 5, 2024

5:00 - 7:00 PM

Meeting info

The Railroad Transportation Safety District (RTSD) is leading the charge to make travel in this vicinity safe and efficient for all transportation types. The first step in doing so was the Planning and Environmental Linkages (PEL) Study, which evaluated environmental constraints and potential transportation improvements.

Before making a major financial investment in the transportation improvements, the RTSD and the City of Lincoln want to make sure that improvements in this area also fit the needs of the future of northeast Lincoln by creating a community-consensus built Subarea Plan and Cornhusker Highway Corridor Enhancement Plan.

Railroad Transportation Safety District (RTSD)

The Railroad Transportation Safety District, or RTSD, is a political subdivision that was created by the Nebraska legislature in 1971. The RTSD provides funding for railroad safety related projects throughout Lincoln and Lancaster County.

More info on the RTSD

Future project phases include environmental review, preliminary engineering, right-of-way acquisition, and construction.

PROJECT GOALS

Improve Safety

Eliminate or reduce the conflict points between trains, vehicles, pedestrians, and bicyclists.

Reduce Delays

Reduce delay for motorists, pedestrians, and bicyclists crossing the rail corridor.

Reduce Congestion

Accommodate existing and future traffic (Year 2040) to reduce congestion along roadways crossing the rail corridor.

Improved Mobility

Improve mobility across the rail corridor in north Lincoln.

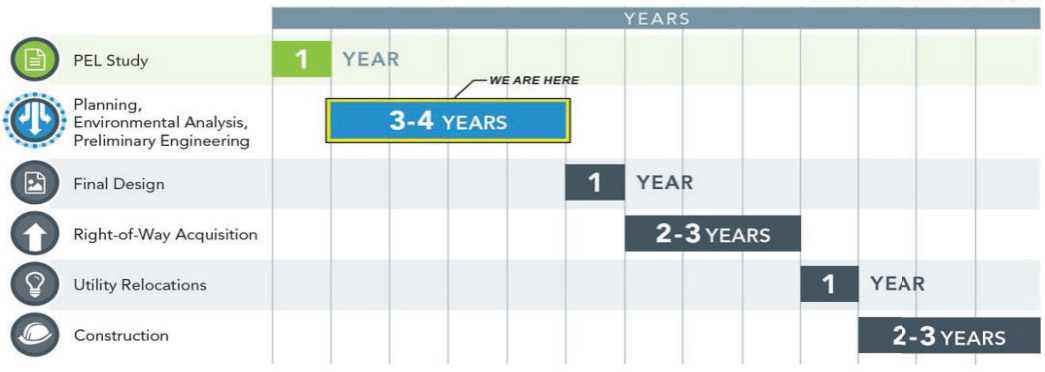

Better Connection

Improve multi-modal connectivity in north Lincoln for vehicles, pedestrians, bicyclists, and bus transit.

Element	Accommodation Area	Yes	No	N/A
Transportation	Is the facility/meeting location accessible by public transportation?	☒	☐	☐
	If yes, is public transportation available at the time of the meeting/training?	☒	☐	☐
Evacuation	Do you know the emergency evacuation plans for the meeting/training location?	☒	☐	☐
Parking	Does the building have accessible *(handicap)* parking spaces?	☒	☐	☐
	If yes, are they at least 8' wide and have 5' aisles next to them?	☒	☐	☐
Sidewalk	Are there unobstructed curb ramps leading to the sidewalk *(walkway)*?	☒	☐	☐
Walkway	Is there a walkway from the parking lot to the building, at least 36" wide?	☒	☐	☐
	Does the walkway have a stable and firm surface?	☒	☐	☐
	If the accessible route is different from the primary route to and through the building, can you post signs with the wheelchair symbol that slow the route?	☐	☐	☒
	Is the walkway level and free of steps?	☒	☐	☐
	If no, is there a ramp at least 36" wide?	☐	☐	☒
	If there is a ramp, does it have a gentle slop *(1" rise to 12" length)*?	☒	☐	☐
Entrance/Doors	Is the door at least 36" wide *(wide enough for a wheelchair)*?	☒	☐	☐
	Can the hardware be operated with one hand *(level, push plate, etc.)* with minimum of twisting or grasping?	☒	☐	☐
	Are the handles low enough to reach *(maximum 48" high)*?	☒	☐	☐
	Can the door be pushed open easily?	☒	☐	☐
	Is the threshold no more than ½" high and beveled?	☒	☐	☐
	When a vestibule, is there a minimum of 48" between the sets of doors?	☒	☐	☐

Element	Accommodation Area	Yes	No	N/A
Floors	Are the floors hard and not slippery?	☒	☐	☐
	Is there a floor mat to dry feet and crutch tips to prevent slipping?	☒	☐	☐
Corridors	Is there a 36” corridor, from the entrance to where the meeting/training is held?	☒	☐	☐
	Is the path free of objects projecting 4” maximum into the corridor?	☒	☐	☐
Elevators	Is there an elevator in the facility where the meeting/ training is located?	☒	☐	☐
	If yes, is it a working one that is large enough for a wheelchair?	☒	☐	☐
	Are the controls within reach *(maximum 48”)*?	☒	☐	☐
	Do the controls have Braille?	☒	☐	☐
	Is there an audible signal ringing at each floor?	☒	☐	☐
	Is there an audible two-way emergency communication system in the elevator?	☒	☐	☐
Meeting/Training Rooms	Is there enough clearance around the table for a wheelchair to move?	☒	☐	☐
	Can the wheelchair pull under the edge of the table to sit close?	☒	☐	☐
Restrooms	Is there a wide, accessible path to the restroom?	☒	☐	☐
	Is there a toilet stall wide enough that a wheelchair can enter and close the door behind? Interior space to turn around?	☒	☐	☐
	Is the water closet *(toilet)* 17-19 inches high to the rim?	☒	☐	☐
	Can the wheelchair roll under the sink *(29” to the bottom)*?	☒	☐	☐
	Can the faucets be reached and turned on easily?	☒	☐	☐
	Are the dispensers *(soap, towel, etc.)* reachable *(maximum 48” high)*?	☒	☐	☐
	Is there a mirror at an accessible height *(bottom of the mirror 44” above the floor)*?	☒	☐	☐
Fire Alarms	Are there flash fire alarm signals in the building, in the meeting/ training room?	☒	☐	☐
Signage	Is there Braille text in the signage at the facility?	☒	☐	☐

Support Materials

Cover Slide (Roger): On behalf of the Lincoln Lancaster County Railroad Transportation Safety District, or RTSD, and our project partners, I would like to welcome you to the public hearing for the draft Environmental Assessment for the 33rd & Cornhusker project. I am Roger Figard, Executive Director of the RTSD. The RTSD has been working closely with the City of Lincoln, the Nebraska Department of Transportation, and the Federal Highway Administration on this project for many years. This is an exciting milestone for the community as we continue to move the project forward to the next stages. This project is the highest priority for the RTSD. This project is a major investment into the area with plans to increase convenience, efficiency, and safety for travelers. Kris Humphrey with the City of Lincoln Transportation and Utilities who serves as the project manager for the RTSD will address some housekeeping items before we get started with the presentation.

Welcome!

Sign up to provide verbal comments after this presentation

N. 33rd & Cornhusker

Welcome (Kris): Thank you, Roger. Again, welcome everyone and thank you for joining us. I am Kris Humphrey, the Assistant City Engineer for the City of Lincoln and the RTSD's project manager. The City has been supporting the RTSD's 33rd and Cornhusker viaduct project by providing management oversight and technical review. We will be receiving public testimony following the presentation so please sign up on the testimony sign in sheet located HERE if you intend to provide your comments at the microphone. All the materials presented at the meeting tonight are available on the project website at Lincoln.ne.gov, search 33rd and Cornhusker. This meeting is being recorded by the reporters here tonight. A full transcript of the meeting will be included in the Final Environmental Assessment.

Why We're Here

Present the most current project information

Listen to and collect your comments

N. 33rd & Cornhusker

Why We're Here (Kris): We are here tonight to share with you the most current information about the project, including presenting the preferred alternative and the findings from the environmental analysis. Also, we are here to listen to the community and collect your comments about the project. The RTSD will respond in writing to all comments before any final decisions are made.

Agenda

- Project Overview
- Project Purpose and Need
- Project History
- Preferred Alternative
- Property Acquisition

N. 33rd & Cornhusker

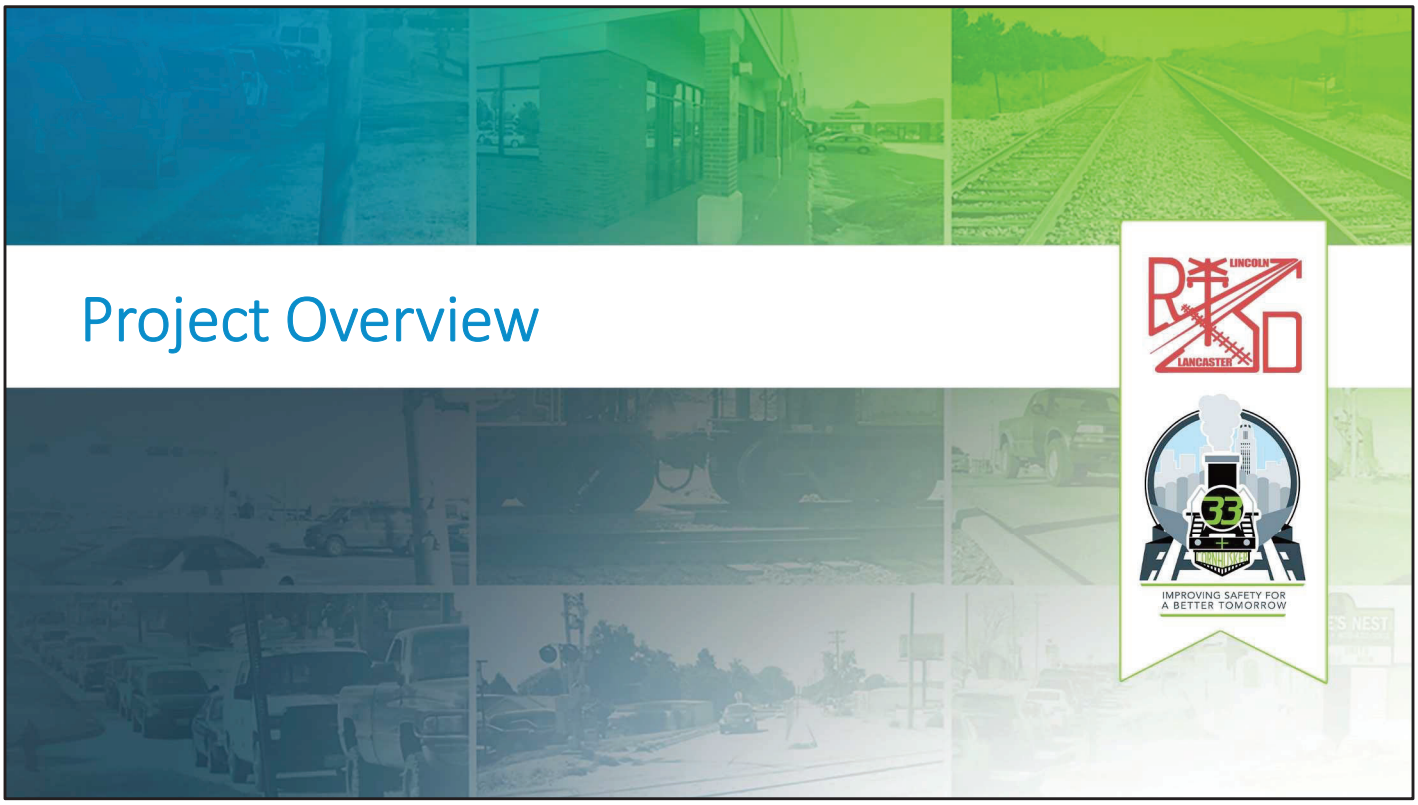

Agenda 1 (Kris): Our agenda for tonight includes several items pertaining to the project and opportunities for public input. An overview of the project, the project's purpose and need, a brief history of how we got here, the preferred alternative, and process for property acquisition will be presented.

Agenda

- Draft Environmental Assessment Findings
- Next Steps
- Draft Environmental Assessment Review and Comments
- Public Testimony

N. 33rd & Cornhusker

Agenda 2 (Kris): We will then dive into the findings of the draft environmental assessment, next steps for the project including the anticipated schedule, the process for reviewing the draft environmental assessment and opportunities for public comment. Those topics will conclude the presentation and we will move into the public testimony portion of the hearing.

Project Overview
LINCOLN
LANCASTER
33
IMPROVING SAFETY FOR
A BETTER TOMORROW

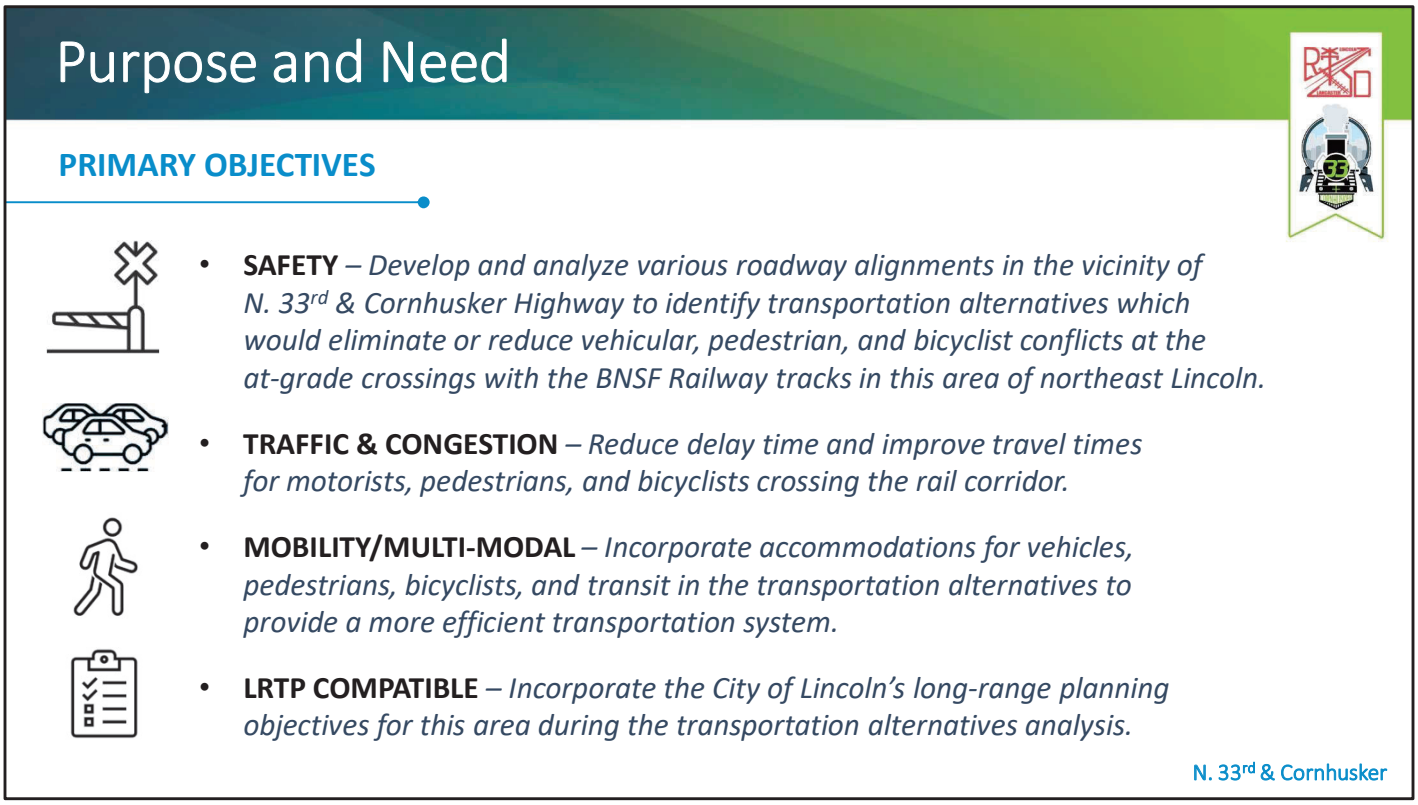

Kris

Project Overview (Kris): In 2019, the BNSF railway carried nearly 65 trains per day through Northeast Lincoln, resulting in at least three and a half hours per day that the at-grade crossings at N. 33rd Street and Adams Street were blocked to traffic. More recent counts suggest the number of trains per day is closer to 46. Regardless, the number of trains multiplied by the average daily vehicle traffic puts these two crossings near the top of the list for the highest exposure ratings in Nebraska. The Nebraska Department of Transportation has identified these two crossings within their top five crossings in the state that need improved. This project would eliminate the potential for train-to-vehicle and train-to-pedestrian collisions and provide a safer, better-connected environment for vehicles, bicycles and pedestrians.

Purpose and Need
LINCOLN
LANCASTER
33
IMPROVING SAFETY FOR
A BETTER TOMORROW

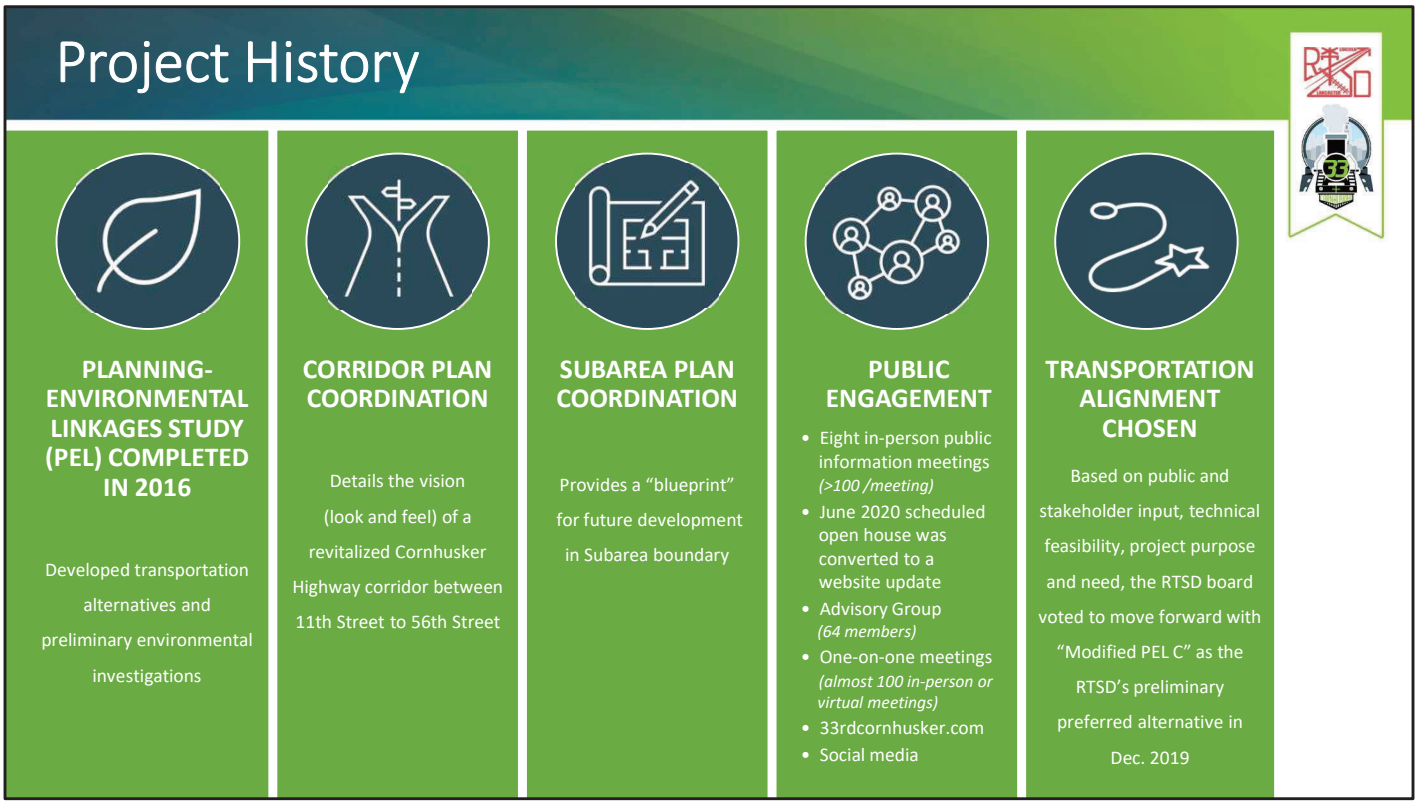

Kris

Purpose and Need (Kris): The purpose of the proposed project is to improve safety along the rail corridor between N. 27th and N. 48th streets by eliminating or reducing the potential conflict points between trains and other transportation modes like vehicles, pedestrians, and bicyclists. The project is needed due to the high volume of vehicular and train traffic in the area along the Burlington Northern Sante Fe rail corridor between N. 27th and N. 48th Streets. The high-volume traffic creates undesirable conditions regarding safety, traffic congestion, traffic delay, and mobility within the project area. In addition, facilities for walking, cycling, and public transit do not meet existing, or future year 2040 needs for the area.

Project History
LINCOLN
LANCASTER
IMPROVING SAFETY FOR
A BETTER TOMORROW

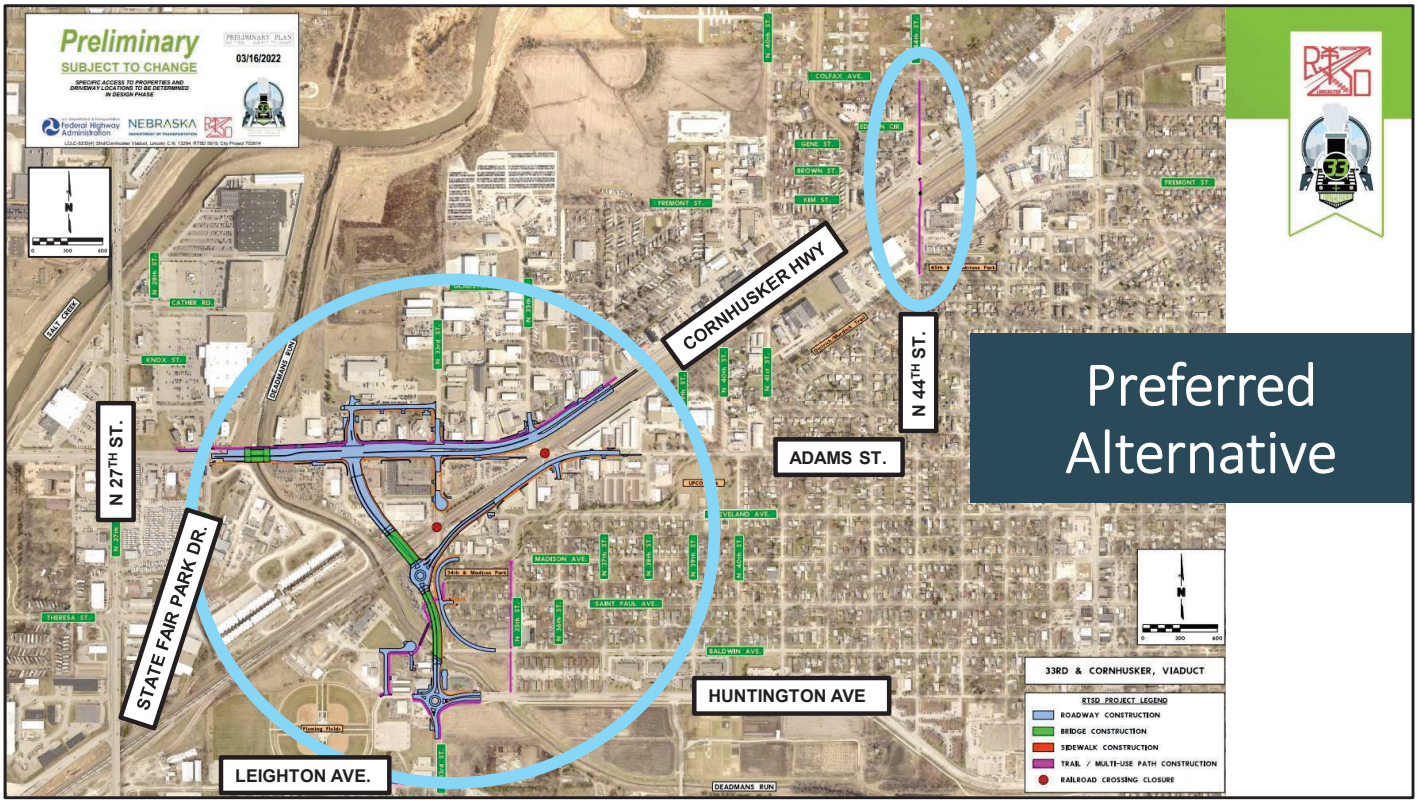

Kris

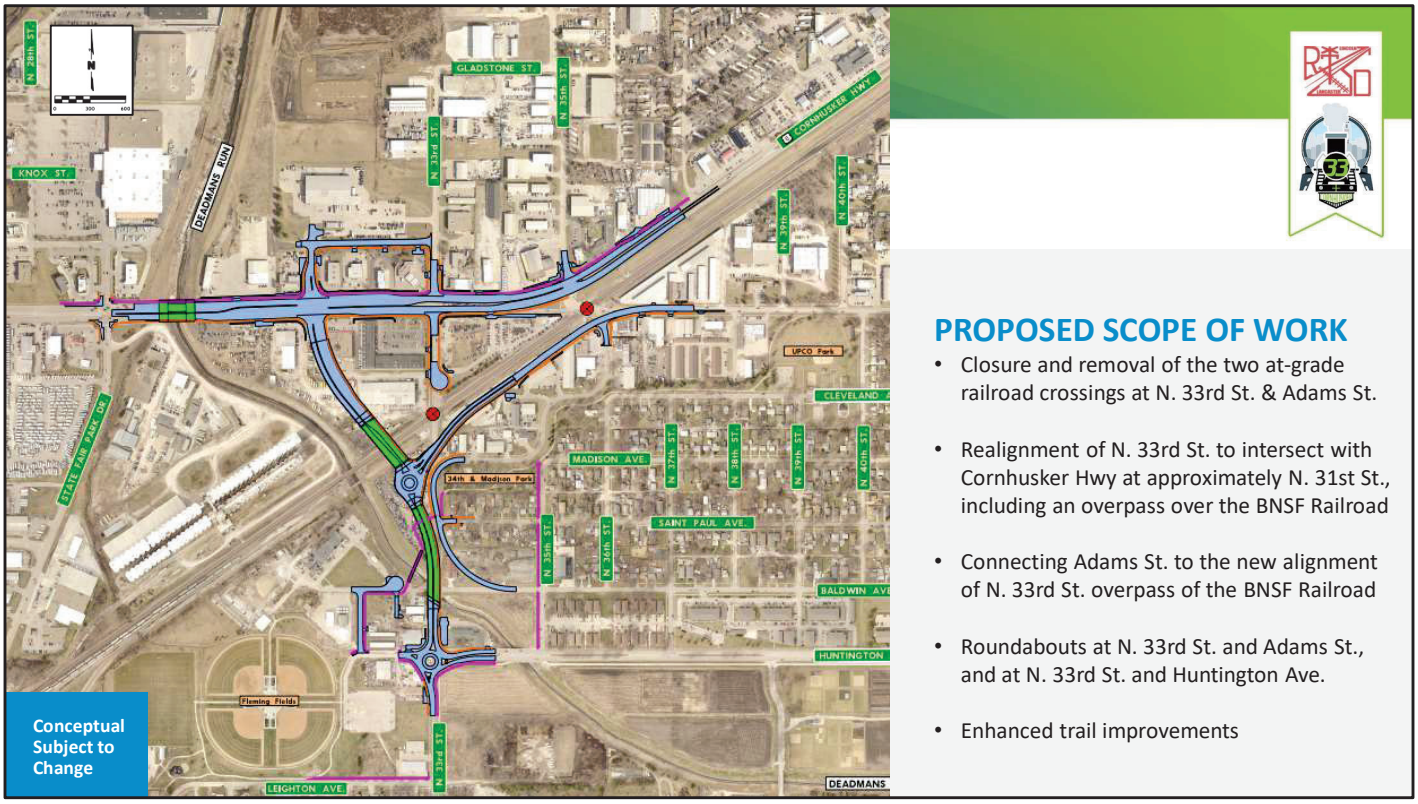

Project History (Kris): The project began with a planning and environmental linkages study, or PEL study, which was completed in 2016. The PEL study developed transportation alternatives and preliminary environmental investigations. Before the RTSD made a major investment in the area, a corridor plan was developed to detail the future look and feel for a revitalized Cornhusker Highway corridor to make sure the transportation solution fit with the future vision. This was followed by a subarea plan that provided a blueprint for future development, again, to make sure that the future transportation project fit within the blueprint. Extensive public engagement has been coordinated for the project thus far, including eight public meetings and nearly 100 one-on-one meetings with adjacent stakeholders. Public and stakeholder input, technical feasibility and meeting the project's purpose and need has gotten us to where we are today with the preferred transportation alternative. The RTSD has hired Olsson to perform the preliminary design and environmental review for the project. Now I'll turn it over to Aaron Keller with Olsson to talk about the preferred alternative.

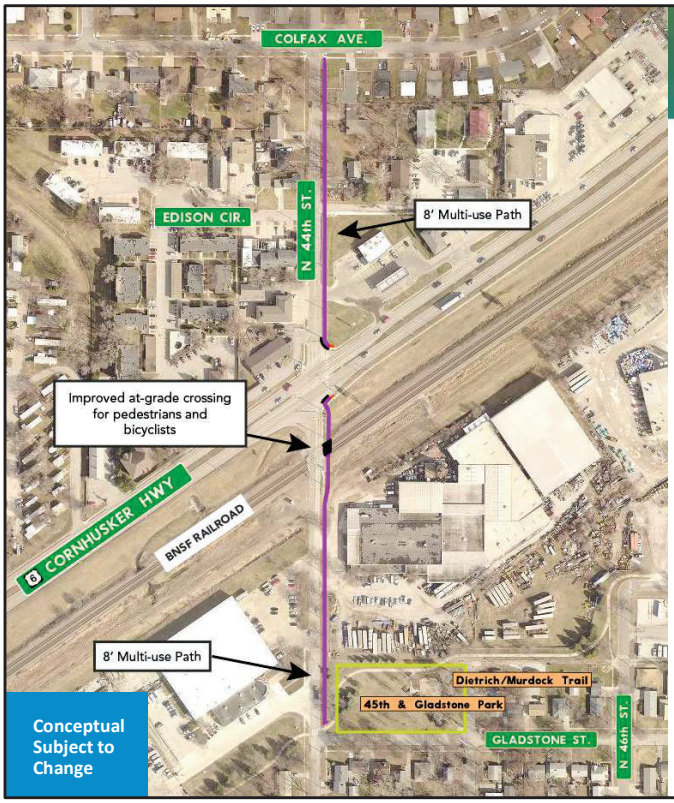

Transition to Aaron

Preferred Alternative (Aaron): Hello. I'm Aaron Keller, Olsson's project manager for this project. The preferred alternative includes two project areas. The area where most of the work would occur is primarily along Cornhusker Highway from State Fair Park Drive to near North 39th Street and just north of Cornhusker Highway south to just south of North 33rd Street and Huntington Avenue. Additional work would be completed on North 44th Street from Colfax Avenue to just north of Gladstone Street.

Proposed Scope of Work 1 (Aaron): The preferred alternative would close the two at-grade railroad crossings at N. 33rd Street and Adams Street and construct a grade separation viaduct over the BNSF Railway tracks at approximately N. 31st Street, south of Cornhusker Highway. The project will connect Adams Street to the new alignment of N. 33rd Street and the overpass of the BNSF Railroad. Roundabouts would be constructed at N. 33rd and Adams streets and at N. 33rd Street and Huntington Avenue. In addition, Cornhusker Highway would be expanded to six lanes with turn lanes from approximately State Fair Park Drive to 35th Street. Additional side streets would be reconstructed to tie into the primary project elements and to maintain local connectivity. The project would also include new sidewalks and curb ramps and upgraded traffic signals. Reconstruction of the storm sewer system, sanitary system, water main system, private utilities and underground fiber-optic lines would also be included. Trail enhancements will also improve connectivity. This map and the map on the following slide are the same maps printed on large paper in the center of the room.

PROPOSED SCOPE OF WORK

- N 44th Street at-grade crossing will remain open to vehicles, pedestrians, and bicyclists
- Wider multi-use path will replace existing sidewalk on east side
- Multi-use path at-grade crossing will be constructed to ADA regulations
- Provides for neighborhood connectivity north and south of Cornhusker Highway

N. 33rd & Cornhusker

Proposed Scope of Work 2 (Aaron): Additionally, the existing at-grade crossing a N. 44th Street would remain open to vehicle, bicycle and pedestrian traffic and would be improved to comply with the Americans with Disabilities Act requirements. A wider multi-use path would replace the sidewalk on the east side of 44th Street. These improvements provide better connectivity to neighborhoods north and south of Cornhusker Highway.

3D Rendering (Aaron): Here's what the area would look like following the completion of construction.

Property Acquisition & Relocation
LINCOLN
LANCASTER
33
IMPROVING SAFETY FOR
A BETTER TOMORROW

Aaron

Property Acquisition & Relocation

Project would require additional property rights which could include:

- New right-of-way
- Permanent easements
- Temporary easements

Some relocations would be necessary

N. 33rd & Cornhusker

Property Acquisition & Relocation 1 (Aaron): This project would require additional property rights to construct the new roadway network which could include new right-of-way, permanent easements and temporary easements. Some relocations would be necessary.

Property Acquisition & Relocation

If your property is impacted, a project representative will contact you once the design footprint has been established.

Property acquisition process will follow federal and state requirements.

N. 33rd & Cornhusker

Property Acquisition & Relocation 2 (Aaron): If your property is impacted, a project representative will contact you once the design footprint has been established. There is a staff member at the right-of-way station in the back of the room with a set of preliminary right-of-way plans. Please visit that station if you think your property might be impacted. The property acquisition process will follow federal and state requirements according to the Uniform Act. Next, I'll turn it over to Amy Cherko with Olsson to share the draft environmental assessment findings.

Draft Environmental Assessment Findings
LINCOLN
LANCASTER
IMPROVING SAFETY FOR
A BETTER TOMORROW

Amy

Evaluated Environmental Resources

- Social
- Economic
- Natural Environment
  - Wetlands, waters and floodplains
  - Vegetation and wildlife
  - Threatened and endangered species
  - Air quality
  - Hazardous materials and waste

N. 33rd & Cornhusker

Evaluated Environmental Resources (Amy): Hello, I'm Amy Cherko, Senior Team Leader with Olsson and one of the primary authors of the environmental assessment document. As required by the National Environmental Policy Act, or NEPA, the project team evaluated social, economic and natural environmental resources for potential impacts due to the proposed project. A full list of these resources can be found on the poster in the back of the room. Of the resources evaluated, there would be some temporary and permanent impacts, however, many of the impacts would be mitigated.

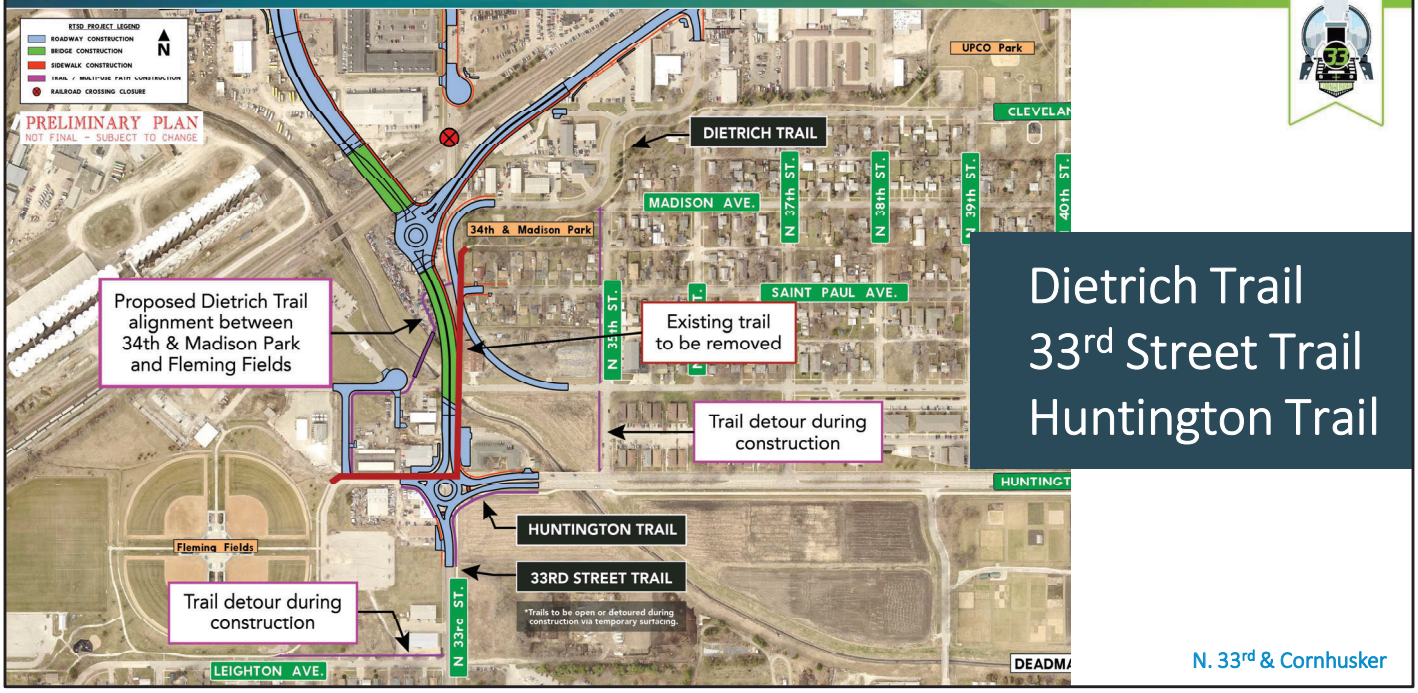

Temporary Construction Impacts

- Construction noise and dust
- Lane closures and detours
- Access to adjoining properties
- Minor visual impacts associated with construction equipment and activities

N. 33rd & Cornhusker

Temporary Construction Impacts (Amy): We anticipate temporary impacts during construction like noise and dust, lane closures and detours. Access to properties would be maintained at all times but could be limited during certain periods. Minor visual impacts are also anticipated for things like equipment, material storage and staging, and other construction activities.

Trail Impacts

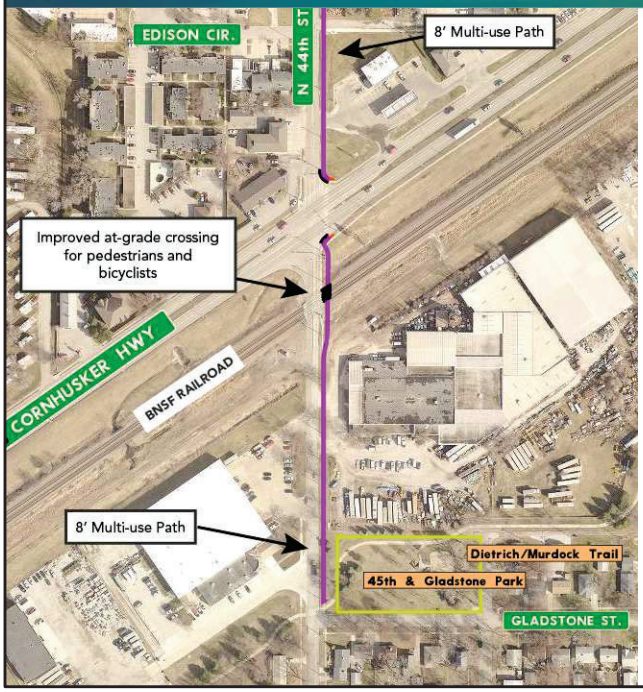

Dietrich Trail
33rd Street Trail
Huntington Trail

N. 33rd & Cornhusker

Trail Impacts (Amy): Impacts to area trails include the removal of the existing segment of the Dietrich Trail (shown in red). The existing at-grade crossing will be replaced with a new segment of the Dietrich Trail to connect 34th & Madison Park and Fleming Fields. Trail detours are anticipated during construction.

45th & Gladstone Park Impacts

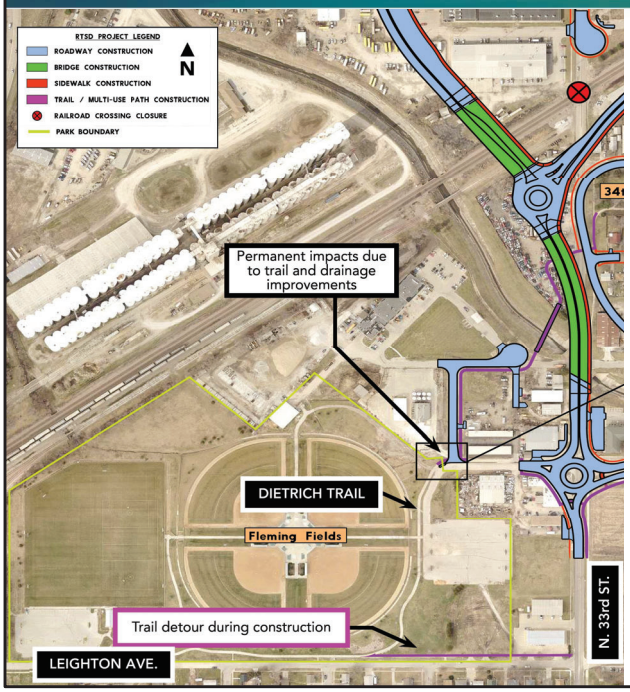

- Trail continuity and park access would be maintained
- No permanent impacts

N. 33rd & Cornhusker

45th & Gladstone Park Impacts (Amy): As part of a dedicated trail bridge over Deadmans Run, temporary impacts to 45th and Gladstone Park are anticipated, however, trail continuity and access to the park would be maintained at all times. No permanent impacts are anticipated at this location and the project would not impact the activities, attributes, and features of the property.

Fleming Fields Impacts

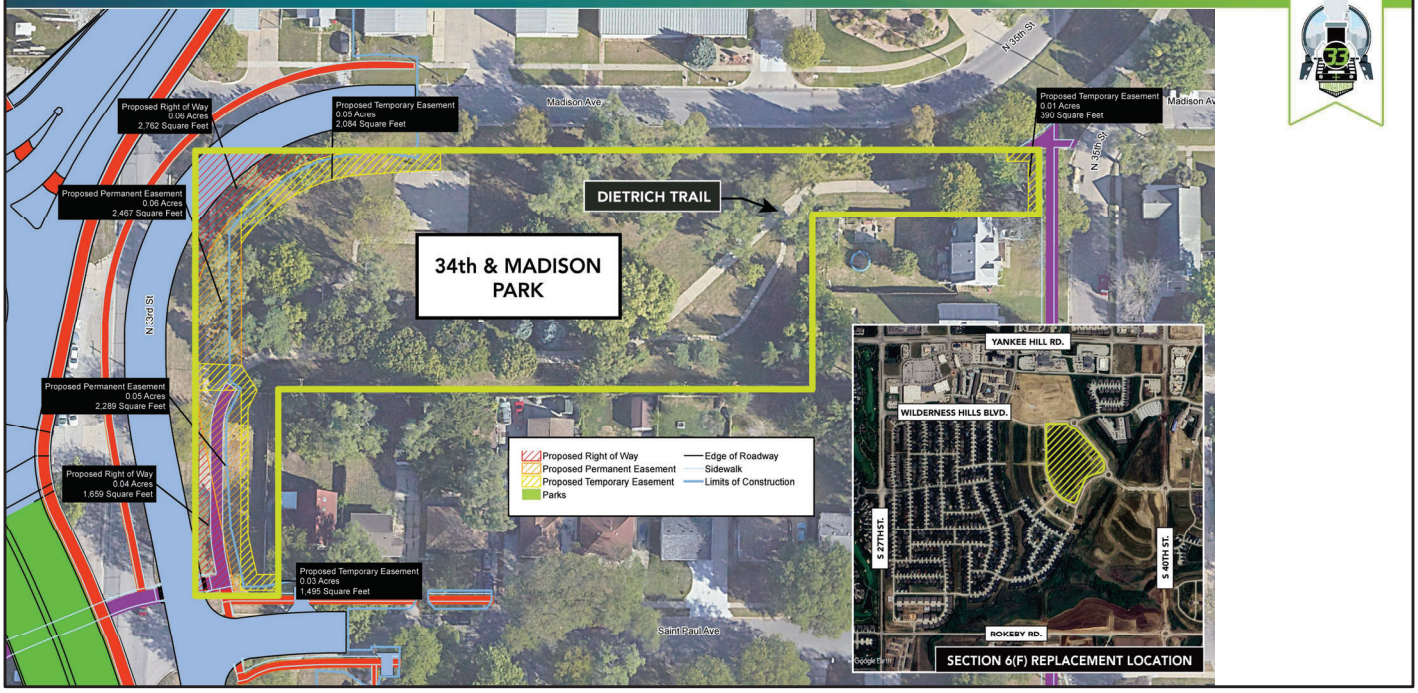

- Temporary impacts – 0.02 acres
- Permanent impacts – 0.05 acres

N. 33rd & Cornhusker

Fleming Fields Impacts (Amy): Temporary and permanent impacts are anticipated at Fleming Fields. There would be permanent impacts adjacent to the access drive on the northeast side of the park resulting in a five-one hundredths of an acre of permanent easement due to the construction of trail and drainage improvements. This is about two thousand two hundred square feet. A temporary easement of two-one hundredths of an acre, or eight hundred seventy square feet is also anticipated near the same area during construction. Trail continuity through the use of detours on the Dietrich Trail, Huntington Trail and 33rd Street Trail would be maintained at all times along with access to the ballfield and other park amenities.

LWCF/Section 6(f) Impacts

LWCF/Section 6(f) Impacts (Amy): A Land and Water Conservation Fund / Section 6(f) conversion for impacts to 34th and Madison Park would be required. This 1.8-acre park would be reduced in size by approximately one tenth of an acre. Existing amenities within the park boundary, such as the basketball court and the gazebo, would not be impacted. The replacement property for this the part property is located near South 40th Street and Wilderness Hills Boulevard as part of an existing city park.

Other Environmental Resources

- Utilities
- Wetlands
- Environmental justice communities
- Threatened and endangered species

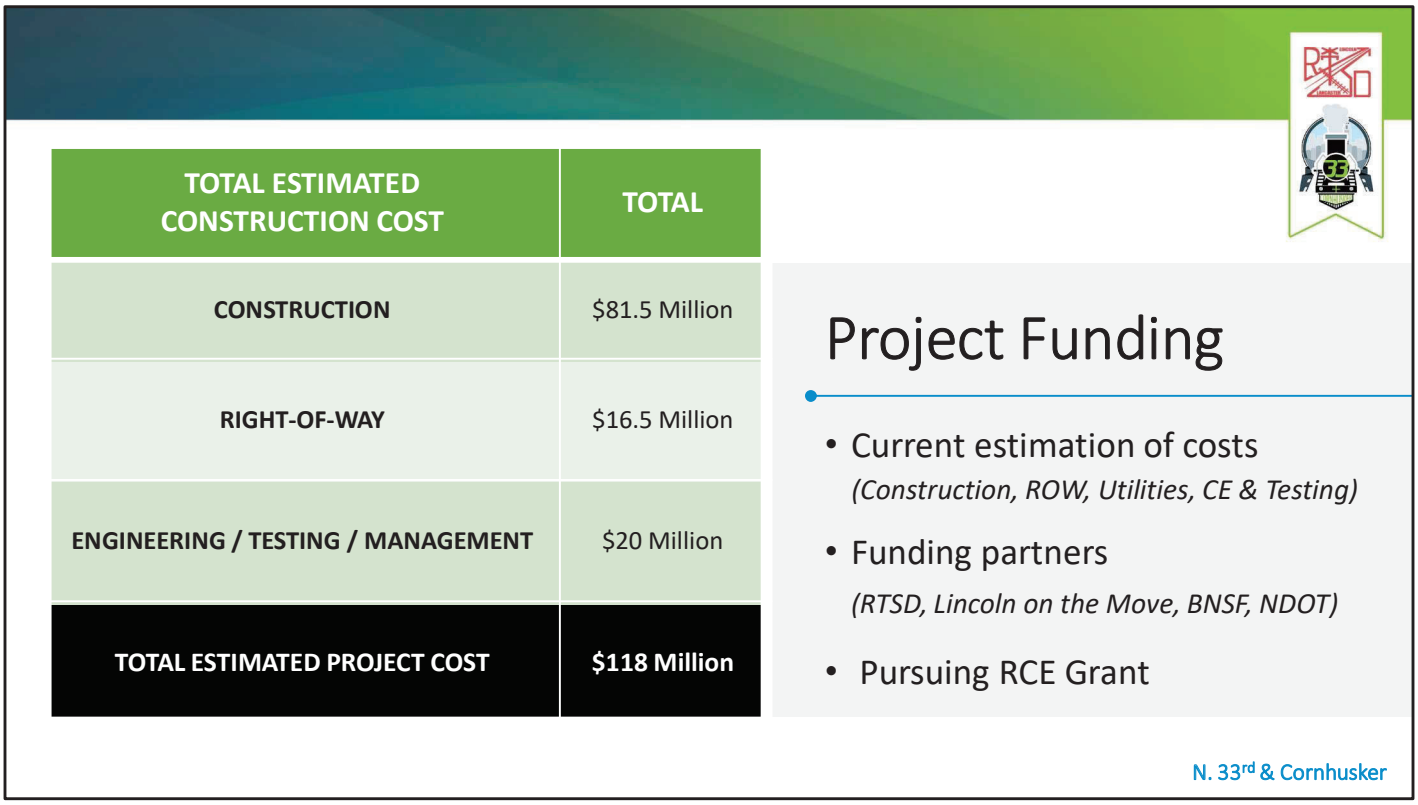

N. 33rd & Cornhusker

Other Environmental Resources (Amy): Minor impacts are also anticipated to utilities and wetlands. Impacts are anticipated to environmental justice communities, however, with the mitigation measures included in the project, the impacts are not considered disproportionately high and adverse. There would be no impacts to threatened and endangered species through the implementation of mitigation measures. Full details of our findings can be found in the Draft Environmental Assessment document, available at the back of the room and online at Lincoln.ne.gov, search 33rd and Cornhusker. Now I will hand it back to Kris to discuss project funding and next steps.

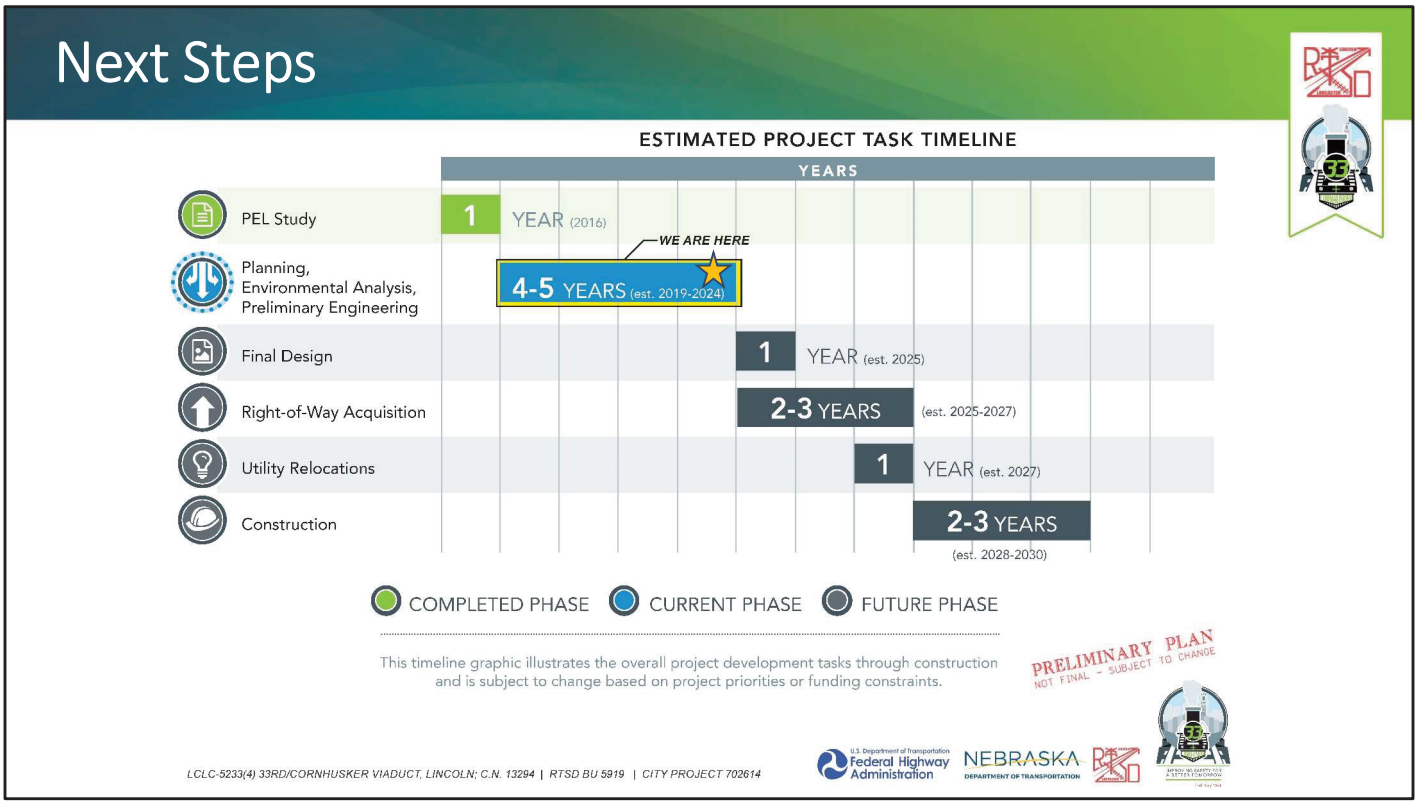

Next Steps

Transition to Kris

Project Funding (Kris): This project is currently estimated to cost $118 million. This estimate contains $81.5 million for construction, $16.5 million for right-of-way needs, and $20 million for engineering, testing and project management. Funding for the project is from federal, state and local sources as well as a contribution from the BNSF Railway. The RTSD is also actively pursuing additional federal funding from a Railroad Crossing Elimination grant program.

Next Steps (Kris): This public hearing is one of the last steps before a decision document can be issued by the Federal Highway Administration which allows the project to move forward to final design. We anticipate final design to begin in 2025. The right-of-way process is anticipated to take two to three years and may overlap with the final design phase. This will be followed by about a year of utility relocations, which could also overlap with the right-of-way phase. We expect construction to begin in late 2027 or early 2028 and be substantially complete in 2030.

Draft Environmental Assessment
Review & Comment
LINCOLN

IMPROVING SAFETY FOR
A BETTER TOMORROW

Kris

How to Provide Comments

- Provide public testimony at the microphone
- Dictate comments to court reporter
- Leave comment form tonight
- Mail comments
- Email comments

Submit comments by September 26, 2024

N. 33rd & Cornhusker

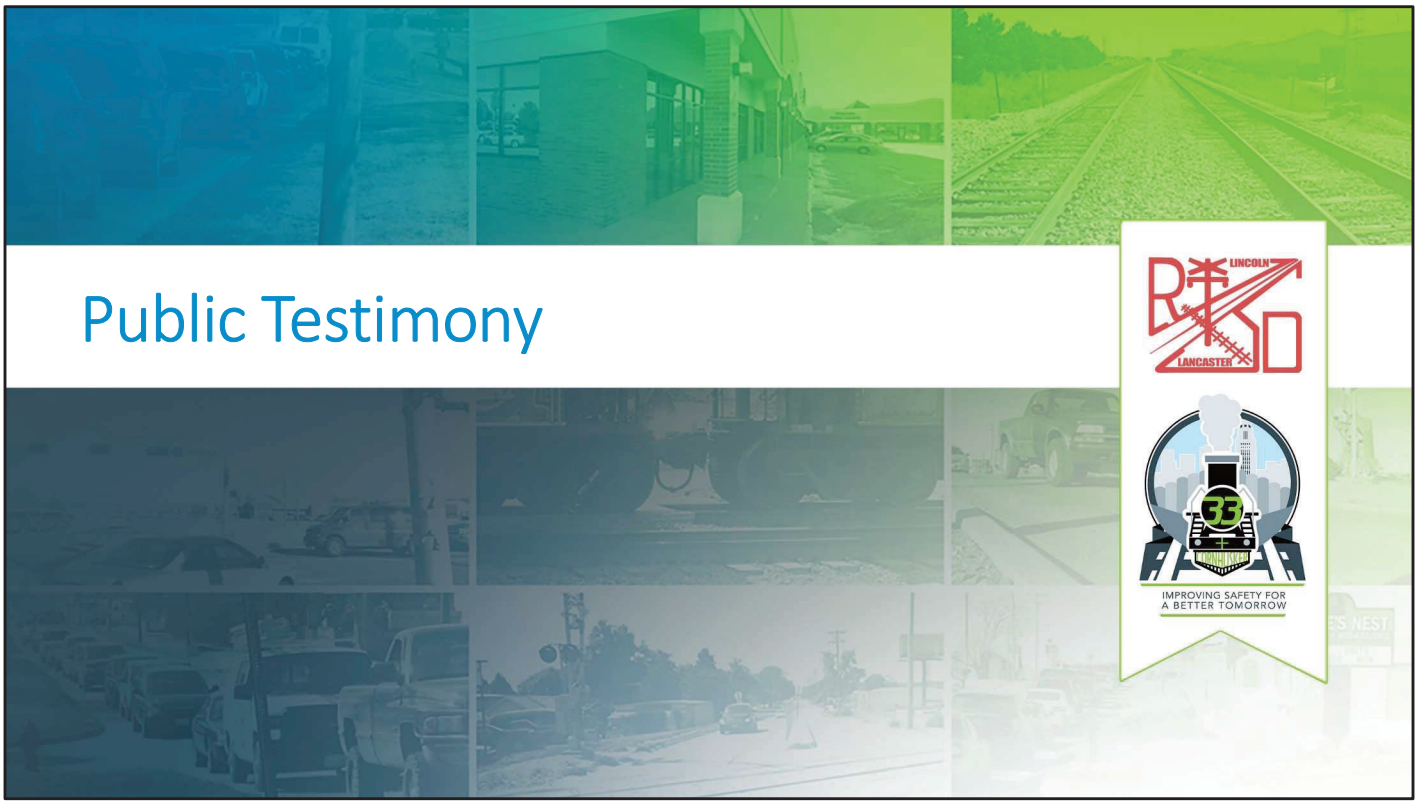

How to Provide Comments (Kris): The full Draft Environmental Assessment is available tonight as well as online at lincoln.ne.gov, search 33rd and cornhusker, and at several locations across the city. Comments are being accepted in a number of formats. You can provide public testimony tonight at the microphone, dictate comments to one of the court reporters who are present tonight, or complete a comment form and leave it in the basket. You can also mail or email your comments, or submit your comments on the project website. The back of the fact sheet contains the contact information for the various methods. Please submit your comments by September 26, 2024.

Your Comments are Important!

- All comments with responses will be included in the Final Environmental Assessment
- Commenters will receive a written response

N. 33rd & Cornhusker

Your Comments are Important! (Kris): All comments with responses will be included in the Final Environmental Assessment and each commenter will receive a written response.

Public Testimony
LINCOLN

Kris

Public Testimony

- Register to speak on the sign in sheet
- Speak into the microphone
- Tell us your name and address
- Limit your comments to 3 minutes
- Comments must be relevant to this project

N. 33rd & Cornhusker

Public Testimony 1 (Kris): Now we will move to the public testimony portion of the hearing. If you plan to speak at the microphone, please sign in on the public testimony sign in sheet. If you do not wish to speak, please remain in your seat or move about the room quietly. Once everyone who desires to speak at the microphone has done so, we will return to open house format until 7:00. If you choose to speak, please come to the microphone when your name is called. Tell us your name and address, which will be recorded along with your comment by the court reporter. Your comments will be limited to three minutes or less to allow enough time for all those who wish to speak, and please only provide comments relevant to this project.

Public Testimony

- Keep duplicate comments brief
- Additional comments can be provided using any of the other methods
- Three-minute timer

N. 33rd & Cornhusker

Public Testimony 2 (Kris): Duplicate comments that have already been made should be kept brief, and please know that you may use any of the other comment methods to provide additional feedback beyond the allocated three minutes. We will use a three-minute timer. The green circle will be held up when your time starts, a yellow circle to indicate the half-way point and a red circle to let you know the time is up.
(Stacey / Haley will coordinate the speakers; last slide will go up after the last speaker)

PUBLIC HEARING

COUNTRY INN & SUITES
LINCOLN NORTH
5353 N. 27TH STREET
LINCOLN, NE 68521

SEPTEMBER 5, 2024
5:00-7:00 P.M.

PROJECT PURPOSE AND NEED

The purpose of the proposed project, identified as 33rd/Cornhusker Viaduct, Lincoln, is to improve safety along the rail corridor between N. 27th and N. 48th streets by eliminating or reducing the potential conflict points between trains and other transportation modes (vehicles, pedestrians, and bicyclists). The project is needed due to the high volume of vehicular and train traffic in the area along the Burlington Northern Sante Fe rail corridor between N. 27th and N. 48th Streets. The high-volume traffic creates undesirable conditions regarding safety, traffic congestion, traffic delay, and mobility within the project area. In addition, facilities for walking, cycling, and public transit do not meet existing, or future (2040) needs for the area.

SCOPE OF WORK

The proposed project would close the at-grade railroad crossings at N. 33rd Street and Adams Street by improving the roadway network in this area and constructing a grade separation across the BNSF Railway tracks at approximately N. 31st Street, south of Cornhusker Highway. The existing at-grade crossing at N. 44th Street would remain open to vehicle, bicycle and pedestrian traffic and would be improved to comply with the Americans with Disabilities Act (ADA) requirements. Cornhusker Highway would be expanded to six lanes with turn lanes from Deadmans Run to N. 35th Street. Additional side streets would be reconstructed to tie into the primary project elements and to maintain local connectivity. The project would also include new sidewalks and curb ramps and upgraded traffic signals. Reconstruction of the storm sewer system, sanitary system, water main system and traffic signal and underground fiber-optic lines would also be included.

RIGHT OF WAY

The proposed project would require the acquisition of additional property rights which could include new right-of-way (ROW), control of access (CA), permanent easements (PE) and/or temporary easements (TE) for construction throughout the project area. Relocations would be required depending on the alternative selected. **If your property would be impacted by this project, you would be contacted by a representative in the future once the design footprint has been established.**

NEBRASKA DEPARTMENT OF TRANSPORTATION

LCLC-5233(4)

33RD/CORNHUSKER VIADUCT, LINCOLN;

C.N. 13294 | RTSD BU 5919 | City Project 702614

CONSTRUCTION SCHEDULE

Construction is anticipated to begin in Fall 2027 and be complete Fall 2029.

ACCOMMODATION OF TRAFFIC

The proposed project would be constructed under full and partial closures. Closures would be phased and access to adjacent properties would be maintained but may be limited at times due to phasing requirements. Trail detours would be constructed or would use existing local roadways and sidewalks.

POTENTIAL IMPACTS

Impacts are anticipated to trails and parks along the project. A Section 4(f) De minimis use is anticipated at Fleming Fields Recreation Sports Park, 34th and Madison Park, Huntington Trail, Dietrich Trail, and 33rd Street Trail. Temporary occupancy is anticipated at 45th and Gladstone Park. A Land Water Conservation Fund/Section 6(f) conversion for impacts at 34th and Madison Park would be required. This 1.8 acre park would be reduced in size by approximately 0.1 acres. Minor impacts are also anticipated to utilities, and wetlands. Impacts are anticipated to environmental justice communities, however, with the mitigation measures included in the project, the impacts are not considered disproportionately high and adverse. There will be no impacts to threatened and endangered species through the implementation of mitigation measures.

ESTIMATED COSTS

The cost to construct the project is estimated to be $81.5 million. Funding for the project derives from federal, state and local funds, including BNSF, the Railroad Transportation Safety District and Lincoln on the Move.

Visit the project website for additional project information or comment online: lincoln.ne.gov (search: 33rd and Cornhusker)

LINCOLN, NE 68521

5 DE SEPTIEMBRE DE 2024

5:00-7:00 P.M

PROPÓSITO Y NECESIDAD DEL PROYECTO

El propósito del proyecto propuesto, identificado como Viaducto 33rd/ Cornhusker, Lincoln, es mejorar la seguridad a lo largo del corredor ferroviario entre las calles N. 27th y N. 48th al eliminar o reducir los puntos de conflicto potenciales entre trenes y otros modos de transporte (vehículos, peatones y ciclistas). El proyecto es necesario debido al alto volumen de tráfico vehicular y ferroviario en el área a lo largo del corredor ferroviario de Burlington Northern Santa Fe entre las calles N. 27th y N. 48th. El alto volumen de tráfico crea condiciones indeseables en cuanto a seguridad, congestión de tráfico, retrasos en el tráfico y movilidad dentro del área del proyecto. Además, las instalaciones para caminar, andar en bicicleta y el transporte público no cumplen con las necesidades actuales o futuras (2040) del área.

ALCANCE DEL TRABAJO

El proyecto propuesto cerraría los cruces ferroviarios a nivel en N. 33rd Street y Adams Street mediante la mejora de la red vial en esta área y la construcción de una separación de niveles a través de las vías ferroviarias de BNSF aproximadamente en N. 31st Street, al sur de Cornhusker Highway. El cruce a nivel existente en N. 44th Street permanecería abierto al tráfico de vehículos, bicicletas y peatones, y se mejoraría para cumplir con los requisitos de la Ley de Estadounidenses con Discapacidades (ADA). Cornhusker Highway se ampliaría a seis carriles con carriles de giro desde Deadmans Run hasta N. 35th Street. Se reconstruirían calles adicionales para conectarse con los elementos principales del proyecto y mantener la conectividad local. El proyecto también incluiría nuevas aceras y rampas, así como señales de tráfico actualizadas. La reconstrucción del sistema de alcantarillado pluvial, sistema de alcantarillado sanitario, sistema de tuberías principales de agua, señales de tráfico y líneas subterráneas de fibra óptica también estarían incluidas.

DERECHO DE VÍA

El proyecto propuesto requeriría la adquisición de derechos de propiedad adicionales que podrían incluir nuevos derechos de vía (ROW), control de acceso (CA), servidumbres permanentes (PE) y/o servidumbres temporales (TE) para la construcción en toda el área del proyecto. Se requerirían reubicaciones según la alternativa seleccionada. **Si su propiedad se ve afectada por este proyecto, un representante se pondrá en contacto con usted en el futuro una vez que se haya establecido la huella del diseño.**

LCLC-5233(4)

VIADUCTO DE 33RD/CORNHUSKER, LINCOLN;

C.N. 13294 | RTSD BU 5919 | City Project 702614

CALENDARIO DEL CONSTRUCCION

La construcción está prevista para comenzar en el otoño de 2027 y finalizar en el otoño de 2029.

ACOMODACIÓN DEL TRÁFICO

El proyecto propuesto se construiría bajo cierres completos y parciales. Los cierres se realizarían en fases y se mantendría el acceso a las propiedades adyacentes, pero podría estar limitado en ocasiones debido a los requisitos de las fases. Se construirían desvíos de senderos o se utilizarían las carreteras y aceras locales existentes.

IMPACTOS POTENCIALES

Se anticipan impactos en los senderos y parques a lo largo del proyecto. Se anticipa un uso De minimis de la Sección 4(f) en Fleming Fields Recreation Sports Park, 34th and Madison Park, Huntington Trail, Dietrich Trail, y 33rd Street Trail. Se anticipa una ocupación temporal en el parque 45th and Gladstone. Se requeriría una conversión del Fondo de Conservación de Tierras y Agua/Sección 6(f) para los impactos en el parque 34th and Madison Park. Este parque de 1.8 acres se reduciría en aproximadamente 0.1 acres. También se anticipan impactos menores en los servicios públicos y en los humedales. Se anticipan impactos en las comunidades de justicia ambiental, sin embargo, con las medidas de mitigación incluidas en el proyecto, los impactos no se consideran desproporcionadamente altos y adversos. No habrá impactos en especies amenazadas y en peligro de extinción a través de la implementación de medidas de mitigación.

COSTOS ESTIMADOS

El costo para construir el proyecto se estima en $81.5 millones. La financiación para el proyecto proviene de fondos federales, estatales y locales, incluidos BNSF, el Distrito de Seguridad del Transporte Ferroviario y Lincoln on the Move.

Visita el sitio web del proyecto para obtener información adicional sobre el proyecto o comenta en línea: **lincoln.ne.gov (busca: 33rd and Cornhusker)**

LCLC-5233(4) 33RD/CORNHUSKER VIADUCT, LINCOLN; C.N. 13294 | RTSD BU 5919 | PROJECT 702614

PROJECT OVERVIEW

The Burlington Northern Santa Fe Railway railroad corridor contains three at-grade crossings within northeast Lincoln between N. 27th Street and N. 48th Street. These crossings are located at:

- N. 33rd Street south of Cornhusker Highway,
- Adams Street at approximately N. 35th Street, and
- N. 44th Street south of Cornhusker Highway

The Railroad Transportation Safety District (RTSD) is proposing to eliminate the at-grade crossings at N. 33rd Street and Adams Street by improving the roadway network in this area and constructing a grade-separation across the BNSF at approximately N. 31st Street, south of Cornhusker Highway.

The existing at-grade crossing at N. 44th Street would remain open to vehicle, bicycle and pedestrian traffic and would be improved to comply with Americans with Disabilities Act (ADA) requirements.

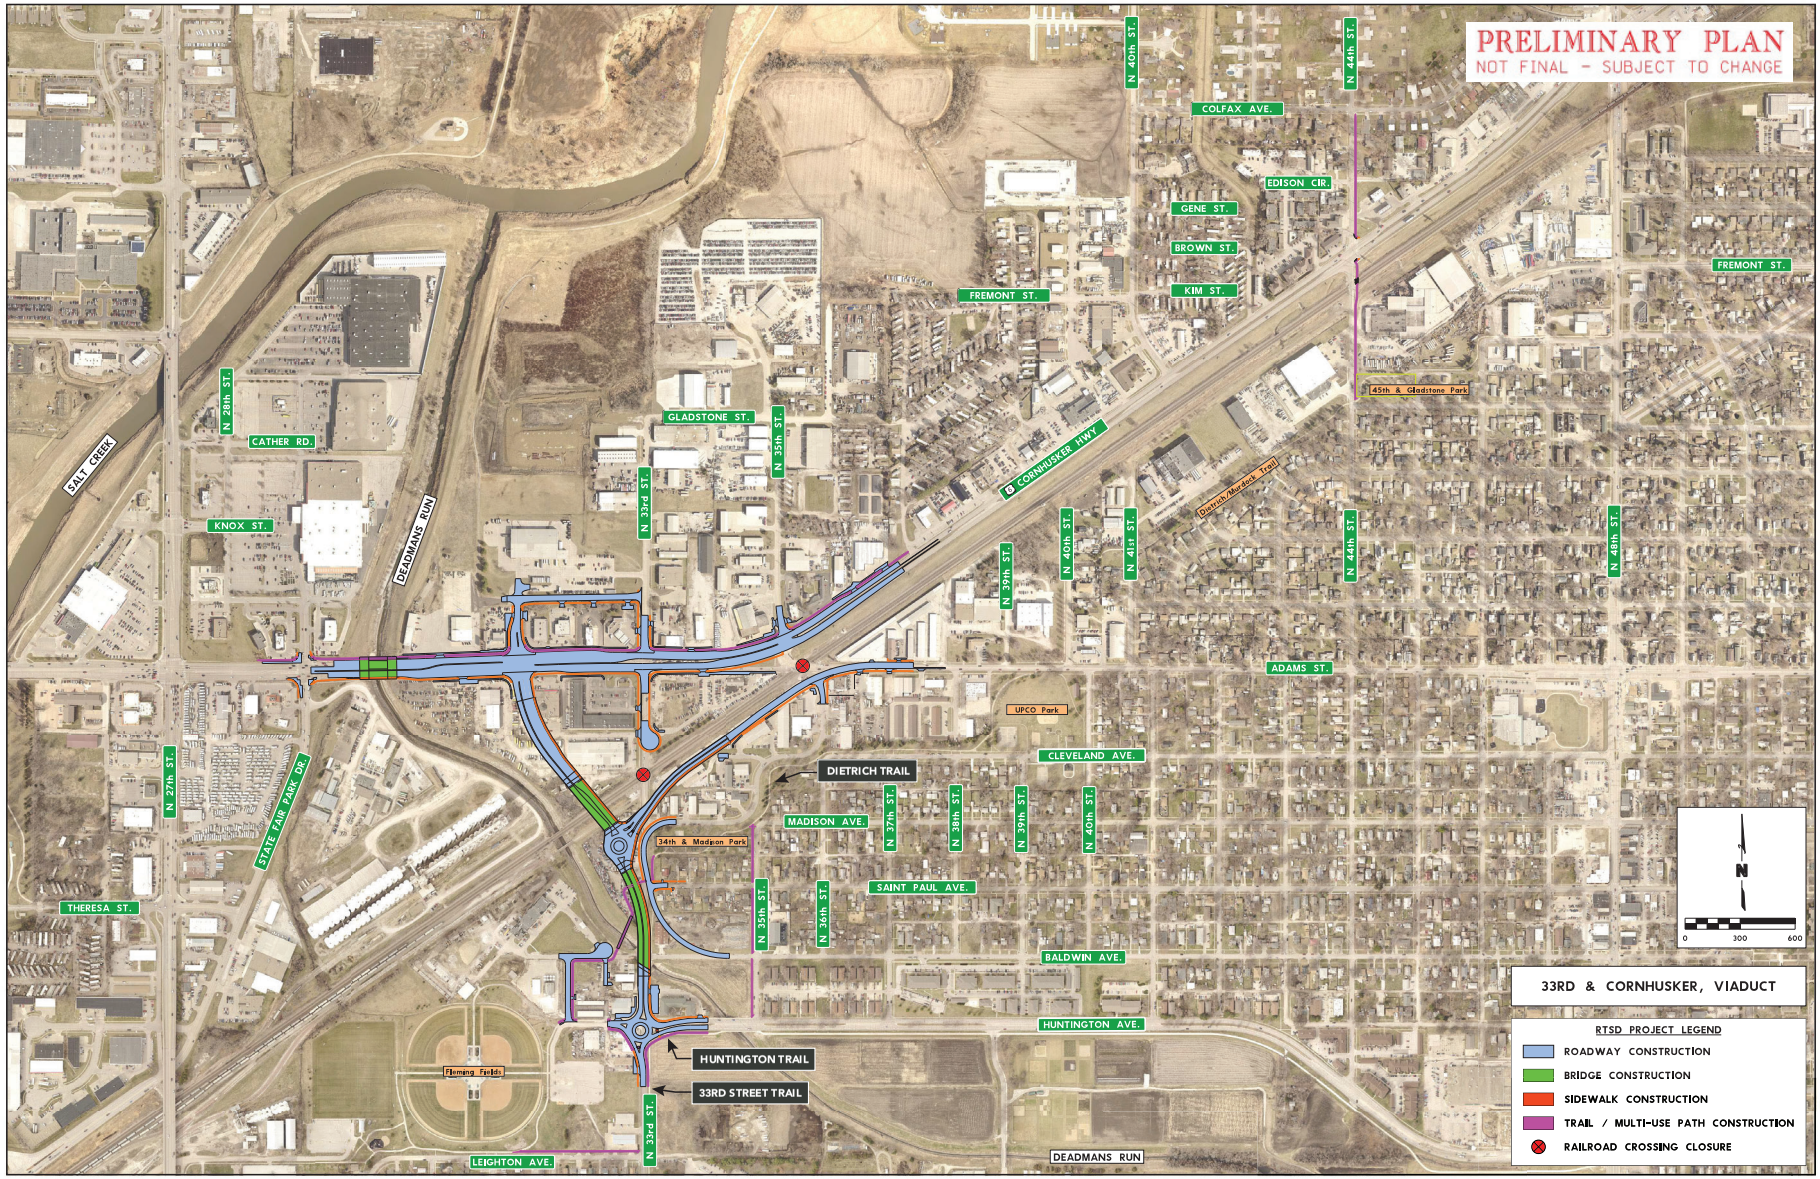

Cornhusker Highway would be expanded to six lanes with turn lanes from Deadmans Run to N. 35th Street. Additional side streets would be reconstructed to tie into the primary project elements and to maintain local connectivity.

The project would also include new sidewalks and curb ramps and upgraded traffic signals. Reconstruction of the storm sewer system, sanitary system, water main system and traffic signal and underground fiber-optic lines would also be included.

IMPROVING SAFETY FOR A BETTER TOMORROW

PROJECT PURPOSE & NEED

The purpose and need for a project describes the problem(s) that a particular project would solve if constructed and is used to develop, evaluate, and compare alternatives.

PROJECT PURPOSE

- Improve safety along the rail corridor between N. 27th and N. 48th streets by eliminating or reducing the potential conflict points between trains and other transportation modes (vehicles, pedestrians, and bicyclists);
- Reduce delay for motorists, pedestrians, and bicyclists crossing the rail corridor, including rerouting of emergency response vehicles due to crossings blocked by trains;
- Accommodate existing and future traffic (Year 2040) to reduce congestion along roadways crossing the rail corridor;
- Improve mobility across the rail corridor in north Lincoln, including public safety response times; and
- Improve multimodal connectivity in north Lincoln for vehicles, pedestrians, bicyclists, and bus transit.

PROJECT NEEDS

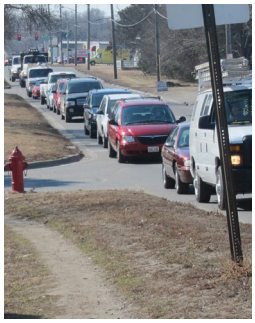

- Improve safety
- Reduce traffic congestion and delay
- Improve mobility
- Address lack of bus, bicycle, and pedestrian accommodations

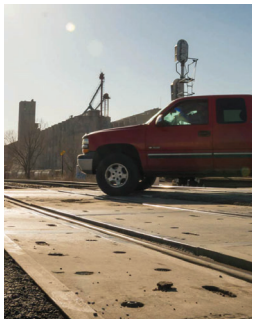

PROJECT PURPOSE & NEED

RECREATIONAL RESOURCES - IMPACTS

45TH & GLADSTONE PARK

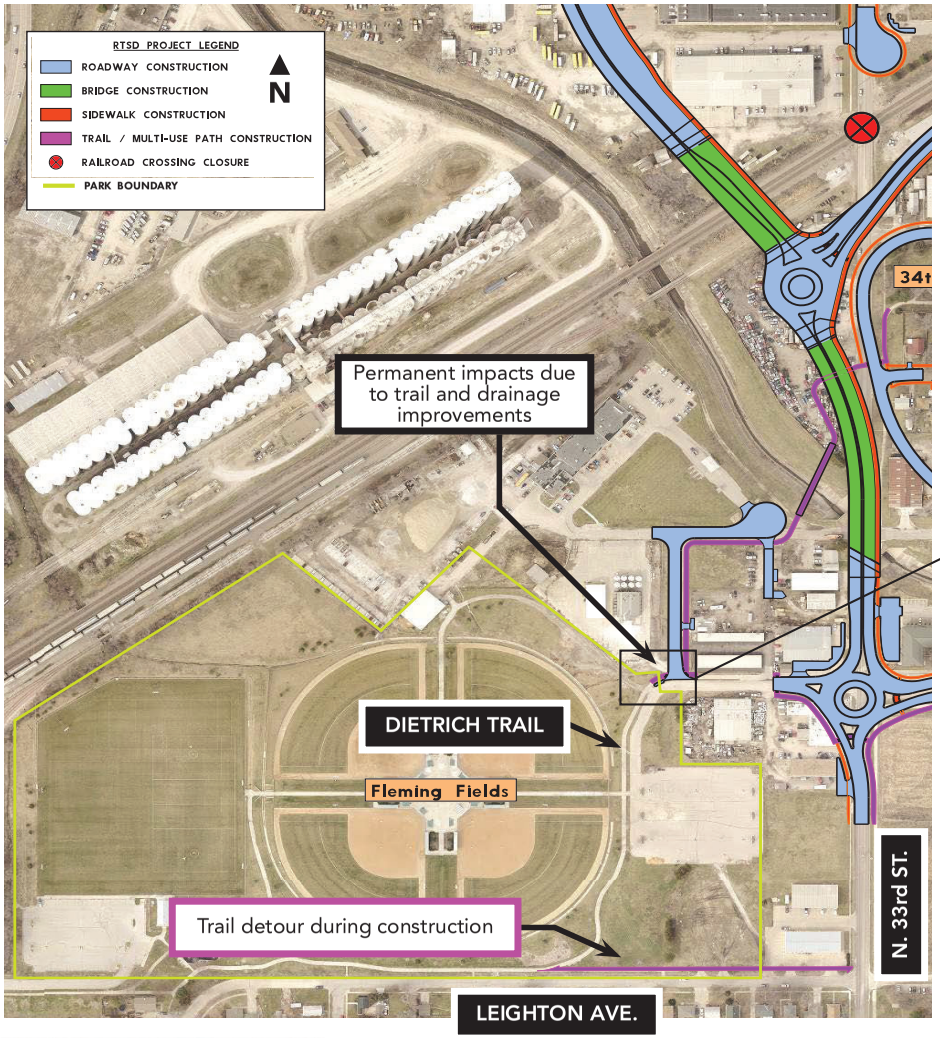

PRELIMINARY PLAN
NOT FINAL - SUBJECT TO CHANGE

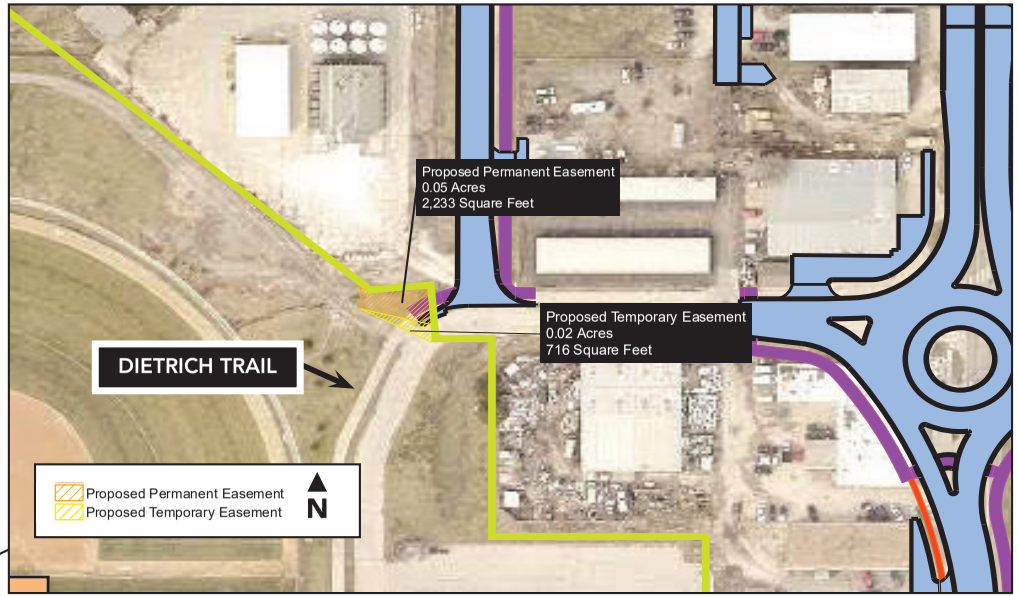

TEMPORARY IMPACTS

Trail continuity and access to 45th and Gladstone Park would be maintained at all times. No permanent impacts are anticipated and the Project would not impact the activities, attributes, and features of the property.

RECREATIONAL RESOURCES - IMPACTS

FLEMING FIELDS

TEMPORARY AND PERMANENT IMPACTS

A sidewalk and maintenance access drive would be temporarily unavailable for the duration of construction of the storm sewer (approximately 2 weeks), but access to the ballfields and other park amenities would be maintained throughout construction via other paths within the property.

Trail continuity would be maintained at all times during construction via detour. A temporary surface would be constructed to provide a trail detour for the following locations: Dietrich Trail, Huntington Trail, and 33rd Street Trail.

ENVIRONMENTAL JUSTICE

MINORITY POPULATIONS

LOW-INCOME POPULATIONS

The entirety of the proposed project is located within Block Groups that contain either minority or low-income populations that are meaningfully greater than the corresponding percentages for the City of Lincoln.

Property acquisitions are anticipated to include 2 residential properties and 14 non-residential properties within these Block Groups.

This includes the parcel located at 3223 Cornhusker Highway which includes services such as **La Cabaña Mexican restaurant, Taqueria Limon food truck, and La Mexicana Market grocery store, as well as a photographer, warehouse tenants, and a check-cashing business.**

These impacts would be mitigated through the Uniform Relocation Assistance and Real Property Acquisition Policies Act (42 U.S.C. 4601).

PUBLIC INPUT

We want to hear from you! Your feedback is an important part of the process.

HOW TO MAKE FORMAL COMMENTS

- Speak at the microphone following the presentation
- Dictate comments to the court reporter
- Written Comment Form (Submit by Sept. 26, 2024)
  Olsson c/o Stacey Roach | 601 P Street, Suite 200 | Lincoln, NE 68508
- Website: lincoln.ne.gov (search: 33rd & Cornhusker)
- Email: 33rdcornhusker@olsson.com

HOW YOUR COMMENTS WILL BE USED IN THE EVALUATION PROCESS

All public comments will be reviewed and responded to by the project team as well as included in the environmental document and as a part of the project record.

OPPORTUNITIES FOR PUBLIC INPUT THROUGHOUT THE PROCESS

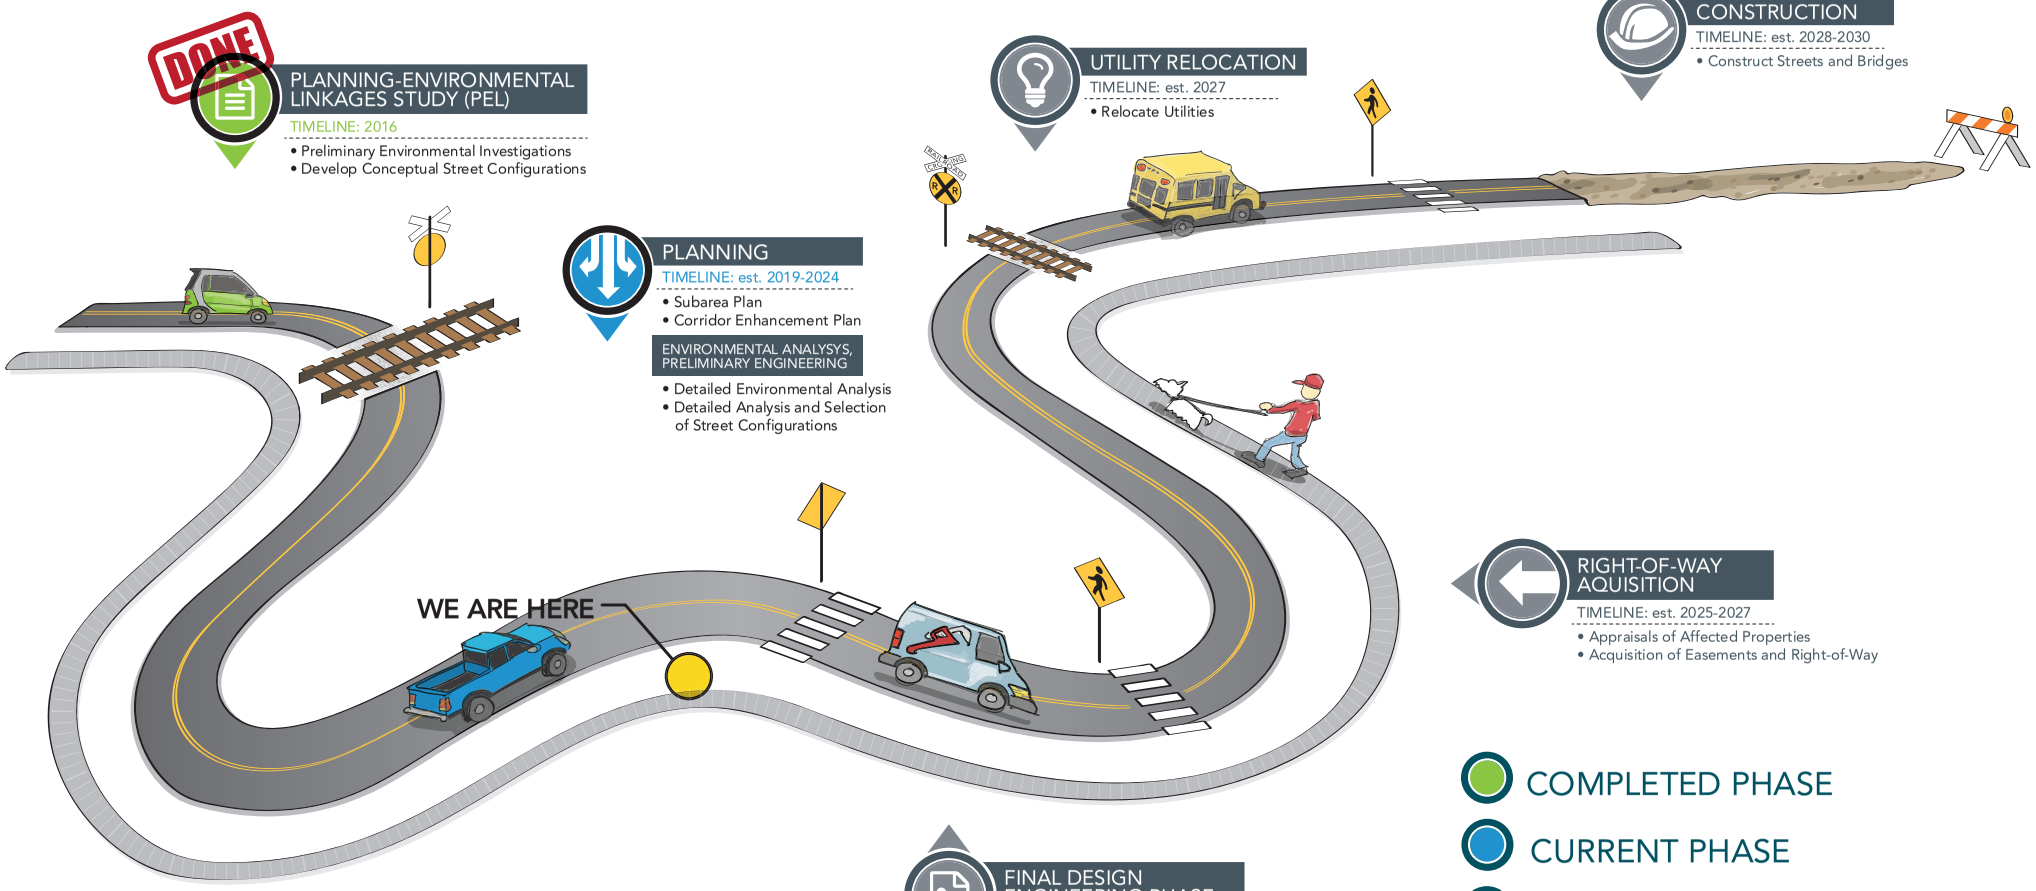

- ✓ Public Scoping Meeting - June 2019
- ✓ Presentation of Preferred Alternative(s) studied in Environmental Document - June 2020
- ✓ Presentation of the RTSD's Current Preliminary Preferred Alternative - December 2021
- ✓ Public Hearing for Draft Environmental Document - Today

(Whereupon, at 5:30 p.m., the following proceedings were had:)

MR. FIGARD: On behalf of the Lincoln, Nebraska Lancaster County Railroad Transportation Safety District, let's just call it the RTSD, and our project partners, I would like to welcome you to the public hearing for the draft environmental assessment for the 33rd and Cornhusker project.

I'm Roger Figard and I currently serve as the executive director of the RTSD.

The RTSD has been working closely with the City of Lincoln and the Nebraska Department of Transportation and the Federal Highway Administration on this project for a number of years.

This is an exciting milestone for the community as we continue to move forward on this project to the next stage. This project is the highest priority of your county RTSD. This project is a major investment into the area, with plans to increase convenience, efficiency, improve safety for travelers.

Kris Humphrey with the City of Lincoln, Nebraska Transportation and Utility who serves as the project manager for our -- the RTSD will address some additional housekeeping items before we get started with the presentation.

MS. HUMPHREY: Thank you, Roger.

Again, welcome everybody. Thank you for joining us. I am Kris Humphrey the assistant city engineer for the City of Lincoln and the RTSD's project manager.

The city has been supporting the RTSD's 33rd and Cornhusker viaduct project by providing management oversight and technical review. We will be receiving public testimony following the presentation, so please sign up on the sign-in sheet located over here by -- by the person in the green dress, sorry, if you intend to provide your comment at the microphone.

As Roger said, all materials presented at the meeting tonight are available on the project website at Lincoln.ne.gov and search 33rd and Cornhusker.

This meeting is being recorded by the reporters here tonight. A full transcript of the meeting will be included in the final environmental assessment.

Okay, why we're here. We are here tonight to share with you the most current information about the project, including pren -- presenting the preferred alternative and the findings from the environmental analysis.

Also, we are here to listen to the community and collect your comments about the project. The RTSD will respond in writing to all comments before any final decisions are made.

Our agenda for tonight includes several times pertaining to the project and opportunity for public input, an overview of the project, the project's purpose and need, a brief history on how we got here, the preferred alternative and process for property acquisition will be presented.

We will then dive into the findings of the draft environmental assessment, next steps for the project including the anticipated schedule, the process for reviewing the draft environmental assessment and opportunities for public comment. Those topics will include the presentation and we will move into public testimony following the public testimony portion of the hearing.

In 2019, the BNSF carried nearly 65 trains per day through northeast Lincoln resulting in at least three and a half hours per day at -- that the at-grade crossings at North 33rd and Adams Street were blocked to traffic. More recent counts suggest the number of trains per day is closer to 46.

Regardless, the number of trains,

multiplied by the average daily vehicle traffic, puts those two crossings near the top of the list for the highest exposure ratings in Nebraska.

The Nebraska Department of Transportation has identified these two crossings within their top five crossings in the state that need improved. This project would eliminate the potential for train-to-vehicle and train-to-pedestrian collisions and provide a safer, better connected environment for vehicles, bicycles and pedestrians.

The purpose of the proposed project is to improve safety along the rail corridor between North 27th and North 48th Street by eliminating or reducing potential conflict points between trains and other transportation modes like vehicles, pedestrians and bicyclists.

The project is needed due to the high volume of vehicular and train traffic in the area along the Burlington Northern Santa Fe rail corridor between 27th and 48th Streets. The high-volume traffic creates undesirable conditions regarding safety, traffic congestion, traffic delay and mobility within that project area.

In addition, facilities for walking, cycling and public transit do not meet existing or

future year 2040 needs for the area.

The project began with a planning and environmental linkages study, or PEL study, which was completed in 2016. Check PEL study developed transportation alternatives and preliminary environmental investigations. Before the RTSD made a major investment in the area, a corridor plan was developed to detail the future look and feel for revitalized Cornhusker Highway corridor to make sure the transportation solution fit with the future vision. This was followed by a subarea plan that provided a blueprint for future development, again to make sure that the future transportation project fit within the blueprint. Extensive public engagement has been coordinated for the project thus far including eight public meetings and nearly 100 one-on-one meetings with adjacent stakeholders. The public and stakeholder input, technical feasibility, and meeting the project's purpose and need has gotten us to where we are today with the preferred transportation alternative.

The RTSD has hired Olsson to perform the preliminary design and environmental review for the project. Now I'll turn it over to Aaron Keller with Olsson to talk about the preferred alternative.

MR. AARON KELLER: Thank you, Kris.

Hello, I'm Aaron Keller, Olsson's project manager for this project. The preferred alternative really includes two distinct project areas. The area where most of the work would occur is primarily along Cornhusker Highway from roughly State Fair Park Drive on the west to almost 90 -- or 39 -- 39th Street and just north of Cornhusker Highway, around 31st South to just south of the 33rd and Huntington Avenue intersection.

In addition to that, work over at the North 44th Street area, the crossing from Colfax Avenue to just north of Gladstone Street, and I'll talk about each of these two areas individually.

So the preferred alternative would close the two at-grade railroad crossings at North 33rd Street and Adams Street and construct a grade separation viaduct over the BNSF Railway tracks at approximately North 31st Street to the south of Cornhusker Highway. The project will connect Adams Street to that new alignment of North 33rd Street and the overpass of the BNSF railroad. Roundabouts are planned to be constructed at North 33rd and Adams and at 33rd and Huntington.

In addition, Cornhusker Highway would be expanded to six lanes with turn lanes from

approximately State Fair Park Drive all the way over to 35th Street. Additional side streets would be reconstructed to tie into that -- those primary project elements, and to maintain that local connectivity.

The project would also include new sidewalks and curb ramps, upgraded traffic signals. We'll be reconstructing the storm sewer system, the sanitary system, the water main system. Private utilities will be -- will be impacted and upgraded as well as underground fiber-optic lines. Trail enhancement are also included and will improve the connectivity.

This map and the map on the following slide are -- they are the same maps that you see on the large paper in the back of the room.

Over at the existing crossing at 44th Street, we are intending that crossing to remain open to vehicle, bicycle and pedestrian access, and we -- the improvements we are proposing is to -- is to the wider multi-use path on a east side of the roadway there to comply with the Americans with Disabilities Act. And that would provide better connectivity to the neighborhoods both north and south of Cornhusker Highway.

On the screen is a rendering that we've

developed in order to help visualize the project since it is, you know, such a -- such a unique project here where we're not just following an existing alignment. This is a view on the screen as if we were above east campus looking towards the north and northwest. So 33rd and Huntington is towards the southwest of that image, and you're looking towards the north as you go up and over the railroad and back down. And this rendering, as well as others, are also around the room.

So with property acquisition, this project does require additional property rights in order to construct it, and that might include new right of way, it could include easements both permanent and temporary, and so -- and also some relocations would be necessary.

If your property is impacted, a project representative will contact you once this design footprint is -- is fully established. There's a staff member here tonight at the right-of-way station if you -- with a set of preliminary plans. If you feel that your property is impacted and want to see some more details, you can visit Michelle over there. That process, the acquisition process, it does and will follow federal and state requirements according to what's called the Uniform Act.

Next I'm going to turn it over to Amy Cherko with Olsson and she is going to share the findings of the environmental assessment.

MS. CHERKO: Thank you, Aaron.

I'm Amy Cherko, senior team leader at Olsson and one of the primary authors of the environment assessment document.

As required by the National Environmental Policy Act, or NEPA, the project team evaluated social, economic and natural environmental resources for potential impacts due to the proposed project. A full list of these resources can be found on the poster in the back of the room over by Chase.

Of the resources evaluated, there would be some temporary and permanent impacts; however, many of these impacts would be mitigated.

We anticipate temporary impacts during construction, so just noise and dust, lane closures and detours. Access to properties would be maintained at all times, but could be limited during certain periods. Minor visual impacts are also anticipated for things like equipment, material storage staging and other construction activities.

Impacts to area trails include the removing -- removal of the existing segment of the

Dietrich Trail, shown in red. The existing at-grade crossing will be replaced with a new segment of the Dietrich Trail to connect 34th and Madison Park and Fleming Fields. Trail detours are anticipated during construction.

As a part of the trail bridge over Deadmans Run, temporary impacts to 45th and Gladstone Park are anticipated; however, trail continuity and access to the park would be maintained at all times. No permanent impacts are anticipated at this location and the project would not impact the activities, attributes and features of the property.

Temporary and permanent impacts are anticipated at Fleming Fields. There would be permanent impacts adjacent to the access drive on the northeast side of the park resulting in a five-one-hundredths of an acre permanent easement due to the construction of the trail and drainage improvements. This is about 2,200 square feet.

A temporary easement of two-one-hundredths of an acre, or 870 square feet, is also anticipated near the same area during construction. Trail continuity through the use of detours on the Dietrich Trail, Huntington Trail and 33rd Street Trail would be maintained at all times

along with access to the ball field and other park amenities.

A land/water conservation fund Section 6(f) conversion for impacts to 34th and Madison Park would be required. This 1.8-acre park would be reduced in size by approximately one-tenth of an acre. Existing amenities within the park boundaries, such as the basketball court and a gazebo, would not be impacted. The replacement property for this part -- for this park property is located near South 40th and Wilderness Hills Boulevard as a part of an existing city park.

Minor impacts are also anticipated to utilities and wetlands. Impacts are anticipated to environmental justice communities; however, with a mitigation measures included in the project, the impacts are not considered disproportionately high and adverse. There would be no impacts to threatened and endangered species through the implementation of mitigation measures.

Full details of our findings can be found in the draft environmental assessment document available at the back of the room, and also online at Lincoln.ne.gov, search 33rd and Cornhusker.

Now I'll hand it back over to Kris to

discuss project funding and next steps.

MS. HUMPHREY: This project is currently estimated to cost $118 million. This estimate contains 81-and-a-half million dollars for construction, 16-and-a-half million dollars for right-of-way needs, and 20 million for engineering, testing and project management.

Funding for the project is from federal, state and local sources, as well as a contribution from the BNSF Railway. The RTSD is also actively pursuing additional federal funding from a Railroad Crossing Elimination grant program.

This public hearing is one of the last steps before a decision document can be issued by the Federal Highway Administration which allows the project to move forward to final design. We anticipate final design to begin in 2025. The right-of-way process is anticipated to take two to three years and may overlap with the final design phase.

This will be followed by about a year of utility relocations which could also overlap with the right-of-way phase. We expect construction to begin in late 2027 or early 2028 and be substantially complete in 2030.

The full draft environmental assessment

is available tonight as well as online at Lincoln.ne.gov, search 33rd and Cornhusker, and at several locations across the city.

Comments are being accepted in a number of formats. You may provide public testimony tonight at the microphone, we'll be wheeling a podium out here. You can dictate comments to one of the court reporters who are present tonight, or you can complete a comment form, that's available in the back, look like this (indicating), and submit the comments through the website as well.

The back of the fact sheet contains the contact information for various methods. Please submit your comments by September 26th of 2024.

All comments with your -- okay, sorry about that.

All comments with responses will be included in the final environmental assessment and each -- and each commenter will receive a written response.

(Discussion off the record to switch microphones.)

MS. HUMPHREY: Okay, now we will move to the public testimony portion of the hearing. If you plan to speak at the microphone, again, please sign in

with Haley over here in the green dress to provide public testimony. If you do not wish to speak, please remain in your seat or move about the room quietly. Once everyone who desires to speak at the microphone has done so, we'll return to open house format until seven o'clock.

If you choose to speak, please come to the microphone when your name is called. Again, we'll wheel out the podium here. Tell us your name and your address, which will be recorded along with your comment by the court reporter sitting over here (indicating).

Your comments will be limited to three minutes or less to allow enough time for all those who wish to speak, and please only provide comments relevant to this project. Duplicate comments that have already been made should be kept brief and please know that you may use any of the other comment methods to provide additional feedback beyond the allocated three minutes.

We will use a three-minute timer. The green circle will be held up when your time starts, a yellow circle to indicate the halfway point, and a red circle to let you know that time is up.

And with that we will open it up to public testimony.

MR. AARON KELLER: So if you would like to speak, you can go ahead and add your name to the list and we'll call you up one by one. And we're -- we're going to use this (indicating) for now until we get more batteries.

(Discussion off the record.)

MR. AARON KELLER: Once you have your name on the list, you can probably just line up here rather than calling your name out, if you so choose.

MR. FIGARD: Don't be bashful. Come on up, we want to hear from you. I know a number of you signed up, so -- here comes Mark.

(Discussion off the record.)

* * *

MR. MARK WHITEHEAD: For the record, my name is Mark Whitehead, W-H-I-T-E-H-E-A-D. I'm the owner and CEO of Whitehead Oil Company, we've got a location affected by this project located at 33rd and Cornhusker Highway.

The -- to say that this has got significant impact would be an understatement. I do want to recognize Amy and I have traded off a lot of e-mails there, and I appreciate our conversations this point as well, and I appreciate this opportunity to give comments on this project.

The impact of this -- there are basically four property owners between 31st and 33rd Street. We recognize some of the challenges that already exist on operating all -- all four of these businesses by a cross access easement that exists between all of us that runs along the south side of all of our businesses. And that is critical to traffic flow the way it exists even with the access points on Cornhusker Highway.

This project takes away all access points onto Cornhusker Highway and our only access points are off of 31st Street with -- and 33rd Street. There does not appear to be any room for the cross access easement that already exists between the four businesses along the south side of our businesses.

We do, of course, recognize the new access road that's going to be constructed along the north side of our properties, but every single one of our businesses are oriented towards Cornhusker and every one of 'em -- and traffic flows come in from the back side of our businesses, which isn't ideal, would -- would be an understatement.

The most critical part for us is this is an unworkable traffic flow for our existing configuration. We've got dispensers along the -- the

southeast portion of our building in a diagonal. The way those dispensers are oriented, they -- they currently customers can come in either on the cross access easement or off of Cornhusker Highway facing towards the east or off of 33rd Street, which is what would be provided here, which is very similar to what's already been provided.

As a customer comes in and goes along our dispensers, they would be facing southwest with no realistic way or convenient way for them to really turn around. It appears as though the cross access easement completely goes away. I don't know whether or not there would be a cross access easement available to us or with Hog Wild, but across their property line, that's not realistic to get to the north -- north access road.

And the yellow that's depicted on -- on your -- on your sheet there shows just one transport, which is our fuel transport, that comes in -- oh, you're got to be kidding me, I'll be very brief.

Our two requests -- our two requests on this thing is to get an access point on Cornhusker Highway. That is critical. The way the configurations are currently right now, it is impossible for our traffic flow to work with this thing.

My second request is to figure out a way to maintain -- maintain a cross easement that's reasonable across the four properties that would, at least, give us the opportunity for traffic flow to come through here.

But Amy -- Amy and Aaron, I look forward to further discussions with you all, but I think our concerns are fairly obvious here. This flat out doesn't work.

Any questions?

MR. FIGARD: Yes. So are you in support or opposition of the project, you support the project and the concern is the current access?

MR. MARK WHITEHEAD: This may not be a fair question for us. We are along the -- we are along the north side of Cornhusker so traffic impediment by railroad trains is probably impacted on Cornhusker by cars turning -- turning south from either direction on Cornhusker. It really doesn't reach us. It doesn't have a significant impact -- Doug, do you think it has a significant impact on us now -- so it maybe, it might be a little self-serving, but since we're on the north side of Cornhusker we do not see the negative impact of the railroad crossings.

MR. FIGARD: Thank you.

MR. MARK WHITEHEAD: Any questions?

Thank you very much for the opportunity.

* * *

MR. RUSS FOLTS: Hi there. Good evening, Russ Folts with Cornhusker International Trucks, we're at 3131 Cornhusker Highway. We've already talked -- Kris and I have talked many times over the, over the bid too. We're a company that built our facility, our original facility 1972. We have employed hundreds of people, tax-paying people, City of Lincoln and we support the community by -- by providing and repairing fire trucks and snow plows and school buses and commercial vehicles, tractor trailers.

Much to what Mark just said that the design does not fit with our business at all. There is no way that we can have -- that we can continue business and coexist with the design. There isn't physically room for turn in and turn out.

What we've been told when we've met with city is that we just have to retrain our -- our customers, and I don't think that there's a businessperson in here that would say that that's a realistic goal. Retraining our customers is just not something that -- that comes with it. We've been there a long time, try to be a good neighbor, we do business

with most of the folks in here.

In addition to that, the rear part of our parking lot, if you look at the picture, today we probably have 30 vehicles parked there. We can have up to 300 vehicles parked there, commercial size tractor trailers back there, school buses back there, and so when -- when we're seeing that we're potentially losing the ability to park in two-thirds of that, we just can't do that, it just won't work.

So we are a safety oriented company. We -- we understand the challenges with railroad. We call 911 probably three times a month for an accident. Now frankly, it doesn't have anything to do with the railroad crossing, has to do with people flying by, motorcycles, cars, whatever. But it is -- it is a dangerous part of town.

Not having access for our customers to come in and out of our property, we saw on one of the designs there was a -- a shoofly or a service road that wasn't -- you couldn't fit commercial vehicles down, and of course that's what the business is.

So I appreciate your time. I've always enjoyed working with you, Kris, and look forward to continuing with that.

I guess one other comment -- she's about

to wave the red at me I guess -- but the timeline that's listed for right-of-way acquisition, I think it's important to note that -- that our -- that impact our business and every business here doesn't start when the equipment comes in and the grading starts. It starts when the first lane is closed and the flags are out there, and there simply is not time to relocate a business like ours in the time that this timeline gives, so -- much longer than that.

All right, any questions?

(No response.)

MR. FIGARD: Thank you.

MS. HUMPHREY: Thank you.

MR. HART: Hey, thank you very much.

* * *

(Discussion off the record.)

MR. RICK VEST: Good evening, everyone. First of all, my name is Rick Vest. I am a member of the Lancaster County Board of Commissioners and I just want to say thank you to everyone here tonight who took time out of your schedules to come and learn more about this project and to give your input, because it's important that these business' concerns are heard and we need to address them to all that we're able to do.

I'm here testifying because I was a --

an employee of the Burlington Northern Railroad for 40 years, the Burlington Northern, BNSF Railway Company, of 27 years at Havelock shops and 14 years as a claims representative. One of the responsibilities I had as a claims representative was to go to at-grade crossing accidents where motorists did not clear the crossing before a train arrived.

These are devastating events for all the employees who respond, to the employees on a train who have to witness the events, and to all the employees who respond and see the aftermath, and to the families of those who are involved. It's a very sad situation.

We can take away that danger and that threat and risk with this project. We can improve traffic flows. I do believe we can find a way to address the concerns of our friends in the business community. And I just hope that we can all come together and support this project. Thank you.

* * *

MR. DALE ARP: Good evening, Dale Arp, 426 Steele Avenue.

My comments are mostly a question to you, but I participated in subarea plan for quite a while. One of the major things that came out of there was connectivity from north to south across the

railroad tracks and I am happy that 44th Street is not getting closed.

But one of the things that I'm -- has been part of my life for many years since 1989 is trails and I do see that part of the new bridge over the railroad tracks will include some kind of a sidewalkway. But I was also told at one point that when you improved Deadmans Run, a platform, or some terminology like that, would be in place so that the city could, if they wanted to, later on put a trail along Deadmans Run to then cross under the tracks and underneath Cornhusker as a actual trail as opposed to a sidewalk.

Is that still part of the plan?

MS. HUMPHREY: The 33rd and Cornhusker RTSD project is the transportation component. There's a separate project in the project area, just for those of you that aren't aware, of the Deadmans Run project. That's a totally separate project that the NRD and the City of Lincoln are actively working on.

The scope for that project has recently been modified and I would have to defer you to Tim Zock with the City of Lincoln watershed division to answer that question of how that scope has been modified.

MR. DALE ARP: So as far as you know,

the construction you're doing is not going to eliminate that possibility; is that correct?

MS. HUMPHREY: Correct. Our -- the -- our project will be in coordination to make sure that, you know, both of the projects that are in synced. If the decision is made to put a bank or a bench on that right bank, then the 33rd Street bridge has enough height and it will have enough span to be able to have that bench.

MR. DALE ARP: Okay, thank you.

* * *

MR. RON BROWN: Ron Brown, 5050 Ellsworth Street.

I was hoping more people would talk before I got up, more of the business people. I'm here because of Deadmans Run and with what you're doing is not going to help me any with Deadmans Run. I think the City of Lincoln needs to give up their utility outfit and make that into a bigger holding pond for Deadmans Run and hasn't been talked about.

And if you talk to Zock down there at the city county building, he'd give you a big turnaround. You can't -- he won't answer any questions. 'Cause he don't want to be pinned down to any of the answers.

Okay, any questions of me?

MR. FIGARD: We will need to respond to all questions and we will do our best to also try to facilitate getting responses and answers out from other entities that we don't have control on here. We may not be able to get you a perfect answer, but we'll try.

MR. RON BROWN: Well, the map got now, and with tearing down the old auto parts place, that needs to be all dredged out and that needs to be a holding pond, not beautiful grass. Because it's not going to help Deadmans Run any by just leaving the green grass in there, it's gonna -- that's gotta be a holding pond.

MR. FIGARD: Our goal with the 33rd Street and Cornhusker was to not conflict with other projects or to keep them from being able to move ahead, but we aren't necessarily in a position of control of those projects.

MR. RON BROWN: But they gotta tie together if your embankment won't -- your weight of your concrete is not going to be solid enough to hold that. How can you work with another project if your cement in the ground isn't going to be solid enough to hold it?

MR. FIGARD: We'll work on that in final

design to make sure that our structure and the surrounding area is long term well maintained and building to top grade.

MR. RON BROWN: All right, thank you.

MR. FIGARD: Thank you.

Before I say we're done, I want to make sure, this is really an opportunity to be here to speak your mind. We really care about what you think. We can't deal with an issue if you don't let us know if you have a concern. And we also know even if it was, "Please, I'm in support of the project. We need to move this ahead." We welcome those comments as well.

So before we close the hearing, I want to make sure that anyone doesn't leave regretting, "Oh, I wish I got up and said something," so...

Here we go one more.

* * *

MR. KIM CAFFERTY: My name is Kim Cafferty and I own Johnstone Supply and the building that Johnstone is in, is in a different corporation we call CCLB, but it's still the same family, same entity.

And I don't want to come up here and imply to anybody that the city and the county and the BN need to take our accounts or our needs into account any more than -- than the city at large. Safety is

huge and closing down those railroad crossings I understand the need for it. It will impair access to us, but not irreparably as your plan shows it, except it will be a big inconvenience.

And for most of our other business owners, I don't think that there's anybody in here who doesn't understand the need for cutting down the risk of cars running into trains, but what we're all complaining about is that your plan is not allowing even limited access, it's walls, it's curbs, it's gutters, it's impediments to people being able to turn into and out of a driveway to a business.

And I know that according to city planners nationwide, the less access you have, the less incidents you have, and I get it. But there's got to be a reason -- a reasonable effort made to be flexible enough to where you can accommodate both commerce and safety. And I don't think that that's been quite as well handled here with the plan as it could be, with a little flexibility, with a few more access points.

And sure, you're going to have some idiot do something stupid once in a while and cause a crash, and there's going to be a lawsuit and there's going to be fines and -- but eventually, our country is going to get back to the point of individual

responsibility for your actions and when someone is a stupid fool and they get hurt and they damage other people and their property, they're going to pay the consequence of that action.

The city can't do it all. The county can't do it all. You can't legislate against stupidity.

So please give us some access, that's my question.

MR. FIGARD: Thank you.

* * *

MS. MEGAN OURADA: My name is Megan Ourada. I'm a realtor here in Lincoln. There have been a lot of questions about whether or not there will be impacts on Deadmans Run and their project, obviously that's not your responsibility. Is there an opportunity for you to have a joint meeting like this or an open house with the Deadmans Run project and your stuff because everything you're doing is going to have an affect on that project?

MR. FIGARD: All I would say is if the city and the Lower Platte South NRD do have some other public meetings, we will make sure that we have a representative from our project there to coordinate.

MS. MEGAN OURADA: Okay. Is that

something that you guys can facilitate, like reaching out to them, or how do we as the consumer make this happen?

MR. FIGARD: I think we can ask LTU and Lower Platte South what their plans are. I would also like to think somewhere on the city's website there's information about those projects and this is a fairly recent change in the Deadmans Run project and I think they're taking a little time to get their feet on the ground and knowing exactly how to move it. 'Cause it's a fairly significant change in -- in the leadership and that project.

MS. MEGAN OURADA: Okay. Yeah, 'cause like you look at like the Dietrich Trail crossover, that needs to be an appropriate size because we expect that project to still continue on over Deadmans Run, so...

And then last question is: So the railroad branch that is just to the west of 33rd, that was a fairly large part of the Deadmans Run project. When they had the meeting before and railroad was there, they had said that that bridge needed to be replaced, is that part of this or is that someone else's responsibility?

MS. HUMPHREY: Are you talking about the

33rd Street structure at Deadmans Run?

MS. MEGAN OURADA: For just the trains.

MS. HUMPHREY: For the trains, yeah. Yeah, so the transportation project will construct a bridge over the railroad tracks --

MS. MEGAN OURADA: For the cars.

MS. HUMPHREY: -- for the cars.

MS. MEGAN OURADA: Yeah.

MS. HUMPHREY: And then they'll have the 8-foot side path for your pedestrians, bicyclists to use to go over the bridge as well.

MS. MEGAN OURADA: So just to the west of this whole project there's a bridge just for the trains over Deadmans Run.

MS. HUMPHREY: Yeah, so that -- those bridges are not part of the transportation project.

MS. MEGAN OURADA: Okay.

MS. HUMPHREY: That was part of the Deadmans Run project. We are working with BNSF with that. We've heard that they might be doing some modifications to those bridges, but for the transportation project, it does not -- the reconstruction or rehabilitation of those bridges does not affect the current plans that you see today.

MS. MEGAN OURADA: Okay, sounds good.

Thank you.

* * *

MR. EARL VISSER: I'm Earl Visser, resident of 36th North 48th Street and the question I had was: As property owners, we're, I understand, paying 1.9 cents for every hundred thousand of assessed valuation, and how do we enter into that budget in regards to property tax total that we get 17 entities?

How do we -- how are we able to have input into your budget and how do we gain that access?

Plus I have a second question: How is -- I understand approximately 7- or $8 million a year now is being put into this fund, the RTSD, right? And how do we have input, because in the past we've been able to have A Street overpass and this type of thing, but when I look at this application, I see the transportation part of it is very, very limited in the sense that we're saving a railroad track, but we're not looking at north/south transportation enhancement because we're not looking at tying in with the beltline, which is Superior. And we're not tying any past Huntington, so it's the 'ole balloon theory, you're putting a big bubble out there, but what is it going to have -- help the global community overcome one little problem which is a big problem. Thank you for

taking that testimony.

You have any questions?

MR. FIGARD: I think I can -- I can try to answer a couple of your questions. I might try to answer them in reverse order.

You ask about resolving maybe a problem at the railroad tracks but not the greater transportation problem from Cornhusker onto Superior.

The mission by state statute for the Railroad Transportation Safety District is to improve safety and reduce conflicts between trains, pedestrians, bicyclists and bikers and vehicles.

So there's a very limited scope where RTSD dollars can be spent and building a roadway from Cornhusker Highway onto 33rd would not meet that -- that criteria.

But the RTSD coordinates very closely with the city and the county to make sure anything we build is compatible with their long-range plan. And that was part of one of the goals of this project was to be consistent with the long-range plan. We just can't spend our money to do that.

How do you participate? You're exactly right, the RTSD collects property tax from everyone in Lancaster County and it's about 1.9 cents per $100 of

your valuation on your property.

The RTSD meets four times a year. You can come to those board meetings at any time. And in fact your timing is good, next Tuesday morning the RTSD will hold a public hearing on its proposed budget. You can address the board members, three county commissioners, three city council members, your thoughts on that budget.

You can also -- the RTSD and a number of political subdivisions in the county are limited by the 15-cent lid limits put in in 19 -- in the late '90 -- '95, '98, in which the county board has ultimate authority over giving a levy to the RTSD, the ag societies, the rural fire districts in the county, and they had a public hearing on their budget in the last couple of weeks.

Those are ways to come and participate and -- in how your tax dollars are used. And the RTSD has had a long history of talking about a project that's a priority, getting, saving money, building it and then going to the next one, and this is a project in a long series of those.

But we're wide open, public can come to the meetings, we -- we welcome the input. 'Cause it is your tax money and we're trying to spend it

responsibly.

Anybody else?

Going, going, gone. With that I would like to thank everyone for participating in the hearing tonight.

The RTSD and the City of Lincoln look forward to completing this milestone and move this existing high-profile project forward.

The project team will remain here until around seven o'clock to continue to discuss the proposed project with you in each of the stations around the room.

Again, we thank you for being here and participating and your input is very much appreciated.

Thank you.

(Hearing presentation and comments concluded at 6:20 p.m.)

(No additional comments were put on the record.)

(Hearing concluded at 7:00 p.m.)

** ** ** **

C E R T I F I C A T E

STATE OF NEBRASKA)
: ss.
COUNTY OF LANCASTER)

I, Christine M. Salerno, Registered Professional Reporter, General Notary Public within and for the State of Nebraska, do hereby certify that the foregoing proceedings were taken by me in shorthand and thereafter reduced to typewriting by use of Computer-Aided Transcription, and the thirty-seven (37) pages contain a full, true and correct transcription of all the proceedings to the best of my ability;

That I am not a kin or in any way associated with any of the parties to said cause of action, or their counsel, and that I am not interested in the event thereof.

IN WITNESS WHEREOF, I hereunto affix my signature and seal this 19th of SEPTEMBER, 2024.

1	Carol Zanetti 402-405-1111 2521 N 87th St Apt K Lincoln, NE 68507 noldor51@gmail.com	The railroad crossing at Adams & Cornhusker is extremely dangerous in both directions. I have been trapped between cars there with nowhere to go in case of an oncoming train. My granddaughter must drive that route between her home and her sisters' schools. They were nearly hit by a train and unable to escape between cars as the bars came down but their view had been obscured and cars behind them had piled up. They were forced to drive off the road in between cars onto gravel to escape the train. It traumatized her young sisters in the back seat. I have been stuck in a long line of cars backed all the way back onto Cornhusker in heavy traffic, completely filling the eastbound lane on Cornhusker. I fear being hit from behind, or sandwiched between cars which 2 have, by cars unknowingly proceeding east on Cornhusker, again with nowhere to go and cars both ahead and behind me. The crossing on N 33rd near Cornhusker is equally dangerous and I have experienced or seen similar situations there. These are accidents and fatalities that have already happened or are waiting to happen again. There is no excuse that in those areas of very heavy traffic at all hours, especially hours before and after work, on streets which are major connections between major parts of town, are allowed to remain in place, placing lives in jeopardy every day. Fix this before more people are killed.	Dear Carol, The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project. The purpose of the proposed project is to improve safety along the rail corridor between N. 27th and N. 48th streets by eliminating or reducing the potential conflict points between trains and other transportation modes (vehicles, pedestrians, and bicyclists). The project is needed due to the high volume of vehicular and train traffic in the area along the Burlington Northern Sante Fe rail corridor between N. 27th and N. 48th Streets. The proposed project would close both the existing at-grade crossings of 33rd Street and Adams Street with the BNSF railroad tracks. The project would also include a new viaduct over the railroad to allow vehicles, bicycles, and pedestrians to traverse the area without the possibility of being stopped on the tracks. Thank you again for your participation! Roger Figard, Executive Director RTSD 402-441-7711 | rfigard@lincoln.ne.gov

2	Brad Merrdith 402-880-0362 3700 Cornhusker Hwy Lot 40C bradfordsmeredith@yahoo.com	What time frame on work & how will traffic be rerouted????	Dear Brad, The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project. The detour routes for traffic will be determined during final design, which is anticipated to begin in 2025. Detour routes typically follow similar or greater roadway classifications. For example, residential roadways would be detoured to other residential roadways or commercial roadways. Arterial roadways would be detoured to other arterial roadways, but not to commercial or residential roadways. The project is nearing the completion of the preliminary design and environmental review stages. Final design is anticipated to begin in 2025 with right-of-way acquisition occurring in 2026 and utility relocations occurring in 2027. Construction of the proposed project is anticipated to begin in late 2027 or early 2028 and is expected to take three years to complete.

			Thank you again for your participation! Roger Figard, Executive Director RTSD 402-441-7711 | rfigard@lincoln.ne.gov
3	James Linneman 2928 N. 64th St Lincoln, NE 68507 jameslinneman@yahoo.com	I was wondering if there was anyway to make the east bound right turn lane at 33rd and Cornhusker a right turn only lane. The people using the middle lane of cornhusker to pass people in the right hand turn/go straight on towards Adams lane causes a lot of near misses and road rage incidents. I drive this route at least 5 times a week and I see close calls all the time, it's a matter of when not if before something horrible happens here. A cheap and easy fix until this project is underway would be to make the east bound turn lane a right turn only lane and have the lane east of 33rd become almost like an exit lane for Adams. This would prevent people racing with each other and cutting each other off. The median of 33rd could be extended north and marked with reflectors to prevent people from 2 going east past 33rd in the right hand turn lane. I think this simple solution would help with some of the risk exposures of this intersection. Thanks	Dear James, The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project. The preferred alternative eliminates the at-grade crossing of Adams Street and addresses your concern. An interim solution for the eastbound merging movements on Cornhusker Highway east of 33rd Street is not part of the scope of this project. Your comment will be shared with the City of Lincoln Traffic Division for further consideration. Thank you again for your participation! Roger Figard, Executive Director RTSD 402-441-7711 | rfigard@lincoln.ne.gov

4	Bryant Grimminger 402-770-4749 3103 N 39th St Lincoln, NE 68504 bgrimmin@gmail.com	Thank you so much for looking at the pedestrian/cyclist aspect of this project. I know this took a lot of work so far, and pleasing everyone who uses the impacted routes is impossible. The people who put this together obviously know a lot more than me, and I would put their expertise over any of my concerns. And I will warn you that I'm a car-free cyclist, and have thus gone insane trying to go about my daily life. I use cornhusker/adams from N 39th to the super saver on N 27th to get groceries on my bike, and it is not an especially fun time. I have to carry my bike over the tracks, bike on Adams itself, or use the Dietrich trail for a lengthy detour. I see pedestrians trudging through the 2 grass/dirt along Adams on the northside fairly often. But, for me, the ideal solution is just to put a concrete path for cyclists and pedestrians on and near the tracks. We would still wait for trains, but at least we don't have to pick up our bikes to get over the tracks or trudge through grass/dirt. I personally think it is a bit overkill to bypass the tracks entirely. It certainly improves things for cars, but don't pedestrians and cyclists now have a longer, more uncomfortable route? Even accounting for no longer waiting for trains, the detour south to madison and then back north to cornhusker seems significant. And now we'll be right next to all these loud, speeding cars while going up an incline too.	Dear Bryant, The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project. The purpose of the proposed project is to improve safety along the rail corridor between N. 27th and N. 48th streets by eliminating or reducing the potential conflict points between trains and other transportation modes (vehicles, pedestrians, and bicyclists). The preferred alternative proposes to completely close the crossings of 33rd Street and Adams Street in order to eliminate the potential for collisions between trains and all other transportation modes. Currently there are no accommodations for bicyclists or pedestrians at the existing 33rd Street and Adams Street railroad crossings. In the preferred alternative, accommodations will be provided for pedestrians and bicyclists with the addition of sidewalks or multi-use paths along the south side of Adams Street and the east side of 33rd Street to avoid pedestrian and bicyclist conflicts with trains. Additionally, a multiuse path would be constructed along the north side of Cornhusker Highway through the project limits.

		I know this sounds trivial, and it probably is. I'm a small and relatively unimportant minority when it comes to this project. And things could certainly be a lot worse. I can still use Dietrich for a more comfortable, if more lengthy, detour after all. I just wanted to let you know how I feel, and I would welcome any insight on the benefits to cyclists. Thank you again for all the time and effort that has been put into this project.	The project team reviewed multiple alternatives for providing a separate bicycle/pedestrian crossing near Adams Street. Ultimately a solution was not found that would have been both reasonable and feasible. The provided solution along 33rd Street and Adams Street, utilizing the proposed viaduct over the railroad tracks, adds approximately 700 additional feet in length as opposed to a direct route. The proposed grades would be 5 percent or less to comply with the Americans with Disabilities Act (ADA) requirements. Thank you again for your participation! Roger Figard, Executive Director RTSD 402-441-7711 | rfigard@lincoln.ne.gov
5	Glen Fergusen gsferg68@gmail.com	Lower the train tracks like it is in Reno Nevada. But I imagine the cost for that would be even higher. Plus flood control would be a big factor as well. Just a suggestion. Thanks	Dear Glen, The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project. The project team did look at an alternative to go under the railroad tracks. Ultimately that alternative was eliminated from further consideration due to the potential flooding concern. Another alternative looked at lowering the tracks which was also deemed unfeasible due to the long distance needed to make the connections on the north and south sides of the tracks west of Deadmans Run. The preferred

			alternative was chosen based on its alignment with the project's purpose and need, compliance with the selection criteria, and input gathered from the public and stakeholders. Thank you again for your participation! Roger Figard, Executive Director RTSD 402-441-7711 | rfigard@lincoln.ne.gov
6	Richard Sutton 5845 Apple St Lincoln, NE 68503 Rsutton131@gmail.com	33rd Street x-sections do not show street trees! All roadway/streetscape projects need to include street trees!	Dear Richard, The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project. The Cornhusker Highway Corridor Enhancement Plan (CEP) was developed in 2020 as part of the revitalization strategy for the North 33rd and Cornhusker Highway subarea. The CEP provides an overview of how updated lighting, landscaping, pedestrian amenities, and other streetscape enhancements could address the visual enhancements of the Cornhusker Highway corridor from N. 11th to N. 56th streets. The CEP was developed with the consideration of safety, connectivity, economic sustainability, identity and quality of life, and environmental sustainability. Future construction or improvements on Cornhusker Highway would utilize the recommendations from the CEP. The CEP can be

			found on the city's website, lincoln.ne.gov (search: Cornhusker corridor enhancement). The final landscape plan for the proposed project would be determined during final design which is anticipated to begin in 2025. Thank you again for your participation! Roger Figard, Executive Director RTSD 402-441-7711 | rfigard@lincoln.ne.gov
7	Anon	-Have presenters us a pointer/laser while talking; speaking quickly is difficult to follow. -Holdrege is misspelled on the brochure map. (no second "d")	Dear Neighbor, The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project. Thank you again for your participation! Roger Figard, Executive Director RTSD 402-441-7711 | rfigard@lincoln.ne.gov
8	Ken Fraley 402-310-6960 3304 Madison Ave Lincoln, NE 68504 customk3869@gmail.com	I own Avenue Cycle. I agree this project is needed and my property will be needed for this to be completed. I would like to have my property purchased as soon as possible, rather than later.	Dear Ken, The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project.

			The right-of-way phase of this project is anticipated to begin in 2026. Early acquisition may be possible in 2025 but would require approval by state and federal authorities due to the use of federal funding for the project. If that approval is received, the City of Lincoln's right-of-way agent will be in contact with you as soon as feasibly possible. Thank you again for your participation! Roger Figard, Executive Director RTSD 402-441-7711 | rfigard@lincoln.ne.gov
9	Carter Thiele (LIBA) 3601 Calvert St Ste 29, Lincoln, NE 68506	Thank you, RTSD Leadership for the opportunity to offer the Lincoln Independent Business Association's (LIBA) comments on this project. My name is Carter Thiele, and I am LIBA's Policy and Research Coordinator. For starters, there's been quite a few documents I've read over the past year that have taken three or four times to get the gist of, and the draft environmental assessment for this project is not one of them. The team that drafted this did an excellent job, and it illustrates the commitment to this project's thorough planning and collaborative engagement with the local community. We share the excitement over this project contributing to Lincoln's economic growth. The prospect of improving north-south travel in this area is long overdue and it will contribute to new and existing businesses expanding	Dear Carter, The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project. We understand your concerns about the impacts to local businesses. The City of Lincoln has adopted an Access Management Policy which provides guidelines for providing reasonable access to individual properties while protecting the effective and safe flow of traffic on the surrounding road system. Additionally, Cornhusker Highway is on the National Highway System which is governed by the Nebraska Department of Transportation.

		northward. With that in mind, we cannot let the prospect of acquiring new members overshadow our responsibility to represent our current ones. As you've heard from several of the business owners affected by this project, the planned reduction in access to their establishments threatens their ability to remain in business. They do not claim that it threatens a hinderance to their profit margins; it threatens their ability to remain in business. One point that I'd like to highlight about the project is regarding the overpass on 33rd south of Cornhusker, a cornerstone of this project. When drivers are going northward on 33rd street towards the planned roundabout, they will see the businesses to the right and take the outside lane for the first exit towards the businesses; only to then realize that there is a median at the intersection they planned on turning left at. This will encourage the unaware drivers to continue down Cornhusker to find another place to get gas or find something to eat. For habitual customers - "regulars" - there may not be the same problem, however the task of having to make the full loop will likely discourage those who are in a hurry and short on time. This in combination with the lack of direct access to the establishments for travelers driving westward on Cornhusker Highway, pose extreme deterrents to business operations.	The proposed project is currently designed to follow the guidelines set forth by the Access Management Policy. According to that policy, the City may approve a deviation provided that public health, safety and welfare are not jeopardized, but they may not conflict with applicable State or Federal standards. Members of the project team would be available to listen to specific concerns from property owners during final design anticipated to begin in 2025. Thank you again for your participation! Roger Figard, Executive Director RTSD 402-441-7711 | rfigard@lincoln.ne.gov

		We understand that restrictions in access during periods of construction are inescapable. But if the finished product of that construction keeps access further limited, then a minor alteration to the design that retains the project's intention while preserving the current level of access would be greatly appreciated. Again, we express optimism over what this project accomplishes in the long run and expect that it will expand the business districts northward beyond Cornhusker. We ask for a minor alteration in the project's design that allows the existing businesses in this area the ability to continue operating. Thank you for your consideration and the work you've put into improving the corridor.	
10	Mohammed Abdulaali 402-219-4582 3625 Adams St Lincoln, NE 68504 mohammed282757@gmail.com	Hello, We, the owners of the building, saw your guys plan to make the roads safer. We are reaching out regards the design of the plan. Looks like our building will be affected. Can you guys reach out to us on what will be done? We would like to keep our building as it is because we are looking to make future carlot out of it. Since the road isn't at its final design, I would like address a possible adjustment to the road so we can avoid any altercation with the property. I hope I am not asking too much. Thank you, Mohammed	Dear Mohammed, The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project. We understand your concerns about the impacts to your property. A member of the project team will soon reach out to you to discuss the proposed project and to listen to your specific concerns. Thank you again for your participation! Roger Figard, Executive Director RTSD 402-441-7711 | rfigard@lincoln.ne.gov

11	Mark Whitehead 2537 Randolph Street, Lincoln, NE 68510-3041	I appreciate the opportunity to express concerns last night. My two requests are …. 1) Egress on to Cornhusker towards our West property line. With the new primary access being off of 33rd Street, it will create a significant bottleneck at our fuel dispensers. The flow of traffic will be facing the SW at the dispensers. When finished there is not a realistic way for them to exit since they will be facing SW. That is depicted in the handout I provided. The other depiction in the handout is our transport. The "drop tubes" that we hook our hoses to that go to the tanks are on the right side of the truck. Our tanks are on the SE corner of the lot. The two truck depictions on the drawing is intended to show what it would look like to have to do a U-Turn on our lot with a semi, and the other shows our truck positioned at the unloading point next to the tanks. 2) The cross-access easement along the South side of all of our business is critical as well. Customers exiting our dispensers that need to continue E on Cornhusker need a good alternative. Kris had expressed a concern of customers coming out of a Cornhusker egress cutting across all lanes of traffic to get to the turn lane to either turn left or negotiate a U-Turn. The cross-access easement would give better access to 31st to accomplish this. I had mentioned last night that the Hog Wild building was the one constructed farthest tp the South that complicates this the most. If the deceleration lane is shortened a bit and if the	Dear Mark, The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project. As previously discussed, the City of Lincoln has adopted an Access Management Policy which provides guidelines for providing reasonable access to individual properties while protecting the effective and safe flow of traffic on the surrounding road system. Additionally, Cornhusker Highway is on the National Highway System which is governed by the Nebraska Department of Transportation. The proposed project is currently designed to follow the guidelines set forth by the Access Management Policy. According to that policy, the City may approve a deviation provided that public health, safety and welfare are not jeopardized, and it may not conflict with applicable State or Federal standards. The City is currently reviewing the deviation request you sent in via email on July 5, 2024 and looking at potential design modifications that would accommodate your request. This will be further evaluated in final design, and we will follow up with you when that phase of the project is underway, anticipated in 2025. Thank you again for your participation!

		bike path is started a little further W then this space may be able to be accommodated. Our diesel tank is compromised right now. We are out of the diesel business. The cost of replacing it is in excess of $1,000,000. Right now we are at a standstill, because of our lack of confidence. Hopefully we will be able to figure this out. As always, if I can assist or answer any questions, please do not hesitate to reach out.	Roger Figard, Executive Director RTSD 402-441-7711 | rfigard@lincoln.ne.gov
12	Brent Bahner 316-613-2444 2024 N Woodlawn, Ste 404 Wichita, KS 67208 bbahner@gohogwild.com	We own and operate the Hog Wild Pit Bar-B-Q at 3210 Cornhusker Hwy in Lincoln. We are a proud resident of the City of Lincoln and support the City's efforts "to eliminate or reduce conflict points between trains and vehicles, pedestrians and bicyclists; to reduce delays for emergency responders, motorists, pedestrians and bicyclists when streets are blocked by trains; to reduce congestion; and to improve mobility and multimodal connectivity." We appreciate the opportunity to submit comments on behalf of ourselves and the other commercial interests along the corridor. We do have our concerns that the proposal will adversely impact the ability of our customers and employees to access our building damaging our ability to continue to conduct business and be an economic driver for the City of Lincoln. We look forward to the opportunity to continue to work with the City of Lincoln.	Dear Brent, The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project. We understand your concerns about the impacts to your property. The City of Lincoln has adopted an Access Management Policy which provides guidelines for providing reasonable access to individual properties while protecting the effective and safe flow of traffic on the surrounding road system. Additionally, Cornhusker Highway is on the National Highway System which is governed by the Nebraska Department of Transportation. The proposed project is currently designed to follow the guidelines set forth by the Access Management Policy. According to that policy, the City may approve a deviation provided that public health, safety and welfare are not jeopardized,

			and it may not conflict with applicable State or Federal standards. Members of the project team would be in contact with property owners and available to listen to specific concerns during final design. Design modifications to individual property access points would occur during final design, which is anticipated to occur in 2025. Thank you again for your participation! Roger Figard, Executive Director RTSD 402-441-7711 | rfigard@lincoln.ne.gov
13	Pam Brunke 402 560-0972 850 Irving St Lincoln, NE 68521 p_brunke@yahoo.com	I own property in the project area, 2525 N 33rd St, 2535 N 3rd St, 2547 N 33rd St, 2512 Griffith St. The most significant impact is the loss of paved access from North 33rd Street. Technically 2525 & 2535 N 33 currently only have access from North 33rd. Because I own the abutting property I have allowed access from the back of the buildings as a convenience. If these properties were owned by others that would not be the case. I will lose parking for 2525 N 33 & 2535 N 33. With the widening of N 33 it is unclear how close the overpass will be to the building structures or whether there may be the need to acquire the properties. The proposed access to the properties will be west on Huntington Ave, north on Griffith, east on Baldwin then a street / drive behind the 33rd street buildings. Griffith is currently an unimproved street. I was told it would be paved with this project. It is unclear as to whether property would need to be acquired along Griffith to do this. I was told the	Dear Pam, The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project. You have correctly interpreted the preliminary plans regarding access to these three properties. Due to geometric conditions, direct access to 33rd Street from these properties is not able to be provided in the future. The project proposes to pave Griffith Street between Huntington Avenue and Baldwin Avenue and provide an access driveway from Baldwin Avenue to these properties. Permanent and temporary easements are anticipated for paving of Griffith Street, however no right-of-way would be acquired. Members of the project team would be in contact with property owners and available to listen to

		street / drive to access the 33rd Street properties would be done with the project. This currently is private property. It is unclear as to whether this would be a city owned /maintained access or would be a private drive. The building at 2535 N 33 has a drive through door on the front of the building and on the back of the building. The building becomes less functional with the loss of access on 33rd. I have been unable to develop or change anything with these properties since they are in located in the Flood Plain. Any time I have tried to do anything I get told I can't do anything that negatively impacts my neighbor. This project and Dead Mans Run project negatively impact me and have been for years. Constant studies, delays and change of plans. It is extremely frustrating.	specific concerns during final design. Design modifications to individual property access points would occur during final design, which is anticipated to occur in 2025. Thank you again for your participation! Roger Figard, Executive Director RTSD 402-441-7711 | rfigard@lincoln.ne.gov
14	Mark Whitehead U-STOP 2537 Randolph Street, Lincoln, NE 68510-3041	For the record, my name is Mark Whitehead, W-H-I-T-E-H-E-A-D. I'm the owner and CEO of Whitehead Oil Company, we've got a location affected by this project located at 33rd and Cornhusker Highway. The -- to say that this has got significant impact would be an understatement. I do want to recognize Amy [Kris] and I have traded off a lot of e-mails there, and I appreciate our conversations this point as well, and I appreciate this opportunity to give comments on this project. The impact of this -- there are basically four property owners between 31st and 33rd Street. We recognize some of the challenges that already exist on operating all -- all four of these businesses by a cross-access easement that exists between all of us that runs along the south side of all	*See response #11

		of our businesses. And that is critical to traffic flow the way it exists even with the access points on Cornhusker Highway. This project takes away all access points onto Cornhusker Highway and our only access points are off of 31st Street with -- and 33rd Street. There does not appear to be any room for the cross-access easement that already exists between the four businesses along the south side of our businesses. We do, of course, recognize the new access road that's going to be constructed along the north side of our properties, but every single one of our businesses are oriented towards Cornhusker and every one of 'em -- and traffic flows come in from the back side of our businesses, which isn't ideal, would -- would be an understatement. The most critical part for us is this is an unworkable traffic flow for our existing configuration. We've got dispensers along the -- the southeast portion of our building in a diagonal. The way those dispensers are oriented, they – they currently customers can come in either on the cross access easement or off of Cornhusker Highway facing towards the east or off of 33rd Street, which is what would be provided here, which is very similar to what's already been provided. As a customer comes in and goes along our dispensers, they would be facing southwest with no realistic way or convenient way for them to really turn around. It appears as though the cross-access easement completely goes away. I don't know whether or not there would be a cross-access easement available to us or with Hog Wild, but across their property line,	

		that's not realistic to get to the north – north access road. And the yellow that's depicted on – on your -- on your sheet there shows just one transport, which is our fuel transport, that comes in – oh you're got to be kidding me, I'll be very brief. Our two requests -- our two requests on this thing is to get an access point on Cornhusker Highway. That is critical. The way the configurations are currently right now, it is impossible for our traffic flow to work with this thing. My second request is to figure out a way to maintain -- maintain a cross easement that's reasonable across the four properties that would, at least, give us the opportunity for traffic flow to come through here. But Amy -- Amy and Aaron, I look forward to further discussions with you all, but I think our concerns are fairly obvious here. This flat out doesn't work.	
15	Russ Folts Cornhusker International 3131 Cornhusker Highway Lincoln, NE 68504	Hi there. Good evening, Russ Folts with Cornhusker International Trucks, we're at 3131 Cornhusker Highway. We've already talked -- Kris and I have talked many times over the, over the bid too. We're a company that built our facility, our original facility 1972. We have employed hundreds of people, tax-paying people, City of Lincoln and we support the community by -- by providing and repairing fire trucks and snow plows and school buses and commercial vehicles, tractor trailers. Much to what Mark just said that the design does not fit with our business at all. There is no way that we can have -- that we can continue business and coexist with the design. There isn't physically room for turn in and turn out. What	Dear Russ, The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project. We understand your concerns about the impacts to your business. The City of Lincoln has adopted an Access Management Policy which provides guidelines for providing reasonable access to individual properties while protecting the effective and safe flow of traffic on the surrounding road system. Additionally, Cornhusker Highway is on

		we've been told when we've met with city is that we just have to retrain our – our customers, and I don't think that there's a businessperson in here that would say that that's a realistic goal. Retraining our customers is just not something that -- that comes with it. We've been there a long time, try to be a good neighbor, we do business with most of the folks in here. In addition to that, the rear part of our parking lot, if you look at the picture, today we probably have 30 vehicles parked there. We can have up to 300 vehicles parked there, commercial size tractor trailers back there, school buses back there, and so when -- when we're seeing that we're potentially losing the ability to park in two-thirds of that, we just can't do that, it just won't work. So we are a safety oriented company. We -- we understand the challenges with railroad. We call 911 probably three times a month for an accident. Now frankly, it doesn't have anything to do with the railroad crossing, has to do with people flying by, motorcycles, cars, whatever. But it is -- it is a dangerous part of town. Not having access for our customers to come in and out of our property, we saw on one of the designs there was a -- a shoofly or a service road that wasn't -- you couldn't fit commercial vehicles down, and of course that's what the business is. So I appreciate your time. I've always enjoyed working with you, Kris, and look forward to continuing with that. I guess one other comment -- she's about to wave the red at me I guess -- but the timeline that's listed for right-of-way acquisition, I think it's important to note	the National Highway System which is governed by the Nebraska Department of Transportation. The proposed project is currently designed to follow the guidelines set forth by the Access Management Policy. According to that policy, the City may approve a deviation provided that public health, safety and welfare are not jeopardized, but they may not conflict with applicable State or Federal standards. The project is nearing the completion of the preliminary design and environmental review stages. Final design is anticipated to begin in 2025 with right-of-way acquisition occurring in 2026 and utility relocations occurring in 2027. Construction of the proposed project is anticipated to begin in late 2027 or early 2028 and is expected to take three years to complete. Members of the project team would be in contact with property owners and available to listen to specific concerns during final design. Design modifications to individual property access points would occur during final design. Thank you again for your participation! Roger Figard, Executive Director RTSD 402-441-7711 | rfigard@lincoln.ne.gov

		that -- that our -- that impact our business and every business here doesn't start when the equipment comes in and the grading starts. It starts when the first lane is closed and the flags are out there, and there simply is not time to relocate a business like ours in the time that this timeline gives, so -- much longer than that.	
16	Rick Vest (Lancaster County Board of Commissioners) 555 S 10th Street Room 110 Lincoln, NE 68508	Good evening, everyone. First of all, my name is Rick Vest. I am a member of the Lancaster County Board of Commissioners and I just want to say thank you to everyone here tonight who took time out of your schedules to come and learn more about this project and to give your input, because it's important that these business' concerns are heard and we need to address them to all that we're able to do. I'm here testifying because I was a -- an employee of the Burlington Northern Railroad for 40 years, the Burlington Northern, BNSF Railway Company, of 27 years at Havelock shops and 14 years as a claims representative. One of the responsibilities I had as a claims representative was to go to at-grade crossing accidents where motorists did not clear the crossing before a train arrived. These are devastating events for all the employees who respond, to the employees on a train who have to witness the events, and to all the employees who respond and see the aftermath, and to the families of those who are involved. It's a very sad situation. We can take away that danger and that threat and risk with this project. We can improve traffic flows. I do believe we can find a way to address the concerns of our friends in the business community. And I just hope that	Dear Rick, The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project. Thank you again for your participation! Roger Figard, Executive Director RTSD 402-441-7711 | rfigard@lincoln.ne.gov

		we can all come together and support this project. Thank you.	
17	Dale Arp 426 Steele Ave Lincoln, NE 68510	My comments are mostly a question to you, but I participated in subarea plan for quite a while. One of the major things that came out of there was connectivity from north to south across the railroad tracks and I am happy that 44th Street is not getting closed. But one of the things that I'm – has been part of my life for many years since 1989 is trails and I do see that part of the new bridge over the railroad tracks will include some kind of a sidewalkway. But I was also told at one point that when you improved Deadmans Run, a platform, or some terminology like that, would be in place so that the city could, if they wanted to, later on put a trail along Deadmans Run to then cross under the tracks and underneath Cornhusker as a actual trail as opposed to a sidewalk. Is that still part of the plan? So as far as you know, the construction you're doing is not going to eliminate that possibility; is that correct?	Dear Dale, The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project. The 33rd and Cornhusker RTSD project focuses on multimodal transportation in the proposed project area. The Deadmans Run project is a separate project in the area, which the Lower Platte South Natural Resource District (LPSNRD) and the City of Lincoln are actively working on. The scope for that project has recently been modified and I would have to defer you to Jared Nelson with the City of Lincoln Watershed Division for more information regarding that project. Jared can be reached at jnelson@lincoln.ne.gov or 402-441-7018. As this proposed project moves into final design, the RTSD would coordinate with the NRD and the City's Watershed Division regarding potential impacts to either project.

			Thank you again for your participation! Roger Figard, Executive Director RTSD 402-441-7711 | rfigard@lincoln.ne.gov
18	Ron Brown 5050 Aylesworth Street Lincoln, NE 68504	I was hoping more people would talk before I got up, more of the business people. I'm here because of Deadmans Run and with what you're doing is not going to help me any with Deadmans Run. I think the City of Lincoln needs to give up their utility outfit and make that into a bigger holding pond for Deadmans Run and hasn't been talked about. And if you talk to Zach down there at the city county building, he'd give you a big turnaround. You can't -- he won't answer any questions. 'Cause he don't want to be pinned down to any of the answers.	Dear Ron, The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project. The 33rd and Cornhusker RTSD project focuses on multimodal transportation in the proposed project area. The Deadmans Run project is a separate project in the area, which the Lower Platte South Natural Resource District (LPSNRD) and the City of Lincoln are actively working on. 19	Kim Cafferty Johnstone Supply 1029 N. 33rd Street Lincoln, NE 68503	My name is Kim Cafferty and I own Johnstone Supply and the building that Johnstone is in, is in a different corporation we call CCLB, but it's still the same family, same entity. And I don't want to come up here and imply to anybody that the city and the county and the BN need to take our accounts or our needs into account any more than -- than the city at large. Safety is huge and closing down those railroad crossings I understand the need for it. It will impair access to us, but not irreparably as your plan shows it, except it will be a big inconvenience. And for most of our other business owners, I don't think that there's anybody in here who doesn't understand the need for cutting down the risk of cars running into trains, but what we're all complaining about is that your plan is not allowing even limited access, it's walls, it's curbs, it's gutters, it's impediments to people being able to turn into and out of a driveway to a business. And I know that according to city planners nationwide, the less access you have, the less incidents you have, and I get it. But there's got to be a reason -- a reasonable effort made to be flexible enough to where you can accommodate both commerce and safety. And I don't think that that's been quite as well handled here with the plan as it could be, with a	Dear Kim, The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project. We understand your concerns about the impacts to your business. The City of Lincoln has adopted an Access Management Policy which provides guidelines for providing reasonable access to individual properties while protecting the effective and safe flow of traffic on the surrounding road system. Additionally, Cornhusker Highway is on the National Highway System which is governed by the Nebraska Department of Transportation. The proposed project is currently designed to follow the guidelines set forth by the Access Management Policy. According to that policy, the City may approve a deviation provided that public health, safety and welfare are not jeopardized, but they may not conflict with applicable State or Federal standards.

		little flexibility, with a few more access points. And sure, you're going to have some idiot do something stupid once in a while and cause a crash, and there's going to be a lawsuit and there's going to be fines and -- but eventually, our country is going to get back to the point of individual responsibility for your actions and when someone is a stupid fool and they get hurt and they damage other people and their property, they're going to pay the consequence of that action. The city can't do it all. The county can't do it all. You can't legislate against stupidity. So please give us some access, that's my question.	Members of the project team would be in contact with property owners and available to listen to specific concerns during final design. Design modifications to individual property access points would occur during final design, which is anticipated to occur in 2025. Thank you again for your participation! Roger Figard, Executive Director RTSD 402-441-7711 | rfigard@lincoln.ne.gov
20	Megan Ourada 6701 Lexington Circle Lincoln, NE 68505	My name is Megan Ourada. I'm a realtor here in Lincoln. There have been a lot of questions about whether or not there will be impacts on Deadmans Run and their project, obviously that's not your responsibility. Is there an opportunity for you to have a joint meeting like this or an open house with the Deadmans Run project and your stuff because everything you're doing is going to have an affect on that project?	Dear Megan, The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project. The 33rd and Cornhusker RTSD project focuses on multimodal transportation in the proposed project area. The Deadmans Run project is a separate project in the area, which the Lower Platte South Natural Resource District (LPSNRD) and the City of Lincoln are actively working on. The scope for that project has recently been modified and I would have to defer you to Jared Nelson with the City of Lincoln Watershed Division for more information regarding that project. Jared can be reached at jnelson@lincoln.ne.gov or 402-441-7018.

			As this proposed project moves into final design, the RTSD would coordinate with the NRD and the City's Watershed Division regarding potential impacts to either project. Your request for a joint public meeting has been forwarded to Tim and the LPSNRD for consideration. Thank you again for your participation! Roger Figard, Executive Director RTSD 402-441-7711 | rfigard@lincoln.ne.gov
21	Earl Visser 3646 N. 48th Street #17 Lincoln, NE 68504	I'm Earl Visser, resident of 36th North 48th Street and the question I had was: As property owners, we're, I understand, paying 1.9 cents for every hundred thousand of assessed valuation, and how do we enter into that budget in regards to property tax total that we get 17 entities? How do we -- how are we able to have input into your budget and how do we gain that access? Plus I have a second question: How is -- I understand approximately 7- or $8 million a year now is being put into this fund, the RTSD, right? And how do we have input, because in the past we've been able to have A Street overpass and this type of thing, but when I look at this application, I see the transportation part of it is very, very limited in the sense that we're saving a railroad track, but we're not looking at north/south transportation enhancement because we're not looking at tying in with the beltline, which is Superior. And we're not tying	Dear Earl, The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project. The mission by state statute for the Railroad Transportation Safety District (RTSD) is to improve safety and reduce conflicts between trains, pedestrians, bicyclists and bikers and vehicles. Because of this, there is a very limited scope where RTSD dollars can be spent and building a roadway from Cornhusker Highway to Superior Street along 33rd Street would not meet those criteria. The RTSD collects property tax from everyone in

		any past Huntington, so it's the 'ole balloon theory, you're putting a big bubble out there, but what is it going to have -- help the global community overcome one little problem which is a big problem. Thank you for taking that testimony.	Lancaster County and it's about 1.9 cents per $100 of your valuation on your property. The RTSD coordinates very closely with the City and the County to make sure anything we build is compatible with their long-range plan. More specifically, the desire for and possible connections for north/south transportation in North Lincoln were addressed in the 33rd and Cornhusker Subarea Plan and are included in the 2050 Long Range Transportation Plan. Both documents can be found on the city's website at lincoln.ne.gov (search "cornhusker subarea" and "LRTP", respectively). Thank you again for your participation! Roger Figard, Executive Director RTSD 402-441-7711 | rfigard@lincoln.ne.gov
22	Scott Meints Joe's Body Shop 2505 N 33rd St, Lincoln, NE 68504	Good Morning. My name is Scott Meints and I am the owner of Joe's Body Shop on the corner of 33rd Street and Huntington Ave. I attended the public meeting earlier this month and have some concerns about what I saw. It appears that the roundabout will take out most of the access to parking on the south side of the building. Your current plans have the only access to my property coming from quite a distance to the west of the roundabout corner. Then customers will need to drive along the south side of the building to get to the front of the building. With	Dear Brent, The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project. We understand your concerns about the impacts to your property. The City of Lincoln has adopted an Access Management Policy which provides guidelines for providing reasonable access to individual properties while protecting the effective and safe flow of traffic on the surrounding road

		that being the only access to the front of the building we will need to keep it free of parked cars to allow vehicles to drive to the front. The entry is also directly in place of the main access to the body shop and our delivery area for parts. Another concern is what we will do with cars that get towed in. If a tow driver is to come in and drop a car on the north side of the property in the parking lot, I do know exactly how much room they would have to turn around and drop a car, but it does not appear that it would be very easy, especially if there are any cars parked in the minimal parking spots we will be left with. I have attached some images that show your plan side by side with google views. In one of those attachments I have highlighted the areas that I am concerned about. If someone would like to come out and physically look at the area in question, I would be more than happy to meet with them and discuss my concerns in person. Thank you and I look forward to hearing from you. Respectfully, Scott Meints	system. The proposed project is currently designed to follow the guidelines set forth by the Access Management Policy. According to that policy, the City may approve a deviation provided that public health, safety and welfare are not jeopardized, and it may not conflict with applicable State or Federal standards. Members of the project team would be in contact with property owners and available to listen to specific concerns during final design. Message	The railroad crossing at Adams & Cornhusker is extremely dangerous in both directions. I have been trapped between cars there with nowhere to go in case of an oncoming train. My granddaughter must drive that route between her home and her sisters' schools. They were nearly hit by a train and unable to escape between cars as the bars came down but their view had been obscured and cars behind them had piled up. They were forced to drive off the road in between cars onto gravel to escape the train. It traumatized her young sisters in the back seat. I have been stuck in a long line of cars backed all the way back onto Cornhusker in heavy traffic, completely filling the eastbound lane on Cornhusker. I fear being hit from behind, or sandwiched between cars which

	have, by cars unknowingly proceeding east on Cornhusker, again with nowhere to go and cars both ahead and behind me. The crossing on N 33rd near Cornhusker is equally dangerous and I have experienced or seen similar situations there. These are accidents and fatalities that have already happened or are waiting to happen again. There is no excuse that in those areas of very heavy traffic at all hours, especially hours before and after work, on streets which are major connections between major parts of town, are allowed to remain in place, placing lives in jeopardy every day. Fix this before more people are killed.
Would you like someone to contact you regarding your comments/questions?	No, thank you

Carol Zanetti
2521 N 87th St Apt K
Lincoln, NE 68507

Dear Carol,

The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project.

The purpose of the proposed project is to improve safety along the rail corridor between N. 27th and N. 48th streets by eliminating or reducing the potential conflict points between trains and other transportation modes (vehicles, pedestrians, and bicyclists).

The project is needed due to the high volume of vehicular and train traffic in the area along the Burlington Northern Sante Fe rail corridor between N. 27th and N. 48th Streets.

The proposed project would close both the existing at-grade crossings of 33rd Street and Adams Street with the BNSF railroad tracks. The project would also include a new viaduct over the railroad to allow vehicles, bicycles, and pedestrians to traverse the area without the possibility of being stopped on the tracks.

Thank you again for your participation!

Roger Figard, Executive Director
RTSD

Would you like someone to contact you regarding your comments/questions?	No, thank you

November 12, 2024

Brad Merrdith
3700 Cornhusker Hwy Lot 40C
Lincoln, NE 68504

Dear Brad,

The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project.

The detour routes for traffic will be determined during final design, which is anticipated to begin in 2025. Detour routes typically follow similar or greater roadway classifications. For example, residential roadways would be detoured to other residential roadways or commercial roadways. Arterial roadways would be detoured to other arterial roadways, but not to commercial or residential roadways.

The project is nearing the completion of the preliminary design and environmental review stages. Final design is anticipated to begin in 2025 with right-of-way acquisition occurring in 2026 and utility relocations occurring in 2027. Construction of the proposed project is anticipated to begin in late 2027 or early 2028 and is expected to take three years to complete.

Thank you again for your participation!

Email Address	jameslinneman@yahoo.com
Message	I was wondering if there was anyway to make the east bound right turn lane at 33rd and Cornhusker a right turn only lane. The people using the middle lane of cornhusker to pass people in the right hand turn/go straight on towards Adams lane causes a lot of near misses and road rage incidents. I drive this route at least 5 times a week and I see close calls all the time, it's a matter of when not if before something horrible happens here. A cheap and easy fix until this project is underway would be to make the east bound turn lane a right turn only lane and have the lane east of 33rd become almost like an exit lane for Adams. This would prevent people racing with each other and cutting each other off. The median of 33rd could be extended north and marked with reflectors to prevent people from

	going east past 33rd in the right hand turn lane. I think this simple solution would help with some of the risk exposures of this intersection. Thanks
Would you like someone to contact you regarding your comments/questions?	Yes, please

November 12, 2024

James Linneman
2928 N. 64th St
Lincoln, NE 68507

Dear James,

The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project.

The preferred alternative eliminates the at-grade crossing of Adams Street and addresses your concern. An interim solution for the eastbound merging movements on Cornhusker Highway east of 33rd Street is not part of the scope of this project. Your comment will be shared with the City of Lincoln Traffic Division for further consideration.

Thank you again for your participation!

Roger Figard, Executive Director

Phone Number	4027704749
Email Address	bgrimmin@gmail.com
Message	Thank you so much for looking at the pedestrian/cyclist aspect of this project. I know this took a lot of work so far, and pleasing everyone who uses the impacted routes is impossible. The people who put this together obviously know a lot more than me, and I would put their expertise over any of my concerns. And I will warn you that I'm a car-free cyclist, and have thus gone insane trying to go about my daily life. I use cornhusker/adams from N 39th to the super saver on N 27th to get groceries on my bike, and it is not an especially fun time. I have to carry my bike over the tracks, bike on Adams itself, or use the Dietrich trail for a lengthy detour. I see pedestrians trudging through the

	grass/dirt along Adams on the northside fairly often. But, for me, the ideal solution is just to put a concrete path for cyclists and pedestrians on and near the tracks. We would still wait for trains, but at least we don't have to pick up our bikes to get over the tracks or trudge through grass/dirt. I personally think it is a bit overkill to bypass the tracks entirely. It certainly improves things for cars, but don't pedestrians and cyclists now have a longer, more uncomfortable route? Even accounting for no longer waiting for trains, the detour south to madison and then back north to cornhusker seems significant. And now we'll be right next to all these loud, speeding cars while going up an incline too. I know this sounds trivial, and it probably is. I'm a small and relatively unimportant minority when it comes to this project. And things could certainly be a lot worse. I can still use Dietrich for a more comfortable, if more lengthy, detour after all. I just wanted to let you know how I feel, and I would welcome any insight on the benefits to cyclists. Thank you again for all the time and effort that has been put into this project.
Would you like someone to contact you regarding your comments/questions?	Yes, please

Lincoln, NE 68504

Dear Bryant,

The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project.

The purpose of the proposed project is to improve safety along the rail corridor between N. 27th and N. 48th streets by eliminating or reducing the potential conflict points between trains and other transportation modes (vehicles, pedestrians, and bicyclists).

The preferred alternative proposes to completely close the crossings of 33rd Street and Adams Street in order to eliminate the potential for collisions between trains and all other transportation modes.

Currently there are no accommodations for bicyclists or pedestrians at the existing 33rd Street and Adams Street railroad crossings. In the preferred alternative, accommodations will be provided for pedestrians and bicyclists with the addition of sidewalks or multi-use paths along the south side of Adams Street and the east side of 33rd Street to avoid pedestrian and bicyclist conflicts with trains. Additionally, a multiuse path would be constructed along the north side of Cornhusker Highway through the project limits.

The project team reviewed multiple alternatives for providing a separate bicycle/pedestrian crossing near Adams Street. Ultimately a solution was not found that would have been both reasonable and feasible. The provided solution along 33rd Street and Adams Street, utilizing the proposed viaduct over the railroad tracks, adds approximately 700 additional feet in length as opposed to a direct route. The proposed grades would be 5 percent or less to comply with the Americans with Disabilities Act (ADA) requirements.

Thank you again for your participation!

Roger Figard, Executive Director
RTSD

33rd and Cornhusker Project Comments

First Name	Glen
Last Name	Ferguson
Address	
Phone Number	
Email Address	gsferg68@gmail.com
Message	Lower the train tracks like it is in Reno Nevada. But I imagine the cost for that would be even higher. Plus flood control would be a big factor as well. Just a suggestion. Thanks
Would you like someone to contact you regarding your comments/questions?	No, thank you

November 19, 2024

Glen Fergusen
gsferg68@gmail.com

Dear Glen,

The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project.

The project team did look at an alternative to go under the railroad tracks. Ultimately that alternative was eliminated from further consideration due to the potential flooding concern. Another alternative looked at lowering the tracks which was also deemed unfeasible due to the long distance needed to make the connections on the north and south sides of the tracks west of Deadmans Run. The preferred alternative was chosen based on its alignment with the project's purpose and need, compliance with the selection criteria, and input gathered from the public and stakeholders.

Thank you again for your participation!

Dear Richard,

The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project.

The Cornhusker Highway Corridor Enhancement Plan (CEP) was developed in 2020 as part of the revitalization strategy for the North 33rd and Cornhusker Highway subarea. The CEP provides an overview of how updated lighting, landscaping, pedestrian amenities, and other streetscape enhancements could address the visual enhancements of the Cornhusker Highway corridor from N. 11th to N. 56th streets. The CEP was developed with the consideration of safety, connectivity, economic sustainability, identity and quality of life, and environmental sustainability. Future construction or improvements on Cornhusker Highway would utilize the recommendations from the CEP. The CEP can be found on the city's website, lincoln.ne.gov (search: Cornhusker corridor enhancement).

The final landscape plan for the proposed project would be determined during final design which is anticipated to begin in 2025.

Dear Ken,

The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project.

The right-of-way phase of this project is anticipated to begin in 2026. Early acquisition may be possible in 2025 but would require approval by state and federal authorities due to the use of federal funding for the project. If that approval is received, the City of Lincoln's right-of-way agent will be in contact with you as soon as feasibly possible.

Thank you again for your participation!

LIBA

LINCOLN INDEPENDENT BUSINESS ASSOCIATION

Thank you, RTSD Leadership for the opportunity to offer the Lincoln Independent Business Association's (LIBA) comments on this project. My name is Carter Thiele, and I am LIBA's Policy and Research Coordinator.

For starters, there's been quite a few documents I've read over the past year that have taken three or four times to get the gist of, and the draft environmental assessment for this project is not one of them. The team that drafted this did an excellent job, and it illustrates the commitment to this project's thorough planning and collaborative engagement with the local community.

We share the excitement over this project contributing to Lincoln's economic growth. The prospect of improving north-south travel in this area is long overdue and it will contribute to new and existing businesses expanding northward. With that in mind, we cannot let the prospect of acquiring new members overshadow our responsibility to represent our current ones. As you've heard from several of the business owners affected by this project, the planned reduction in access to their establishments threatens their ability to remain in business. They do not claim that it threatens a hinderance to their profit margins; it threatens their ability to remain in business.

One point that I'd like to highlight about the project is regarding the overpass on 33rd south of Cornhusker, a cornerstone of this project. When drivers are going northward on 33rd street towards the planned roundabout, they will see the businesses to the right and take the outside lane for the first exit towards the businesses; only to then realize that there is a median at the intersection they planned on turning left at. This will encourage the unaware drivers to continue down Cornhusker to find another place to get gas or find something to eat.

For habitual customers – "regulars" – there may not be the same problem, however the task of having to make the full loop will likely discourage those who are in a hurry and short on time. This in combination with the lack of direct access to the establishments for travelers driving westward on Cornhusker Highway, pose extreme deterrents to business operations.

We understand that restrictions in access during periods of construction are inescapable. But if the finished product of that construction keeps access further limited, then a minor alteration to the design that retains the project's intention while preserving the current level of access would be greatly appreciated.

Again, we express optimism over what this project accomplishes in the long run and expect that it will expand the business districts northward beyond Cornhusker. We ask for a minor alteration in the project's design that allows the existing businesses in this area the ability to continue operating.

Thank you for your consideration and the work you've put into improving the corridor.

Carter Thiele
Policy & Research Coordinator
Lincoln Independent Business Association
3601 Calvert Street, Suite 29

Carter Thiele
LIBA
3601 Calvert St. Ste 29
Lincoln, NE 68506

Dear Carter,

The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project.

We understand your concerns about the impacts to local businesses. The City of Lincoln has adopted an Access Management Policy which provides guidelines for providing reasonable access to individual properties while protecting the effective and safe flow of traffic on the surrounding road system. Additionally, Cornhusker Highway is on the National Highway System which is governed by the Nebraska Department of Transportation.

The proposed project is currently designed to follow the guidelines set forth by the Access Management Policy. According to that policy, the City may approve a deviation provided that public health, safety and welfare are not jeopardized, but they may not conflict with applicable State or Federal standards.

Members of the project team would be available to listen to specific concerns from property owners during final design anticipated to begin in 2025.

Thank you again for your participation!

This message came from outside your organization. Please take care when clicking links or opening attachments. When in doubt, use the Report Phish button or contact IT to have the message analyzed.

I appreciate the opportunity to express concerns last night. My two requests are ....

1) Egress on to Cornhusker towards our West property line. With the new primary access being off of 33rd Street, it will create a significant bottleneck at our fuel dispensers. The flow of traffic will be facing the SW at the dispensers. When finished there is not a realistic way for them to exit since they will be facing SW. That is depicted in the handout I provided. The other depiction in the handout is our transport. The "drop tubes" that we hook our hoses to that go to the tanks are on the right side of the truck. Our tanks are on the SE corner of the lot. The two truck depictions on the drawing is intended to show what it would look like to have to do a U-Turn on our lot with a semi, and the other shows our truck positioned at the unloading point next to the tanks.
2) The cross-access easement along the South side of all of our business is critical as well. Customers exiting our dispensers that need to continue E on Cornhusker need a good alternative. Kris had expressed a concern of customers coming out of a Cornhusker egress cutting across all lanes of traffic to get to the turn lane to either turn left or negotiate a U-Turn. The cross-access easement would give better access to 31st to accomplish this. I had mentioned last night that the Hog Wild building was the one constructed

farthest tp the South that complicates this the most. If the deceleration lane is shortened a bit and if the bike path is started a little further W then this space may be able to be accommodated.

Our diesel tank is compromised right now. We are out of the diesel business. The cost of replacing it is in excess of $1,000,000. Right now we are at a standstill, because of our lack of confidence.

Hopefully we will be able to figure this out. As always, if I can assist or answer any questions, please do not hesitate to reach out.

MR. AARON KELLER: So if you would like to speak, you can go ahead and add your name to the list and we'll call you up one by one. And we're -- we're going to use this (indicating) for now until we get more batteries.

(Discussion off the record.)

MR. AARON KELLER: Once you have your name on the list, you can probably just line up here rather than calling your name out, if you so choose.

MR. FIGARD: Don't be bashful. Come on up, we want to hear from you. I know a number of you signed up, so -- here comes Mark.

(Discussion off the record.)

* * *

MR. MARK WHITEHEAD: For the record, my name is Mark Whitehead, W-H-I-T-E-H-E-A-D. I'm the owner and CEO of Whitehead Oil Company, we've got a location affected by this project located at 33rd and Cornhusker Highway.

The -- to say that this has got significant impact would be an understatement. I do want to recognize Amy and I have traded off a lot of e-mails there, and I appreciate our conversations this point as well, and I appreciate this opportunity to give comments on this project.

The impact of this -- there are basically four property owners between 31st and 33rd Street. We recognize some of the challenges that already exist on operating all -- all four of these businesses by a cross access easement that exists between all of us that runs along the south side of all of our businesses. And that is critical to traffic flow the way it exists even with the access points on Cornhusker Highway.

This project takes away all access points onto Cornhusker Highway and our only access points are off of 31st Street with -- and 33rd Street. There does not appear to be any room for the cross access easement that already exists between the four businesses along the south side of our businesses.

We do, of course, recognize the new access road that's going to be constructed along the north side of our properties, but every single one of our businesses are oriented towards Cornhusker and every one of 'em -- and traffic flows come in from the back side of our businesses, which isn't ideal, would -- would be an understatement.

The most critical part for us is this is an unworkable traffic flow for our existing configuration. We've got dispensers along the -- the

southeast portion of our building in a diagonal. The way those dispensers are oriented, they -- they currently customers can come in either on the cross access easement or off of Cornhusker Highway facing towards the east or off of 33rd Street, which is what would be provided here, which is very similar to what's already been provided.

As a customer comes in and goes along our dispensers, they would be facing southwest with no realistic way or convenient way for them to really turn around. It appears as though the cross access easement completely goes away. I don't know whether or not there would be a cross access easement available to us or with Hog Wild, but across their property line, that's not realistic to get to the north -- north access road.

And the yellow that's depicted on -- on your -- on your sheet there shows just one transport, which is our fuel transport, that comes in -- oh, you're got to be kidding me, I'll be very brief.

Our two requests -- our two requests on this thing is to get an access point on Cornhusker Highway. That is critical. The way the configurations are currently right now, it is impossible for our traffic flow to work with this thing.

My second request is to figure out a way to maintain -- maintain a cross easement that's reasonable across the four properties that would, at least, give us the opportunity for traffic flow to come through here.

But Amy -- Amy and Aaron, I look forward to further discussions with you all, but I think our concerns are fairly obvious here. This flat out doesn't work.

Any questions?

MR. FIGARD: Yes. So are you in support or opposition of the project, you support the project and the concern is the current access?

MR. MARK WHITEHEAD: This may not be a fair question for us. We are along the -- we are along the north side of Cornhusker so traffic impediment by railroad trains is probably impacted on Cornhusker by cars turning -- turning south from either direction on Cornhusker. It really doesn't reach us. It doesn't have a significant impact -- Doug, do you think it has a significant impact on us now -- so it maybe, it might be a little self-serving, but since we're on the north side of Cornhusker we do not see the negative impact of the railroad crossings.

MR. FIGARD: Thank you.

November 12, 2024

Mark Whitehead
2537 Randolph Street
Lincoln, NE 68510-3041

Dear Mark,

The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project.

As previously discussed, the City of Lincoln has adopted an Access Management Policy which provides guidelines for providing reasonable access to individual properties while protecting the effective and safe flow of traffic on the surrounding road system. Additionally, Cornhusker Highway is on the National Highway System which is governed by the Nebraska Department of Transportation. The proposed project is currently designed to follow the guidelines set forth by the Access Management Policy. According to that policy, the City may approve a deviation provided that public health, safety and welfare are not jeopardized, and it may not conflict with applicable State or Federal standards.

The City is currently reviewing the deviation request you sent in via email on July 5, 2024 and looking at potential design modifications that would accommodate your request. This will be further evaluated in final design, and we will follow up with you when that phase of the project is underway, anticipated in 2025.

Thank you again for your participation!

Roger Figard, Executive Director
RTSD

33rd and Cornhusker Project Comments

First Name	Pam
Last Name	Brunke
Address	850 Irving Street
Phone Number	402 560-0972
Email Address	p_brunke@yahoo.com
Message	I own property in the project area, 2525 N 33rd St, 2535 N 3rd St, 2547 N 33rd St, 2512 Griffith St. The most significant impact is the loss of paved access from North 33rd Street. Technically 2525 & 2535 N 33 currently only have access from North 33rd. Because I own the abutting property I have allowed access from the back of the buildings as a convenience. If these properties were owned by others that would not be the case. I will lose parking for 2525 N 33 & 2535 N 33. With the widening of N 33 it is unclear how close the overpass will be to the building structures or whether there may be the need to acquire the properties. The

	proposed access to the properties will be west on Huntington Ave, north on Griffith, east on Baldwin then a street / drive behind the 33rd street buildings. Griffith is currently an unimproved street. I was told it would be paved with this project. It is unclear as to whether property would need to be acquired along Griffith to do this. I was told the street / drive to access the 33rd Street properties would be done with the project. This currently is private property. It is unclear as to whether this would be a city owned / maintained access or would be a private drive. The building at 2535 N 33 has a drive through door on the front of the building and on the back of the building. The building becomes less functional with the loss of access on 33rd. I have been unable to develop or change anything with these properties since they are in located in the Flood Plain. Any time I have tried to do anything I get told I can't do anything that negatively impacts my neighbor. This project and Dead Mans Run project negatively impact me and have been for years. Constant studies, delays and change of plans. It is extremely frustrating.
Would you like someone to contact you regarding your comments/questions?	Yes, please

November 12, 2024

Pam Brunke
850 Irving St.
Lincoln, NE 69521

Dear Pam,

The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project.

You have correctly interpreted the preliminary plans regarding access to these three properties. Due to geometric conditions, direct access to 33rd Street from these properties is not able to be provided in the future. The project proposes to pave Griffith Street between Huntington Avenue and Baldwin Avenue and provide an access driveway from Baldwin Avenue to these properties. Permanent and temporary easements are anticipated for paving of Griffith Street, however no right-of-way would be acquired. Members of the project team would be in contact with property owners and available to listen to specific concerns during final design. Design modifications to individual property access points would occur during final design, which is anticipated to occur in 2025.

Thank you again for your participation!

Roger Figard, Executive Director
RTSD
402-441-7711 | rfigard@lincoln.ne.gov

MR. MARK WHITEHEAD: Any questions?

Thank you very much for the opportunity.

* * *

MR. RUSS FOLTS: Hi there. Good evening, Russ Folts with Cornhusker International Trucks, we're at 3131 Cornhusker Highway. We've already talked -- Kris and I have talked many times over the, over the bid too. We're a company that built our facility, our original facility 1972. We have employed hundreds of people, tax-paying people, City of Lincoln and we support the community by -- by providing and repairing fire trucks and snow plows and school buses and commercial vehicles, tractor trailers.

Much to what Mark just said that the design does not fit with our business at all. There is no way that we can have -- that we can continue business and coexist with the design. There isn't physically room for turn in and turn out.

What we've been told when we've met with city is that we just have to retrain our -- our customers, and I don't think that there's a businessperson in here that would say that that's a realistic goal. Retraining our customers is just not something that -- that comes with it. We've been there a long time, try to be a good neighbor, we do business

with most of the folks in here.

In addition to that, the rear part of our parking lot, if you look at the picture, today we probably have 30 vehicles parked there. We can have up to 300 vehicles parked there, commercial size tractor trailers back there, school buses back there, and so when -- when we're seeing that we're potentially losing the ability to park in two-thirds of that, we just can't do that, it just won't work.

So we are a safety oriented company. We -- we understand the challenges with railroad. We call 911 probably three times a month for an accident. Now frankly, it doesn't have anything to do with the railroad crossing, has to do with people flying by, motorcycles, cars, whatever. But it is -- it is a dangerous part of town.

Not having access for our customers to come in and out of our property, we saw on one of the designs there was a -- a shoofly or a service road that wasn't -- you couldn't fit commercial vehicles down, and of course that's what the business is.

So I appreciate your time. I've always enjoyed working with you, Kris, and look forward to continuing with that.

I guess one other comment -- she's about

to wave the red at me I guess -- but the timeline that's listed for right-of-way acquisition, I think it's important to note that -- that our -- that impact our business and every business here doesn't start when the equipment comes in and the grading starts. It starts when the first lane is closed and the flags are out there, and there simply is not time to relocate a business like ours in the time that this timeline gives, so -- much longer than that.

All right, any questions?

(No response.)

MR. FIGARD: Thank you.

MS. HUMPHREY: Thank you.

MR. HART: Hey, thank you very much.

(Discussion off the record.)

MR. RICK VEST: Good evening, everyone. First of all, my name is Rick Vest. I am a member of the Lancaster County Board of Commissioners and I just want to say thank you to everyone here tonight who took time out of your schedules to come and learn more about this project and to give your input, because it's important that these business' concerns are heard and we need to address them to all that we're able to do.

I'm here testifying because I was a --

November 12, 2024

Russ Folts
Cornhusker International
3131 Cornhusker Highway
Lincoln, NE 68521

Dear Russ,

The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project.

We understand your concerns about the impacts to your business. The City of Lincoln has adopted an Access Management Policy which provides guidelines for providing reasonable access to individual properties while protecting the effective and safe flow of traffic on the surrounding road system. Additionally, Cornhusker Highway is on the National Highway System which is governed by the Nebraska Department of Transportation.

The proposed project is currently designed to follow the guidelines set forth by the Access Management Policy. According to that policy, the City may approve a deviation provided that public health, safety and welfare are not jeopardized, but they may not conflict with applicable State or Federal standards.

The project is nearing the completion of the preliminary design and environmental review stages. Final design is anticipated to begin in 2025 with right-of-way acquisition occurring in 2026 and utility relocations occurring in 2027. Construction of the proposed project is anticipated to begin in late 2027 or early 2028 and is expected to take three years to complete.

Members of the project team would be in contact with property owners and available to listen to specific concerns during final design. Design modifications to individual property access points would occur during final design.

Thank you again for your participation!

Roger Figard, Executive Director
RTSD
402-441-7711 | rfigard@lincoln.ne.gov

to wave the red at me I guess -- but the timeline that's listed for right-of-way acquisition, I think it's important to note that -- that our -- that impact our business and every business here doesn't start when the equipment comes in and the grading starts. * * *

MR. DALE ARP: Good evening, Dale Arp, 426 Steele Avenue.

My comments are mostly a question to you, but I participated in subarea plan for quite a while. One of the major things that came out of there was connectivity from north to south across the

railroad tracks and I am happy that 44th Street is not getting closed.

But one of the things that I'm -- has been part of my life for many years since 1989 is trails and I do see that part of the new bridge over the railroad tracks will include some kind of a sidewalkway. But I was also told at one point that when you improved Deadmans Run, a platform, or some terminology like that, would be in place so that the city could, if they wanted to, later on put a trail along Deadmans Run to then cross under the tracks and underneath Cornhusker as a actual trail as opposed to a sidewalk.

Is that still part of the plan?

MS. HUMPHREY: The 33rd and Cornhusker RTSD project is the transportation component. There's a separate project in the project area, just for those of you that aren't aware, of the Deadmans Run project. That's a totally separate project that the NRD and the City of Lincoln are actively working on.

The scope for that project has recently been modified and I would have to defer you to Tim Zock with the City of Lincoln watershed division to answer that question of how that scope has been modified.

MR. DALE ARP: So as far as you know,

the construction you're doing is not going to eliminate that possibility; is that correct?

MS. HUMPHREY: Correct. Our -- the -- our project will be in coordination to make sure that, you know, both of the projects that are in synced. If the decision is made to put a bank or a bench on that right bank, then the 33rd Street bridge has enough height and it will have enough span to be able to have that bench.

MR. DALE ARP: Okay, thank you.

* * *

MR. RON BROWN: Ron Brown, 5050 Ellsworth Street.

I was hoping more people would talk before I got up, more of the business people. I'm here because of Deadmans Run and with what you're doing is not going to help me any with Deadmans Run. I think the City of Lincoln needs to give up their utility outfit and make that into a bigger holding pond for Deadmans Run and hasn't been talked about.

And if you talk to Zock down there at the city county building, he'd give you a big turnaround. You can't -- he won't answer any questions. 'Cause he don't want to be pinned down to any of the answers.

November 12, 2024

Dale Arp
426 Steele Ave
Lincoln, NE 68510

Dear Dale,

The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project.

The 33rd and Cornhusker RTSD project focuses on multimodal transportation in the proposed project area. The Deadmans Run project is a separate project in the area, which the Lower Platte South Natural Resource District (LPSNRD) and the City of Lincoln are actively working on.
The scope for that project has recently been modified and I would have to defer you to Jared Nelson with the City of Lincoln Watershed Division for more information regarding that project. Jared can be reached at jnelson@lincoln.ne.gov or 402-441-7018.

As this proposed project moves into final design, the RTSD would coordinate with the NRD and the City's Watershed Division regarding potential impacts to either project.

Thank you again for your participation!

Roger Figard, Executive Director
RTSD
402-441-7711 | rfigard@lincoln.ne.gov

the construction you're doing is not going to eliminate that possibility; is that correct?

MS. HUMPHREY: Correct. Our -- the -- our project will be in coordination to make sure that, you know, both of the projects that are in synced. If the decision is made to put a bank or a bench on that right bank, then the 33rd Street bridge has enough height and it will have enough span to be able to have that bench.

MR. DALE ARP: Okay, thank you.

* * *

MR. RON BROWN: Ron Brown, 5050 Ellsworth Street.

I was hoping more people would talk before I got up, more of the business people. I'm here because of Deadmans Run and with what you're doing is not going to help me any with Deadmans Run. I think the City of Lincoln needs to give up their utility outfit and make that into a bigger holding pond for Deadmans Run and hasn't been talked about.

And if you talk to Zock down there at the city county building, he'd give you a big turnaround. You can't -- he won't answer any questions. 'Cause he don't want to be pinned down to any of the answers.

Okay, any questions of me?

MR. FIGARD: We will need to respond to all questions and we will do our best to also try to facilitate getting responses and answers out from other entities that we don't have control on here. We may not be able to get you a perfect answer, but we'll try.

MR. RON BROWN: Well, the map got now, and with tearing down the old auto parts place, that needs to be all dredged out and that needs to be a holding pond, not beautiful grass. Because it's not going to help Deadmans Run any by just leaving the green grass in there, it's gonna -- that's gotta be a holding pond.

MR. FIGARD: Our goal with the 33rd Street and Cornhusker was to not conflict with other projects or to keep them from being able to move ahead, but we aren't necessarily in a position of control of those projects.

MR. RON BROWN: But they gotta tie together if your embankment won't -- your weight of your concrete is not going to be solid enough to hold that. How can you work with another project if your cement in the ground isn't going to be solid enough to hold it?

MR. FIGARD: We'll work on that in final

design to make sure that our structure and the surrounding area is long term well maintained and building to top grade.

MR. RON BROWN: All right, thank you.

MR. FIGARD: Thank you.

Before I say we're done, I want to make sure, this is really an opportunity to be here to speak your mind. We really care about what you think. We can't deal with an issue if you don't let us know if you have a concern. And we also know even if it was, "Please, I'm in support of the project. We need to move this ahead." We welcome those comments as well.

So before we close the hearing, I want to make sure that anyone doesn't leave regretting, "Oh, I wish I got up and said something," so...

Here we go one more.

* * *

MR. KIM CAFFERTY: My name is Kim Cafferty and I own Johnstone Supply and the building that Johnstone is in, is in a different corporation we call CCLB, but it's still the same family, same entity.

And I don't want to come up here and imply to anybody that the city and the county and the BN need to take our accounts or our needs into account any more than -- than the city at large. Safety is

* * *

MR. KIM CAFFERTY: My name is Kim Cafferty and I own Johnstone Supply and the building that Johnstone is in, is in a different corporation we call CCLB, but it's still the same family, same entity.

And I don't want to come up here and imply to anybody that the city and the county and the BN need to take our accounts or our needs into account any more than -- than the city at large. Safety is

huge and closing down those railroad crossings I understand the need for it. It will impair access to us, but not irreparably as your plan shows it, except it will be a big inconvenience.

And for most of our other business owners, I don't think that there's anybody in here who doesn't understand the need for cutting down the risk of cars running into trains, but what we're all complaining about is that your plan is not allowing even limited access, it's walls, it's curbs, it's gutters, it's impediments to people being able to turn into and out of a driveway to a business.

And I know that according to city planners nationwide, the less access you have, the less incidents you have, and I get it. But there's got to be a reason -- a reasonable effort made to be flexible enough to where you can accommodate both commerce and safety. And I don't think that that's been quite as well handled here with the plan as it could be, with a little flexibility, with a few more access points.

And sure, you're going to have some idiot do something stupid once in a while and cause a crash, and there's going to be a lawsuit and there's going to be fines and -- but eventually, our country is going to get back to the point of individual

responsibility for your actions and when someone is a stupid fool and they get hurt and they damage other people and their property, they're going to pay the consequence of that action.

The city can't do it all. The county can't do it all. You can't legislate against stupidity.

So please give us some access, that's my question.

MR. FIGARD: Thank you.

* * *

MS. MEGAN OURADA: My name is Megan Ourada. I'm a realtor here in Lincoln. There have been a lot of questions about whether or not there will be impacts on Deadmans Run and their project, obviously that's not your responsibility. Is there an opportunity for you to have a joint meeting like this or an open house with the Deadmans Run project and your stuff because everything you're doing is going to have an affect on that project?

MR. FIGARD: All I would say is if the city and the Lower Platte South NRD do have some other public meetings, we will make sure that we have a representative from our project there to coordinate.

MS. MEGAN OURADA: Okay. Is that

November 12, 2024

Kim Cafferty

MS. MEGAN OURADA: My name is Megan Ourada. I'm a realtor here in Lincoln. There have been a lot of questions about whether or not there will be impacts on Deadmans Run and their project, obviously that's not your responsibility. Is there an opportunity for you to have a joint meeting like this or an open house with the Deadmans Run project and your stuff because everything you're doing is going to have an affect on that project?

MR. FIGARD: All I would say is if the city and the Lower Platte South NRD do have some other public meetings, we will make sure that we have a representative from our project there to coordinate.

MS. MEGAN OURADA: Okay. Is that

something that you guys can facilitate, like reaching out to them, or how do we as the consumer make this happen?

MR. FIGARD: I think we can ask LTU and Lower Platte South what their plans are. I would also like to think somewhere on the city's website there's information about those projects and this is a fairly recent change in the Deadmans Run project and I think they're taking a little time to get their feet on the ground and knowing exactly how to move it. 'Cause it's a fairly significant change in -- in the leadership and that project.

MS. MEGAN OURADA: Okay. Yeah, 'cause like you look at like the Dietrich Trail crossover, that needs to be an appropriate size because we expect that project to still continue on over Deadmans Run, so...

And then last question is: So the railroad branch that is just to the west of 33rd, that was a fairly large part of the Deadmans Run project. When they had the meeting before and railroad was there, they had said that that bridge needed to be replaced, is that part of this or is that someone else's responsibility?

MS. HUMPHREY: Are you talking about the

33rd Street structure at Deadmans Run?

MS. MEGAN OURADA: For just the trains.

MS. HUMPHREY: For the trains, yeah. Yeah, so the transportation project will construct a bridge over the railroad tracks --

MS. MEGAN OURADA: For the cars.

MS. HUMPHREY: -- for the cars.

MS. MEGAN OURADA: Yeah.

MS. HUMPHREY: And then they'll have the 8-foot side path for your pedestrians, bicyclists to use to go over the bridge as well.

MS. MEGAN OURADA: So just to the west of this whole project there's a bridge just for the trains over Deadmans Run.

MS. HUMPHREY: Yeah, so that -- those bridges are not part of the transportation project.

MS. MEGAN OURADA: Okay.

MS. HUMPHREY: That was part of the Deadmans Run project. We are working with BNSF with that. We've heard that they might be doing some modifications to those bridges, but for the transportation project, it does not -- the reconstruction or rehabilitation of those bridges does not affect the current plans that you see today.

MS. MEGAN OURADA: Okay, sounds good.

November 12, 2024

Megan Ourada
6701 Lexington Circle
Lincoln, NE 68505

Dear Megan,

The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project.

The 33rd and Cornhusker RTSD project focuses on multimodal transportation in the proposed project area. The Deadmans Run project is a separate project in the area, which the Lower Platte South Natural Resource District (LPSNRD) and the City of Lincoln are actively working on.
The scope for that project has recently been modified and I would have to defer you to Jared Nelson with the City of Lincoln Watershed Division for more information regarding that project. Jared can be reached at jnelson@lincoln.ne.gov or 402-441-7018.

As this proposed project moves into final design, the RTSD would coordinate with the NRD and the City's Watershed Division regarding potential impacts to either project.

Your request for a joint public meeting has been forwarded to Jared and the LPSNRD for consideration.

Thank you again for your participation!

Roger Figard, Executive Director
RTSD
402-441-7711 | rfigard@lincoln.ne.gov

Thank you.

* * *

MR. EARL VISSER: I'm Earl Visser, resident of 36th North 48th Street and the question I had was: As property owners, we're, I understand, paying 1.9 cents for every hundred thousand of assessed valuation, and how do we enter into that budget in regards to property tax total that we get 17 entities?

How do we -- how are we able to have input into your budget and how do we gain that access?

Plus I have a second question: How is -- I understand approximately 7- or $8 million a year now is being put into this fund, the RTSD, right? And how do we have input, because in the past we've been able to have A Street overpass and this type of thing, but when I look at this application, I see the transportation part of it is very, very limited in the sense that we're saving a railroad track, but we're not looking at north/south transportation enhancement because we're not looking at tying in with the beltline, which is Superior. And we're not tying any past Huntington, so it's the 'ole balloon theory, you're putting a big bubble out there, but what is it going to have -- help the global community overcome one little problem which is a big problem. Thank you for

your valuation on your property.

The RTSD meets four times a year. You can come to those board meetings at any time. And in fact your timing is good, next Tuesday morning the RTSD will hold a public hearing on its proposed budget. You can address the board members, three county commissioners, three city council members, your thoughts on that budget.

You can also -- the RTSD and a number of political subdivisions in the county are limited by the 15-cent lid limits put in in 19 -- in the late '90 -- '95, '98, in which the county board has ultimate authority over giving a levy to the RTSD, the ag societies, the rural fire districts in the county, and they had a public hearing on their budget in the last couple of weeks.

Those are ways to come and participate and -- in how your tax dollars are used. And the RTSD has had a long history of talking about a project that's a priority, getting, saving money, building it and then going to the next one, and this is a project in a long series of those.

But we're wide open, public can come to the meetings, we -- we welcome the input. 'Cause it is your tax money and we're trying to spend it

November 12, 2024

Earl Visser
3646 N. 48th Street #17
Lincoln, NE 68504

Dear Earl,

The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project.

The mission by state statute for the Railroad Transportation Safety District (RTSD) is to improve safety and reduce conflicts between trains, pedestrians, bicyclists and vehicles. Because of this, there is a very limited scope where RTSD dollars can be spent and building a roadway from Cornhusker Highway to Superior Street along 33rd Street would not meet those criteria.

The RTSD collects property tax from everyone in Lancaster County and it is about 1.9 cents per $100 of the valuation on your property.

The RTSD coordinates very closely with the City and the County to make sure anything we build is compatible with their long-range plan. More specifically, the desire for and possible connections for north/south transportation in North Lincoln were addressed in the 33rd and Cornhusker Subarea Plan and are included in the 2050 Long Range Transportation Plan. Both documents can be found on the city's website at lincoln.ne.gov (search "cornhusker subarea" and "LRTP", respectively).

Thank you again for your participation!

Good Morning.

My name is Scott Meints and I am the owner of Joe's Body Shop on the corner of 33rd Street and Huntington Ave. I attended the public meeting earlier this month and have some concerns about what I saw.

It appears that the roundabout will take out most of the access to parking on the south side of the building. Your current plans have the only access to my property coming from quite a distance to the west of the roundabout corner. Then customers will need to drive along the south side of the building to get to the front of the building. With that being the only access to the front of the building we will need to keep it free of parked cars to allow

vehicles to drive to the front. The entry is also directly in place of the main access to the body shop and our delivery area for parts. Another concern is what we will do with cars that get towed in. If a tow driver is to come in and drop a car on the north side of the property in the parking lot, I do know exactly how much room they would have to turn around and drop a car, but it does not appear that it would be very easy, especially if there are any cars parked in the minimal parking spots we will be left with.

I have attached some images that show your plan side by side with google views. In one of those attachments I have highlighted the areas that I am concerned about.

If someone would like to come out and physically look at the area in question, I would be more than happy to meet with them and discuss my concerns in person.

Thank you and I look forward to hearing from

you.

Respectfully,

Scott Meints

Dear Scott,

The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project.

We understand your concerns about the impacts to your property. The City of Lincoln has adopted an Access Management Policy which provides guidelines for providing reasonable access to individual properties while protecting the effective and safe flow of traffic on the surrounding road system. The proposed project is currently designed to follow the guidelines set forth by the Access Management Policy. According to that policy, the City may approve a deviation provided that public health, safety and welfare are not jeopardized, and it may not conflict with applicable State or Federal standards.

Members of the project team would be in contact with property owners and available to listen to specific concerns during final design. Design modifications to individual property access points would occur during final design, which is anticipated to occur in 2025.

Thank you again for your participation!

Roger Figard, Executive Director

Please submit your written comments by September 26, 2024.

George & Carolene Skorohod own 3101 Cornhusker Hwy, known as Star City Auto Sales. We has been a used car lot for us since the early 1980's. We have always had 2 curb cuts on Cornhusker Hwy. This new plan allows one entrance & exit. Many cars, trucks, transits, etc enter the grounds and exit the 2nd curb cut without incident. The new plan will provide chaos in getting vehicles in & out. International (Cornhusker) resides to the east of us. They have the same problem with the new plan. Take another look at the plan and how business will be affected by one entrance & exit - some business will not even have an opening on to Cornhusker!

Written comments submitted to Olsson are considered public information and may be shared with appropriate local, state, or federal agencies, as well as the general public, as part of the project development process.

We appreciate your input. Your comments, questions, and suggestions will be reviewed by appropriate personnel. Thank you for your participation!

Carolene Skorohod
501 S. 120th St.
Lincoln, NE 68520

Dear Carolene,

The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD) appreciates your comments concerning the proposed ***33rd/Cornhusker Viaduct, Lincoln*** project.

We understand your concerns about the impacts to your property. The City of Lincoln has adopted an Access Management Policy which provides guidelines for providing reasonable access to individual properties while protecting the effective and safe flow of traffic on the surrounding road system. The proposed project is currently designed to follow the guidelines set forth by the Access Management Policy. According to that policy, the City may approve a deviation provided that public health, safety and welfare are not jeopardized, and it may not conflict with applicable State or Federal standards.

Members of the project team would be in contact with property owners and available to listen to specific concerns during final design. Design modifications to individual property access points would occur during final design, which is anticipated to occur in 2025.

Thank you again for your participation!

Roger Figard, Executive Director
RTSD
402-441-7711 | rfigard@lincoln.ne.gov

DEPARTMENT OF TRANSPORTATION

Section 4(f) *De Minimis*

Project Development Division Form 042

Project Name
North 33rd and Cornhusker

Project Number
LCLC-5233(4)

Control No.
13294

Project Location (Town, County, Street)
Lincoln, Lancaster, North 33rd Street

Project Description

The Preferred Alternative would construct a new viaduct on a new alignment to create a direct connection over the railroad tracks near N. 33rd Street and Cornhusker Highway (US 6). The Preferred Alternative would close two at-grade railroad crossings: N. 33rd Street and Adams Street.

The Preferred Alternative includes the expansion of Cornhusker Highway (US 6) to six lanes with turn lanes from Deadmans Run to just east of N. 35th Street. North 33rd Street would be on a new alignment that includes two bridges over the Deadmans Run channel and the BNSF railroad tracks. The realigned N. 33rd Street connects at an intersection with Cornhusker Highway (US 6) near the existing N. 31st Street and Cornhusker intersection. Intersections at Cornhusker Highway (US 6) and State Fair Park Drive, a re-aligned N. 33rd Street and Cornhusker Highway (US 6), N. 33rd Street and Huntington Avenue, N. 33rd Street and Adams Street, and N. 35th Street and Cornhusker Highway (US 6) would operate as full access intersections.

The Preferred Alternative includes the realignment of Adams Street. Adams Street, no longer crossing the railroad tracks, would be extended southwest running roughly parallel to the railroad tracks, connecting to N. 33rd Street south of the railroad tracks and Cornhusker Highway (US 6). The new intersection would be located on the south end of the N. 33rd Street bridge and would be entirely elevated and supported by embankments, walls, or other structures.

The Preferred Alternative would maintain the present traffic flow on Cornhusker Highway (US 6) but would create a new access route for Adams Street via N. 33rd Street, south of the BNSF railroad tracks.

As a part of the Preferred Alternative, the existing at-grade crossing at N. 44th Street would remain open to vehicular and pedestrian traffic; however, improvements would be made to the crossing to bring it into compliance with ADA guidelines. Improvements would include the addition of detectable warning panels and ADA compliant slopes and extension of an 8-foot-wide sidewalk connecting from approximately Gladstone Street on the south and extending north to Colfax Circle. The newly constructed grade separated viaduct at N. 33rd and Adams Streets would include an 8-foot-wide sidewalk separated from traffic for pedestrians and bicycles. The Preferred Alternative would provide upgrades and enhance connectivity to the existing trail network by providing a reroute of the existing trail network. The trail would proceed under the newly constructed N. 33rd Street bridge over Deadmans Run, cross over Deadmans Run on a dedicated trail bridge, run adjacent to Baldwin Avenue and south along Griffith Street to reconnect to the existing trail near Fleming Fields and Huntington Avenue.

The Preferred Alternative would include the installation of fencing along the BNSF rail corridor from approximately Deadmans Run to approximately N. 36th Street with final locations and dimensions to be determined during final design in coordination with BNSF.

Additional side streets would be reconstructed to tie into the primary project elements and to maintain local connectivity, as follows:

- Huntington Avenue would be reconstructed on either side of the intersection of N. 33rd Street to connect back to the existing road.
- N. 31st Street would be reconstructed on the north side of Cornhusker Highway (US 6) where the newly aligned N. 33rd Street meets at an intersection. Existing N 33rd Street would be reconstructed on the north and south sides of Cornhusker Highway (US 6) as well to connect back to the existing road.
- Existing N. 33rd Street on the south side of Cornhusker Highway (US 6) would include the construction of a cul-de-sac just north of the BNSF railroad tracks to provide a turnaround for traffic near the closed at-grade railroad crossing.
- N. 35th Street would be reconstructed on the north side of Cornhusker Highway (US 6). N. 36th Street would be reconstructed on the south side of Adams Street.
- Griffith Street would be reconstructed between Huntington Avenue and Baldwin Avenue.
- A new local 33-foot-wide roadway called Greenwood Street would be constructed between 31st Street and 33rd Street. It would include a five-foot sidewalk on the southside.
- A new local roadway called 33rd Avenue would reconnect Madison Avenue to Saint Paul Avenue and Baldwin Avenue on the east side of the newly realigned N. 33rd Street bridge. These streets would no longer have direct access onto N. 33rd Street. Baldwin Avenue on the west side of N. 33rd Street would not reconnect with N. 33rd Street and would include a new cul-de-sac for traffic to turnaround.

The project would include sidewalk, and curb ramp improvements to meet ADA guidelines at the intersection of N. 29th Street and Cornhusker Highway (US 6). The existing traffic signal at N. 29th Street and Cornhusker Highway (US 6) would be upgraded due to the addition of another westbound left turn lane and westbound outside through lane. Traffic signals at N. 31st Street and Cornhusker Highway and N. 35th Street and Cornhusker Highway.

The project would include reconstruction of the storm sewer system, sanitary sewer system, water main system as well as traffic signal and underground fiber-optic lines due to the impacts from the project. The project would include impacts to private utility companies.

Construction of the project would require sections of N. 33rd Street, Adams Street, and the intersection of N. 33rd Street and Huntington Avenue to be closed to traffic. Detours would be required to reroute traffic due to the closure of N. 33rd Street to construct the viaduct over Deadmans Run channel and the railroad tracks. The project would detour traffic onto roadways of the same, or higher functional roadway classification. No improvements would be made to detour routes as a part of the Preferred Alternative. Temporary detours would be required along sections of the 33rd Street, Huntington Avenue, and Dietrich Trails. Trail detours would use existing local roadways and sidewalks. No improvements would be required along any designated trail detour route.

Name of Section 4(f) Property (A separate form must be completed for each property with a *de minimis* impact)

33rd Street Trail

Official(s) with Jurisdiction

Maggie Stuckey-Ross, Director of Lincoln Parks and Recreation

Total Property Size (in acres)	Permanent Impact (in acres)	Temporary Impact (in acres)
0.60	0.04	0.00

Property Description

The 33rd Street Trail is an 8-foot-wide multiuse trail that runs along the east side right-of-way of North 33rd Street. The trail intersects the project alignment at the intersection of North 33rd Street and Huntington Avenue. The 33rd Street Trail terminates at the intersection with the Huntington Trail, which runs along the southside right-of-way of Huntington Avenue. The total length of 33rd Street Trail is approximately 0.63 mile.

Answer only the questions in the applicable block (A or B). All questions in Block C must be answered.

A. Section 4(f) *De Minimis* Park, Recreation Area, and Refuge Eligibility

If the *de minimis* impact does NOT involve a park, recreation area or refuge, check the N/A below and proceed to Block B.

☐ N/A

Will the project adversely affect the activities, features, or attributes that make the property eligible for Section 4(f) protection?

☐ Yes ☒ No

Have measures been taken to minimize harm to the property? If Yes, explain in the Avoidance, Minimization, and Mitigation Measures box in Block C.

☒ Yes ☐ No

Have *de minimis* public involvement requirements (notice, review, comments, etc.) been completed? If Yes, describe in the Comments box below.

☒ Yes ☐ No

Date(s): 09/05/2024

Did the Official(s) with Jurisdiction concur with the determination of no adverse effect?

☒ Yes ☐ No

Date(s): 01/27/2025

B. Section 4(f) *De Minimis* Historic and Archeological Resource Eligibility

If the *de minimis* impact does NOT involve an historic or archeological resource, check the N/A below and proceed to Block C.

☒ N/A

Have measures been taken to minimize harm to the property? If Yes, explain in the Avoidance, Minimization, and Mitigation Measures box below.

☐ Yes ☐ No

Was the effect determination either "no historic properties affected" or "no adverse effect"? *

☐ Yes ☐ No

PQS Date	SHPO Date	THPO Date

* The PQS field will always be filled out. If there is a date in the SHPO or THPO field, this would indicate the entity is the Official with Jurisdiction and they were informed of NDOT's intent to apply *de minimis* via project-specific correspondence. The date in the field would be the date the entity concurred on the Section 106 effect determination. A notation of "N/A" in the field indicates the entity was not the Official with Jurisdiction. "Programmatic" in the SHPO field indicates that a determination of "no historic properties affected" or "no adverse effect" was made for the project per the Section 106 Programmatic Agreement and the *de minimis* notification was provided via letter agreement with the SHPO.

C. Additional Information

Description of Use (Temporary and/or Permanent)

Construction of a roundabout at the intersection of North 33rd Street and Huntington Avenue would result in permanent impacts to 33rd Street Trail. The existing 33rd Street Trail is approximately 3,290 feet (0.60 acres) in total length. Approximately 215 feet (0.04 acre) of existing trail would be permanently removed to accommodate the new roundabout. The trail would be realigned to the southern approach of the roundabout, resulting in the construction of approximately 154 feet (0.03 acre) of realigned trail. In addition, approximately 316 feet (0.06 acre) of new trail would be constructed to extend the 33rd Street Trail across North 33rd Street to the west and then across Huntington Avenue to the north, connecting to the existing John Dietrich Trail. The John Dietrich trail would include an undercrossing of 33rd Street, this would require installing lighting for pedestrian safety where the path crosses under the proposed 33rd Street. With the removal of the Baldwin Avenue access at 33rd, consolidation of vehicle entry/exit to the Baldwin Maintenance shop would occur, increasing the frequency of truck/equipment traffic across the Deitrich Trail. Advance warning to notify trail users and drivers of the trail crossing would be necessary. Pavement markings and additional signage would be added for pedestrian safety.

The realignment and extension of the 33rd Street Trail would result in a net increase of approximately 255 feet of trail, and more direct connection to the wider trail network via the adjacent John Dietrich Trail located northwest of the intersection of North 33rd Street and Huntington Avenue.

Trail continuity would be maintained at all times during construction via detour. A temporary surface would be constructed southeast of North 33rd Street and Huntington Avenue to allow 33rd Street Trail users to bypass the construction area and connect to the adjacent Huntington Trail or John Dietrich Trail detour. The temporary surface would consist of either asphalt or concrete and be 8 feet wide and would include routine inspections and maintenance by the contractor for the duration of the trail detour. The temporary crossing for 33rd Street Trail would cross Huntington Avenue at North 35th Street. Pavement markings and additional signage would be added for pedestrian safety. The final determination of roadway closures will be completed in final design; however, the intersection construction at Huntington Avenue will either be a full closure or phased if necessary. Traffic along North 35th Street from Huntington Avenue to Madison Avenue would be limited to local traffic only during construction. The temporary detour may be in place for the entirety of construction, which is anticipated to be three years

Permanent impacts to the 33rd Street Trail would result in a minor take (215 linear feet) of the trail to accommodate the new roundabout; however, these impacts would not adversely affect the activities, features, or attributes that qualify the property for protection under Section 4(f).

Avoidance, Minimization, and Mitigation Measures

The proposed project includes all appropriate measures to minimize harm and subsequent mitigation necessary to preserve and enhance those features and values of the property that originally qualified the property for Section 4(f) protection.

Trail continuity would be maintained at all times during construction via detour. A temporary surface would be constructed southeast of North 33rd Street and Huntington Avenue to allow 33rd Street Trail users to bypass the construction area and connect to the adjacent Huntington Trail or John Dietrich Trail detour.

Access to the 33rd Street Trail, outside of areas slated for construction, would remain open and available at all times during construction.

Advanced warning to notify trail users and drivers of the trail crossing would be required at the new crossing on Griffith Street and Huntington Avenue. Pavement markings and additional signage would be added for pedestrian safety.

Areas of temporary disturbance would be fully restored, and the property would be returned to a condition which is at least as good as that which existed prior to the project.

Comments

The permanent loss of trail (approximately 215 feet) comprises approximately 6.53 percent of the total length of the 33rd Street Trail (approximately 3,290 feet).

The realignment and extension of the 33rd Street Trail would result in a net increase of approximately 255 feet of trail, and more direct connection to the wider trail network via the adjacent John Dietrich Trail located northwest of the intersection of North 33rd Street and Huntington Avenue.

Specific impacts to the 33rd Street Trail were disclosed to the public as a part of the public hearing for the project on September 5th, 2024. One comment, out of 23, questioned the need to close the at-grade crossing of the railroad tracks on 33rd Street and expressed concern about the length, slope, and location of the trail adjacent to traffic along the proposed trail compared to the current condition. The RTSD response noted that the current condition provides no accommodation for non-vehicular access across the railroad crossing. The proposed trail would provide that access, would not exceed a 5% gradient to comply with Americans with Disabilities Act (ADA) requirements, and would add approximately 700 feet to the route suggested by the respondent.

De Minimis Documentation

Are detailed maps included, showing current and proposed right-of-way, property boundaries, access, and existing and planned property features?

☒ Yes ☐ No

Is documentation of public involvement attached?

☒ Yes ☐ No ☐ N/A (for historic resources)

Is concurrence from the Official(s) with Jurisdiction (and Consulting Parties, for historic properties) attached?

☒ Yes ☐ No

Additional Attachments (If Applicable)

Approval Signatures

The project involves a *de minimis* use of the Section 4(f) property. Harm to the park, recreation land, wildlife or waterfowl refuge, or historic property has been avoided or mitigated to minimize impacts to the qualifying characteristics and/or functions of the resource. Based on the scope of the undertaking, the fact that the undertaking does not adversely affect the function/qualities of the Section 4(f) property on a permanent or temporary basis, and with agreement from the Official(s) with Jurisdiction, the proposed action constitutes a *de minimis* use.

RE: North 33rd and Cornhusker
LCLC-5233(4); CN 13294
Section 4(f) *de minimis* concurrence request, 33rd Street Trail

The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD), in cooperation with City of Lincoln, is undertaking the North 33rd and Cornhusker project (the project). The project involves an action by the Federal Highway Administration (FHWA), in cooperation with the Nebraska Department of Transportation (NDOT) and is pursuant to Section 4(f) of the Department of Transportation Act regarding the use of 33rd Street Trail. This letter documents the RTSD's intent to coordinate with Lincoln Parks and Recreation as the official with jurisdiction over the management of the 33rd Street Trail.

Project Description

Recognizing the safety, mobility, and congestion concerns caused by at-grade railroad crossings, the RTSD, City of Lincoln, NDOT, and FHWA identified the area near North 33rd Street and Cornhusker Highway (US 6) for a project that would close two at-grade railroad crossings. The project would include a new grade-separated viaduct at North 33rd and Adams Streets. A new roundabout intersection would be located south of the viaduct, at the intersection of North 33rd Street and Huntington Avenue. Additional side streets would be reconstructed to tie into the primary project elements and to maintain local connectivity. The project would include reconstruction of the storm sewer system, sanitary sewer system, and water main system as well as traffic signal and underground fiber-optic lines due to impacts from the project.

The project would provide upgrades and enhance connectivity to the existing trail network. The new trail would proceed under the new viaduct, cross over Deadmans Run on a dedicated trail bridge, run adjacent to Baldwin Avenue and south along Griffith Street to reconnect to the existing trail network near Fleming Fields and Huntington Avenue.

Construction of the project would require sections of North 33rd Street, Adams Street, and Huntington Avenue to be closed to traffic. Detours would be required to reroute traffic during construction; no improvements would be required to detour routes. Temporary trail detours would be required along sections of the 33rd Street Trail, Huntington Trail, and Dietrich Trail.

Section 4(f) Property

Section 4(f) of the U.S. Department of Transportation (DOT) Act of 1966 provides special protection for certain properties, such as publicly owned parks, trails, recreation lands, wildlife and waterfowl refuges, and historic sites. FHWA is required to give special consideration to any properties identified as meeting this definition. The 33rd Street Trail is an 8-foot-wide multiuse trail that runs along the east side right-of-way of North 33rd Street (Figure 1) and is subject to Section 4(f) provisions. Section 4(f) requires coordination with the official having jurisdiction over the potentially affected resource.

Section 4(f) Analysis

The FHWA, in cooperation with NDOT and the official with jurisdiction over the property, is responsible for making decisions related to Section 4(f) compliance. Title 23, Part 774.3 of the Code of Federal Regulations (CFR) provides for Section 4(f) approval by FHWA. As relevant to this project, one of the approvals outlined under Part 774.3(b) includes determination that the use of the land from the property would have a de minimis (minor) impact (as defined in §774.17) on the property. There are three conditions that must be met for this project to qualify for a de minimis impact decision under Section 4(f). These three conditions and how they have been addressed for this project are as follows.

Condition 1) *"The transportation use of the Section 4(f) resource, together with any impact avoidance, minimization and mitigation or enhancement measures incorporated into the project, does not adversely affect the protected activities, features, or attributes of the property, on either a temporary or permanent basis".*

The following is a summary of the Section 4(f) property impacts for the project. Attached are exhibits identifying the impacts (Figure 2). *De minimis* impacts are defined as those that do not adversely affect the activities, features, and attributes of the Section 4(f) resource.

Construction of a roundabout at the intersection of North 33rd Street and Huntington Avenue would result in permanent impacts to 33rd Street Trail. The existing 33rd Street Trail is approximately 3,290 feet (0.60 acres) in total length. Approximately 215 feet (0.04 acre) of existing trail would be permanently removed to accommodate the new roundabout. The trail would be realigned to the southern approach of the roundabout, resulting in the construction of approximately 154 feet (0.03 acre) of realigned trail. In addition, approximately 316 feet (0.06 acre) of new trail would be constructed to extend the 33rd Street Trail across North 33rd Street to the west and then across Huntington Avenue to the north, connecting to the existing John Dietrich Trail. The John Dietrich trail would include an undercrossing of 33rd Street, this would require installing lighting for pedestrian safety where the path crosses under the proposed 33rd Street. With the removal of the Baldwin Avenue access at 33rd, consolidation of vehicle entry/exit to the Baldwin Maintenance shop would occur, increasing the frequency of truck/equipment traffic across the Deitrich Trail. Advance warning to notify trail users and drivers of the trail crossing would be necessary. Pavement markings and additional signage would be added for pedestrian safety.

The realignment and extension of the 33rd Street Trail would result in a net increase of approximately 255 feet of trail, and more direct connection to the wider trail network via the adjacent John Dietrich Trail located northwest of the intersection of North 33rd Street and Huntington Avenue.

Trail continuity would be maintained at all times during construction via detour. A temporary surface would be constructed southeast of North 33rd Street and Huntington Avenue to allow 33rd Street Trail users to bypass the construction area and connect to the adjacent Huntington Trail or John Dietrich Trail detour. The temporary surface would consist of either asphalt or concrete and be 8 feet wide and would include routine inspections and maintenance by the contractor for the duration of the trail detour. The temporary crossing for 33rd Street Trail would cross Huntington Avenue at North 35th Street. Pavement markings and additional signage would be added for pedestrian safety. The final determination of roadway closures will be completed in final design; however, the intersection construction at Huntington Avenue will either be a full closure or phased if necessary. Traffic along North 35th Street from Huntington Avenue to Madison

Avenue would be limited to local traffic only during construction The temporary detour may be in place for the entirety of construction, which is anticipated to be three years

Table 1: 33rd Street Trail Impacts Table

Permanent Impacts	Temporary Impacts	Reason for Impact
Approximately 215 linear feet (6.53%)	N/A	Construction of a roundabout at the intersection of N. 33rd Street and Huntington Avenue

Permanent impacts to the 33rd Street Trail would result in a minor take (215 linear feet) of the trail to accommodate the new roundabout; however, these impacts would not adversely affect the activities, features, or attributes that qualify the property for protection under Section 4(f).

Condition 2) "*There must be a documented agreement of the official(s) with jurisdiction over the Section 4(f) resource regarding the above conditions.*"

As the official with jurisdiction over the 33rd Street Trail, the RTSD is requesting your concurrence that the proposed project would not adversely affect the protected activities, features, or attributes of the 33rd Street Trail. Please acknowledge your concurrence by signing on the appropriate line below.

Condition 3) "*The public has been afforded the opportunity to review and comment on the effects of the project on the activities, features, and attributes of the Section 4(f) resource.*"

Specific impacts to the 33rd Street Trail were disclosed to the public as a part of the public hearing for the project on September 5th, 2024. One comment, out of 23, questioned the need to close the at-grade crossing of the railroad tracks on 33rd Street and expressed concern about the length, slope, and location of the trail adjacent to traffic along the proposed trail compared to the current condition. The RTSD response noted that the current condition provides no accommodation for non-vehicular access across the railroad crossing. The proposed trail would provide that access, would not exceed a 5% gradient to comply with Americans with Disabilities Act (ADA) requirements, and would add approximately 700 feet to the route suggested by the respondent.

We have enclosed the following maps/figures for your review:

1. Location Map
2. Impact Map
3. Public Involvement Summary

If you have any questions on the North 33rd and Cornhusker project, please contact me at (402) 441-7711.

Sincerely,

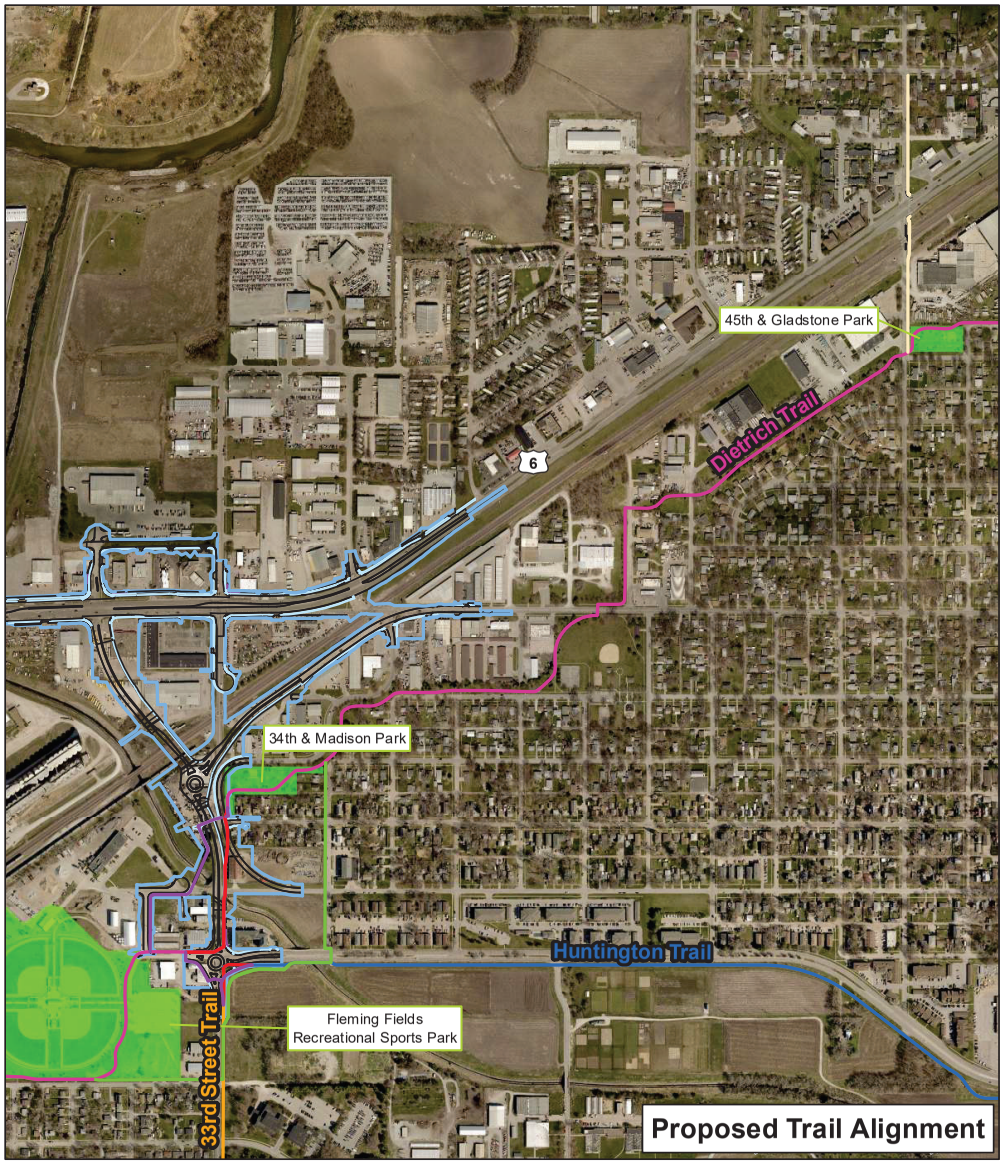

Roger Figard, P. E.
Executive Director, RTSD
949 West Bond Street, Suite 200
Lincoln, NE 68521

As the official with jurisdiction over the 33rd Street Trail, I concur that the proposed project would not adversely affect the activities, features, and attributes that qualify the 33rd Street Trail for protection under Section 4(f). I acknowledge concurrence by signing on the line below.

Maggie Stuckey-Ross 1-27-25

Project Location (Town, County, Street)
Lincoln, Lancaster, North 33rd Street

Project Description

The Preferred Alternative would construct a new viaduct on a new alignment to create a direct connection over the railroad tracks near N. 33rd Street and Cornhusker Highway (US 6). The Preferred Alternative would close two at-grade railroad crossings: N. 33rd Street and Adams Street.

The Preferred Alternative includes the expansion of Cornhusker Highway (US 6) to six lanes with turn lanes from Deadmans Run to just east of N. 35th Street. North 33rd Street would be on a new alignment that includes two bridges over the Deadmans Run channel and the BNSF railroad tracks. The realigned N. 33rd Street connects at an intersection with Cornhusker Highway (US 6) near the existing N. 31st Street and Cornhusker intersection. Intersections at Cornhusker Highway (US 6) and State Fair Park Drive, a re-aligned N. 33rd Street and Cornhusker Highway (US 6), N. 33rd Street and Huntington Avenue, N. 33rd Street and Adams Street, and N. 35th Street and Cornhusker Highway (US 6) would operate as full access intersections.

The Preferred Alternative includes the realignment of Adams Street. Adams Street, no longer crossing the railroad tracks, would be extended southwest running roughly parallel to the railroad tracks, connecting to N. 33rd Street south of the railroad tracks and Cornhusker Highway (US 6). The new intersection would be located on the south end of the N. 33rd Street bridge and would be entirely elevated and supported by embankments, walls, or other structures.

The Preferred Alternative would maintain the present traffic flow on Cornhusker Highway (US 6) but would create a new access route for Adams Street via N. 33rd Street, south of the BNSF railroad tracks.

As a part of the Preferred Alternative, the existing at-grade crossing at N. 44th Street would remain open to vehicular and pedestrian traffic; however, improvements would be made to the crossing to bring it into compliance with ADA guidelines. Improvements would include the addition of detectable warning panels and ADA compliant slopes and extension of an 8-foot-wide sidewalk connecting from approximately Gladstone Street on the south and extending north to Colfax Circle. The newly constructed grade separated viaduct at N. 33rd and Adams Streets would include an 8-foot-wide sidewalk separated from traffic for pedestrians and bicycles. The Preferred Alternative would provide upgrades and enhance connectivity to the existing trail network by providing a reroute of the existing trail network. The trail would proceed under the newly constructed N. 33rd Street bridge over Deadmans Run, cross over Deadmans Run on a dedicated trail bridge, run adjacent to Baldwin Avenue and south along Griffith Street to reconnect to the existing trail near Fleming Fields and Huntington Avenue.

The Preferred Alternative would include the installation of fencing along the BNSF rail corridor from approximately Deadmans Run to approximately N. 36th Street with final locations and dimensions to be determined during final design in coordination with BNSF.

Additional side streets would be reconstructed to tie into the primary project elements and to maintain local connectivity, as follows:

- Huntington Avenue would be reconstructed on either side of the intersection of N. 33rd Street to connect back to the existing road.
- N. 31st Street would be reconstructed on the north side of Cornhusker Highway (US 6) where the newly aligned N. 33rd Street meets at an intersection. Existing N 33rd Street would be reconstructed on the north and south sides of Cornhusker Highway (US 6) as well to connect back to the existing road.
- Existing N. 33rd Street on the south side of Cornhusker Highway (US 6) would include the construction of a cul-de-sac just north of the BNSF railroad tracks to provide a turnaround for traffic near the closed at-grade railroad crossing.
- N. 35th Street would be reconstructed on the north side of Cornhusker Highway (US 6). N. 36th Street would be reconstructed on the south side of Adams Street.
- Griffith Street would be reconstructed between Huntington Avenue and Baldwin Avenue.
- A new local 33-foot-wide roadway called Greenwood Street would be constructed between 31st Street and 33rd Street. It would include a five-foot sidewalk on the southside.
- A new local roadway called 33rd Avenue would reconnect Madison Avenue to Saint Paul Avenue and Baldwin Avenue on the east side of the newly realigned N. 33rd Street bridge. These streets would no longer have direct access onto N. 33rd Street. Baldwin Avenue on the west side of N. 33rd Street would not reconnect with N. 33rd Street and would include a new cul-de-sac for traffic to turnaround.

The project would include sidewalk, and curb ramp improvements to meet ADA guidelines at the intersection of N. 29th Street and Cornhusker Highway (US 6). The existing traffic signal at N. 29th Street and Cornhusker Highway (US 6) would be upgraded due to the addition of another westbound left turn lane and westbound outside through lane. Traffic signals at N. 31st Street and Cornhusker Highway and N. 35th Street and Cornhusker Highway.

The project would include reconstruction of the storm sewer system, sanitary sewer system, water main system as well as traffic signal and underground fiber-optic lines due to the impacts from the project. The project would include impacts to private utility companies.

Construction of the project would require sections of N. 33rd Street, Adams Street, and the intersection of N. 33rd Street and Huntington Avenue to be closed to traffic. Detours would be required to reroute traffic due to the closure of N. 33rd Street to construct the viaduct over Deadmans Run channel and the railroad tracks. The project would detour traffic onto roadways of the same, or higher functional roadway classification. No improvements would be made to detour routes as a part of the Preferred Alternative. Temporary detours would be required along sections of the 33rd Street, Huntington Avenue, and Dietrich Trails. Trail detours would use existing local roadways and sidewalks. No improvements would be required along any designated trail detour route.

Name of Section 4(f) Property (A separate form must be completed for each property with a *de minimis* impact)

34th and Madison Park

Official(s) with Jurisdiction

Maggie Stuckey-Ross, Director of City of Lincoln Parks and Recreation

Total Property Size (in acres)	Permanent Impact (in acres)	Temporary Impact (in acres)
1.77	0.21	0.09

Property Description

34th and Madison Park is a public access park located south of Madison Avenue, between N. 33rd Street and N. 35th Street. 34th and Madison Park contains the John Dietrich Trail, a basketball court, drinking fountains, and a gazebo.

Answer only the questions in the applicable block (A or B). All questions in Block C must be answered.

A. Section 4(f) *De Minimis* Park, Recreation Area, and Refuge Eligibility

If the *de minimis* impact does NOT involve a park, recreation area or refuge, check the N/A below and proceed to Block B.

☐ N/A

Will the project adversely affect the activities, features, or attributes that make the property eligible for Section 4(f) protection?

☐ Yes ☒ No

Have measures been taken to minimize harm to the property? If Yes, explain in the Avoidance, Minimization, and Mitigation Measures box in Block C.

☒ Yes ☐ No

Have *de minimis* public involvement requirements (notice, review, comments, etc.) been completed? If Yes, describe in the Comments box below.

☒ Yes ☐ No

Date(s): 09/05/2025

Did the Official(s) with Jurisdiction concur with the determination of no adverse effect?

☒ Yes ☐ No

Date(s): 01/24/2025

B. Section 4(f) *De Minimis* Historic and Archeological Resource Eligibility

If the *de minimis* impact does NOT involve an historic or archeological resource, check the N/A below and proceed to Block C.

☒ N/A

Have measures been taken to minimize harm to the property? If Yes, explain in the Avoidance, Minimization, and Mitigation Measures box below.

☐ Yes ☐ No

Was the effect determination either "no historic properties affected" or "no adverse effect"? *

☐ Yes ☐ No

PQS Date	SHPO Date	THPO Date

* The PQS field will always be filled out. If there is a date in the SHPO or THPO field, this would indicate the entity is the Official with Jurisdiction and they were informed of NDOT's intent to apply *de minimis* via project-specific correspondence. The date in the field would be the date the entity concurred on the Section 106 effect determination. A notation of "N/A" in the field indicates the entity was not the Official with Jurisdiction. "Programmatic" in the SHPO field indicates that a determination of "no historic properties affected" or "no adverse effect" was made for the project per the Section 106 Programmatic Agreement and the *de minimis* notification was provided via letter agreement with the SHPO.

C. Additional Information

Description of Use (Temporary and/or Permanent)

Impacts to 34th and Madison Park would consist of construction of the new 33rd Avenue that would require right-of-way (ROW) and permanent easements along the western and northwestern edges of the property. 34th and Madison Park is approximately 1.77 acres in total size and the new avenue would require approximately 0.10 acre (4,421 square feet) of ROW acquisition and approximately 0.11 acre (4,755 square feet) of permanent easement. The permanent easements are required to accommodate underground utility infrastructure (water mains) and would not impact the aboveground, open space areas of the park. Approximately 0.01 acre (600 square feet) of the permanent easements are from the John Dietrich Trail, which passes through the property. An additional 0.09 acre (3,969 square feet) of temporary easement would be required from the northwest, southwest, and northeast corners of the property. The area proposed for easements consists of open space and does not extend into the basketball court or gazebo amenities. Access to the western and northwestern portions of the property would be limited during construction, but access to the basketball court and other park amenities would be maintained throughout construction via the east side of the property via Madison Avenue. The Dietrich Trail would remain open to just west of the basketball court. Temporary trail detours that are constructed would be done so using asphalt or concrete and be 8 feet wide. These detours may be in place for the duration of construction, which is anticipated to be three years.

Permanent impacts to 34th and Madison Park would result in a minor take of park property. No relocation of park features would occur. Access to the basketball court and other park amenities would remain available at all times. These impacts would not adversely affect the activities, features, or attributes that qualify the property for protection under Section 4(f).

Avoidance, Minimization, and Mitigation Measures

The proposed project includes all appropriate measures to minimize harm and subsequent mitigation necessary to preserve and enhance those features and values of the property that originally qualified the property for Section 4(f) protection.

During construction of the new 33rd Avenue, the western and northwestern edges of 34th and Madison Park would be inaccessible; however, access opportunities would be available from the eastern extent of the Dietrich Trail and east side of the park via Madison Avenue. The Dietrich Trail would remain open to just west of the basketball court. Access to park amenities including the gazebo and basketball courts would be maintained during construction.

Areas of temporary disturbance would be fully restored, and the property would be returned to a condition which is at least as good as that which existed prior to the project.

Comments

The permanent ROW impacts (approximately 0.1 acre) comprise approximately 5.7 percent of the total area of the 34th and Madison Park (approximately 1.77 acres). The permanent easements (0.11 acre) comprise 6.1 percent of the total 34th and Madison Park (approximately 1.77 acres).

Impacts to 34th and Madison Park were disclosed to the public during the Public Hearing for this project on September 5, 2024. No comments were received concerning 34th and Madison Park.

De Minimis Documentation

Are detailed maps included, showing current and proposed right-of-way, property boundaries, access, and existing and planned property features?

☒ Yes ☐ No

Is documentation of public involvement attached?

☒ Yes ☐ No ☐ N/A (for historic resources)

Is concurrence from the Official(s) with Jurisdiction (and Consulting Parties, for historic properties) attached?

☒ Yes ☐ No

Additional Attachments (If Applicable)

OWJ Concurrence Letter, Project Location Map, Impact Maps, and Public Hearing Summary

Approval Signatures

The project involves a *de minimis* use of the Section 4(f) property. Harm to the park, recreation land, wildlife or waterfowl refuge, or historic property has been avoided or mitigated to minimize impacts to the qualifying characteristics and/or functions of the resource. Based on the scope of the undertaking, the fact that the undertaking does not adversely affect the function/qualities of the Section 4(f) property on a permanent or temporary basis, and with agreement from the Official(s) with Jurisdiction, the proposed action constitutes a *de minimis* use.

RE: North 33rd and Cornhusker
LCLC-5233(4); CN 13294
Section 4(f) *de minimis* concurrence request, 34th and Madison Park

The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD), in cooperation with City of Lincoln, is undertaking the North 33rd and Cornhusker project (the project). The project involves an action by the Federal Highway Administration (FHWA), in cooperation with the Nebraska Department of Transportation (NDOT) and is pursuant to Section 4(f) of the Department of Transportation Act regarding the use of 34th and Madison Park. This letter documents the RTSD's intent to coordinate with Lincoln Parks and Recreation as the official with jurisdiction over the management of the 34th and Madison Park.

Project Description

Recognizing the safety, mobility, and congestion concerns caused by at-grade railroad crossings, the RTSD, City of Lincoln, NDOT, and FHWA identified the area near North 33rd Street and Cornhusker Highway (US 6) for a project that would close two at-grade railroad crossings. The project would include a new grade-separated viaduct at North 33rd and Adams Streets. A new roundabout intersection would be located south of the viaduct, at the intersection of North 33rd Street and Huntington Avenue. Additional side streets would be reconstructed to tie into the primary project elements and to maintain local connectivity. The project would include reconstruction of the storm sewer system, sanitary sewer system, and water main system as well as traffic signal and underground fiber-optic lines due to impacts from the project.

The project would provide upgrades and enhance connectivity to the existing trail network. The new trail would proceed under the new viaduct, cross over Deadmans Run on a dedicated trail bridge, run adjacent to Baldwin Avenue and south along Griffith Street to reconnect to the existing trail network near Fleming Fields and Huntington Avenue.

Construction of the project would require sections of North 33rd Street, Adams Street, and Huntington Avenue to be closed to traffic. Detours would be required to reroute traffic during construction; no improvements would be required to detour routes. Temporary trail detours would be required along sections of the 33rd Street Trail, Huntington Trail, and Dietrich Trail.

Section 4(f) Property

Section 4(f) of the U.S. Department of Transportation (DOT) Act of 1966 provides special protection for certain properties, such as publicly owned parks, recreation lands, wildlife and waterfowl refuges, and historic sites. FHWA is required to give special consideration to any properties identified as meeting this definition. 34th and Madison Park is located south of Madison Avenue, between North 33rd Street and North 35th Street (Figure 1) and is subject to Section 4(f) provisions. Section 4(f) requires coordination with the official having jurisdiction over the potentially affected resource.

Section 4(f) Analysis

The FHWA, in cooperation with NDOT and the official with jurisdiction over the property, is responsible for making decisions related to Section 4(f) compliance. Title 23, Part 774.3 of the Code of Federal Regulations (CFR) provides for Section 4(f) approval by FHWA. As relevant to this project, one of the approvals outlined under Part 774.3(b) includes determination that the use of the land from the property would have a de minimis (minor) impact (as defined in §774.17) on the property. There are three conditions that must be met for this project to qualify for a de minimis impact decision under Section 4(f). These three conditions and how they have been addressed for this project are as follows.

Condition 1) *"The transportation use of the Section 4(f) resource, together with any impact avoidance, minimization and mitigation or enhancement measures incorporated into the project, does not adversely affect the protected activities, features, or attributes of the property, on either a temporary or permanent basis".*

The following is a summary of the 4(f) property impacts for the project. Attached are exhibits identifying the impacts (Figure 2). *De minimis* impacts are defined as those that do not adversely affect the activities, features, and attributes of the Section 4(f) resource.

Impacts to 34th and Madison Park would consist of construction of the new 33rd Avenue that would require right-of-way (ROW) and permanent easements along the western and northwestern edges of the property. 34th and Madison Park is approximately 1.77 acres in total size and the new avenue would require approximately 0.10 acre (4,421 square feet) of ROW acquisition and approximately 0.11 acre (4,755 square feet) of permanent easement. The permanent easements are required to accommodate underground utility infrastructure (water mains) and would not impact the aboveground, open space areas of the park. Approximately 0.01 acre (600 square feet) of the permanent easements are from the John Dietrich Trail, which passes through the property. An additional 0.09 acre (3,969 square feet) of temporary easement would be required from the northwest, southwest, and northeast corners of the property. The area proposed for easements consists of open space and does not extend into the basketball court or gazebo amenities. Access to the western and northwestern portions of the property would be limited during construction, but access to the basketball court and other park amenities would be maintained throughout construction via the east side of the property via Madison Avenue. The Dietrich Trail would remain open to just west of the basketball court. Temporary trail detours that are constructed would be done so using asphalt or concrete and be 8 feet wide. These detours may be in place for the duration of construction, which is anticipated to be three years.

Table 1: 34th and Madison Park Impacts Table

Permanent ROW Impacts	Permanent Easement Impacts	Temporary Impacts	Reason for Impact
Approximately 0.1 acre (5.7%)	Approximately 0.11 acre (6.1%)	Approximately 0.09 acre (5.1%)	Construction of the new 33rd Avenue

Permanent impacts to 34th and Madison Park would result in a minor take of park property. No relocation of park features would occur. Access to the basketball court and other park amenities would remain available at all times. These impacts would not adversely affect the activities, features, or attributes that qualify the property for protection under Section 4(f).

Condition 2) "*There must be a documented agreement of the official(s) with jurisdiction over the Section 4(f) resource regarding the above conditions.*"

As the official with jurisdiction over 34th and Madison Park, the RTSD is requesting your concurrence that the proposed project would not adversely affect the protected activities, features, or attributes of 34th and Madison Park. Please acknowledge your concurrence by signing on the appropriate line below.

Condition 3) "*The public has been afforded the opportunity to review and comment on the effects of the project on the activities, features, and attributes of the Section 4(f) resource.*"

Impacts to 34th and Madison Park were disclosed to the public during the Public Hearing for this project on September 5, 2024. No comments were received concerning 34th and Madison Park.

We have enclosed the following maps/figures for your review:

1. Location Map
2. Impact Map
3. Public Involvement Summary

If you have any questions on the North 33rd and Cornhusker project, please contact me at (402) 441-7711.

Sincerely,

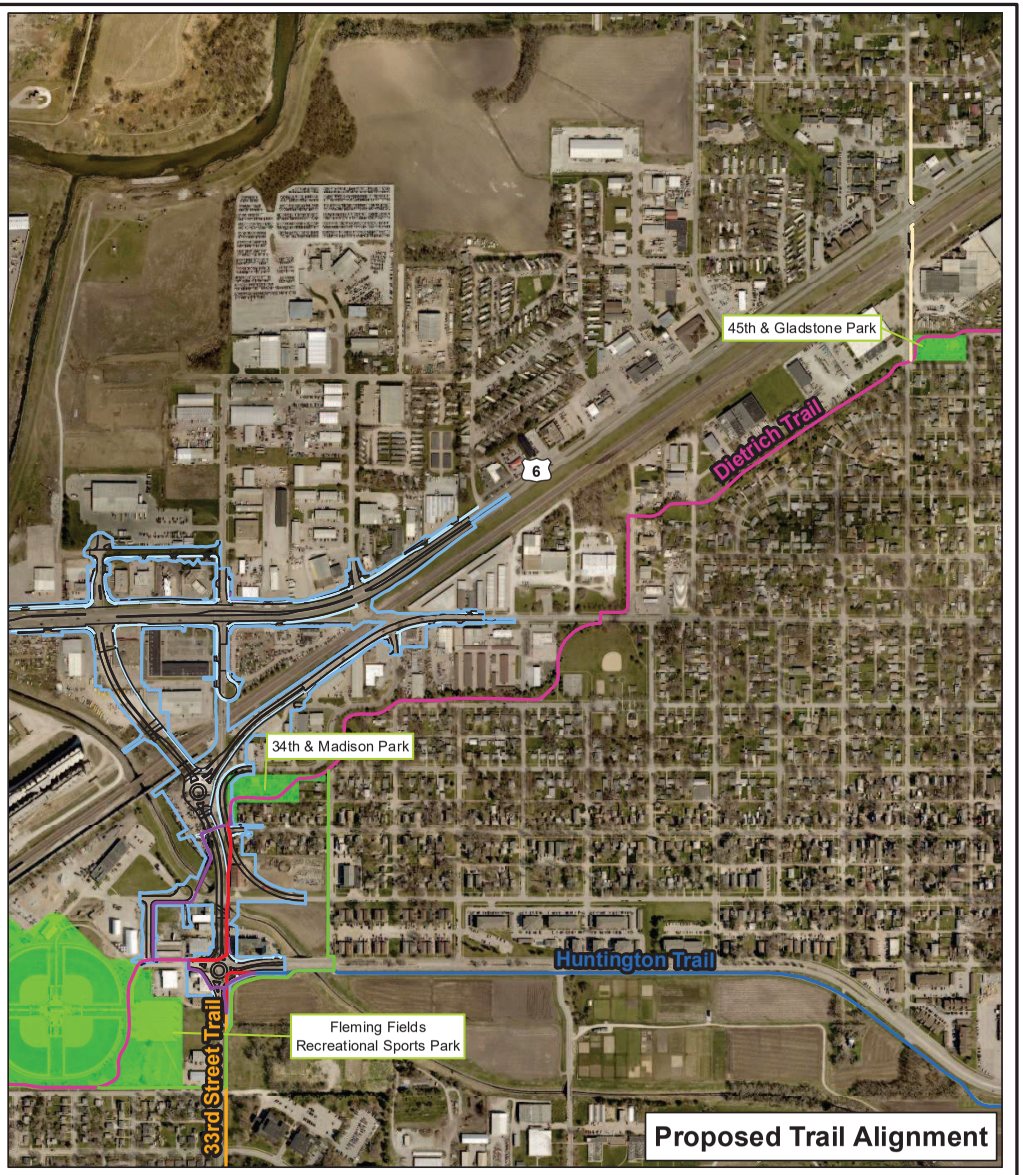

Roger Figard, P. E.
Executive Director, RTSD
949 West Bond Street, Suite 200
Lincoln, NE 68521

As the official with jurisdiction over 34th and Madison Park, I concur that the proposed project would not adversely affect the activities, features, and attributes that qualify 34th and Madison Park for protection under Section 4(f). I acknowledge concurrence by signing on the line below.

Section 4(f) Exceptions

Project Development Division Form 041

Section 4(f) Exceptions (23 CFR 774.13): Public Parks, Recreation Lands, Wildlife & Waterfowl Refuges, and Historic Properties

Project Name

North 33rd and Cornhusker

Project Number

LCLC-5233(4)

Control Number

13294

Project Location *(Road, Town, County)*

Lincoln, Lancaster North 33rd Street

Project Description

The Preferred Alternative would construct a new viaduct on a new alignment to create a direct connection over the railroad tracks near N. 33rd Street and Cornhusker Highway (US 6). The Preferred Alternative would close two at-grade railroad crossings: N. 33rd Street and Adams Street.

The Preferred Alternative includes the expansion of Cornhusker Highway (US 6) to six lanes with turn lanes from Deadmans Run to just east of N. 35th Street. North 33rd Street would be on a new alignment that includes two bridges over the Deadmans Run channel and the BNSF railroad tracks. The realigned N. 33rd Street connects at an intersection with Cornhusker Highway (US 6) near the existing N. 31st Street and Cornhusker intersection. Intersections at Cornhusker Highway (US 6) and State Fair Park Drive, a re-aligned N. 33rd Street and Cornhusker Highway (US 6), N. 33rd Street and Huntington Avenue, N. 33rd Street and Adams Street, and N. 35th Street and Cornhusker Highway (US 6) would operate as full access intersections.

The Preferred Alternative includes the realignment of Adams Street. Adams Street, no longer crossing the railroad tracks, would be extended southwest running roughly parallel to the railroad tracks, connecting to N. 33rd Street south of the railroad tracks and Cornhusker Highway (US 6). The new intersection would be located on the south end of the N. 33rd Street bridge and would be entirely elevated and supported by embankments, walls, or other structures.

The Preferred Alternative would maintain the present traffic flow on Cornhusker Highway (US 6) but would create a new access route for Adams Street via N. 33rd Street, south of the BNSF railroad tracks.

As a part of the Preferred Alternative, the existing at-grade crossing at N. 44th Street would remain open to vehicular and pedestrian traffic; however, improvements would be made to the crossing to bring it into compliance with ADA guidelines. Improvements would include the addition of detectable warning panels and ADA compliant slopes and extension of an 8-foot-wide sidewalk connecting from approximately Gladstone Street on the south and extending north to Colfax Circle. The newly constructed grade separated viaduct at N. 33rd and Adams Streets would include an 8-foot-wide sidewalk separated from traffic for pedestrians and

bicycles. The Preferred Alternative would provide upgrades and enhance connectivity to the existing trail network by providing a reroute of the existing trail network. The trail would proceed under the newly constructed N. 33rd Street bridge over Deadmans Run, cross over Deadmans Run on a dedicated trail bridge, run adjacent to Baldwin Avenue and south along Griffith Street to reconnect to the existing trail near Fleming Fields and Huntington Avenue.

The Preferred Alternative would include the installation of fencing along the BNSF rail corridor from approximately Deadmans Run to approximately N. 36th Street with final locations and dimensions to be determined during final design in coordination with BNSF.

Additional side streets would be reconstructed to tie into the primary project elements and to maintain local connectivity, as follows:

- Huntington Avenue would be reconstructed on either side of the intersection of N. 33rd Street to connect back to the existing road.
- N. 31st Street would be reconstructed on the north side of Cornhusker Highway (US 6) where the newly aligned N. 33rd Street meets at an intersection. Existing N 33rd Street would be reconstructed on the north and south sides of Cornhusker Highway (US 6) as well to connect back to the existing road.
- Existing N. 33rd Street on the south side of Cornhusker Highway (US 6) would include the construction of a cul-de-sac just north of the BNSF railroad tracks to provide a turnaround for traffic near the closed at-grade railroad crossing.
- N. 35th Street would be reconstructed on the north side of Cornhusker Highway (US 6). N. 36th Street would be reconstructed on the south side of Adams Street.
- Griffith Street would be reconstructed between Huntington Avenue and Baldwin Avenue.
- A new local 33-foot-wide roadway called Greenwood Street would be constructed between 31st Street and 33rd Street. It would include a five-foot sidewalk on the southside.
- A new local roadway called 33rd Avenue would reconnect Madison Avenue to Saint Paul Avenue and Baldwin Avenue on the east side of the newly realigned N. 33rd Street bridge. These streets would no longer have direct access onto N. 33rd Street. Baldwin Avenue on the west side of N. 33rd Street would not reconnect with N. 33rd Street and would include a new cul-de-sac for traffic to turnaround.

The project would include sidewalk, and curb ramp improvements to meet ADA guidelines at the intersection of N. 29th Street and Cornhusker Highway (US 6). The existing traffic signal at N. 29th Street and Cornhusker Highway (US 6) would be upgraded due to the addition of another westbound left turn lane and westbound outside through lane. Traffic signals at N. 31st Street and Cornhusker Highway and N. 35th Street and Cornhusker Highway.

The project would include reconstruction of the storm sewer system, sanitary sewer system, water main system as well as traffic signal and underground fiber-optic lines due to the impacts from the project. The project would include impacts to private utility companies.

Construction of the project would require sections of N. 33rd Street, Adams Street, and the intersection of N. 33rd Street and Huntington Avenue to be closed to traffic. Detours would be required to reroute traffic due to the closure of N. 33rd Street to construct the viaduct over Deadmans Run channel and the railroad tracks. The project would detour traffic onto roadways of the same, or higher functional roadway classification. No improvements would be made to detour routes as a part of the Preferred Alternative. Temporary detours would be required along sections of the 33rd Street, Huntington Avenue, and Dietrich Trails. Trail detours would use

existing local roadways and sidewalks. No improvements would be required along any designated trail detour route.

Section 4(f) Property Name

45th and Gladstone Park

Official(s) with Jurisdiction

Maggie Stuckey-Ross, Director of City of Lincoln Parks and Recreation

Property Description

The 45th and Gladstone Park is located northwest of the intersection of North 45th Street and Gladstone Street. The property consists of a playground, picnic tables, and a covered seating area. The John Dietrich Trail runs from the southwest corner of the property to the northeast corner. 45th and Gladstone Park is approximately 0.2 acres in size.

Type of Exception (Note: Choose the primary exception that applies from the drop-down choices below.)

23 CFR 774.13(a)

The following form was developed as a tool to assist in streamlining the Section 4(f) Exception process and to ensure that all necessary information is documented. A separate Exceptions Form is required for each Section 4(f) property for which an exception applies.

Establishing Section 4(f) Exception Relevancy

The following questions are taken directly from 23 CFR 774.13 to determine if the project is exempt from the requirement of Section 4(f) approval.

Check only the exceptions that apply for this property. (NOTE: More than one exception may apply.)

a. 23 CFR 774.13(a): Restoration, rehabilitation, or maintenance of transportation facilities that are on or eligible for the National Register when: 1. [FHWA] concludes…that such work will not adversely affect the historic qualities of the facility that caused it to be on or eligible for the National Register, and 2. the Officials with Jurisdiction (OWJ) over the Section 4(f) resource have not objected to the [FHWA] conclusion.

☐

b. 23 CFR 774.13(b): *All archeological sites qualify for the exception to Section 4(f) detailed at 23 CFR 774.13(b) unless the NDOT Professionally Qualified Staff (NDOT PQS) determines that the archeological site has important value for preservation in place and the SHPO/THPO has not objected. This information can be found on page 2 of the NDOT Section 106 Tier Review Form or through coordination with the NDOT PQS.*

☐

c. 23 CFR 774.13(c): Designations of park and recreation lands, wildlife and waterfowl refuges, and historic sites that are made, or determinations of significance that are changed, late in the development of a proposed action. [See 23 CFR 774.13(c) for more parameters.]

☐

d. 23 CFR 774.13(d): Temporary occupancies of land that are so minimal as to not constitute a use within the meaning of Section 4(f).

   The following conditions must be satisfied: 1. duration must be temporary and there should be no change in ownership of the land; 2. scope of the work must be minor; 3. there are no anticipated permanent adverse physical impacts, nor will there be interference with the protected activities, features, or attributes of the property, on either a temporary or permanent basis; 4. the land being used must be fully restored to pre-existing conditions or better; and 5. there must be documented agreement of the OWJ(s) over the Section 4(f) resource regarding the above conditions.

☒

e. 23 CFR 774.13(e): Federal lands transportation facilities as defined in section 1103(a)(3) MAP-21 (23 U.S.C. 101(a)(8)).

☐

f. 23 CFR 774.13(f): Certain trails, paths, bikeways, and sidewalks, in the following circumstances: 1. trail-related projects funded under the Recreational Trails Program, 23 U.S.C. 206(h)(2); 2. National Historic Trails and the Continental Divide National Scenic Trail, designated under the National Trails System Act, 16 U.S.C. 1241-1251, with the exception of those trail segments that are historic sites as defined in 23 CFR 774.17; 3. trails, paths, bikeways, and sidewalks that occupy a transportation facility right-of-way without limitation to any specific location within that right-of-way, so long as the continuity of the trail, path, bikeway, or sidewalk is maintained; and 4. trails, paths, bikeways, and sidewalks that are part of the local transportation system and which function primarily for transportation.

☐

g. 23 CFR 774.13(g): Transportation enhancement projects and mitigation activities, where: 1. the use of the Section 4(f) property is solely for the purpose of preserving or enhancing an activity, feature, or attribute that qualifies the property for Section 4(f) protection; and 2. the OWJ(s) over the Section 4(f) resource agrees in writing to paragraph (g)(1) of this section.

☐

Describe project impacts, how the project qualifies for the selected Exception, completed coordination, and any other pertinent information.

Impacts to the 45th and Gladstone Park would consist of approximately 0.07 acre of temporary easements to accommodate the construction of an 8-foot-wide multiuse path along the westside right-of-way of North 44th Street. The new path would tie into the existing John Dietrich Trail within the 45th and Gladstone Park.

Temporary occupancy of 45th and Gladstone Park will occur during the construction of the multi-use path on the western edge of 45th and Gladstone Park. The time to construct the multi-use path would not take longer than one month with restoration of the area to follow immediately after construction is completed. There would be no change in ownership of the 45th and Gladstone Park and it would continue to be owned by the City of Lincoln upon project completion.

Construction workers would construct a multi-use trail along an alignment currently associated with a sidewalk located along the west side of 45th and Gladstone Park. Construction activities would include approximately 165 feet by 12 feet of minor grading, subgrade preparation, and pouring of concrete.

There would be no permanent impacts to 45th and Gladstone Park. The main feature of the Section 4(f) property is the playground area and the John Dietrich Trail which crosses east to west through the park. Access to the John Dietrich Trail and playground area would be maintained and uninterrupted by activities associated with the construction of the multi-use path. Construction of the multi-use path along the west side of 45th and Gladstone Park would not result in permanent adverse physical impacts or interference with the protected activities, features, or attributes of the property.

The area to be disturbed currently includes areas with turf grasses and a tree line with dense, non-native trees and shrubs. Areas disturbed from construction would be restored and seeded with a mix of turf grasses that would be used throughout the project.

The City of Lincoln Parks and Recreation Director, Maggie Stuckey-Ross, The Official with Jurisdiction over 45th and Gladstone Park, concurred with the finding that construction would qualify as a 4(f) Exception on January 24, 2025.

Was mitigation necessary to minimize use? If so, explain the impacts and mitigation.

The proposed project includes all appropriate measures to minimize harm and subsequent mitigation necessary to preserve and enhance those features and values of the property that originally qualified the property for Section 4(f) protection.

Access to 45th and Gladstone Park and all park amenities, including the John Dietrich Trail, would remain open and available at all times during construction.

Upon completion of the project, the disturbed areas must be returned to a condition which is at least as good as that which existed prior to the project.

Exception Documentation

Are detailed maps included, showing current and proposed right-of-way, temporary/construction easements, property boundaries, access points for pedestrians and vehicles (if applicable), and existing and planned property features?

☒ Yes ☐ No

Is concurrence from the Official(s) with Jurisdiction attached? (if required)

☒ Yes ☐ No, not required

Approval Signatures

I reviewed this checklist and all attached documentation and confirm that the above property and proposed project meet the requirements of 23 CFR 774.13 for a Section 4(f) Exception finding.

RE: **Section 4(f) Temporary Occupancy Exception, 45th and Gladstone Park**
North 33rd and Cornhusker Project, LCLC-5233(4); CN 13294, Lincoln, NE

The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD), in cooperation with City of Lincoln, is undertaking the North 33rd and Cornhusker project (the project). The project involves an action by the Federal Highway Administration (FHWA), in cooperation with the Nebraska Department of Transportation (NDOT) and is pursuant to Section 4(f) of the Department of Transportation Act regarding the use of the 45th and Gladstone Park. This letter documents the RTSD's intent to coordinate with Lincoln Parks and Recreation as the official with jurisdiction over the management of the 45th and Gladstone Park.

This letter documents the RTSD's coordination with the City of Lincoln Parks and Recreation Department as the official with jurisdiction over the management of the 45th and Gladstone Park. The North 33rd and Cornhusker project would close two at-grade railroad crossings. The project would include a new grade-separated viaduct at North 33rd and Adams Streets. A new roundabout intersection would be located south of the viaduct, at the intersection of North 33rd Street and Huntington Avenue. Additional side streets would be reconstructed to tie into the primary project elements and to maintain local connectivity. The project would include reconstruction of the storm sewer system, sanitary sewer system, and water main system as well as traffic signal and underground fiber-optic lines due to impacts from the project

The project would construct an eight-foot-wide multiuse path along the east side of N. 44th Street that would connect to the Dietrich Trail within 45th and Gladstone Park. The project would use temporary easements to construct the path under an internal City of Lincoln process that is equivalent to a right-of-entry permit. The eight-foot-wide multiuse path would be tied into the Dietrich Trail and would not restrict or impede users of the Dietrich Trail during construction.

Section 4(f) Resources
Section 4(f) of the U.S. Department of Transportation (DOT) Act of 1966 provides special protection for certain properties, such as publicly owned parks, recreation lands, wildlife and waterfowl refuges, and historic sites. FHWA is required to give special consideration to any properties identified as meeting this definition. 45th and Gladstone Park is owned by the City of Lincoln, with the City of Lincoln Parks Department identified as the Official with Jurisdiction (OWJ) for the property. 45th and Gladstone Park is open to the public year-round and is subject to protection under Section 4(f).

Section 4(f) Analysis
The FHWA, in cooperation with the OWJ, is responsible for making all decisions related to Section 4(f) compliance. Title 23, part 774.13 of the Code of Federal Regulations provides for certain exceptions to the requirements for Section 4(f) approval. One of the exceptions, outlines under 774.13(d), addresses temporary occupancies of land. There are five conditions that must be met

for a project to qualify for the temporary occupancy exception under Section 4(f). Those conditions, along with how they would be addressed, are outlined below:

Condition 1 - Duration must be temporary, i.e., less than the time needed for construction of the project, and there should be no change in ownership of the land

Temporary occupancy of 45th and Gladstone Park will occur during the construction of the multi-use path on the western edge of 45th and Gladstone Park. The time to construct the multi-use path would not take longer than one month with restoration of the area to follow immediately after construction is completed. There would be no change in ownership of the 45th and Gladstone Park and it would continue to be owned by the City of Lincoln upon project completion.

Condition 2 - Scope of the work must be minor, i.e., both the nature and the magnitude of the changes to the Section 4(f) property are minimal

Construction workers would construct a multi-use trail along an alignment currently associated with a sidewalk located along the west side of 45th and Gladstone Park. Construction activities would include approximately 165 feet by 12 feet of minor grading, subgrade preparation, and pouring of concrete.

Condition 3 - There are no anticipated permanent adverse physical impacts, nor will there be interference with the protected activities, features, or attributes of the property, on either a temporary or permanent basis

There would be no permanent impacts to 45th and Gladstone Park. The main feature of the Section 4(f) property is the playground area and the John Dietrich Trail which crosses east to west through the park. Access to the John Dietrich Trail and playground area would be maintained and uninterrupted by activities associated with the construction of the multi-use path. Construction of the multi-use path along the west side of 45th and Gladstone Park would not result in permanent adverse physical impacts or interference with the protected activities, features, or attributes of the property.

Condition 4 - The land being used must be fully restored, i.e., the property must be returned to a condition which is at least as good as that which existed prior to the project

The area to be disturbed currently includes areas with turf grasses and a tree line with dense, non-native trees and shrubs. Areas disturbed from construction would be restored and seeded with a mix of turf grasses that would be used throughout the project.

Condition 5 - There must be documented agreement of the official(s) with jurisdiction over the Section 4(f) resource regarding the above conditions

We have enclosed the following maps/figures for your review:

1. Location Map
2. Impact Map

If you have any questions on the North 33rd and Cornhusker project, please contact me at (402) 441-7711.

Sincerely,

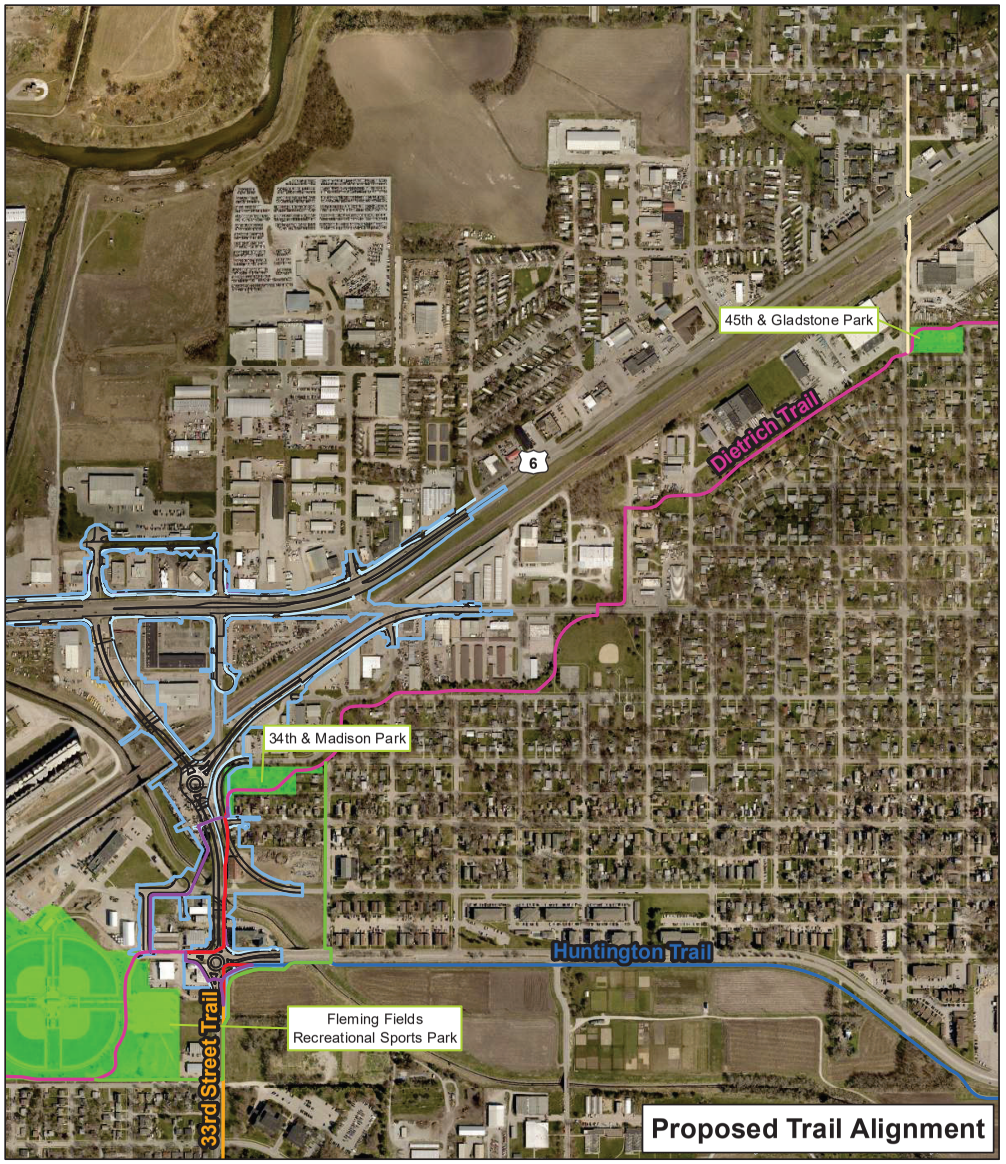

Roger Figard, P. E.
Executive Director, RTSD
949 West Bond Street, Suite 200
Lincoln, NE 68521

As the Official with Jurisdiction over the property, certified the project would not adversely affect the protected attributes, features, or activities of the existing 45th and Gladstone Park and concurs the Temporary Occupancy conditions are met, per 23 CFR 774.13(d)(5).

Project Name
North 33rd and Cornhusker

Project Number
LCLC-5233(4)

Control No.
13294

Project Location (Town, County, Street)
Lincoln, Lancaster, North 33rd Street

Project Description

The Preferred Alternative would construct a new viaduct on a new alignment to create a direct connection over the railroad tracks near N. 33rd Street and Cornhusker Highway (US 6). The Preferred Alternative would close two at-grade railroad crossings: N. 33rd Street and Adams Street.

The Preferred Alternative includes the expansion of Cornhusker Highway (US 6) to six lanes with turn lanes from Deadmans Run to just east of N. 35th Street. North 33rd Street would be on a new alignment that includes two bridges over the Deadmans Run channel and the BNSF railroad tracks. The realigned N. 33rd Street connects at an intersection with Cornhusker Highway (US 6) near the existing N. 31st Street and Cornhusker intersection. Intersections at Cornhusker Highway (US 6) and State Fair Park Drive, a re-aligned N. 33rd Street and Cornhusker Highway (US 6), N. 33rd Street and Huntington Avenue, N. 33rd Street and Adams Street, and N. 35th Street and Cornhusker Highway (US 6) would operate as full access intersections.

The Preferred Alternative includes the realignment of Adams Street. Adams Street, no longer crossing the railroad tracks, would be extended southwest running roughly parallel to the railroad tracks, connecting to N. 33rd Street south of the railroad tracks and Cornhusker Highway (US 6). The new intersection would be located on the south end of the N. 33rd Street bridge and would be entirely elevated and supported by embankments, walls, or other structures.

The Preferred Alternative would maintain the present traffic flow on Cornhusker Highway (US 6) but would create a new access route for Adams Street via N. 33rd Street, south of the BNSF railroad tracks.

As a part of the Preferred Alternative, the existing at-grade crossing at N. 44th Street would remain open to vehicular and pedestrian traffic; however, improvements would be made to the crossing to bring it into compliance with ADA guidelines. Improvements would include the addition of detectable warning panels and ADA compliant slopes and extension of an 8-foot-wide sidewalk connecting from approximately Gladstone Street on the south and extending north to Colfax Circle. The newly constructed grade separated viaduct at N. 33rd and Adams Streets would include an 8-foot-wide sidewalk separated from traffic for pedestrians and bicycles. The Preferred Alternative would provide upgrades and enhance connectivity to the existing trail network by providing a reroute of the existing trail network. The trail would proceed under the newly constructed N. 33rd Street bridge over Deadmans Run, cross over Deadmans Run on a dedicated trail bridge, run adjacent to Baldwin Avenue and south along Griffith Street to reconnect to the existing trail near Fleming Fields and Huntington Avenue.

The Preferred Alternative would include the installation of fencing along the BNSF rail corridor from approximately Deadmans Run to approximately N. 36th Street with final locations and dimensions to be determined during final design in coordination with BNSF.

Additional side streets would be reconstructed to tie into the primary project elements and to maintain local connectivity, as follows:

- Huntington Avenue would be reconstructed on either side of the intersection of N. 33rd Street to connect back to the existing road.
- N. 31st Street would be reconstructed on the north side of Cornhusker Highway (US 6) where the newly aligned N. 33rd Street meets at an intersection. Existing N 33rd Street would be reconstructed on the north and south sides of Cornhusker Highway (US 6) as well to connect back to the existing road.
- Existing N. 33rd Street on the south side of Cornhusker Highway (US 6) would include the construction of a cul-de-sac just north of the BNSF railroad tracks to provide a turnaround for traffic near the closed at-grade railroad crossing.
- N. 35th Street would be reconstructed on the north side of Cornhusker Highway (US 6). N. 36th Street would be reconstructed on the south side of Adams Street.
- Griffith Street would be reconstructed between Huntington Avenue and Baldwin Avenue.
- A new local 33-foot-wide roadway called Greenwood Street would be constructed between 31st Street and 33rd Street. It would include a five-foot sidewalk on the southside.
- A new local roadway called 33rd Avenue would reconnect Madison Avenue to Saint Paul Avenue and Baldwin Avenue on the east side of the newly realigned N. 33rd Street bridge. These streets would no longer have direct access onto N. 33rd Street. Baldwin Avenue on the west side of N. 33rd Street would not reconnect with N. 33rd Street and would include a new cul-de-sac for traffic to turnaround.

The project would include sidewalk, and curb ramp improvements to meet ADA guidelines at the intersection of N. 29th Street and Cornhusker Highway (US 6). The existing traffic signal at N. 29th Street and Cornhusker Highway (US 6) would be upgraded due to the addition of another westbound left turn lane and westbound outside through lane. Traffic signals at N. 31st Street and Cornhusker Highway and N. 35th Street and Cornhusker Highway.

The project would include reconstruction of the storm sewer system, sanitary sewer system, water main system as well as traffic signal and underground fiber-optic lines due to the impacts from the project. The project would include impacts to private utility companies.

Construction of the project would require sections of N. 33rd Street, Adams Street, and the intersection of N. 33rd Street and Huntington Avenue to be closed to traffic. Detours would be required to reroute traffic due to the closure of N. 33rd Street to construct the viaduct over Deadmans Run channel and the railroad tracks. The project would detour traffic onto roadways of the same, or higher functional roadway classification. No improvements would be made to roadway detour routes as a part of the Preferred Alternative. Temporary detours would be required along sections of the 33rd Street, Huntington Avenue, and Dietrich Trails.

Name of Section 4(f) Property (A separate form must be completed for each property with a *de minimis* impact)

John Dietrich Trail

Official(s) with Jurisdiction

Maggie Stuckey-Ross, Director of City of Lincoln Parks and Recreation

Total Property Size (in acres)	Permanent Impact (in acres)	Temporary Impact (in acres)
3.55	0.19	0.00

Property Description

The John Dietrich Trail is an 8-foot-wide trail that crosses the project alignment at the intersection of North 33rd Street and Huntington Avenue. West of North 33rd Street, the trail runs along the northside right-of-way of Huntington Avenue. The trail then crosses North 33rd Street and continues north along the eastside right-of-way of North 33rd Street. The total length of the John Dietrich Trail is approximately 3.12 miles.

Answer only the questions in the applicable block (A or B). All questions in Block C must be answered.

A. Section 4(f) *De Minimis* Park, Recreation Area, and Refuge Eligibility

If the *de minimis* impact does NOT involve a park, recreation area or refuge, check the N/A below and proceed to Block B.

☐ N/A

Will the project adversely affect the activities, features, or attributes that make the property eligible for Section 4(f) protection?

☐ Yes ☒ No

Have measures been taken to minimize harm to the property? If Yes, explain in the Avoidance, Minimization, and Mitigation Measures box in Block C.

☒ Yes ☐ No

Have *de minimis* public involvement requirements (notice, review, comments, etc.) been completed? If Yes, describe in the Comments box below.

☒ Yes ☐ No

Date(s): 09/05/2024

Did the Official(s) with Jurisdiction concur with the determination of no adverse effect?

☒ Yes ☐ No

Date(s): 01/24/2025

B. Section 4(f) *De Minimis* Historic and Archeological Resource Eligibility

If the *de minimis* impact does NOT involve an historic or archeological resource, check the N/A below and proceed to Block C.

☒ N/A

Have measures been taken to minimize harm to the property? If Yes, explain in the Avoidance, Minimization, and Mitigation Measures box below.

☐ Yes ☐ No

Was the effect determination either “no historic properties affected” or “no adverse effect”? *

☐ Yes ☐ No

PQS Date	SHPO Date	THPO Date

* The PQS field will always be filled out. If there is a date in the SHPO or THPO field, this would indicate the entity is the Official with Jurisdiction and they were informed of NDOT's intent to apply *de minimis* via project-specific correspondence. The date in the field would be the date the entity concurred on the Section 106 effect determination. A notation of "N/A" in the field indicates the entity was not the Official with Jurisdiction. "Programmatic" in the SHPO field indicates that a determination of "no historic properties affected" or "no adverse effect" was made for the project per the Section 106 Programmatic Agreement and the *de minimis* notification was provided via letter agreement with the SHPO.

C. Additional Information

Description of Use (Temporary and/or Permanent)

The John Dietrich Trail would be impacted from construction of a roundabout at the intersection of North 33rd Street and Huntington Avenue, the construction of Griffith Street, the 33rd Street bridge over Deadmans Run, and the construction of 33rd Avenue between Baldwin and Madison Avenues. The existing John Dietrich Trail is approximately 19,331 feet (3.55 acres) in total length. Approximately 1,010 feet (0.19 acre) of the existing trail would be permanently removed near the intersection of North 33rd Street and Huntington Avenue. The trail would be realigned along Griffith Street and Baldwin Avenue, resulting in the construction of approximately 1,145 feet (0.21 acre) of realigned trail. The John Dietrich trail would include an undercrossing of 33rd Street, this would require installing lighting for pedestrian safety where the path crosses under the proposed 33rd Street. With the removal of the Baldwin Avenue access at 33rd, consolidation of vehicle entry/exit to the Baldwin Maintenance shop would occur, increasing the frequency of truck/equipment traffic across the Deitrich Trail. Advance warning to notify trail users and drivers of the trail crossing would be necessary. Pavement markings and additional signage would be added for pedestrian safety.

The realignment of the John Dietrich Trail would result in a net increase of approximately 135 feet of total trail length, as well as more direct connection to the wider trail network via the adjacent 33rd Street and Huntington Avenue Trails. The realigned trail would be routed under the proposed viaduct, reducing delay to trail users and improving safety.

Trail continuity would be maintained at all times during construction via detour. During the construction of North 33rd Street, the John Dietrich Trail would be detoured around the project area beginning at Leighton Avenue west of North 33rd Street and extending to the east across North 33rd Street. A multi-use path would be constructed on the north side of Leighton Avenue and extend east to a temporary crossing of North 33rd Street at Leighton Avenue. The detour would continue north to the intersection of North 33rd Street and Huntington Avenue and proceed along the south side of Huntington Avenue to North 35th Street. A temporary crossing of Huntington Avenue would be provided at North 35th Street. Pavement markings and additional signage would be installed at the crossing for pedestrian safety. Trail users would proceed along a temporary 8-foot-wide trail detour along the west side of North 35th Street to the intersection of North 35th and Madison Avenue where it connects to the existing John Dietrich Trail. Temporary crossings would also be positioned along North 35th Street at Baldwin Avenue, and Saint Paul Avenue. The trail detour path would consist of either asphalt or concrete would include routine inspections and maintenance by the contractor for the duration of the trail detour. The final determination of roadway closures will be completed in final design; however, the intersection construction at Huntington Avenue will either be a full closure or phased if necessary. Traffic along North 35th Street from Huntington Avenue to Madison Avenue would be limited to local traffic only during construction. The temporary detour may be in place for the entirety of construction, which is anticipated to be three years.

Avoidance, Minimization, and Mitigation Measures

The proposed project includes all appropriate measures to minimize harm and subsequent mitigation necessary to preserve and enhance those features and values of the property that originally qualified the property for Section 4(f) protection.

Trail continuity would be maintained at all times during construction via detour.

Access to the John Dietrich Trail, outside of areas slated for construction, would remain open and available at all times during construction.

Advanced warning to notify trail users and drivers of the trail crossing would be required at the new crossing on Griffith Street and Huntington Avenue. Pavement markings and additional signage would be added for pedestrian safety.

Areas of temporary disturbance would be fully restored, and the property would be returned to a condition which is at least as good as that which existed prior to the project.

Comments

The permanent loss of trail (approximately 1,010 feet) comprises approximately 5.22 percent of the total length of the John Dietrich Trail (approximately 19,331 feet). The realignment of the John Dietrich Trail would result in a net increase of approximately 135 feet of trail.

The realigned John Dietrich Trail would result in more direct connection to the wider trail network via the adjacent 33rd Street and Huntington Avenue Trails. The realigned trail would be routed under the proposed viaduct, reducing delay to trail users and improving safety.

Specific Impacts to Dietrich Trail were disclosed to the public during the Public Hearing for this project on September 5, 2024. No comments were received concerning Dietrich Trail.

De Minimis Documentation

Are detailed maps included, showing current and proposed right-of-way, property boundaries, access, and existing and planned property features?

☒ Yes ☐ No

Is documentation of public involvement attached?

☒ Yes ☐ No ☐ N/A (for historic resources)

Is concurrence from the Official(s) with Jurisdiction (and Consulting Parties, for historic properties) attached?

☒ Yes ☐ No

Additional Attachments (If Applicable)

OWJ Concurrence Letter, Project Location Map, Impact Maps, and Public Hearing Summary

Approval Signatures

The project involves a *de minimis* use of the Section 4(f) property. Harm to the park, recreation land, wildlife or waterfowl refuge, or historic property has been avoided or mitigated to minimize impacts to the qualifying characteristics and/or functions of the resource. Based on the scope of the undertaking, the fact that the undertaking does not adversely affect the function/qualities of the Section 4(f) property on a permanent or temporary basis, and with agreement from the Official(s) with Jurisdiction, the proposed action constitutes a *de minimis* use.

RE: North 33rd and Cornhusker
LCLC-5233(4); CN 13294
Section 4(f) *de minimis* concurrence request, John Dietrich Trail

The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD), in cooperation with City of Lincoln, is undertaking the North 33rd and Cornhusker project (the project). The project involves an action by the Federal Highway Administration (FHWA), in cooperation with the Nebraska Department of Transportation (NDOT) and is pursuant to Section 4(f) of the Department of Transportation Act regarding the use of the John Dietrich Trail. This letter documents the RTSD's intent to coordinate with Lincoln Parks and Recreation as the official with jurisdiction over the management of the John Dietrich Trail.

Project Description

Recognizing the safety, mobility, and congestion concerns caused by at-grade railroad crossings, the RTSD, City of Lincoln, NDOT, and FHWA identified the area near North 33rd Street and Cornhusker Highway (US 6) for a project that would close two at-grade railroad crossings. The project would include a new grade-separated viaduct at North 33rd and Adams Streets. A new roundabout intersection would be located south of the viaduct, at the intersection of North 33rd Street and Huntington Avenue. Additional side streets would be reconstructed to tie into the primary project elements and to maintain local connectivity. The project would include reconstruction of the storm sewer system, sanitary sewer system, and water main system as well as traffic signal and underground fiber-optic lines due to impacts from the project.

The project would provide upgrades and enhance connectivity to the existing trail network. The new trail would proceed under the new viaduct, cross over Deadmans Run on a dedicated trail bridge, run adjacent to Baldwin Avenue and south along Griffith Street to reconnect to the existing trail network near Fleming Fields and Huntington Avenue.

Construction of the project would require sections of North 33rd Street, Adams Street, and Huntington Avenue to be closed to traffic. Detours would be required to reroute traffic during construction; no improvements would be required to detour routes. Temporary trail detours would be required along sections of the 33rd Street Trail, Huntington Trail, and Dietrich Trail.

Section 4(f) Property

Section 4(f) of the U.S. Department of Transportation (DOT) Act of 1966 provides special protection for certain properties, such as publicly owned parks, trails, recreation lands, wildlife and waterfowl refuges, and historic sites. FHWA is required to give special consideration to any properties identified as meeting this definition. The John Dietrich Trail is an 8-foot-wide multiuse trail that crosses the project alignment at the intersection of North 33rd Street and Huntington Avenue. West of North 33rd Street, the trail runs along the northside of Huntington Avenue. The trail then crosses North 33rd Street and continues north along the eastside of North 33rd Street (Figure 1). The John Dietrich Trail is subject to Section 4(f) provisions. Section 4(f) requires coordination with the official having jurisdiction over the potentially affected resource.

Section 4(f) Analysis

The FHWA, in cooperation with NDOT and the official with jurisdiction over the property, is responsible for making decisions related to Section 4(f) compliance. Title 23, Part 774.3 of the Code of Federal Regulations (CFR) provides for Section 4(f) approval by FHWA. As relevant to this project, one of the approvals outlined under Part 774.3(b) includes determination that the use of the land from the property would have a de minimis (minor) impact (as defined in §774.17) on the property. There are three conditions that must be met for this project to qualify for a de minimis impact decision under Section 4(f). These three conditions and how they have been addressed for this project are as follows.

Condition 1) *"The transportation use of the Section 4(f) resource, together with any impact avoidance, minimization and mitigation or enhancement measures incorporated into the project, does not adversely affect the protected activities, features, or attributes of the property, on either a temporary or permanent basis".*

The following is a summary of the 4(f) property impacts for the project. Attached are exhibits identifying the impacts (Figure 2). *De minimis* impacts are defined as those that do not adversely affect the activities, features, and attributes of the Section 4(f) resource.

The John Dietrich Trail would be impacted from construction of a roundabout at the intersection of North 33rd Street and Huntington Avenue, the construction of Griffith Street, the 33rd Street bridge over Deadmans Run, and the construction of 33rd Avenue between Baldwin and Madison Avenues. The existing John Dietrich Trail is approximately 19,331 feet (3.55 acres) in total length. Approximately 1,010 feet (0.19 acre) of the existing trail would be permanently removed near the intersection of North 33rd Street and Huntington Avenue. The trail would be realigned along Griffith Street and Baldwin Avenue, resulting in the construction of approximately 1,145 feet (0.21 acre) of realigned trail. The John Dietrich trail would include an undercrossing of 33rd Street, this would require installing lighting for pedestrian safety where the path crosses under the proposed 33rd Street. With the removal of the Baldwin Avenue access at 33rd, consolidation of vehicle entry/exit to the Baldwin Maintenance shop would occur, increasing the frequency of truck/equipment traffic across the Deitrich Trail. Advance warning to notify trail users and drivers of the trail crossing would be necessary. Pavement markings and additional signage would be added for pedestrian safety.

The realignment of the John Dietrich Trail would result in a net increase of approximately 135 feet of total trail length, as well as more direct connection to the wider trail network via the adjacent 33rd Street and Huntington Avenue Trails. The realigned trail would be routed under the proposed viaduct, reducing delay to trail users and improving safety.

Trail continuity would be maintained at all times during construction via detour. During the construction of North 33rd Street, the John Dietrich Trail would be detoured around the project area beginning at Leighton Avenue west of North 33rd Street and extending to the east across North 33rd Street. A multi-use path would be constructed on the north side of Leighton Avenue and extend east to a temporary crossing of North 33rd Street at Leighton Avenue. The detour would continue north to the intersection of North 33rd Street and Huntington Avenue and proceed along the south side of Huntington Avenue to North 35th Street. A temporary crossing of Huntington Avenue would be provided at North 35th Street. Pavement markings and additional signage would be installed at the crossing for pedestrian safety. Trail users would proceed along a temporary 8-foot-wide trail detour along the west side of North 35th Street to the intersection of North 35th and Madison Avenue where it connects to the existing John Dietrich Trail. Temporary crossings would also be positioned along North 35th Street at Baldwin Avenue, and Saint Paul

Avenue. The trail detour path would consist of either asphalt or concrete would include routine inspections and maintenance by the contractor for the duration of the trail detour. The final determination of roadway closures will be completed in final design; however, the intersection construction at Huntington Avenue will either be a full closure or phased if necessary. Traffic along North 35th Street from Huntington Avenue to Madison Avenue would be limited to local traffic only during construction. The temporary detour may be in place for the entirety of construction, which is anticipated to be three years.

Table 1: John Dietrich Trail Impacts Table

Permanent Impacts	Temporary Impacts	Reason for Impact
Approximately 0.19 acre (5.22%)	N/A	Construction of a roundabout at N. 33rd Street and Huntington Avenue, Griffith Street, 33rd Avenue, and the 33rd Street bridge over Deadmans Run

Permanent impacts to the John Dietrich Trail would result in a minor take of park property; however, these impacts would not adversely affect the activities, features, or attributes that qualify the property for protection under Section 4(f).

Condition 2) "*There must be a documented agreement of the official(s) with jurisdiction over the Section 4(f) resource regarding the above conditions.*"

As the official with jurisdiction over the John Dietrich Trail, the RTSD is requesting your concurrence that the proposed project would not adversely affect the protected activities, features, or attributes of the John Dietrich Trail. Please acknowledge your concurrence by signing on the appropriate line below.

Condition 3) "*The public has been afforded the opportunity to review and comment on the effects of the project on the activities, features, and attributes of the Section 4(f) resource.*"

Specific impacts to the John Dietrich Trail were disclosed to the public as part of the public hearing for the project on September 5th, 2024. No comments were received concerning the John Dietrich Trail.

We have enclosed the following maps/figures for your review:

1. Location Map
2. Impact Map
3. Public Involvement Summary

If you have any questions on the North 33rd and Cornhusker project, please contact me at (402) 441-7711.

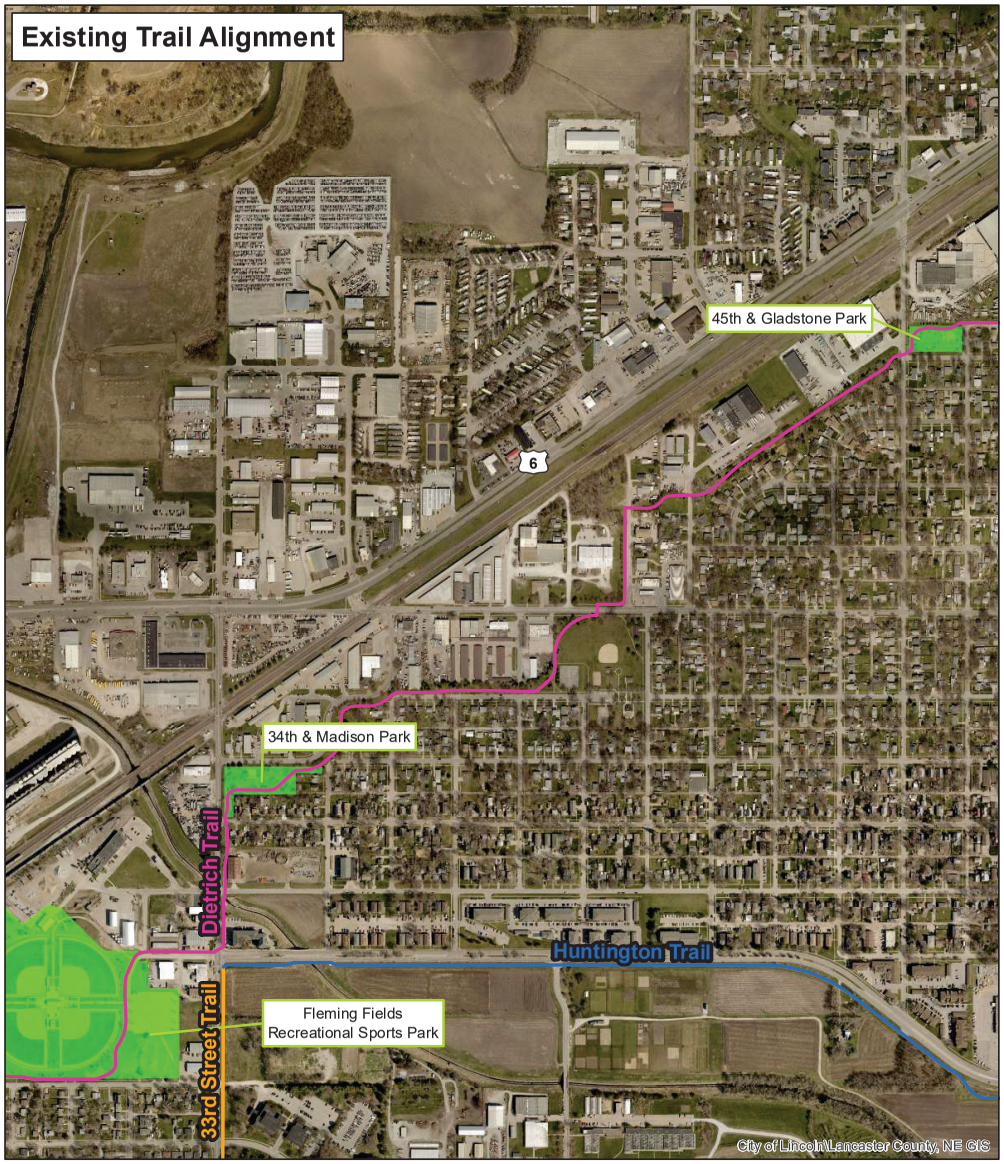

Sincerely,

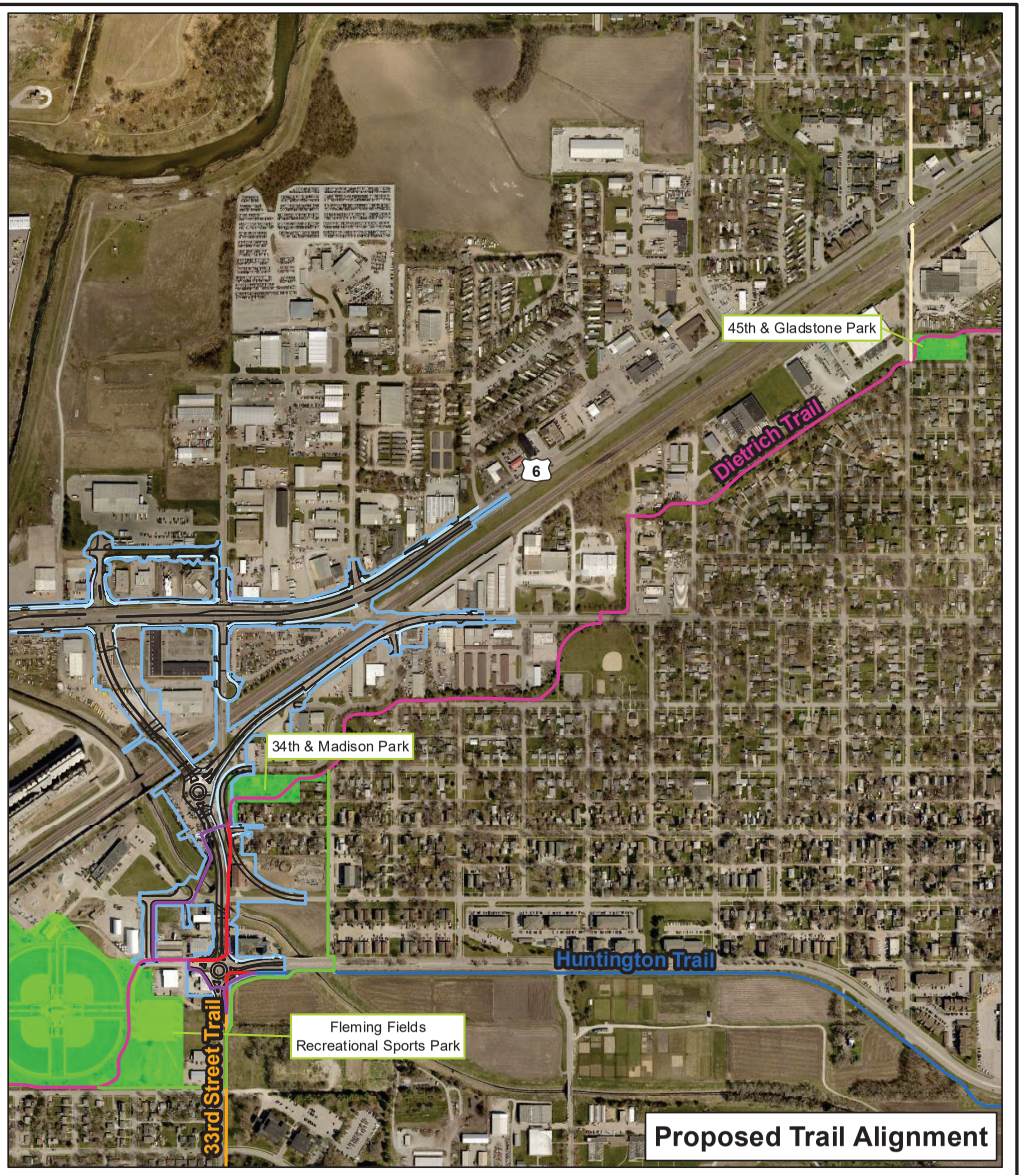

Roger Figard, P. E.
Executive Director, RTSD
949 West Bond Street, Suite 200
Lincoln, NE 68521

As the official with jurisdiction over the John Dietrich Trail, I concur that the proposed project would not adversely affect the activities, features, and attributes that qualify the John Dietrich Trail for protection under Section 4(f). I acknowledge concurrence by signing on the line below.

Maggie Stuckey-Ross 1-24-25

Project Development Division Form 042

Project Name
North 33rd and Cornhusker

Project Number
LCLC-5233(4)

Control No.
13294

Project Location (Town, County, Street)
Lincoln, Lancaster, North 33rd Street

Project Description

The Preferred Alternative would construct a new viaduct on a new alignment to create a direct connection over the railroad tracks near N. 33rd Street and Cornhusker Highway (US 6). The Preferred Alternative would close two at-grade railroad crossings: N. 33rd Street and Adams Street.

The Preferred Alternative includes the expansion of Cornhusker Highway (US 6) to six lanes with turn lanes from Deadmans Run to just east of N. 35th Street. North 33rd Street would be on a new alignment that includes two bridges over the Deadmans Run channel and the BNSF railroad tracks. The realigned N. 33rd Street connects at an intersection with Cornhusker Highway (US 6) near the existing N. 31st Street and Cornhusker intersection. Intersections at Cornhusker Highway (US 6) and State Fair Park Drive, a re-aligned N. 33rd Street and Cornhusker Highway (US 6), N. 33rd Street and Huntington Avenue, N. 33rd Street and Adams Street, and N. 35th Street and Cornhusker Highway (US 6) would operate as full access intersections.

The Preferred Alternative includes the realignment of Adams Street. Adams Street, no longer crossing the railroad tracks, would be extended southwest running roughly parallel to the railroad tracks, connecting to N. 33rd Street south of the railroad tracks and Cornhusker Highway (US 6). The new intersection would be located on the south end of the N. 33rd Street bridge and would be entirely elevated and supported by embankments, walls, or other structures.

The Preferred Alternative would maintain the present traffic flow on Cornhusker Highway (US 6) but would create a new access route for Adams Street via N. 33rd Street, south of the BNSF railroad tracks.

As a part of the Preferred Alternative, the existing at-grade crossing at N. 44th Street would remain open to vehicular and pedestrian traffic; however, improvements would be made to the crossing to bring it into compliance with ADA guidelines. Improvements would include the addition of detectable warning panels and ADA compliant slopes and extension of an 8-foot-wide sidewalk connecting from approximately Gladstone Street on the south and extending north to Colfax Circle. The newly constructed grade separated viaduct at N. 33rd and Adams Streets would include an 8-foot-wide sidewalk separated from traffic for pedestrians and bicycles. The Preferred Alternative would provide upgrades and enhance connectivity to the existing trail network by providing a reroute of the existing trail network. The trail would proceed under the newly constructed N. 33rd Street bridge over Deadmans Run, cross over Deadmans Run on a dedicated trail bridge, run adjacent to Baldwin Avenue and south along Griffith Street to reconnect to the existing trail near Fleming Fields and Huntington Avenue.

The Preferred Alternative would include the installation of fencing along the BNSF rail corridor from approximately Deadmans Run to approximately N. 36th Street with final locations and dimensions to be determined during final design in coordination with BNSF.

Additional side streets would be reconstructed to tie into the primary project elements and to maintain local connectivity, as follows:

- Huntington Avenue would be reconstructed on either side of the intersection of N. 33rd Street to connect back to the existing road.
- N. 31st Street would be reconstructed on the north side of Cornhusker Highway (US 6) where the newly aligned N. 33rd Street meets at an intersection. Existing N 33rd Street would be reconstructed on the north and south sides of Cornhusker Highway (US 6) as well to connect back to the existing road.
- Existing N. 33rd Street on the south side of Cornhusker Highway (US 6) would include the construction of a cul-de-sac just north of the BNSF railroad tracks to provide a turnaround for traffic near the closed at-grade railroad crossing.
- N. 35th Street would be reconstructed on the north side of Cornhusker Highway (US 6). N. 36th Street would be reconstructed on the south side of Adams Street.
- Griffith Street would be reconstructed between Huntington Avenue and Baldwin Avenue.
- A new local 33-foot-wide roadway called Greenwood Street would be constructed between 31st Street and 33rd Street. It would include a five-foot sidewalk on the southside.
- A new local roadway called 33rd Avenue would reconnect Madison Avenue to Saint Paul Avenue and Baldwin Avenue on the east side of the newly realigned N. 33rd Street bridge. These streets would no longer have direct access onto N. 33rd Street. Baldwin Avenue on the west side of N. 33rd Street would not reconnect with N. 33rd Street and would include a new cul-de-sac for traffic to turnaround.

The project would include sidewalk, and curb ramp improvements to meet ADA guidelines at the intersection of N. 29th Street and Cornhusker Highway (US 6). The existing traffic signal at N. 29th Street and Cornhusker Highway (US 6) would be upgraded due to the addition of another westbound left turn lane and westbound outside through lane. Traffic signals at N. 31st Street and Cornhusker Highway and N. 35th Street and Cornhusker Highway.

The project would include reconstruction of the storm sewer system, sanitary sewer system, water main system as well as traffic signal and underground fiber-optic lines due to the impacts from the project. The project would include impacts to private utility companies.

Construction of the project would require sections of N. 33rd Street, Adams Street, and the intersection of N. 33rd Street and Huntington Avenue to be closed to traffic. Detours would be required to reroute traffic due to the closure of N. 33rd Street to construct the viaduct over Deadmans Run channel and the railroad tracks. The project would detour traffic onto roadways of the same, or higher functional roadway classification. No improvements would be made to detour routes as a part of the Preferred Alternative. Temporary detours would be required along sections of the 33rd Street, Huntington Avenue, and Dietrich Trails. Trail detours would use existing local roadways and sidewalks. No improvements would be required along any designated trail detour route.

Name of Section 4(f) Property (A separate form must be completed for each property with a *de minimis* impact)

Fleming Fields Recreational Sports Park

Official(s) with Jurisdiction

Maggie Stuckey-Ross, Director of City of Lincoln Parks and Recreation

Total Property Size (in acres)	Permanent Impact (in acres)	Temporary Impact (in acres)
30.82	0.05	0.10

Property Description

The Fleming Fields Recreational Sports Park is a public access park consisting of four baseball fields, a playground, the John Dietrich Trail, and open space located northwest of the intersection of North 33rd Street and Leighton Avenue.

Answer only the questions in the applicable block (A or B). All questions in Block C must be answered.

A. Section 4(f) *De Minimis* Park, Recreation Area, and Refuge Eligibility

If the *de minimis* impact does NOT involve a park, recreation area or refuge, check the N/A below and proceed to Block B.

☐ N/A

Will the project adversely affect the activities, features, or attributes that make the property eligible for Section 4(f) protection?

☐ Yes ☒ No

Have measures been taken to minimize harm to the property? If Yes, explain in the Avoidance, Minimization, and Mitigation Measures box in Block C.

☒ Yes ☐ No

Have *de minimis* public involvement requirements (notice, review, comments, etc.) been completed? If Yes, describe in the Comments box below.

☒ Yes ☐ No

Date(s): 09/05/2024

Did the Official(s) with Jurisdiction concur with the determination of no adverse effect?

☒ Yes ☐ No

Date(s): 01/24/2025

B. Section 4(f) *De Minimis* Historic and Archeological Resource Eligibility

If the *de minimis* impact does NOT involve an historic or archeological resource, check the N/A below and proceed to Block C.

☒ N/A

Have measures been taken to minimize harm to the property? If Yes, explain in the Avoidance, Minimization, and Mitigation Measures box below.

☐ Yes ☐ No

Was the effect determination either "no historic properties affected" or "no adverse effect"? *

☐ Yes ☐ No

PQS Date	SHPO Date	THPO Date

* The PQS field will always be filled out. If there is a date in the SHPO or THPO field, this would indicate the entity is the Official with Jurisdiction and they were informed of NDOT's intent to apply *de minimis* via project-specific correspondence. The date in the field would be the date the entity concurred on the Section 106 effect determination. A notation of "N/A" in the field indicates the entity was not the Official with Jurisdiction. "Programmatic" in the SHPO field indicates that a determination of "no historic properties affected" or "no adverse effect" was made for the project per the Section 106 Programmatic Agreement and the *de minimis* notification was provided via letter agreement with the SHPO.

C. Additional Information

Description of Use (Temporary and/or Permanent)

Impacts to Fleming Fields Recreational Sports Park would consist of storm sewer work that would require temporary and permanent easements at the far northeast corner of the property. Fleming Fields Recreational Sports Park is approximately 30.82 acres in size and would require approximately 0.05 acre (2,233 square feet) of permanent easement and approximately 0.02 acre (716 square feet) of temporary easement for the storm sewer work. The area proposed for easements consists of open space and does not extend into any of the ballfields or other park amenities. A sidewalk and maintenance access drive would be temporarily unavailable for the duration of construction of the storm sewer (approximately 2 weeks), but access to the ballfields and other park amenities would be maintained throughout construction via other paths within the property.

Additional impacts to Fleming Fields property would be associated with the construction of the multi-use path along the north side of Leighton Avenue that will serve as a detour route for the John Dietrich Trail during construction of the 33rd Street and Huntington Avenue areas of the project. The project would construct approximately 670 feet of 8-foot-wide multi-use path, using either asphalt or concrete, along the northside ROW of Leighton Avenue and would require approximately 0.08 acre (3,467 square feet) of temporary easements from Fleming Fields. Construction of this multi-use path would require the removal of trees located in the ROW. The multi-use path along the north side of Leighton Avenue would remain in place upon completion of the project, which is anticipated to be three years.

Permanent impacts to Fleming Fields Recreational Sports Park would result in a minor take of park property. No relocation of park features would occur. Access to the ballfields and other park amenities would remain available at all times. These impacts would not adversely affect the activities, features, or attributes that qualify the property for protection under Section 4(f).

Avoidance, Minimization, and Mitigation Measures

The proposed project includes all appropriate measures to minimize harm and subsequent mitigation necessary to preserve and enhance those features and values of the property that originally qualified the property for Section 4(f) protection.

Access to the far northeast corner of Fleming Fields, one sidewalk, and one maintenance access drive would be temporarily unavailable during construction; however, access to the ballfields and other park amenities would remain available at all times during construction via access from the south and west.

Areas of temporary disturbance would be fully restored, and the property would be returned to a condition which is at least as good as that which existed prior to the project.

Comments

The permanent easements (approximately 0.05 acre) comprise approximately 0.17 percent of the total area of the Fleming Fields Recreational Sports Park (approximately 30.82 acres).

Impacts to Fleming Fields Recreational Sports Park were disclosed to the public during the Public Hearing for this project on September 5, 2024. No comments were received concerning Fleming Fields Recreational Sports Park.

De Minimis Documentation

Are detailed maps included, showing current and proposed right-of-way, property boundaries, access, and existing and planned property features?

☒ Yes ☐ No

Is documentation of public involvement attached?

☒ Yes ☐ No ☐ N/A (for historic resources)

Is concurrence from the Official(s) with Jurisdiction (and Consulting Parties, for historic properties) attached?

☒ Yes ☐ No

Additional Attachments (If Applicable)

OWJ Concurrence Letter, Project Location Map, Impact Maps, Public Hearing Summary and Section 6(f) Coordination Email

Approval Signatures

The project involves a *de minimis* use of the Section 4(f) property. Harm to the park, recreation land, wildlife or waterfowl refuge, or historic property has been avoided or mitigated to minimize impacts to the qualifying characteristics and/or functions of the resource. Based on the scope of the undertaking, the fact that the undertaking does not adversely affect the function/qualities of the Section 4(f) property on a permanent or temporary basis, and with agreement from the Official(s) with Jurisdiction, the proposed action constitutes a *de minimis* use.

RE: North 33rd and Cornhusker
LCLC-5233(4); CN 13294
Section 4(f) *de minimis* concurrence request, Fleming Fields Recreational Sports Park

The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD), in cooperation with City of Lincoln, is undertaking the North 33rd and Cornhusker project (the project). The project involves an action by the Federal Highway Administration (FHWA), in cooperation with the Nebraska Department of Transportation (NDOT) and is pursuant to Section 4(f) of the Department of Transportation Act regarding the use of Fleming Fields Recreational Sports Park. This letter documents the RTSD's intent to coordinate with Lincoln Parks and Recreation as the official with jurisdiction over the management of the Fleming Fields Recreational Sports Park.

Project Description

Recognizing the safety, mobility, and congestion concerns caused by at-grade railroad crossings, the RTSD, City of Lincoln, NDOT, and FHWA identified the area near North 33rd Street and Cornhusker Highway (US 6) for a project that would close two at-grade railroad crossings. The project would include a new grade-separated viaduct at North 33rd and Adams Streets. A new roundabout intersection would be located south of the viaduct, at the intersection of North 33rd Street and Huntington Avenue. Additional side streets would be reconstructed to tie into the primary project elements and to maintain local connectivity. The project would include reconstruction of the storm sewer system, sanitary sewer system, and water main system as well as traffic signal and underground fiber-optic lines due to impacts from the project.

The project would provide upgrades and enhance connectivity to the existing trail network. The new trail would proceed under the new viaduct, cross over Deadmans Run on a dedicated trail bridge, run adjacent to Baldwin Avenue and south along Griffith Street to reconnect to the existing trail network near Fleming Fields and Huntington Avenue.

Construction of the project would require sections of North 33rd Street, Adams Street, and Huntington Avenue to be closed to traffic. Detours would be required to reroute traffic during construction; no improvements would be required to detour routes. Temporary trail detours would be required along sections of the 33rd Street Trail, Huntington Trail, and Dietrich Trail.

Section 4(f) Property

Section 4(f) of the U.S. Department of Transportation (DOT) Act of 1966 provides special protection for certain properties, such as publicly owned parks, recreation lands, wildlife and waterfowl refuges, and historic sites. FHWA is required to give special consideration to any properties identified as meeting this definition. Fleming Fields Recreational Sports Park is located northwest of the intersection of North 33rd Street and Leighton Avenue (Figure 1) and is subject to Section 4(f) provisions. Section 4(f) requires coordination with the official having jurisdiction over the potentially affected resource.

Section 4(f) Analysis

The FHWA, in cooperation with NDOT and the official with jurisdiction over the property, is responsible for making decisions related to Section 4(f) compliance. Title 23, Part 774.3 of the Code of Federal Regulations (CFR) provides for Section 4(f) approval by FHWA. As relevant to this project, one of the approvals outlined under Part 774.3(b) includes determination that the use of the land from the property would have a de minimis (minor) impact (as defined in §774.17) on the property. There are three conditions that must be met for this project to qualify for a de minimis impact decision under Section 4(f). These three conditions and how they have been addressed for this project are as follows.

Condition 1) *"The transportation use of the Section 4(f) resource, together with any impact avoidance, minimization and mitigation or enhancement measures incorporated into the project, does not adversely affect the protected activities, features, or attributes of the property, on either a temporary or permanent basis".*

The following is a summary of the 4(f) property impacts for the project. Attached are exhibits identifying the impacts (Figure 2). *De minimis* impacts are defined as those that do not adversely affect the activities, features, and attributes of the Section 4(f) resource.

Impacts to Fleming Fields Recreational Sports Park would consist of storm sewer work that would require temporary and permanent easements at the far northeast corner of the property. Fleming Fields Recreational Sports Park is approximately 30.82 acres in size and would require approximately 0.05 acre (2,233 square feet) of permanent easement and approximately 0.02 acre (716 square feet) of temporary easement for the storm sewer work. The area proposed for easements consists of open space and does not extend into any of the ballfields or other park amenities. A sidewalk and maintenance access drive would be temporarily unavailable for the duration of construction of the storm sewer (approximately 2 weeks), but access to the ballfields and other park amenities would be maintained throughout construction via other paths within the property.

Additional impacts to Fleming Fields property would be associated with the construction of the multi-use path along the north side of Leighton Avenue that will serve as a detour route for the John Dietrich Trail during construction of the 33rd Street and Huntington Avenue areas of the project. The project would construct approximately 670 feet of 8-foot-wide multi-use path, using either asphalt or concrete, along the northside ROW of Leighton Avenue and would require approximately 0.08 acre (3,467 square feet) of temporary easements from Fleming Fields. Construction of this multi-use path would require the removal of trees located in the ROW. The multi-use path along the north side of Leighton Avenue would remain in place upon completion of the project, which is anticipated to be three years.

Table 1: Fleming Fields Recreational Sports Park Impacts Table

Permanent Impacts	Total Temporary Impacts	Reason for Impact
Approximately 0.05 acre (less than 0.01%)	Approximately 0.10 acre (less than 0.01%)	Storm sewer and multi-use path construction

Permanent impacts to Fleming Fields Recreational Sports Park would result in a minor take of park property. No relocation of park features would occur. Access to the ballfields and other park amenities would remain available at all times. These impacts would not adversely affect the activities, features, or attributes that qualify the property for protection under Section 4(f).

Condition 2) "*There must be a documented agreement of the official(s) with jurisdiction over the Section 4(f) resource regarding the above conditions.*"

As the official with jurisdiction over Fleming Fields Recreational Sports Park, the RTSD is requesting your concurrence that the proposed project would not adversely affect the protected activities, features, or attributes of Fleming Fields Recreational Sports Park. Please acknowledge your concurrence by signing on the appropriate line below.

Condition 3) "*The public has been afforded the opportunity to review and comment on the effects of the project on the activities, features, and attributes of the Section 4(f) resource.*"

Impacts to Fleming Fields were be disclosed to the public during the Public Hearing for this project on September 5th, 2024. No comments were received concerning Fleming Fields.

We have enclosed the following maps/figures for your review:

1. Location Map
2. Impact Maps
3. Public Involvement Summary

If you have any questions on the North 33rd and Cornhusker project, please contact me at (402) 441-7711.

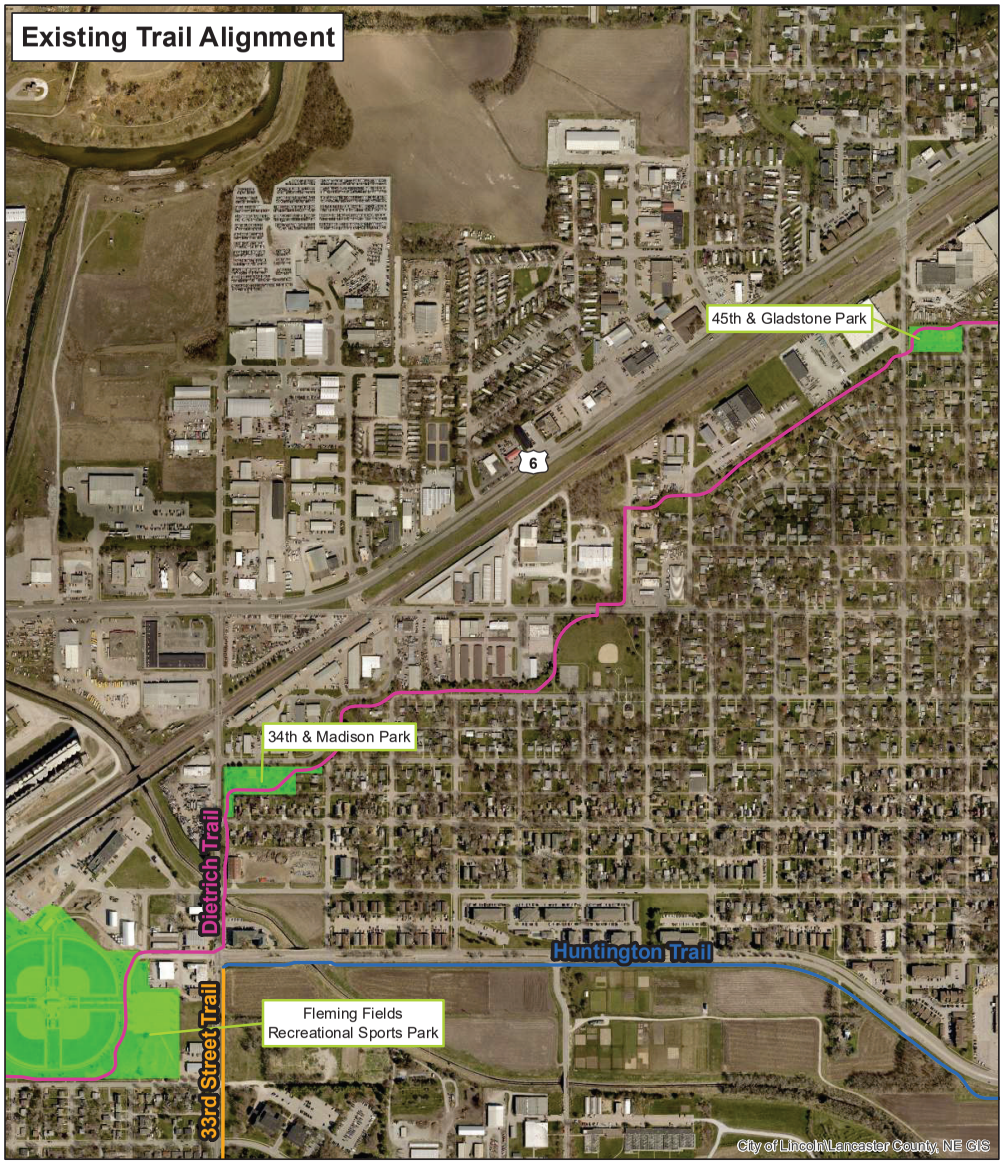

Sincerely,

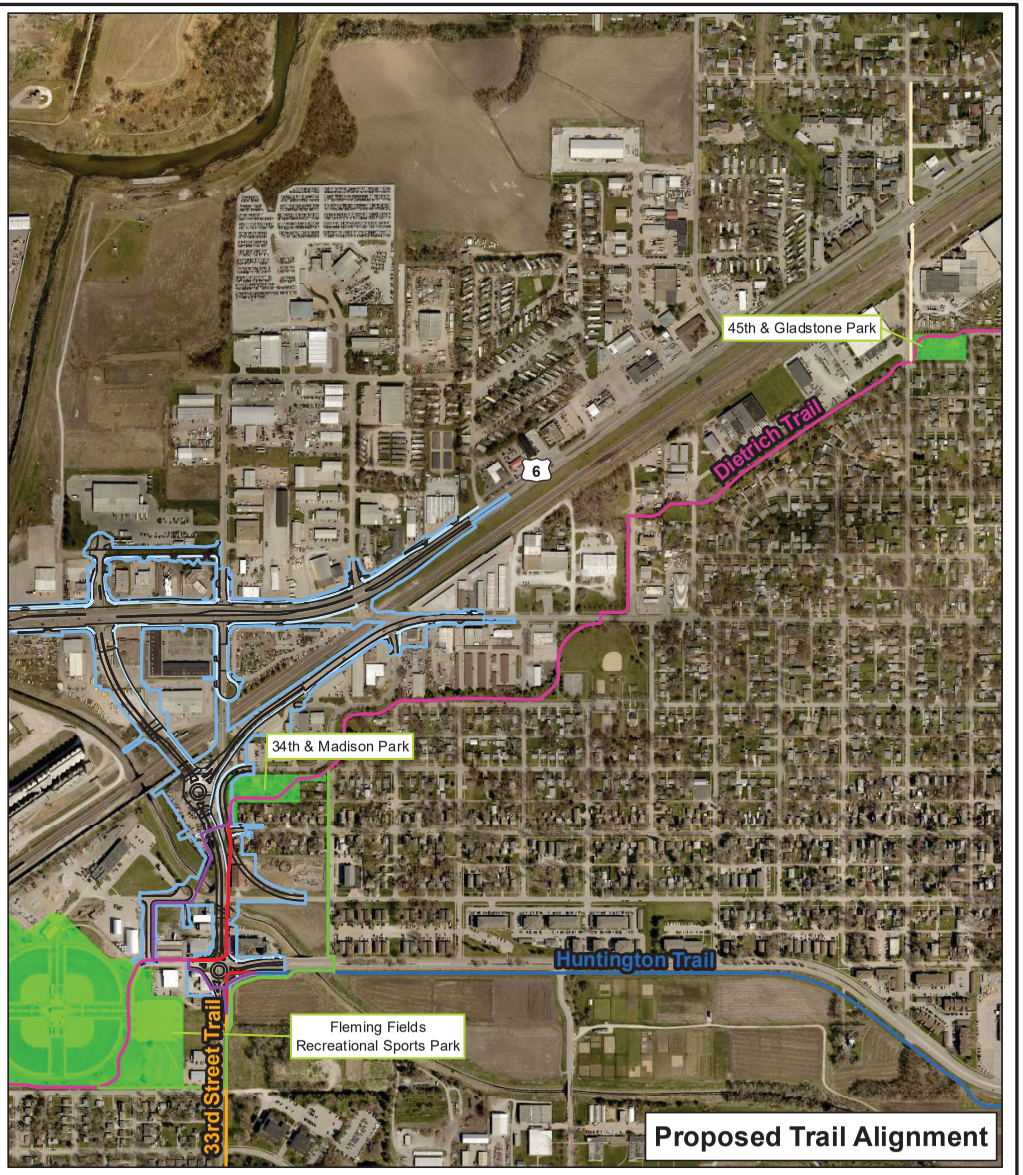

Roger Figard, P. E.
Executive Director, RTSD
949 West Bond Street, Suite 200
Lincoln, NE 68521

As the official with jurisdiction over the Fleming Fields Recreational Sports Park, I concur that the proposed project would not adversely affect the activities, features, and attributes that qualify the Fleming Fields Recreational Sports Park for protection under Section 4(f). I acknowledge concurrence by signing on the line below.

Project Development Division Form 042

Project Name
North 33rd and Cornhusker

Project Number
LCLC-5233(4)

Control No.
13294

Project Location (Town, County, Street)
Lincoln, Lancaster, North 33rd Street

Project Description

The Preferred Alternative would construct a new viaduct on a new alignment to create a direct connection over the railroad tracks near N. 33rd Street and Cornhusker Highway (US 6). The Preferred Alternative would close two at-grade railroad crossings: N. 33rd Street and Adams Street.

The Preferred Alternative includes the expansion of Cornhusker Highway (US 6) to six lanes with turn lanes from Deadmans Run to just east of N. 35th Street. North 33rd Street would be on a new alignment that includes two bridges over the Deadmans Run channel and the BNSF railroad tracks. The realigned N. 33rd Street connects at an intersection with Cornhusker Highway (US 6) near the existing N. 31st Street and Cornhusker intersection. Intersections at Cornhusker Highway (US 6) and State Fair Park Drive, a re-aligned N. 33rd Street and Cornhusker Highway (US 6), N. 33rd Street and Huntington Avenue, N. 33rd Street and Adams Street, and N. 35th Street and Cornhusker Highway (US 6) would operate as full access intersections.

The Preferred Alternative includes the realignment of Adams Street. Adams Street, no longer crossing the railroad tracks, would be extended southwest running roughly parallel to the railroad tracks, connecting to N. 33rd Street south of the railroad tracks and Cornhusker Highway (US 6). The new intersection would be located on the south end of the N. 33rd Street bridge and would be entirely elevated and supported by embankments, walls, or other structures.

The Preferred Alternative would maintain the present traffic flow on Cornhusker Highway (US 6) but would create a new access route for Adams Street via N. 33rd Street, south of the BNSF railroad tracks.

As a part of the Preferred Alternative, the existing at-grade crossing at N. 44th Street would remain open to vehicular and pedestrian traffic; however, improvements would be made to the crossing to bring it into compliance with ADA guidelines. Improvements would include the addition of detectable warning panels and ADA compliant slopes and extension of an 8-foot-wide sidewalk connecting from approximately Gladstone Street on the south and extending north to Colfax Circle. The newly constructed grade separated viaduct at N. 33rd and Adams Streets would include an 8-foot-wide sidewalk separated from traffic for pedestrians and bicycles. The Preferred Alternative would provide upgrades and enhance connectivity to the existing trail network by providing a reroute of the existing trail network. The trail would proceed under the newly constructed N. 33rd Street bridge over Deadmans Run, cross over Deadmans Run on a dedicated trail bridge, run adjacent to Baldwin Avenue and south along Griffith Street to reconnect to the existing trail near Fleming Fields and Huntington Avenue.

The Preferred Alternative would include the installation of fencing along the BNSF rail corridor from approximately Deadmans Run to approximately N. 36th Street with final locations and dimensions to be determined during final design in coordination with BNSF.

Additional side streets would be reconstructed to tie into the primary project elements and to maintain local connectivity, as follows:

- Huntington Avenue would be reconstructed on either side of the intersection of N. 33rd Street to connect back to the existing road.
- N. 31st Street would be reconstructed on the north side of Cornhusker Highway (US 6) where the newly aligned N. 33rd Street meets at an intersection. Existing N 33rd Street would be reconstructed on the north and south sides of Cornhusker Highway (US 6) as well to connect back to the existing road.
- Existing N. 33rd Street on the south side of Cornhusker Highway (US 6) would include the construction of a cul-de-sac just north of the BNSF railroad tracks to provide a turnaround for traffic near the closed at-grade railroad crossing.
- N. 35th Street would be reconstructed on the north side of Cornhusker Highway (US 6). N. 36th Street would be reconstructed on the south side of Adams Street.
- Griffith Street would be reconstructed between Huntington Avenue and Baldwin Avenue.
- A new local 33-foot-wide roadway called Greenwood Street would be constructed between 31st Street and 33rd Street. It would include a five-foot sidewalk on the southside.
- A new local roadway called 33rd Avenue would reconnect Madison Avenue to Saint Paul Avenue and Baldwin Avenue on the east side of the newly realigned N. 33rd Street bridge. These streets would no longer have direct access onto N. 33rd Street. Baldwin Avenue on the west side of N. 33rd Street would not reconnect with N. 33rd Street and would include a new cul-de-sac for traffic to turnaround.

The project would include sidewalk, and curb ramp improvements to meet ADA guidelines at the intersection of N. 29th Street and Cornhusker Highway (US 6). The existing traffic signal at N. 29th Street and Cornhusker Highway (US 6) would be upgraded due to the addition of another westbound left turn lane and westbound outside through lane. Traffic signals at N. 31st Street and Cornhusker Highway and N. 35th Street and Cornhusker Highway.

The project would include reconstruction of the storm sewer system, sanitary sewer system, water main system as well as traffic signal and underground fiber-optic lines due to the impacts from the project. The project would include impacts to private utility companies.

Construction of the project would require sections of N. 33rd Street, Adams Street, and the intersection of N. 33rd Street and Huntington Avenue to be closed to traffic. Detours would be required to reroute traffic due to the closure of N. 33rd Street to construct the viaduct over Deadmans Run channel and the railroad tracks. The project would detour traffic onto roadways of the same, or higher functional roadway classification. No improvements would be made to detour routes as a part of the Preferred Alternative. Temporary detours would be required along sections of the 33rd Street, Huntington Avenue, and Dietrich Trails. Trail detours would use existing local roadways and sidewalks. No improvements would be required along any designated trail detour route.

Name of Section 4(f) Property (A separate form must be completed for each property with a *de minimis* impact)

Huntington Trail

Official(s) with Jurisdiction

Maggie Stuckey-Ross, Director of City of Lincoln Parks and Recreation

Total Property Size (in acres)	Permanent Impact (in acres)	Temporary Impact (in acres)
1.00	0.03	0.00

Property Description

The Huntington Trail is an 8-foot-wide multiuse trail that runs along the southside right-of-way of Huntington Avenue. The trail intersects the project alignment at the intersection of North 33rd Street and Huntington Avenue. The Huntington Trail terminates at the intersection with the 33rd Street Trail, which runs along the eastside right-of-way of North 33rd Street. The total length of Huntington Trail is approximately 0.84 mile.

Answer only the questions in the applicable block (A or B). All questions in Block C must be answered.

A. Section 4(f) *De Minimis* Park, Recreation Area, and Refuge Eligibility

If the *de minimis* impact does NOT involve a park, recreation area or refuge, check the N/A below and proceed to Block B.

☐ N/A

Will the project adversely affect the activities, features, or attributes that make the property eligible for Section 4(f) protection?

☐ Yes ☒ No

Have measures been taken to minimize harm to the property? If Yes, explain in the Avoidance, Minimization, and Mitigation Measures box in Block C.

☒ Yes ☐ No

Have *de minimis* public involvement requirements (notice, review, comments, etc.) been completed? If Yes, describe in the Comments box below.

☒ Yes ☐ No

Date(s): 09/05/2024

Did the Official(s) with Jurisdiction concur with the determination of no adverse effect?

☒ Yes ☐ No

Date(s): 01/24/2025

B. Section 4(f) *De Minimis* Historic and Archeological Resource Eligibility

If the *de minimis* impact does NOT involve an historic or archeological resource, check the N/A below and proceed to Block C.

☒ N/A

Have measures been taken to minimize harm to the property? If Yes, explain in the Avoidance, Minimization, and Mitigation Measures box below.

☐ Yes ☐ No

Was the effect determination either "no historic properties affected" or "no adverse effect"? *

☐ Yes ☐ No

PQS Date	SHPO Date	THPO Date

* The PQS field will always be filled out. If there is a date in the SHPO or THPO field, this would indicate the entity is the Official with Jurisdiction and they were informed of NDOT's intent to apply *de minimis* via project-specific correspondence. The date in the field would be the date the entity concurred on the Section 106 effect determination. A notation of "N/A" in the field indicates the entity was not the Official with Jurisdiction. "Programmatic" in the SHPO field indicates that a determination of "no historic properties affected" or "no adverse effect" was made for the project per the Section 106 Programmatic Agreement and the *de minimis* notification was provided via letter agreement with the SHPO.

C. Additional Information

Description of Use (Temporary and/or Permanent)

Construction of a roundabout at the intersection of North 33rd Street and Huntington Avenue would result in permanent impacts to Huntington Trail. The existing Huntington Trail is approximately 5,449 feet (1.0 acres) in total length. Approximately 165 feet (0.03 acre) of existing trail would be permanently removed to accommodate the new roundabout. The trail would be realigned to the south to connect to the existing 33rd Street Trail, resulting in the construction of approximately 183 feet (0.03 acre) of realigned trail. Therefore, construction of the project would result in a net gain of approximately 18 feet of length to Huntington Trail, and more direct connection to the wider trail network by connecting to the existing John Dietrich Trail.

Trail continuity would be maintained at all times during construction via detour. A temporary surface would be constructed southeast of North 33rd Street and Huntington Avenue to allow 33rd Street Trail users to bypass the construction area and connect to the adjacent Huntington Trail or John Dietrich Trail detour. The temporary surface would consist of either asphalt or concrete and be 8 feet wide and would include routine inspections and maintenance by the contractor for the duration of the trail detour. The temporary crossing for 33rd Street Trail would cross Huntington Avenue at North 35th Street. Pavement markings and additional signage would be added for pedestrian safety. The final determination of roadway closures will be completed in final design; however, the intersection construction at Huntington Avenue will either be a full closure or phased if necessary. Traffic along North 35th Street from Huntington Avenue to Madison Avenue would be limited to local traffic only during construction. The temporary detour may be in place for the entirety of construction, which is anticipated to be three years

Permanent impacts to Huntington Trail would result in a minor take of park property; however, these impacts would not adversely affect the activities, features, or attributes that qualify the property for protection under Section 4(f).

Avoidance, Minimization, and Mitigation Measures

The proposed project includes all appropriate measures to minimize harm and subsequent mitigation necessary to preserve and enhance those features and values of the property that originally qualified the property for Section 4(f) protection.

Trail continuity would be maintained at all times during construction via detour.

Access to Huntington Trail, outside of areas slated for construction, would remain open and available at all times during construction.

Areas of temporary disturbance would be fully restored, and the property would be returned to a condition which is at least as good as that which existed prior to the project.

Comments

The permanent loss of trail (approximately 165 feet) comprises approximately 3.03 percent of the total length of the Huntington Trail (approximately 5,449 feet).

The realignment of the Huntington Trail would result in a net increase of approximately 18 feet of trail and more direct connection to the adjacent John Dietrich Trail located northwest of the intersection of North 33rd Street and Huntington Avenue.

Specific impacts to the Huntington Trail were disclosed to the public during the public hearing for this project on September 5, 2024. No comments were received concerning the Huntington Trail.

De Minimis Documentation

Are detailed maps included, showing current and proposed right-of-way, property boundaries, access, and existing and planned property features?

☒ Yes ☐ No

Is documentation of public involvement attached?

☒ Yes ☐ No ☐ N/A (for historic resources)

Is concurrence from the Official(s) with Jurisdiction (and Consulting Parties, for historic properties) attached?

☒ Yes ☐ No

Additional Attachments (If Applicable)

OWJ Concurrence Letter, Project Location Map, Impact Maps, and Public Hearing Summary

Approval Signatures

The project involves a *de minimis* use of the Section 4(f) property. Harm to the park, recreation land, wildlife or waterfowl refuge, or historic property has been avoided or mitigated to minimize impacts to the qualifying characteristics and/or functions of the resource. Based on the scope of the undertaking, the fact that the undertaking does not adversely affect the function/qualities of the Section 4(f) property on a permanent or temporary basis, and with agreement from the Official(s) with Jurisdiction, the proposed action constitutes a *de minimis* use.

RE: North 33rd and Cornhusker
LCLC-5233(4); CN 13294
Section 4(f) *de minimis* concurrence request, Huntington Trail

The Lincoln/Lancaster County Railroad Transportation Safety District (RTSD), in cooperation with City of Lincoln, is undertaking the North 33rd and Cornhusker project (the project). The project involves an action by the Federal Highway Administration (FHWA), in cooperation with the Nebraska Department of Transportation (NDOT) and is pursuant to Section 4(f) of the Department of Transportation Act regarding the use of Huntington Trail. This letter documents the RTSD's intent to coordinate with Lincoln Parks and Recreation as the official with jurisdiction over the management of the Huntington Trail.

Project Description

Recognizing the safety, mobility, and congestion concerns caused by at-grade railroad crossings, the RTSD, City of Lincoln, NDOT, and FHWA identified the area near North 33rd Street and Cornhusker Highway (US 6) for a project that would close two at-grade railroad crossings. The project would include a new grade-separated viaduct at North 33rd and Adams Streets. A new roundabout intersection would be located south of the viaduct, at the intersection of North 33rd Street and Huntington Avenue. Additional side streets would be reconstructed to tie into the primary project elements and to maintain local connectivity. The project would include reconstruction of the storm sewer system, sanitary sewer system, and water main system as well as traffic signal and underground fiber-optic lines due to impacts from the project.

The project would provide upgrades and enhance connectivity to the existing trail network. The new trail would proceed under the new viaduct, cross over Deadmans Run on a dedicated trail bridge, run adjacent to Baldwin Avenue and south along Griffith Street to reconnect to the existing trail network near Fleming Fields and Huntington Avenue.

Construction of the project would require sections of North 33rd Street, Adams Street, and Huntington Avenue to be closed to traffic. Detours would be required to reroute traffic during construction; no improvements would be required to detour routes. Temporary trail detours would be required along sections of the 33rd Street Trail, Huntington Trail, and Dietrich Trail.

Section 4(f) Property

Section 4(f) of the U.S. Department of Transportation (DOT) Act of 1966 provides special protection for certain properties, such as publicly owned parks, trails, recreation lands, wildlife and waterfowl refuges, and historic sites. FHWA is required to give special consideration to any properties identified as meeting this definition. Huntington Trail an 8-foot-wide multiuse trail that runs along the southside right-of-way of Huntington Avenue (Figure 1) and is subject to Section 4(f) provisions. Section 4(f) requires coordination with the official having jurisdiction over the potentially affected resource.

Section 4(f) Analysis

The FHWA, in cooperation with NDOT and the official with jurisdiction over the property, is responsible for making decisions related to Section 4(f) compliance. Title 23, Part 774.3 of the Code of Federal Regulations (CFR) provides for Section 4(f) approval by FHWA. As relevant to this project, one of the approvals outlined under Part 774.3(b) includes determination that the use of the land from the property would have a de minimis (minor) impact (as defined in §774.17) on the property. There are three conditions that must be met for this project to qualify for a de minimis impact decision under Section 4(f). These three conditions and how they have been addressed for this project are as follows.

Condition 1) *"The transportation use of the Section 4(f) resource, together with any impact avoidance, minimization and mitigation or enhancement measures incorporated into the project, does not adversely affect the protected activities, features, or attributes of the property, on either a temporary or permanent basis".*

The following is a summary of the 4(f) property impacts for the project. Attached are exhibits identifying the impacts (Figure 2). *De minimis* impacts are defined as those that do not adversely affect the activities, features, and attributes of the Section 4(f) resource.

Construction of a roundabout at the intersection of North 33rd Street and Huntington Avenue would result in permanent impacts to Huntington Trail. The existing Huntington Trail is approximately 5,449 feet (1.0 acres) in total length. Approximately 165 feet (0.03 acre) of existing trail would be permanently removed to accommodate the new roundabout. The trail would be realigned to the south to connect to the existing 33rd Street Trail, resulting in the construction of approximately 183 feet (0.03 acre) of realigned trail. Therefore, construction of the project would result in a net gain of approximately 18 feet of length to Huntington Trail, and more direct connection to the wider trail network by connecting to the existing John Dietrich Trail.

Trail continuity would be maintained at all times during construction via detour. A temporary surface would be constructed southeast of North 33rd Street and Huntington Avenue to allow 33rd Street Trail users to bypass the construction area and connect to the adjacent Huntington Trail or John Dietrich Trail detour. The temporary surface would consist of either asphalt or concrete and be 8 feet wide and would include routine inspections and maintenance by the contractor for the duration of the trail detour. The temporary crossing for 33rd Street Trail would cross Huntington Avenue at North 35th Street. Pavement markings and additional signage would be added for pedestrian safety. The final determination of roadway closures will be completed in final design; however, the intersection construction at Huntington Avenue will either be a full closure or phased if necessary. Traffic along North 35th Street from Huntington Avenue to Madison Avenue would be limited to local traffic only during construction. The temporary detour may be in place for the entirety of construction, which is anticipated to be three years

Table 1: Huntington Trail Impacts Table

Permanent Impacts	Temporary Impacts	Reason for Impact
Approximately 0.03 acre (3.03%)	N/A	Construction of a roundabout at the intersection of N. 33rd Street and Huntington Avenue

Permanent impacts to Huntington Trail would result in a minor take of park property; however, these impacts would not adversely affect the activities, features, or attributes that qualify the property for protection under Section 4(f).

Condition 2) "*There must be a documented agreement of the official(s) with jurisdiction over the Section 4(f) resource regarding the above conditions.*"

As the official with jurisdiction over Huntington Trail, the RTSD is requesting your concurrence that the proposed project would not adversely affect the protected activities, features, or attributes of Huntington Trail. Please acknowledge your concurrence by signing on the appropriate line below.

Condition 3) "*The public has been afforded the opportunity to review and comment on the effects of the project on the activities, features, and attributes of the Section 4(f) resource.*"

Specific impacts to the Huntington Trail were disclosed to the public during the public hearing for this project on September 5, 2024. No comments were received concerning the Huntington Trail.

We have enclosed the following maps/figures for your review:

1. Location Map
2. Impact Map
3. Public Involvement Summary

If you have any questions on the North 33rd and Cornhusker project, please contact me at (402) 441-7711.

Sincerely,

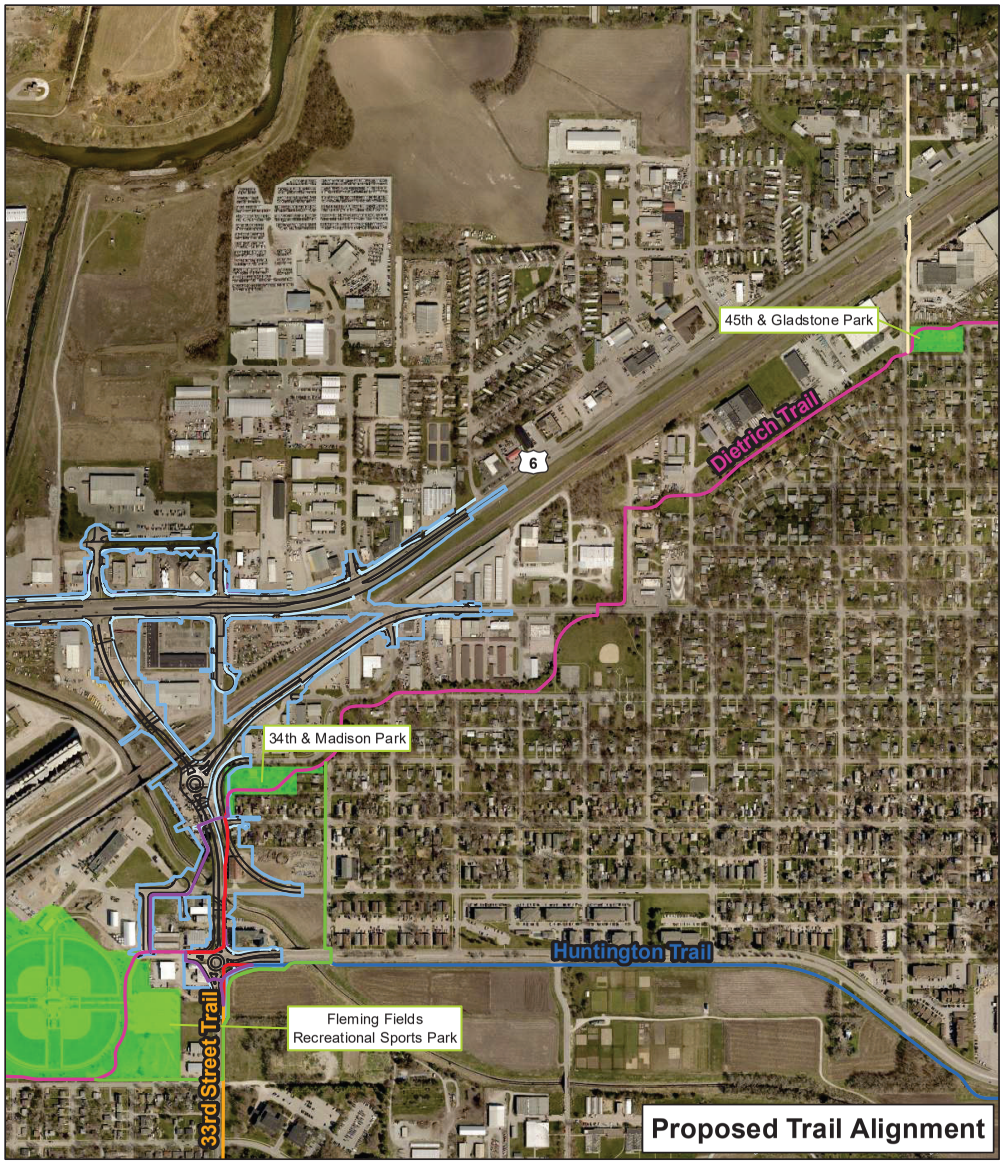

Roger Figard, P. E.
Executive Director, RTSD
949 West Bond Street, Suite 200
Lincoln, NE 68521

As the official with jurisdiction over the Huntington Trail, I concur that the proposed project would not adversely affect the activities, features, and attributes that qualify the Huntington Trail for protection under Section 4(f). I acknowledge concurrence by signing on the line below.

Jon,

For clarification on North 33rd and Cornhusker, the 5/9/25 FHWA approval of the Final EA and FONSI Determination also approves all Section 4(f) *de minimis* and exception forms located in Appendix B: *4(f) Use Documents* of the Final EA errata document.

Please save this email for your records.

Thanks.

NDOT Environmental,
Please see the attached Final EA/FONSIs for North 33rd & Cornhusker; US-81 York-Columbus; Minatare – US-385; and Central City Viaduct. This momentous occasion doesn't occur without the NDOT's hard work and dedication to project delivery. Great job to the Environmental Section, the Project Studies unit, Roadway Design, Communications and everyone else who helped make this day come to fruition. The public will be greatly served by these projects. We look forward to further advancing efficiencies on future projects.

Luke
